CTO CONSULTING

Change Management Workbench

Screen tour: every part of the application

Version shown	The offline workbench: one HTML file that runs in the browser, with no server, installation or internet connection
Demonstration data	National Insurance Disability Agency, a fictional organisation with three change initiatives
Screens	163 figures in 14 parts
Captured	24 October 2026

Prosci® and ADKAR® are registered trademarks of Prosci, Inc. This application references the Prosci Methodology descriptively for alignment purposes and is not affiliated with, or endorsed by, Prosci, Inc.

Contents

Screens captured from the offline workbench, Change_Management_Workbench.html, opened from disk in Chromium, the browser engine of Google Chrome and Microsoft Edge, at 1440 × 900. They show the change management lead, Priya Raman, unless a part says otherwise. All people, organisations and figures are fictional demonstration data.

PART 1 OF 14

Opening the offline workbench

The whole application is one file, Change_Management_Workbench.html. Double-click it and it opens in the web browser, with no server, installation or internet connection. It starts with fictional demonstration data, and you can start your own empty workbench at any time.

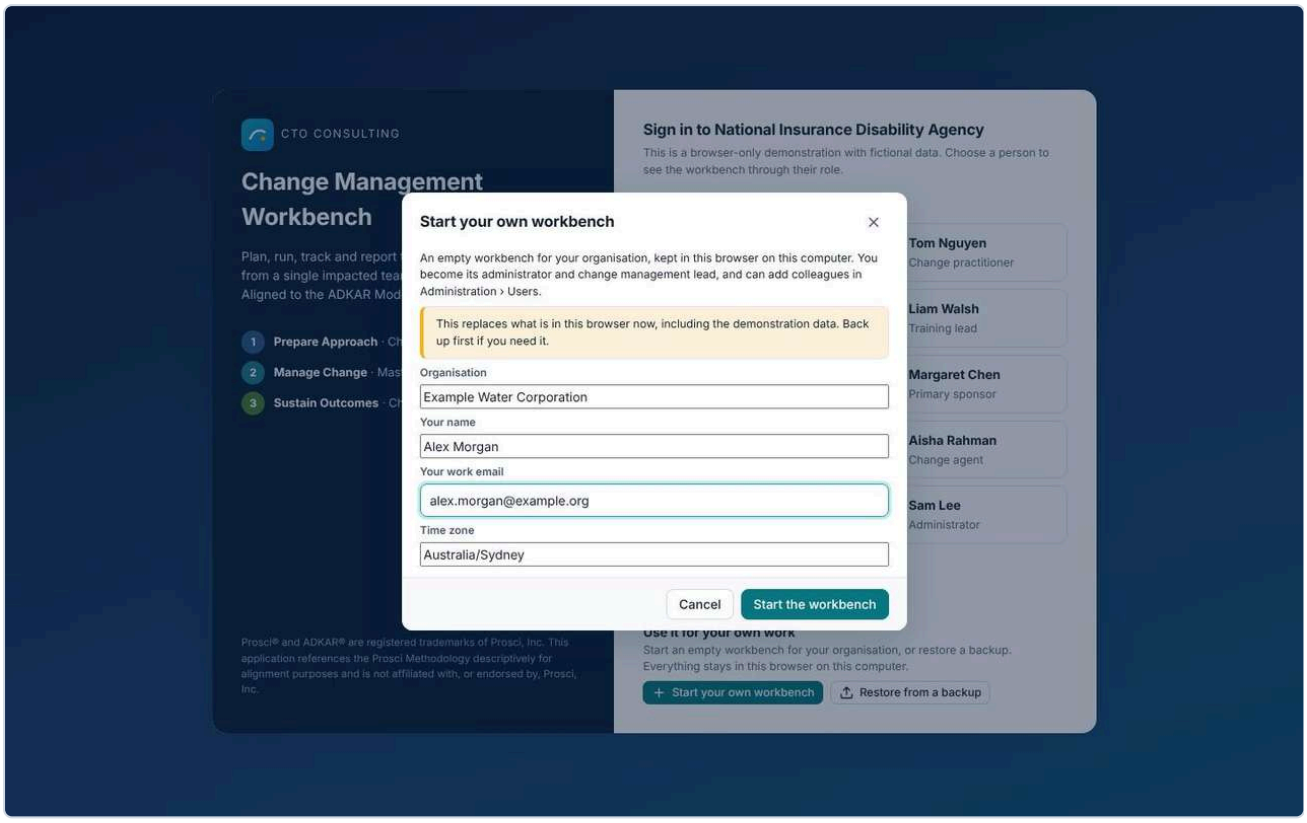

1 Sign-in screen

The sign-in screen when the file is opened. Choose a demonstration person to see the workbench through their role, start your own empty workbench, or restore a backup.

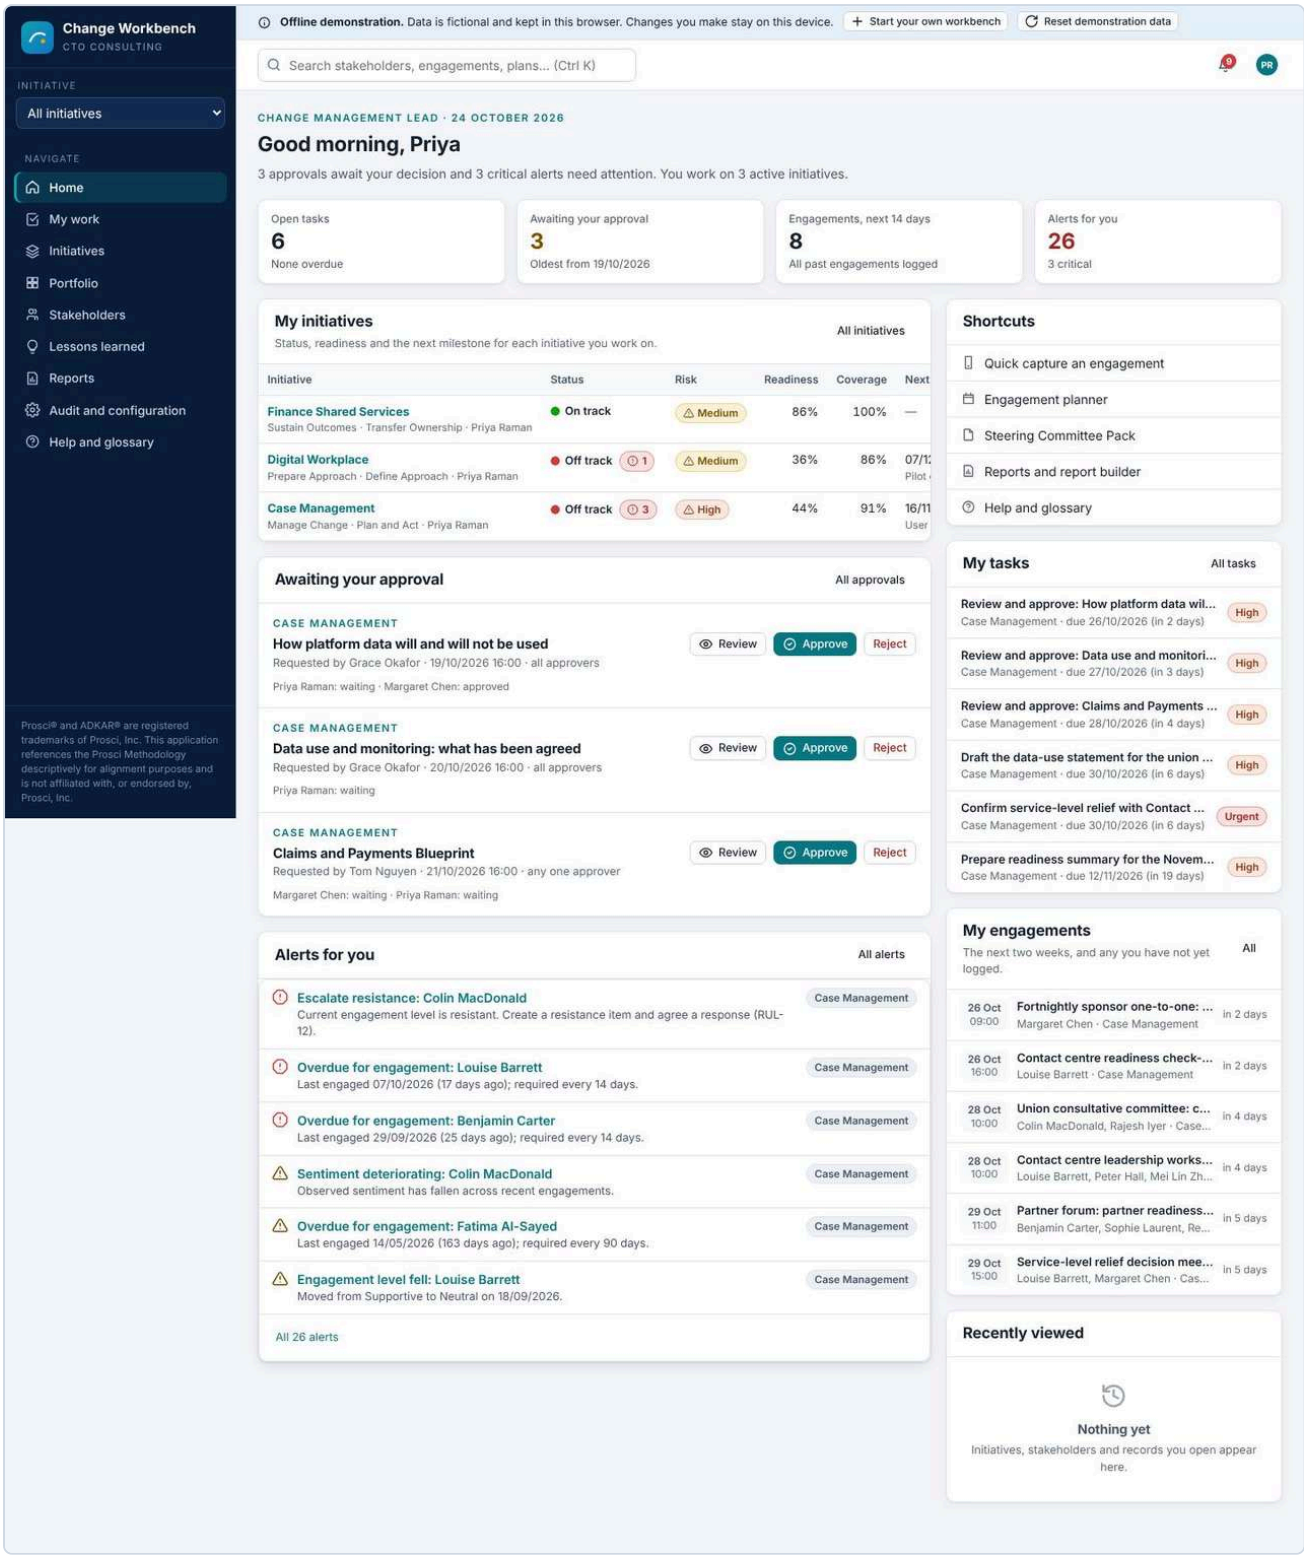

2 Start your own workbench

Starting your own workbench: the organisation, your name, email and time zone. You become its administrator and change management lead, and the demonstration data is replaced.

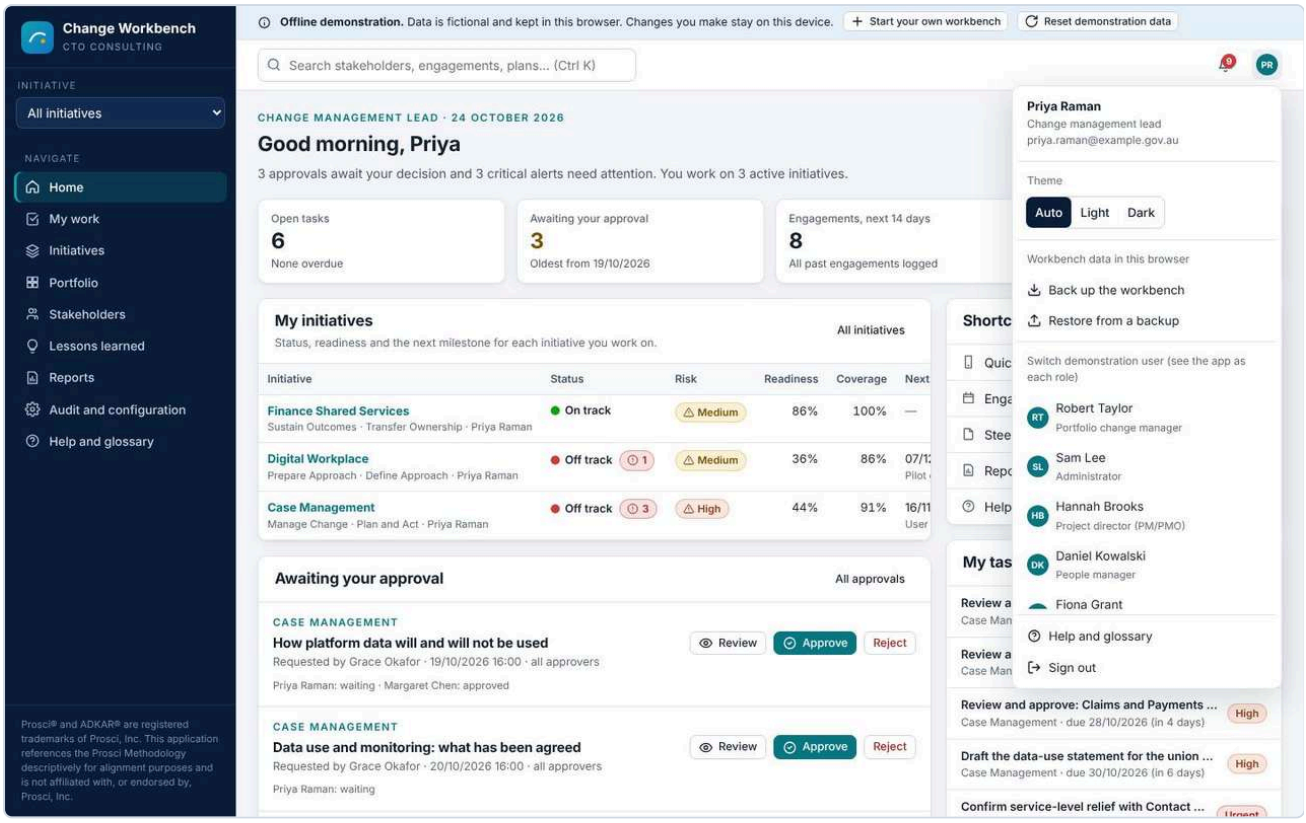

3 Home for the change management lead

Home for the change management lead: open tasks, approvals waiting, engagements in the next fortnight and alerts, then each initiative's status, readiness and next milestone, approvals, tasks and shortcuts.

4 User menu: theme, backup and switching user

The account menu: light, dark or automatic theme, backing up and restoring the workbench, switching between demonstration people, help and signing out.

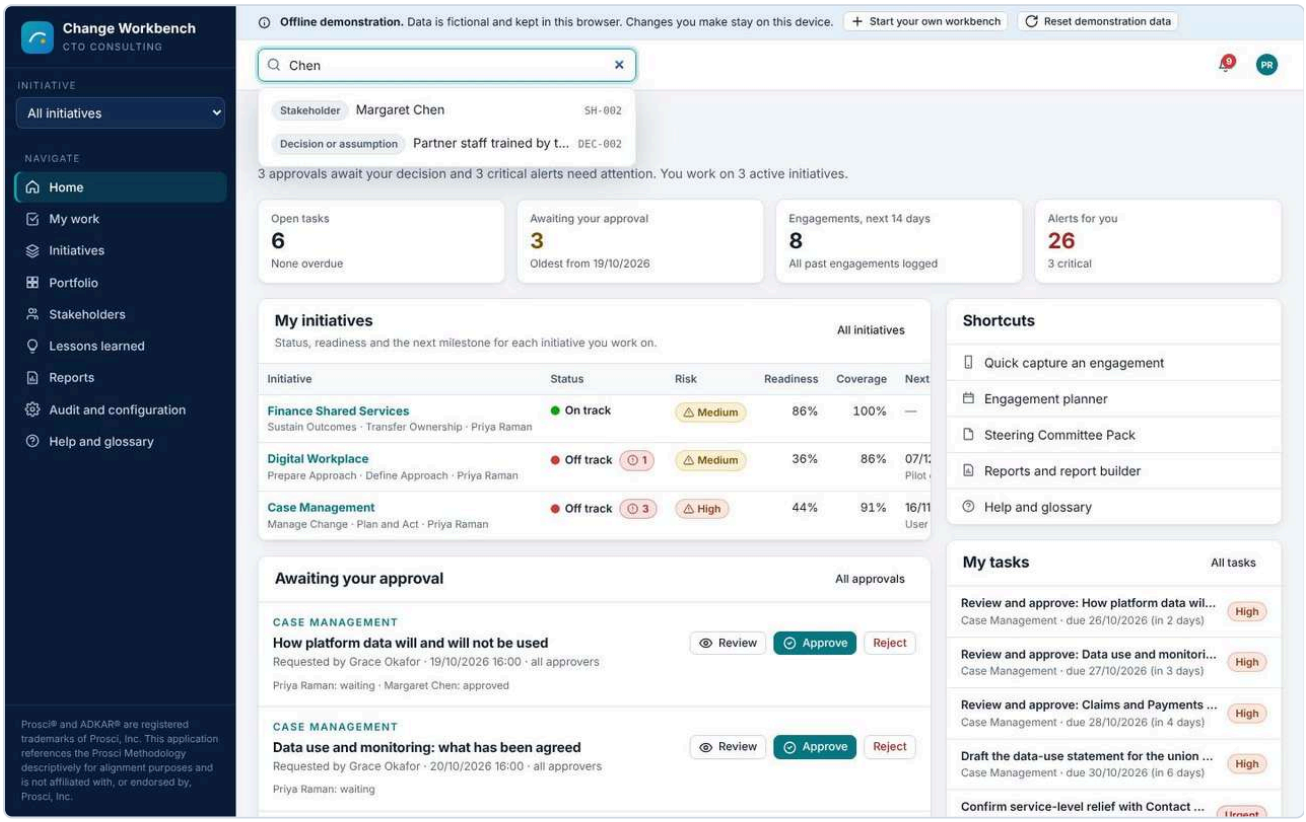

PART 2 OF 14

Home, my work and search

Each person starts at a home page shaped by their role. Everything waiting on them across initiatives is gathered in My work, and search reaches everything they are allowed to see.

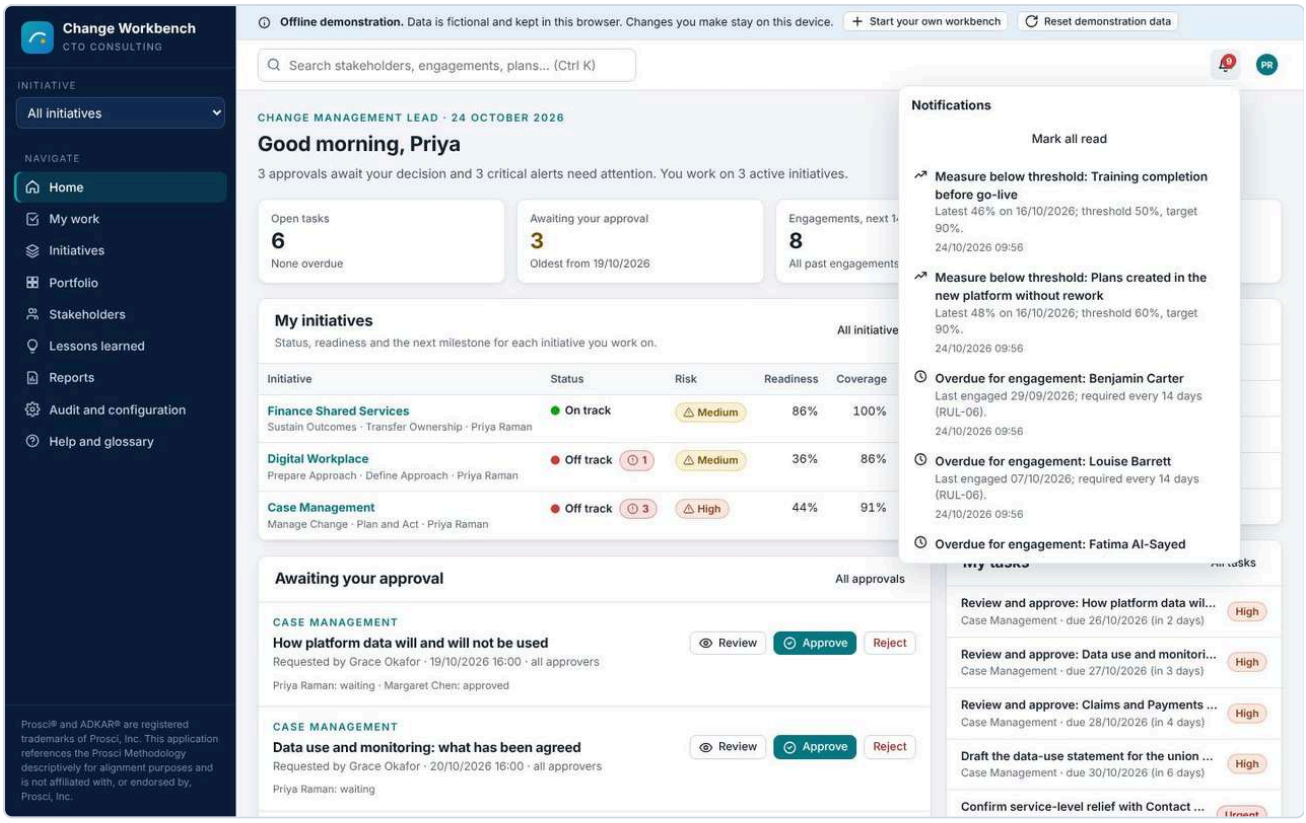

5 Search everything you can see

Search from the top bar (Ctrl K) finds stakeholders, engagements, plans, decisions and other records, limited to what your role can see.

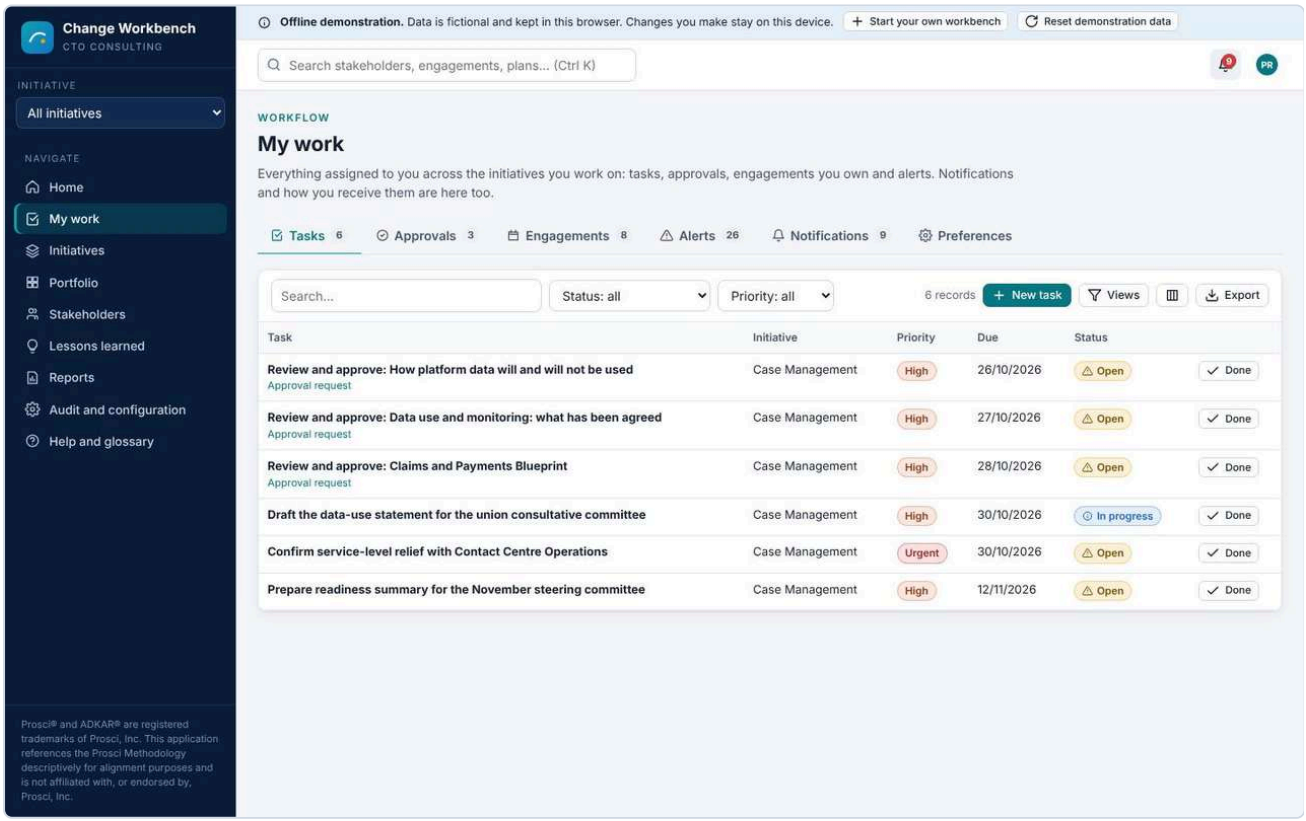

6 Notifications

Notifications of approvals, engagements due, measures below threshold, scheduled artefacts and more. Each opens the record it is about.

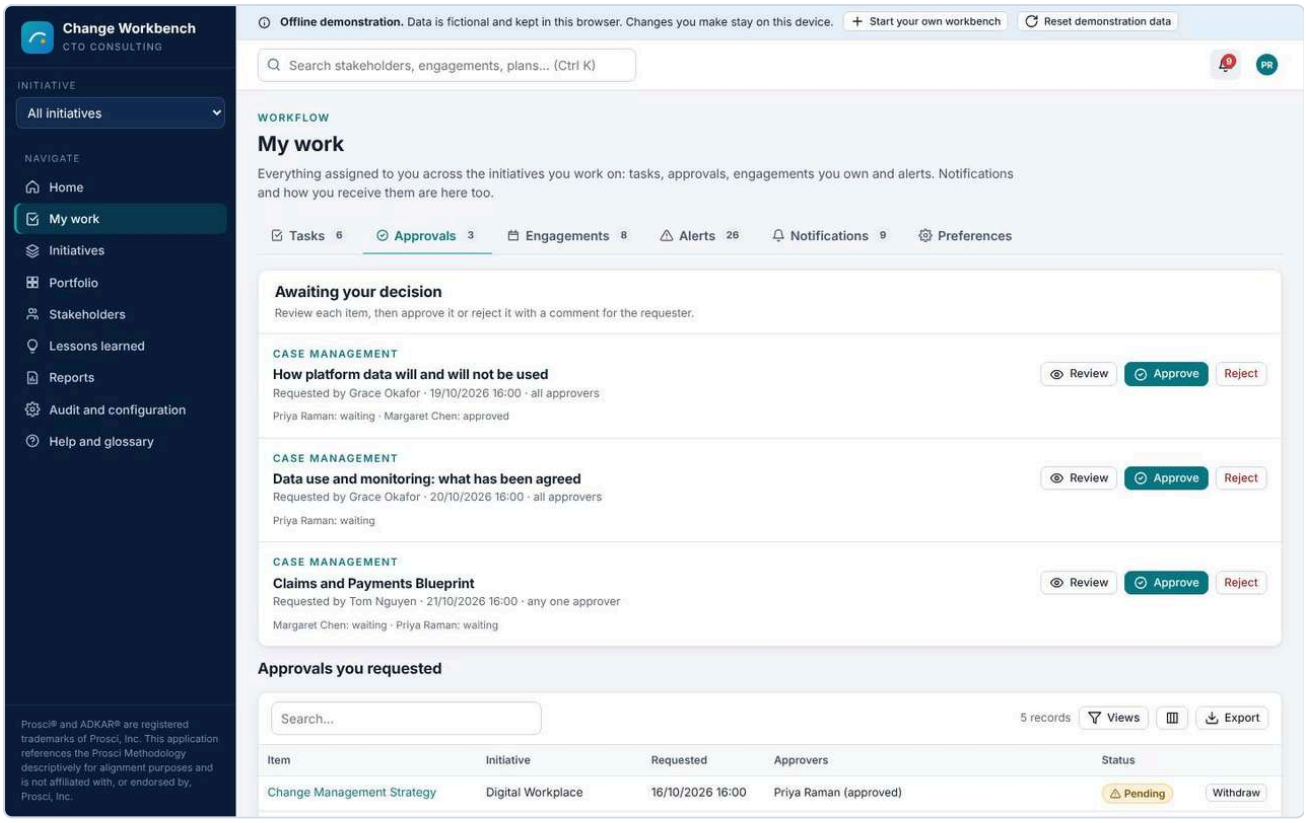

7 My work · Tasks

My work gathers everything waiting on you across initiatives. Tasks shows assigned tasks with priority, due date and status; filter them, mark them done or open each one.

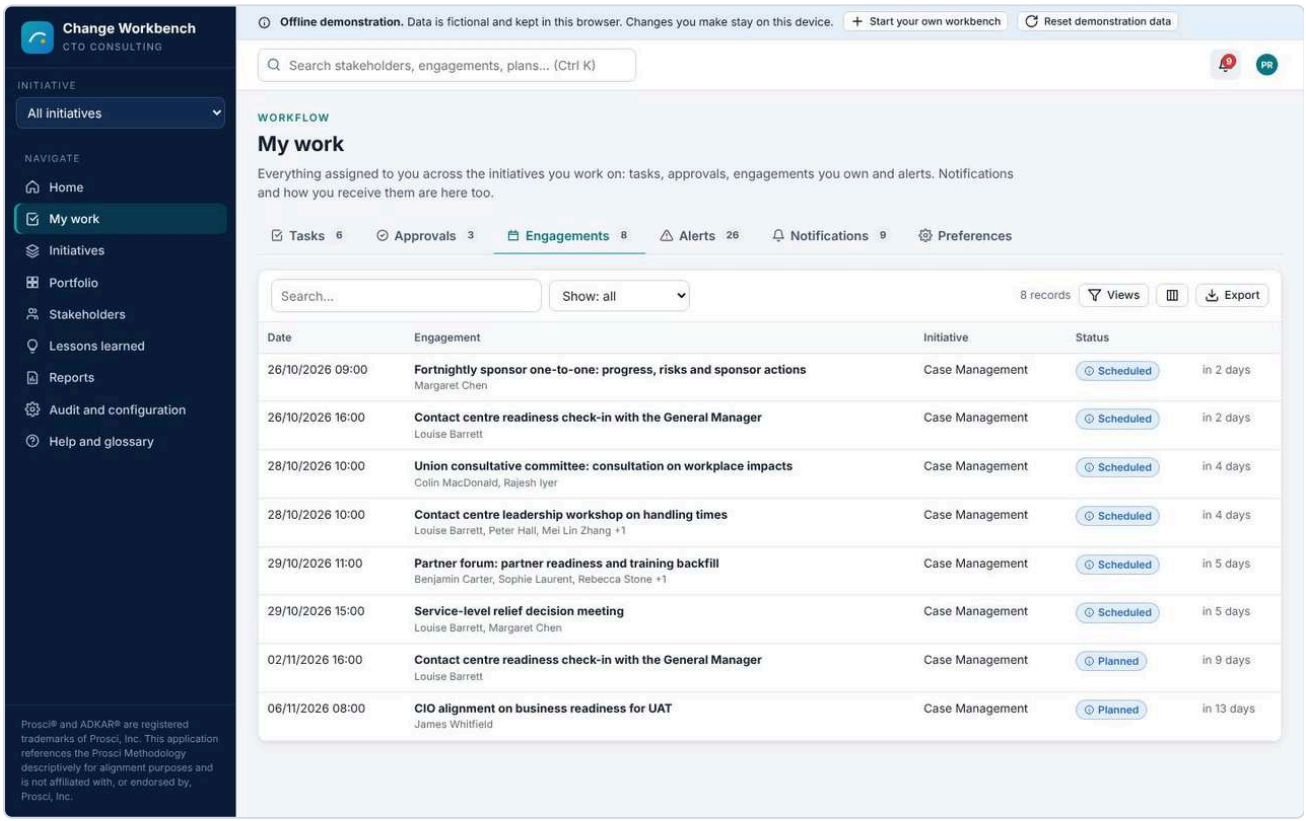

8 My work · Approvals

Approvals waiting on your decision, approved or rejected in place with a comment, and the approvals you have asked others for.

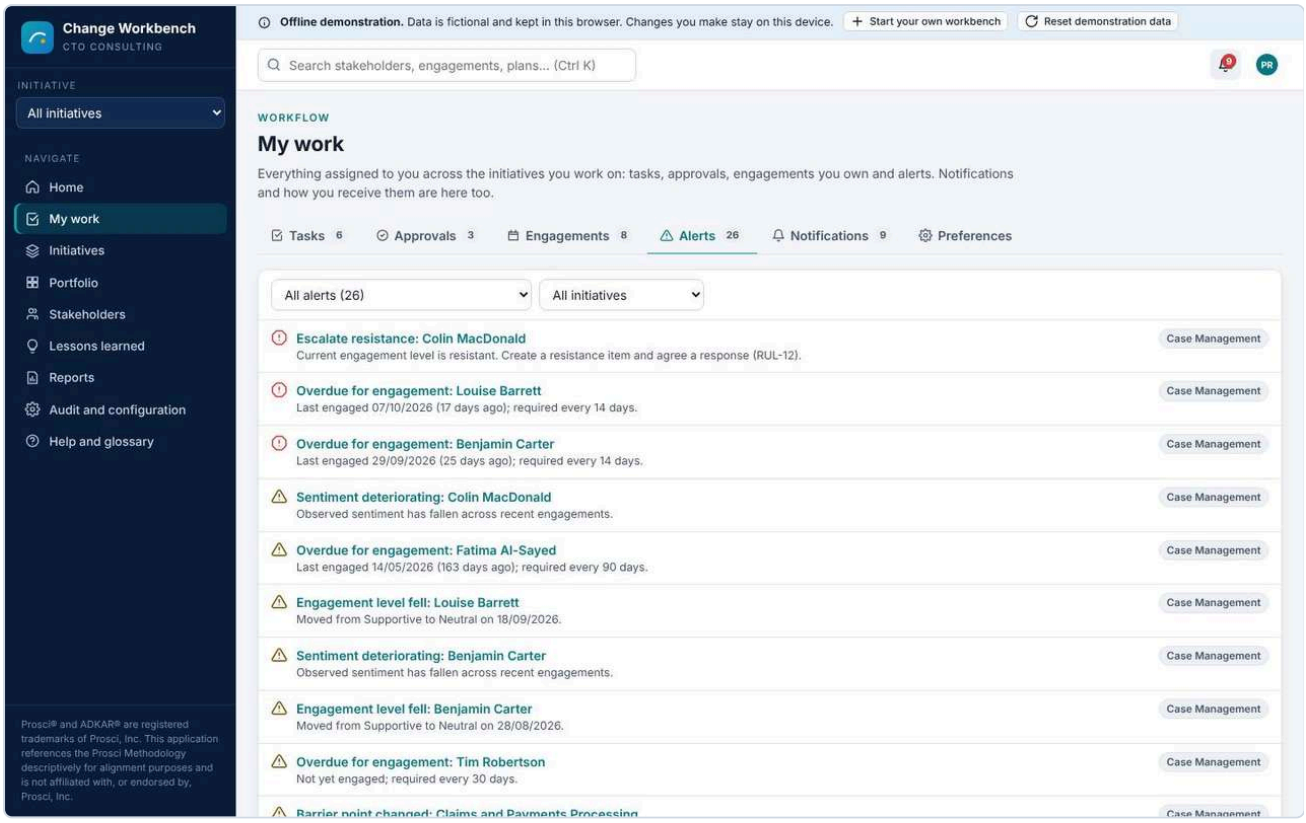

9 My work · Engagements

Engagements you own across initiatives: those coming up, and any past ones not yet logged.

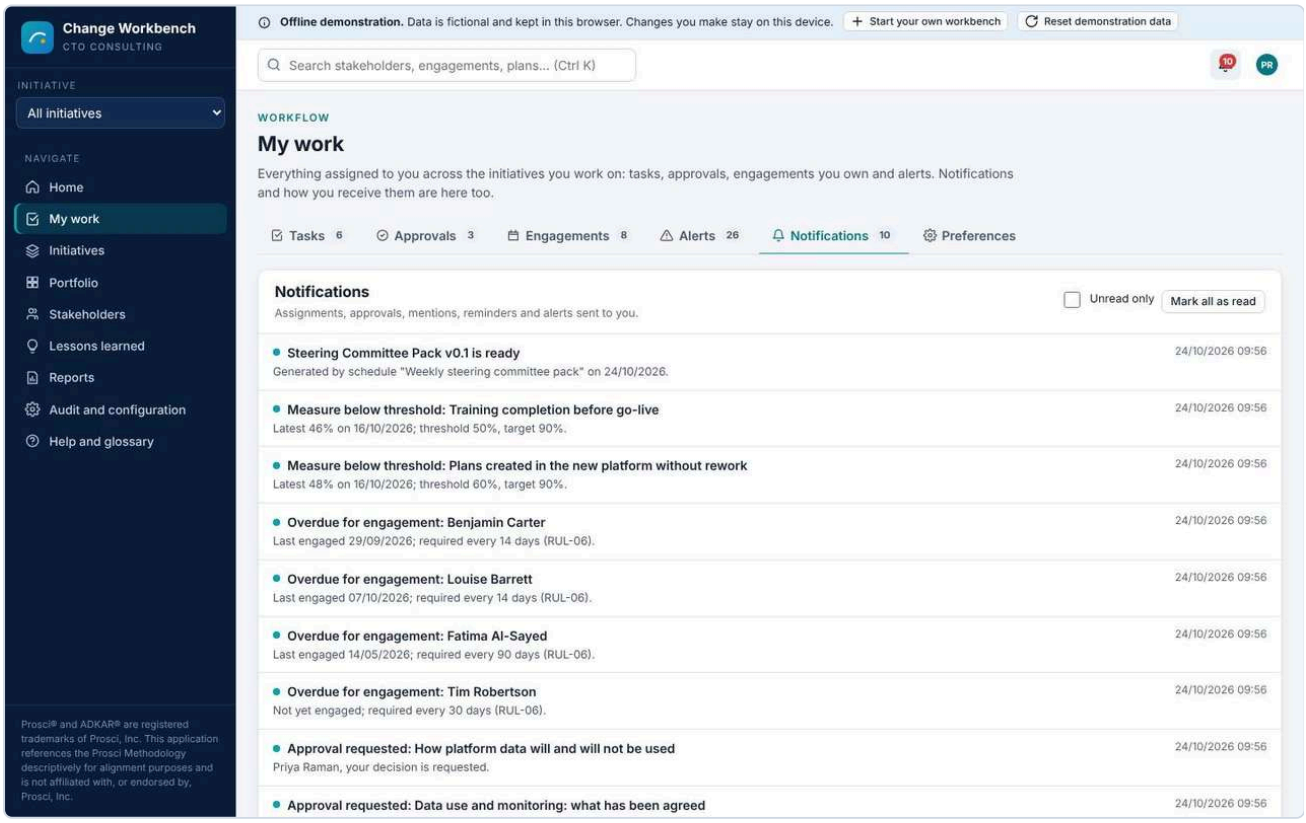

10 My work · Alerts

Alerts about the stakeholders and engagements you look after: overdue engagement, escalations, falling sentiment or engagement, and changed barrier points.

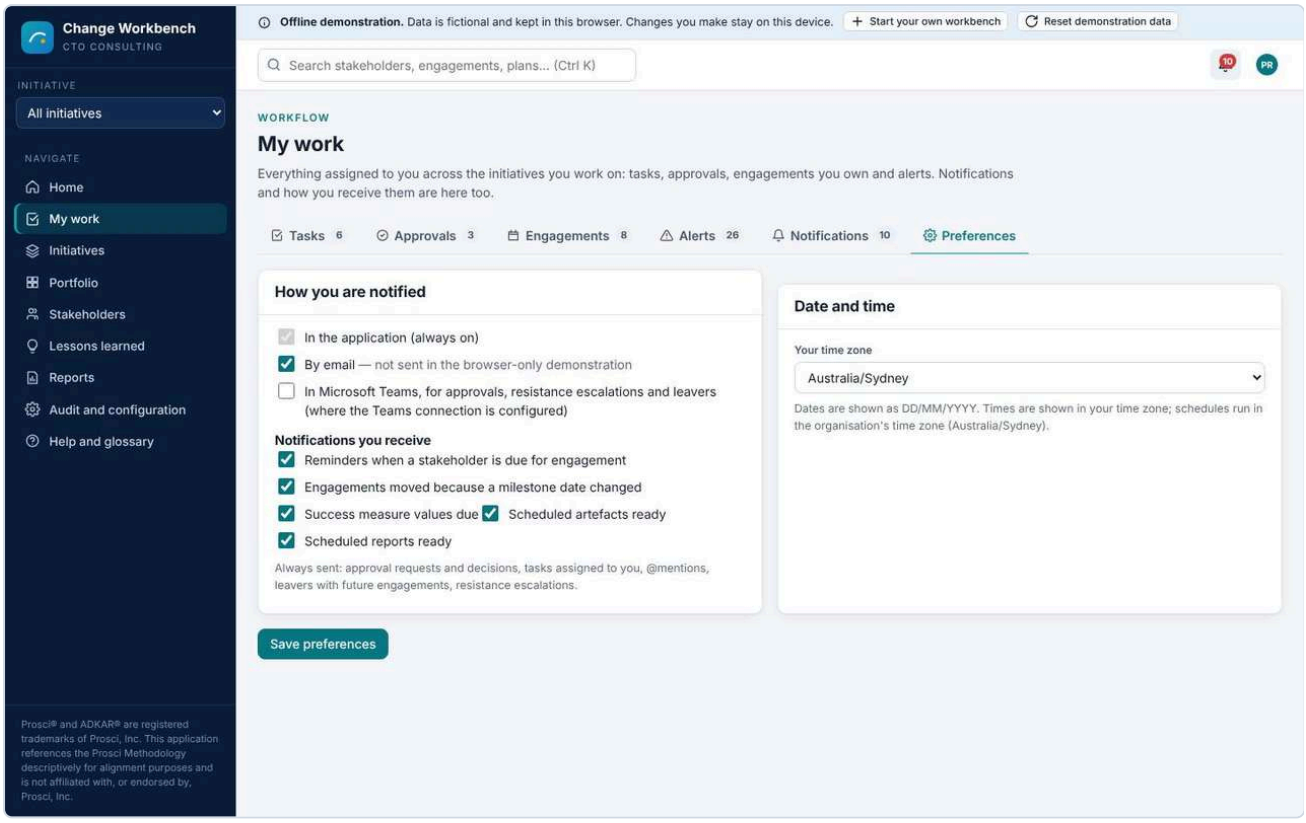

11 My work · Notifications

Every notification, newest first, with unread ones marked and a filter to show only those.

12 My work · Preferences

How you are notified (in the application, by email and in Microsoft Teams when configured), which kinds you receive, and your time zone.

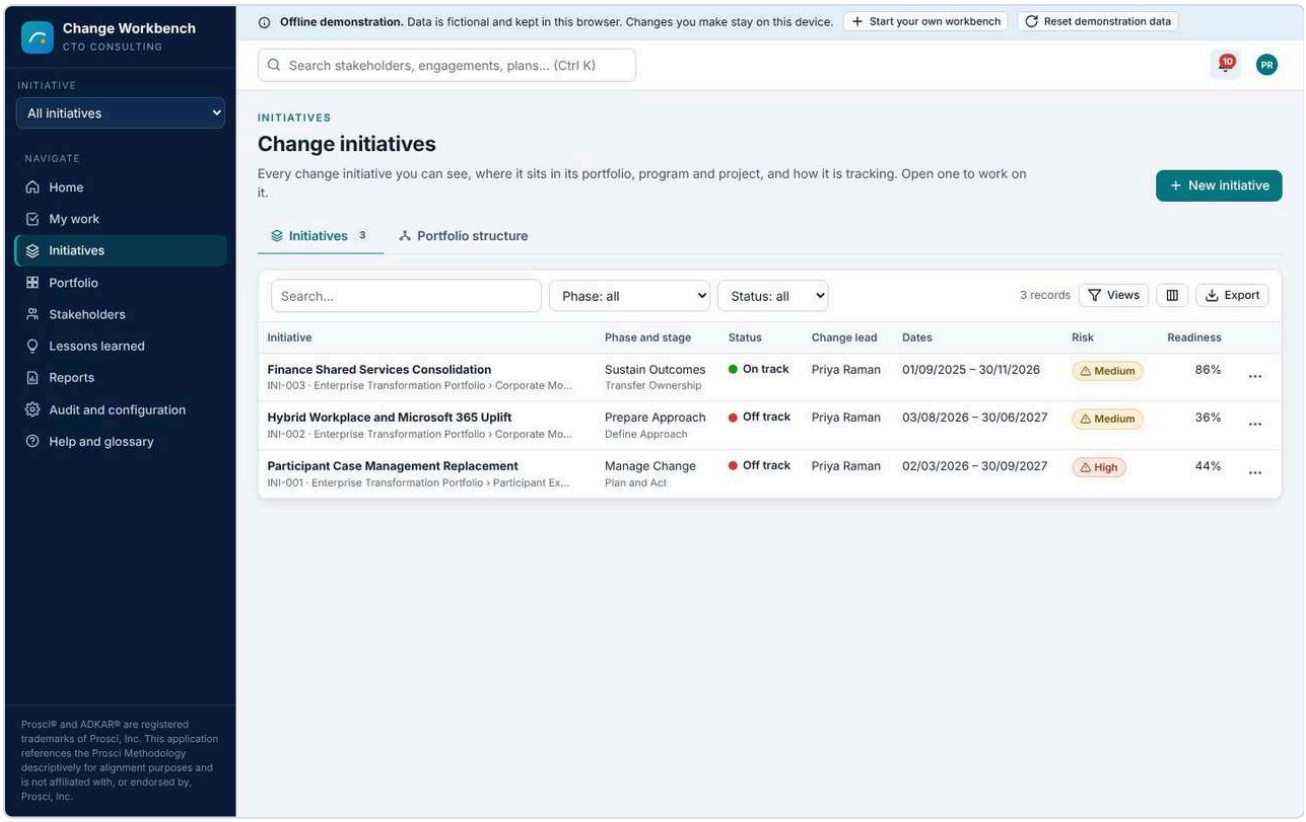

PART 3 OF 14

Initiatives

Every change initiative, from one team's process change to an enterprise program, sits in the portfolio, program and project hierarchy.

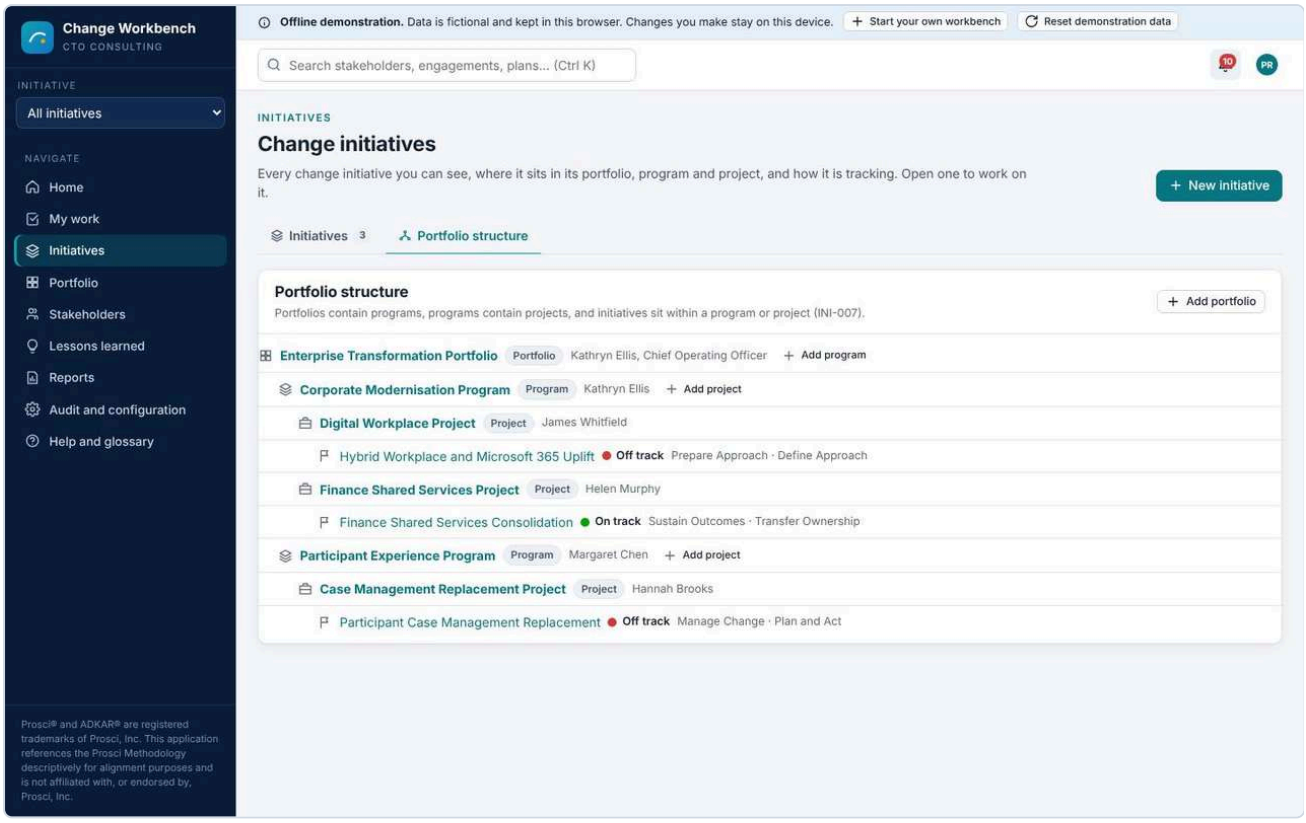

13 Initiatives

Every initiative you can see, with its phase and stage, status, change lead, dates, risk and readiness. Search, filter and export, or open one to work on it.

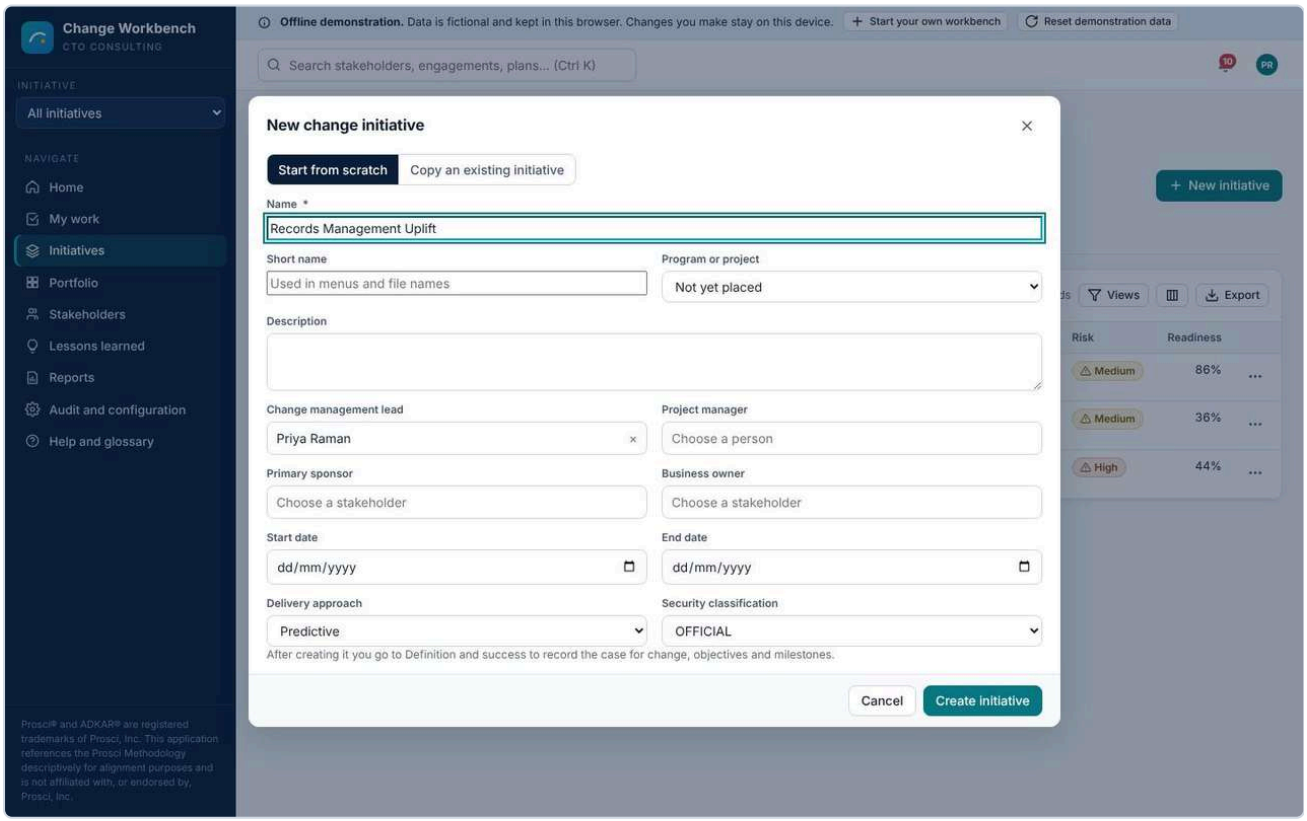

14 Portfolio structure

The portfolio structure: portfolios hold programs, programs hold projects, and initiatives sit within them for roll-up reporting.

15 New initiative

A new initiative, from scratch or by copying chosen registers of an existing one, such as milestones, impacts, plans and key messages.

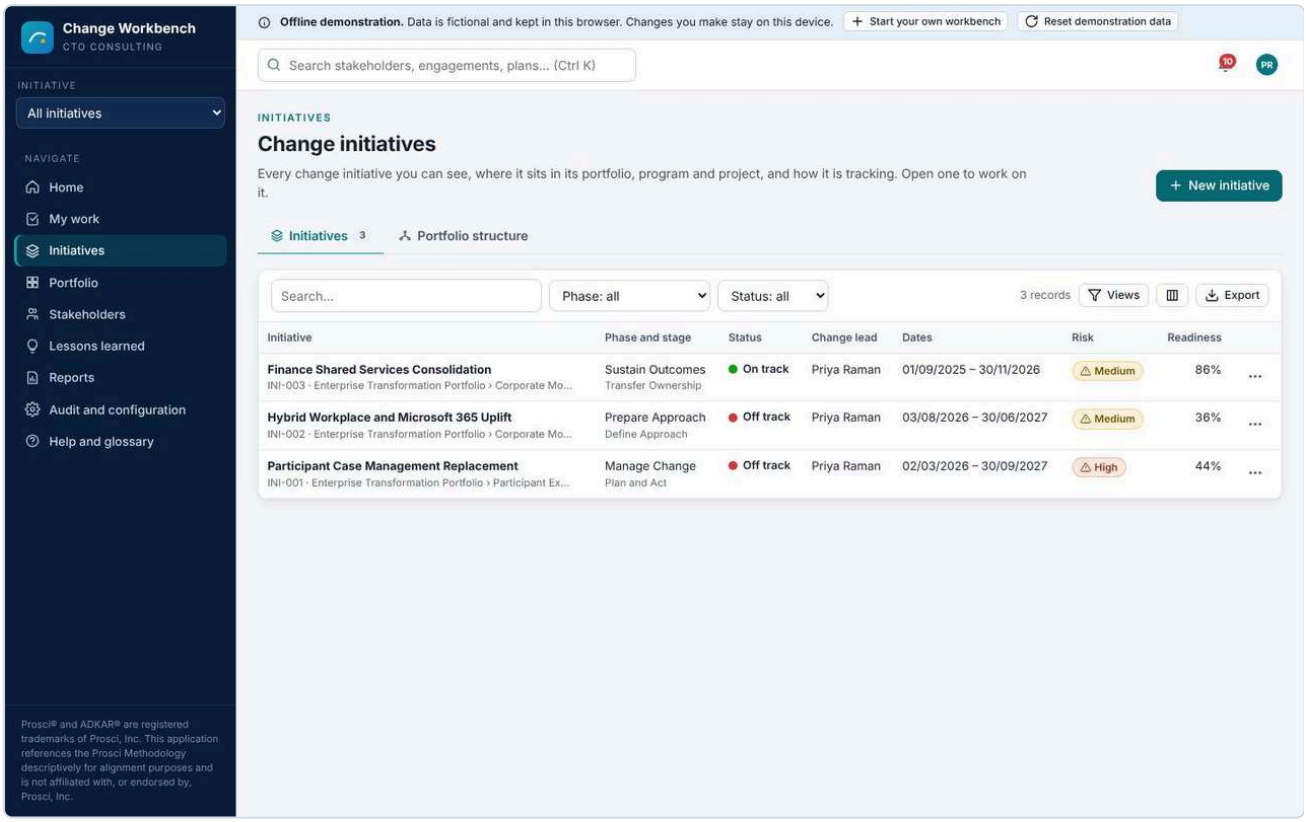

PART 4 OF 14

An initiative: overview and dashboards

Each initiative opens on its overview: progress through the 3-Phase Process and what needs attention. Dashboards give the change lead, sponsor, project manager and people managers their own view.

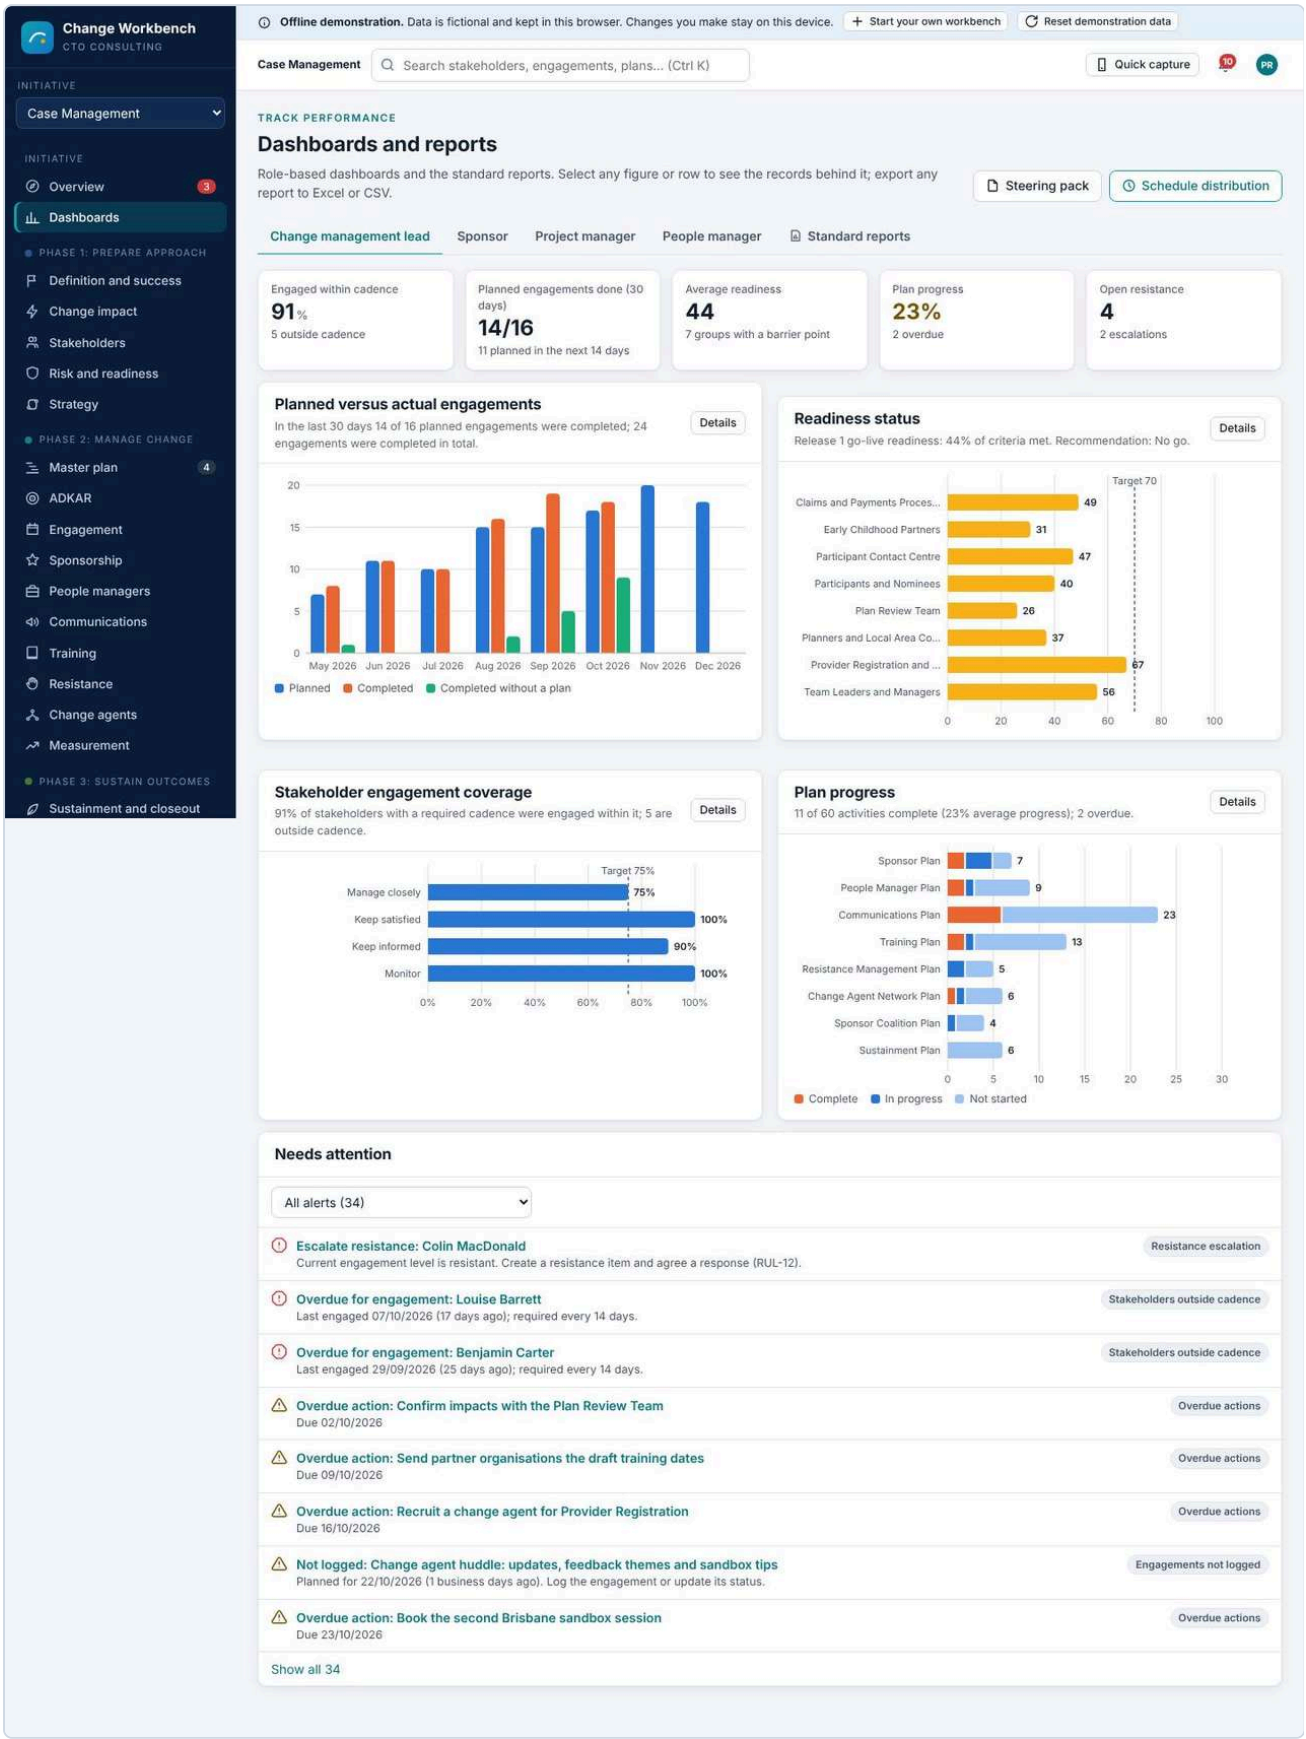

16 Initiative overview

The initiative overview: headline figures, progress through each stage of the 3-Phase Process against its checks, what needs attention, coverage warnings and the milestones ahead.

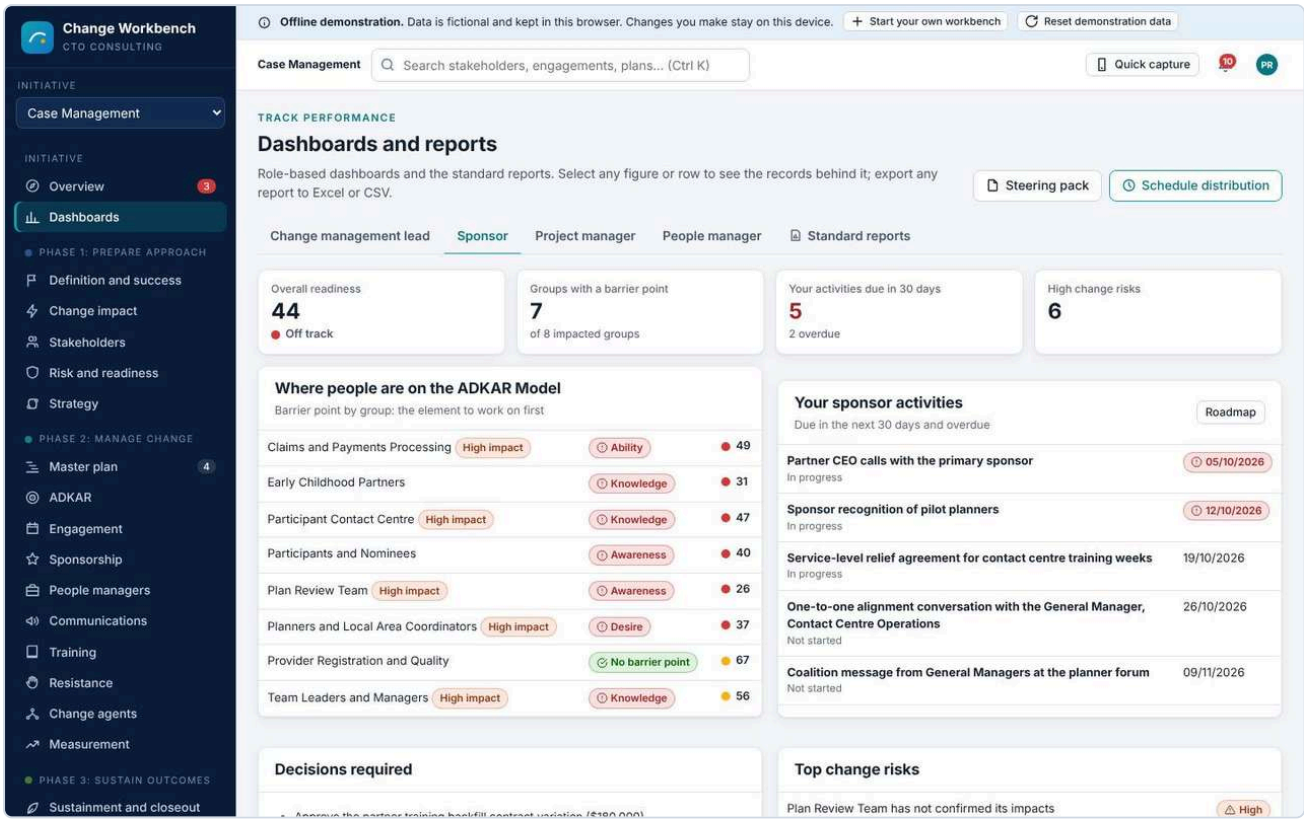

17 Dashboard · Change management lead

The change management lead's dashboard: engagement within cadence, planned against actual engagements, readiness by group, stakeholder coverage and plan progress. Each figure opens the records behind it.

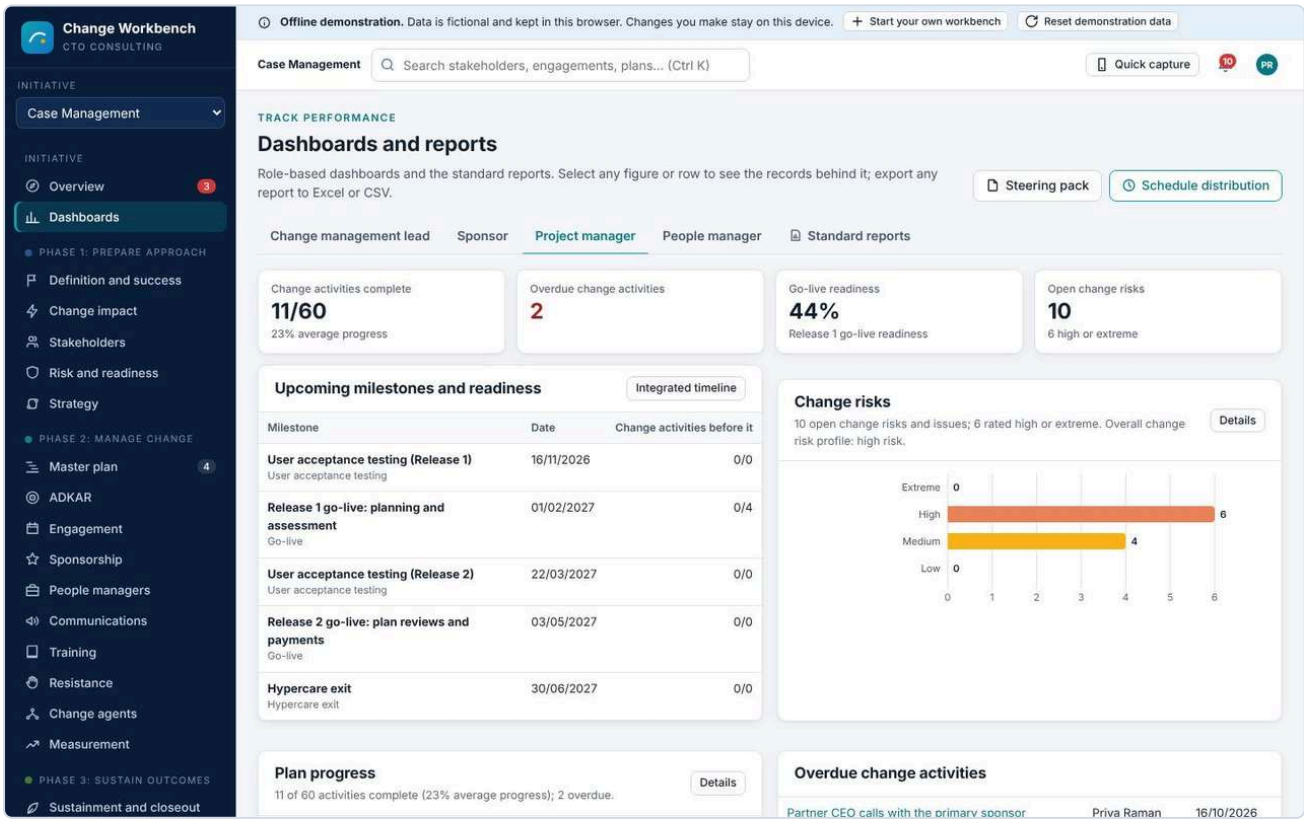

18 Dashboard · Sponsor

The sponsor's dashboard: overall readiness, groups at a barrier point, the sponsor's own activities, where each group is on the ADKAR Model and the decisions needed.

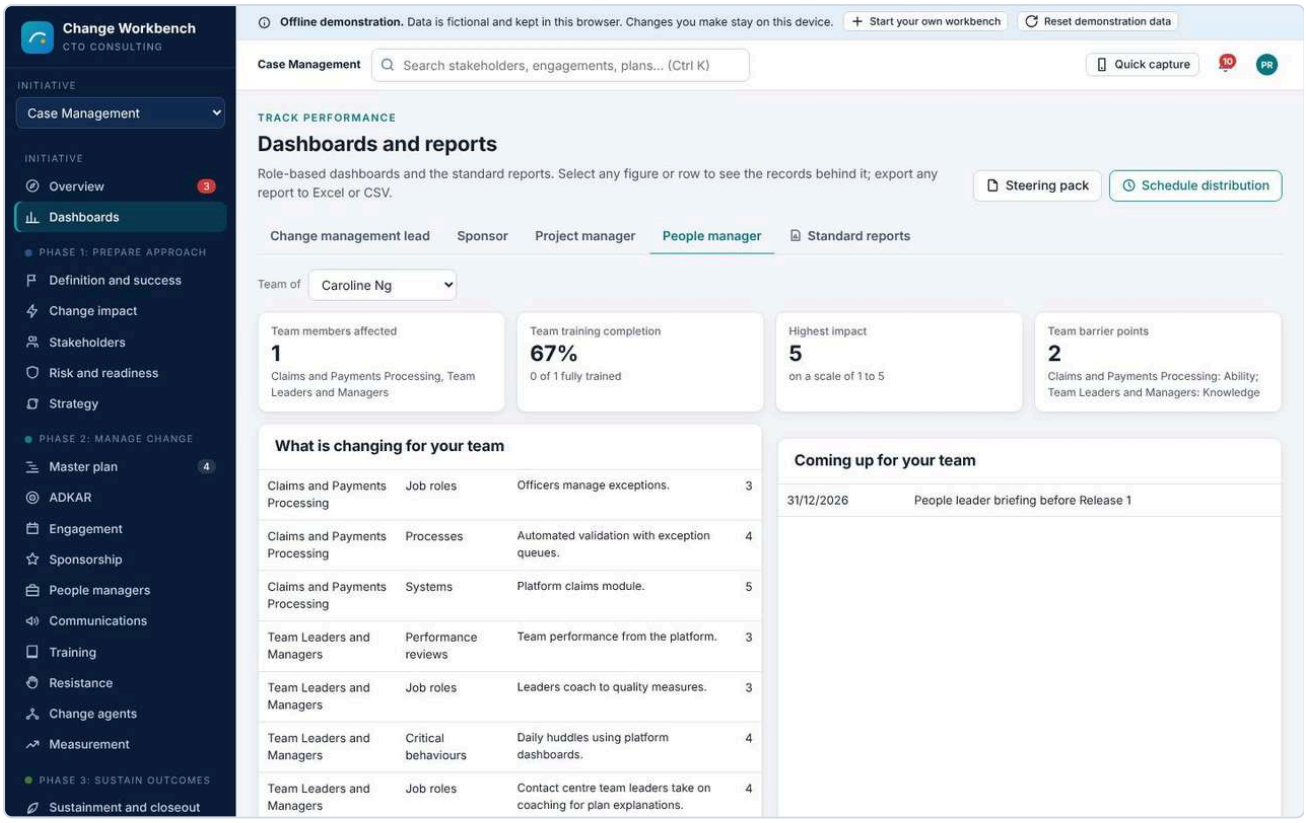

19 Dashboard · Project manager

The project manager's dashboard: change activities complete and overdue, go-live readiness, milestones with their readiness, and the change risks.

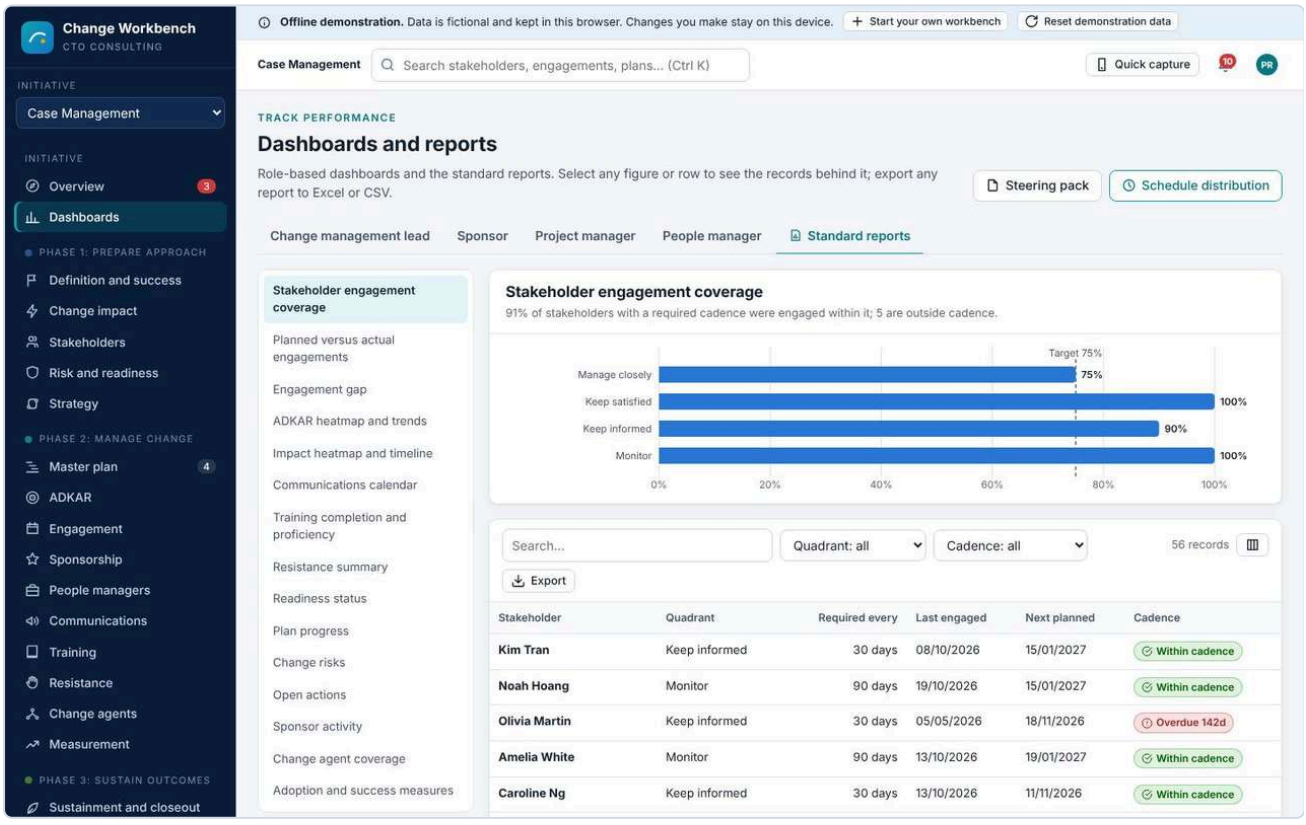

20 Dashboard · People manager

The people manager's dashboard for a chosen manager: what is changing for their team, training completion, barrier points and what is coming up.

21 Dashboard · Standard reports

Standard reports for the initiative, such as stakeholder engagement coverage, each with a chart, a filterable table and export to Excel or CSV.

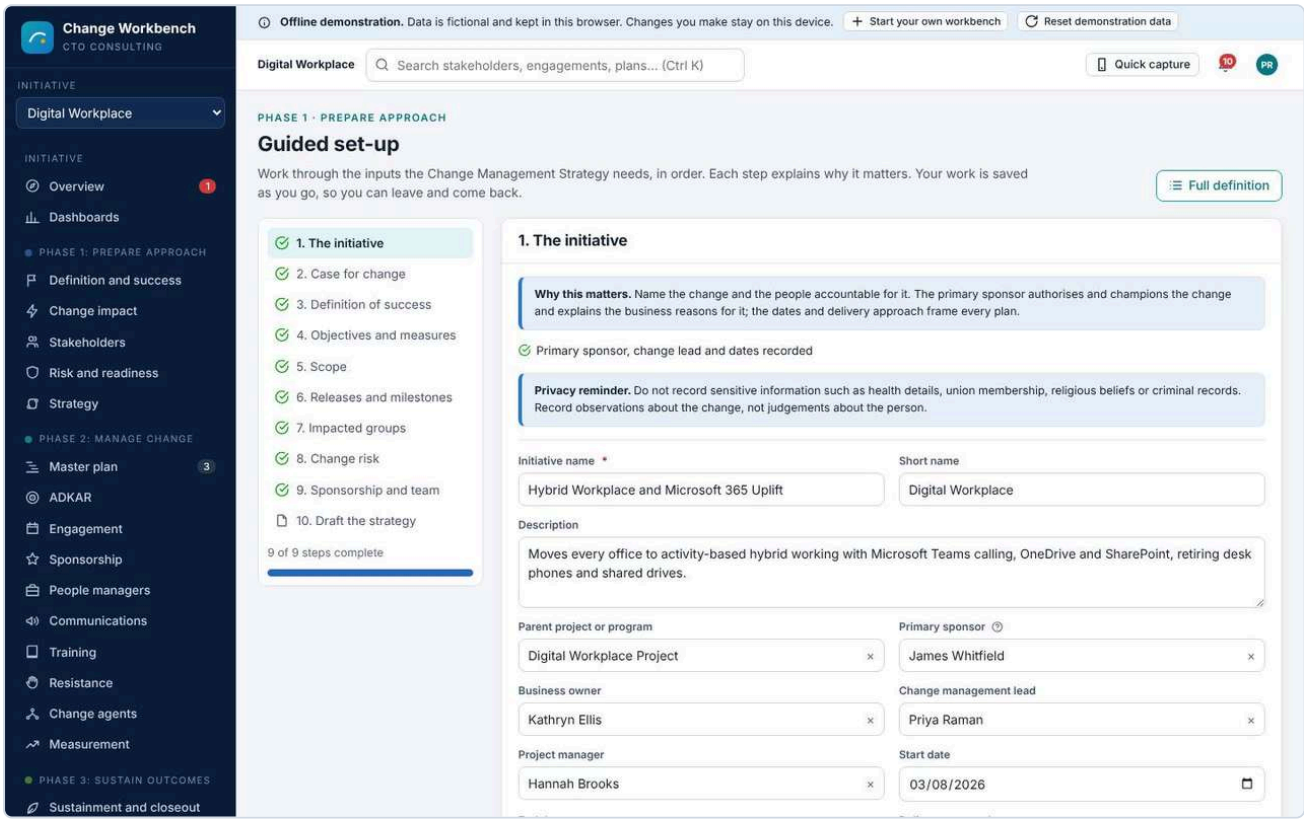

PART 5 OF 14

Phase 1 · Prepare Approach

Define success, assess the impact, analyse stakeholders, size the change risk and set the strategy. The guided set-up takes a new initiative through each input in order.

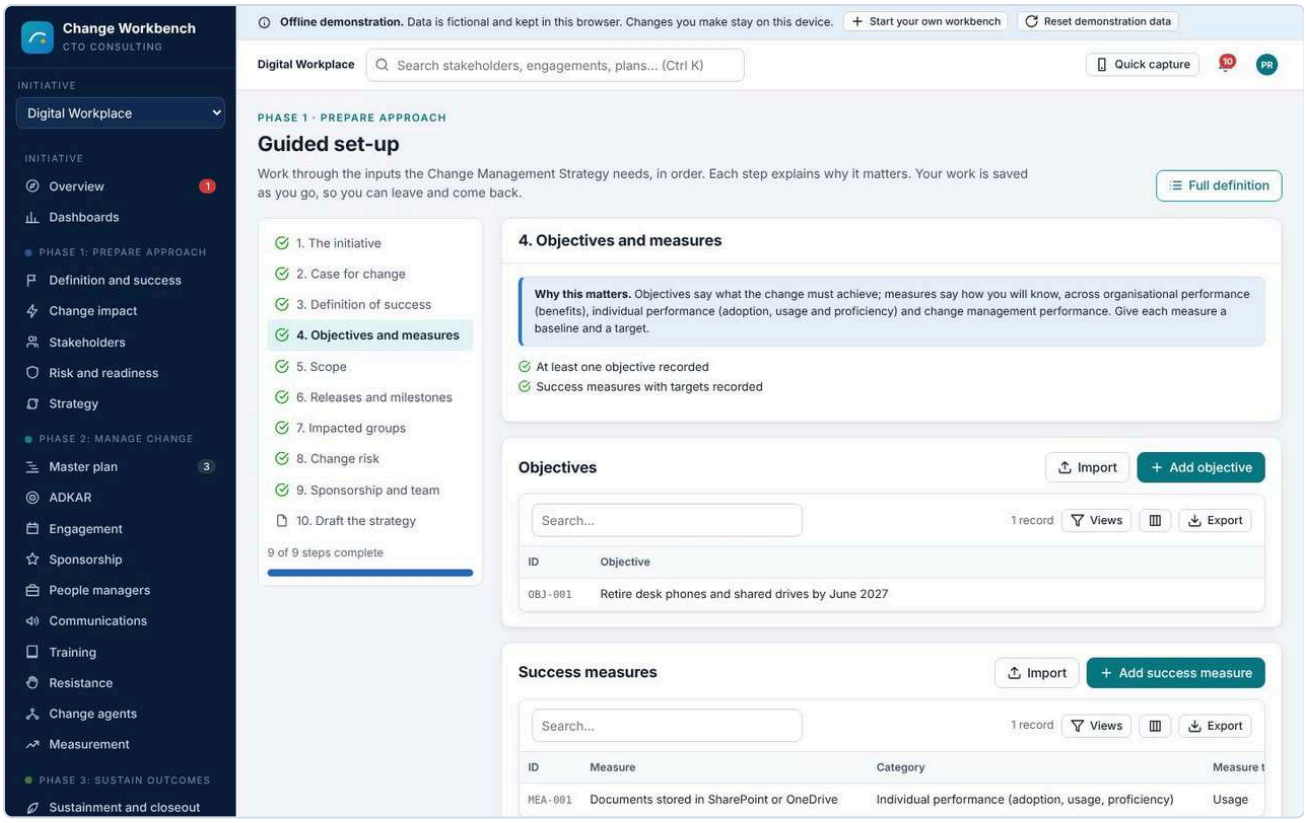

22 Guided set-up · The initiative

The guided set-up takes a new initiative through what the Change Management Strategy needs, one step at a time. Each step says why it matters and ticks off the checks it meets.

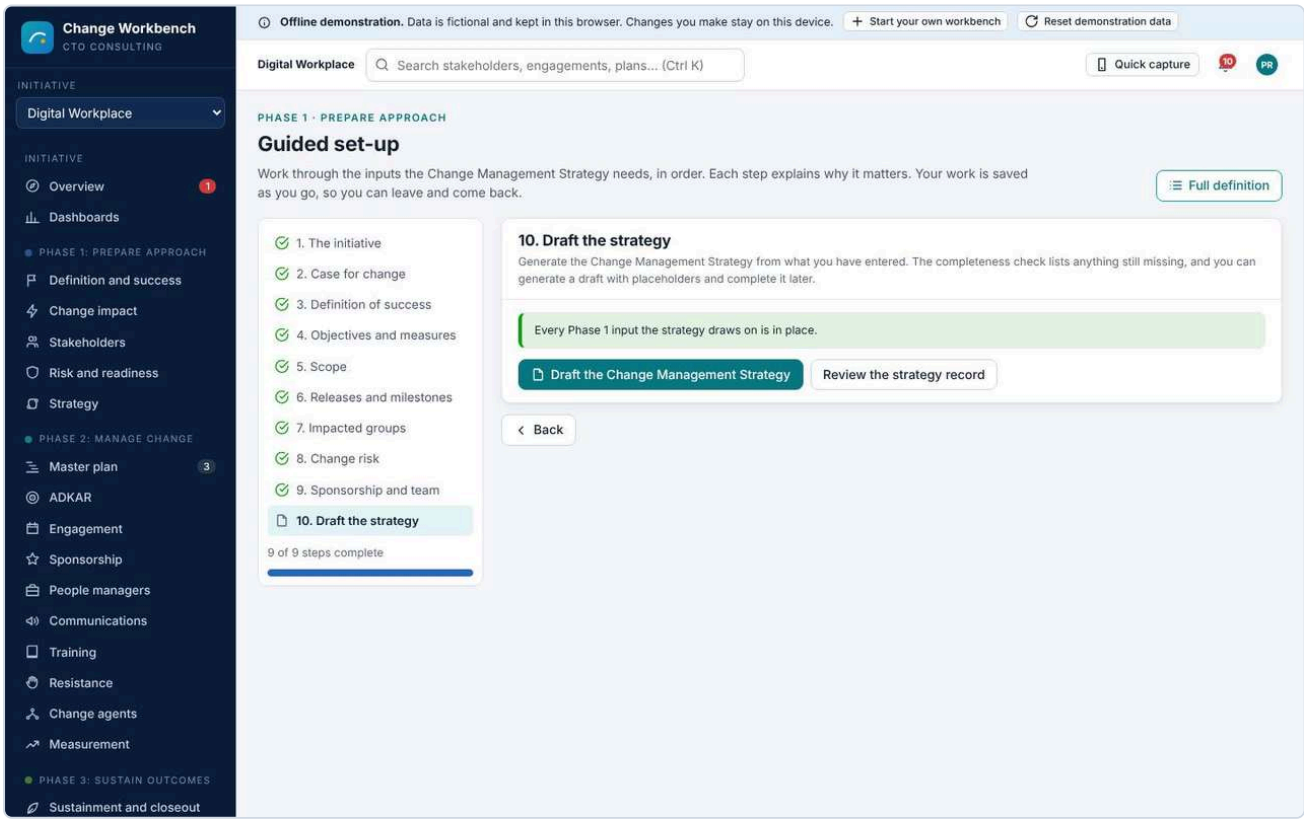

23 Guided set-up · Objectives and measures

Steps that need a register, such as objectives and success measures, hold the register itself, so items can be added or imported without leaving the guide.

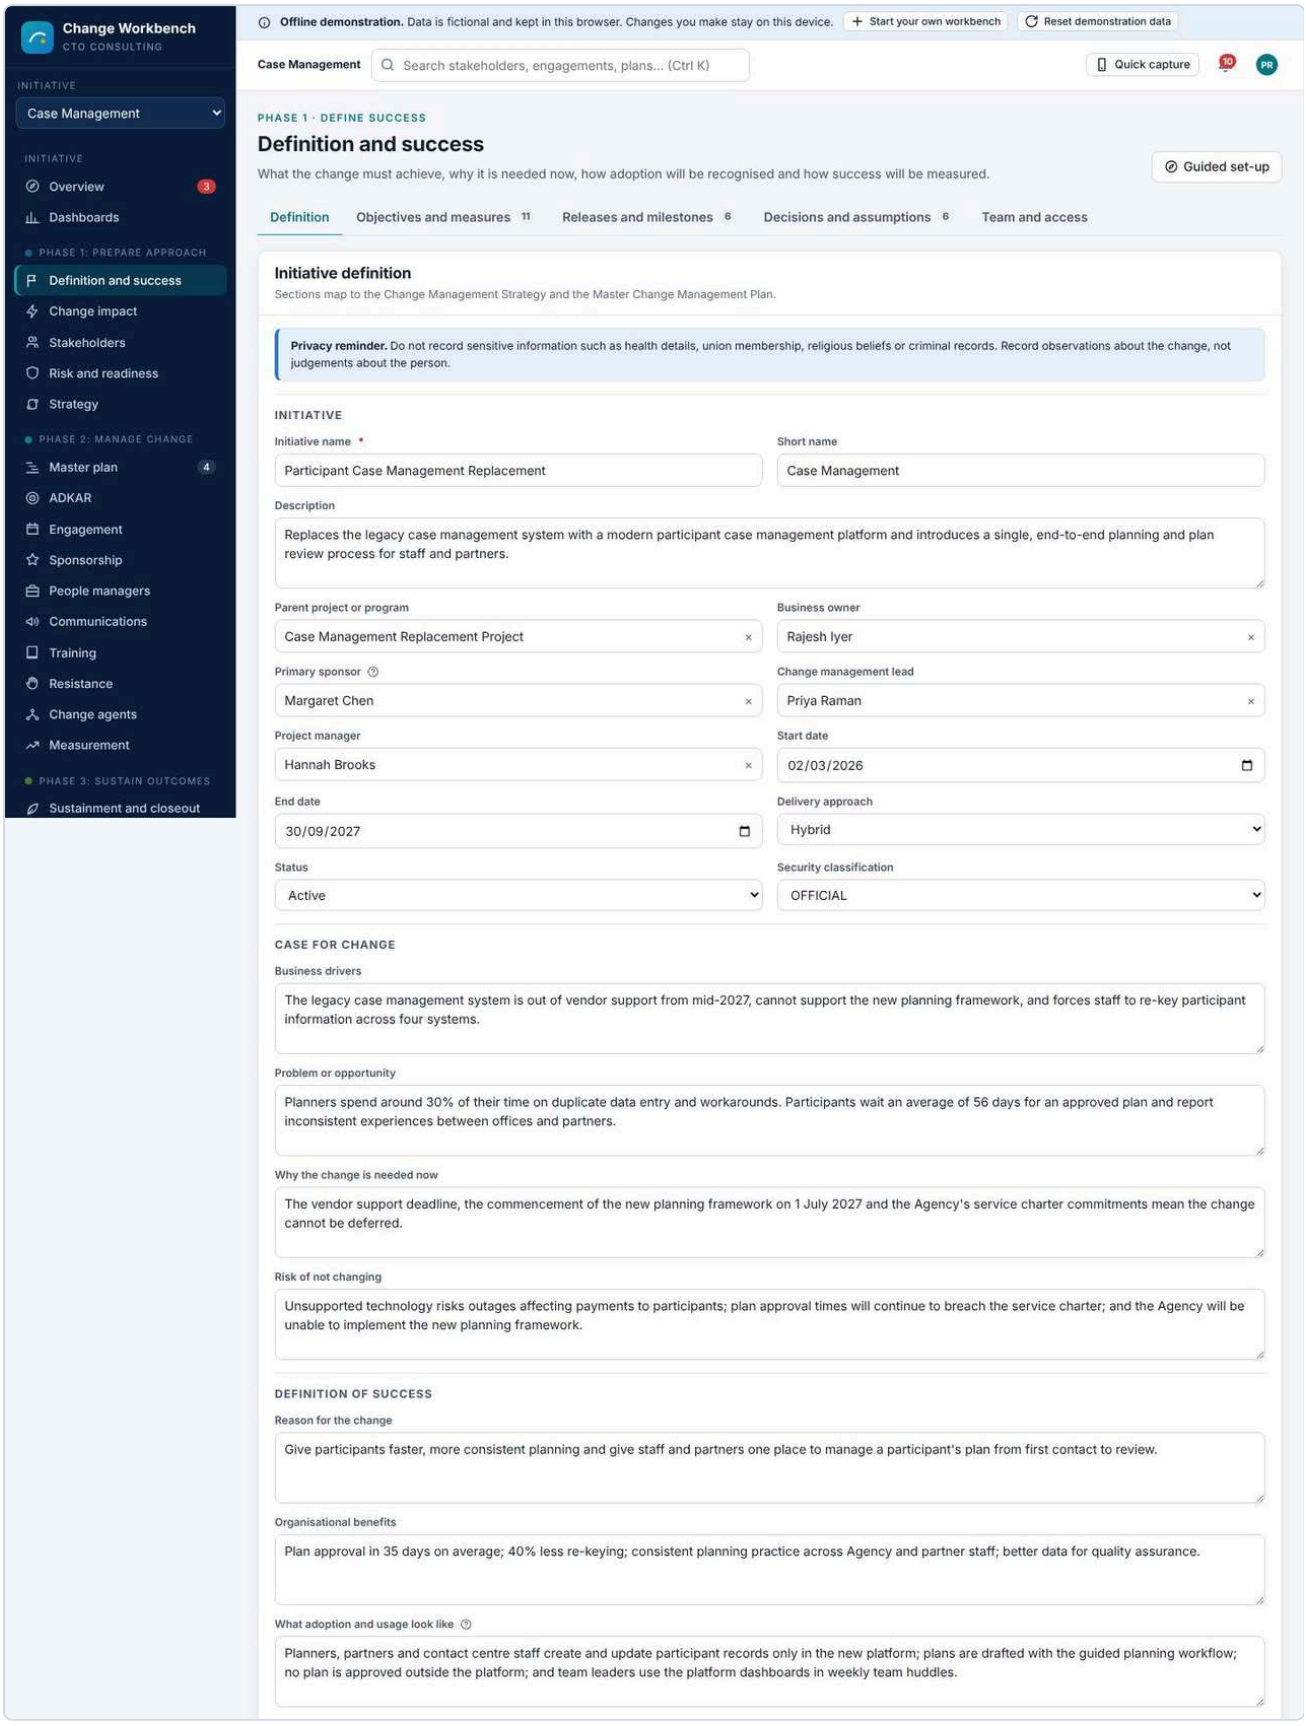

24 Guided set-up · Draft the strategy

The last step lists anything still missing and drafts the Change Management Strategy from what has been entered.

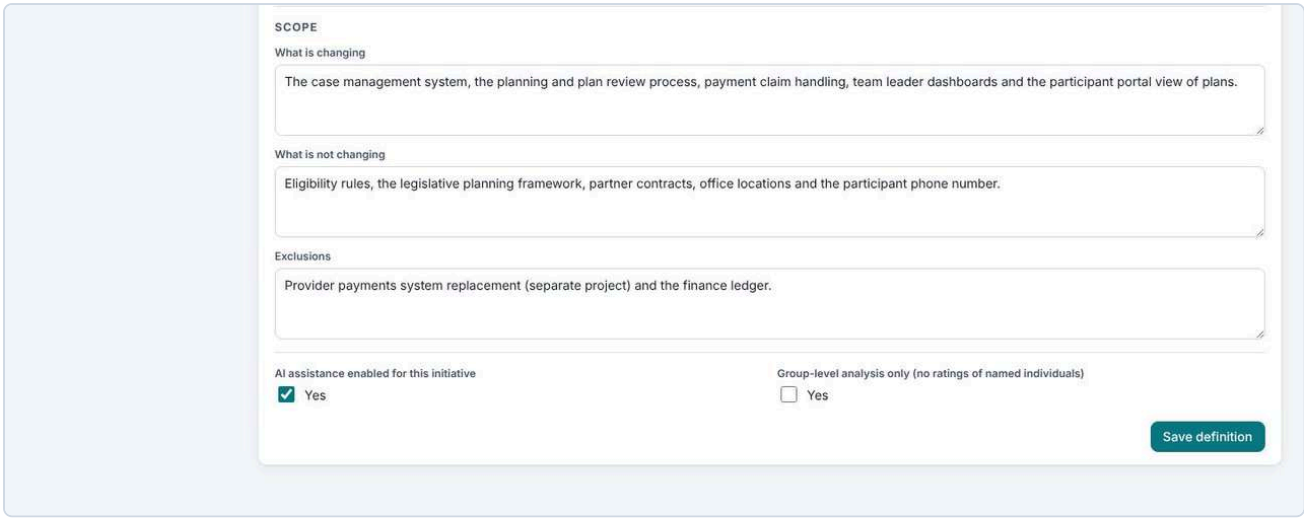

25 Definition and success · Definition

Definition and success: the initiative's details, the accountable people, dates and classification, the case for change, the scope and what adoption looks like.

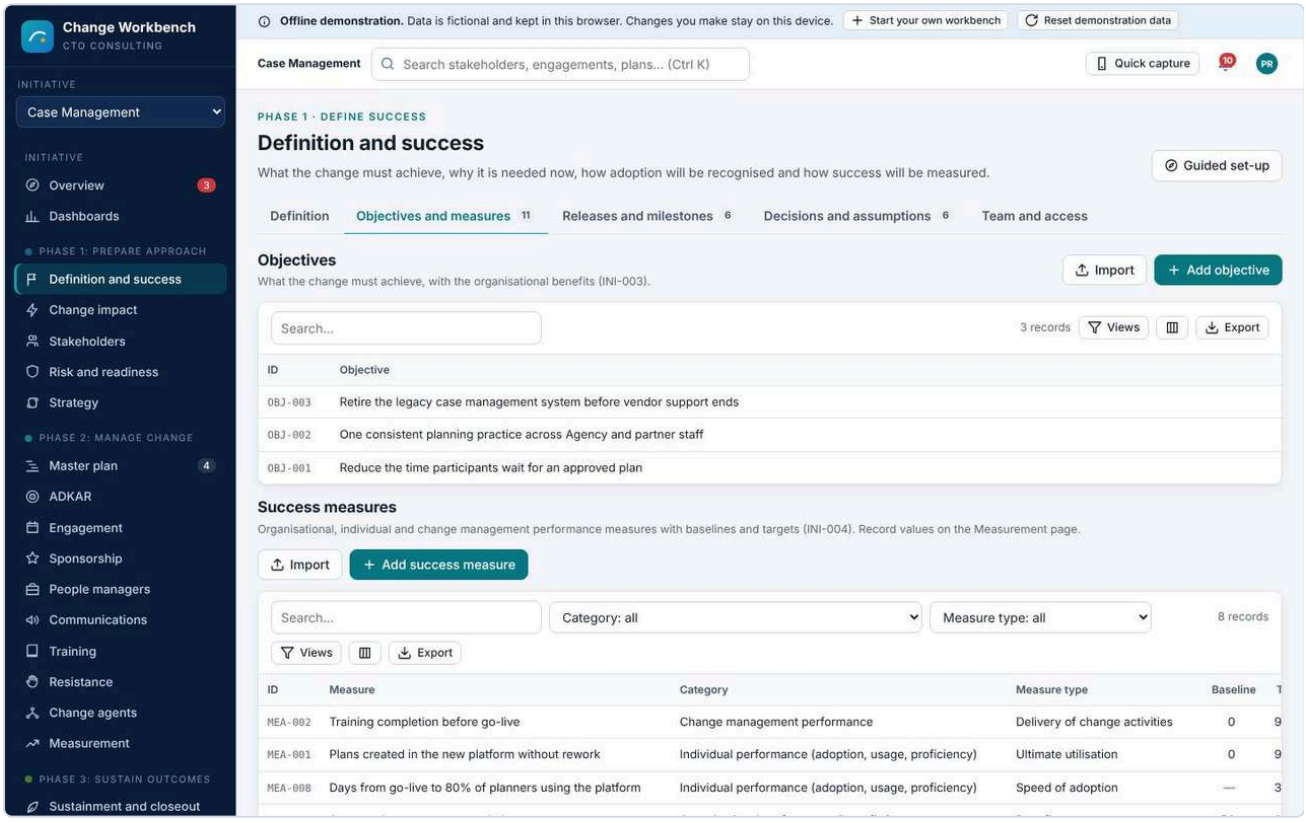

25 Definition and success · Definition (continued, 2 of 2)

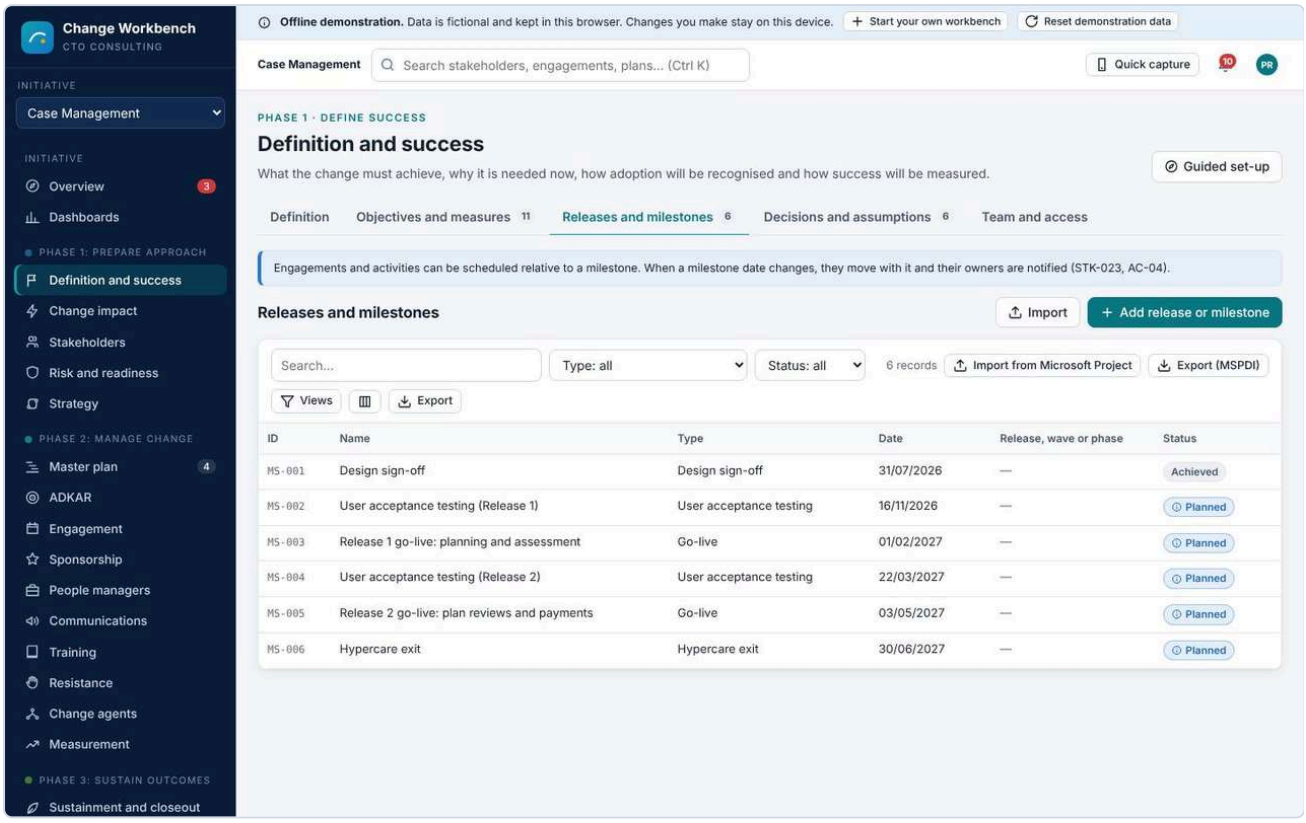

26 Definition and success · Objectives and measures

Objectives and success measures across organisational performance, individual performance (adoption, usage and proficiency) and change management performance, each with a baseline and target.

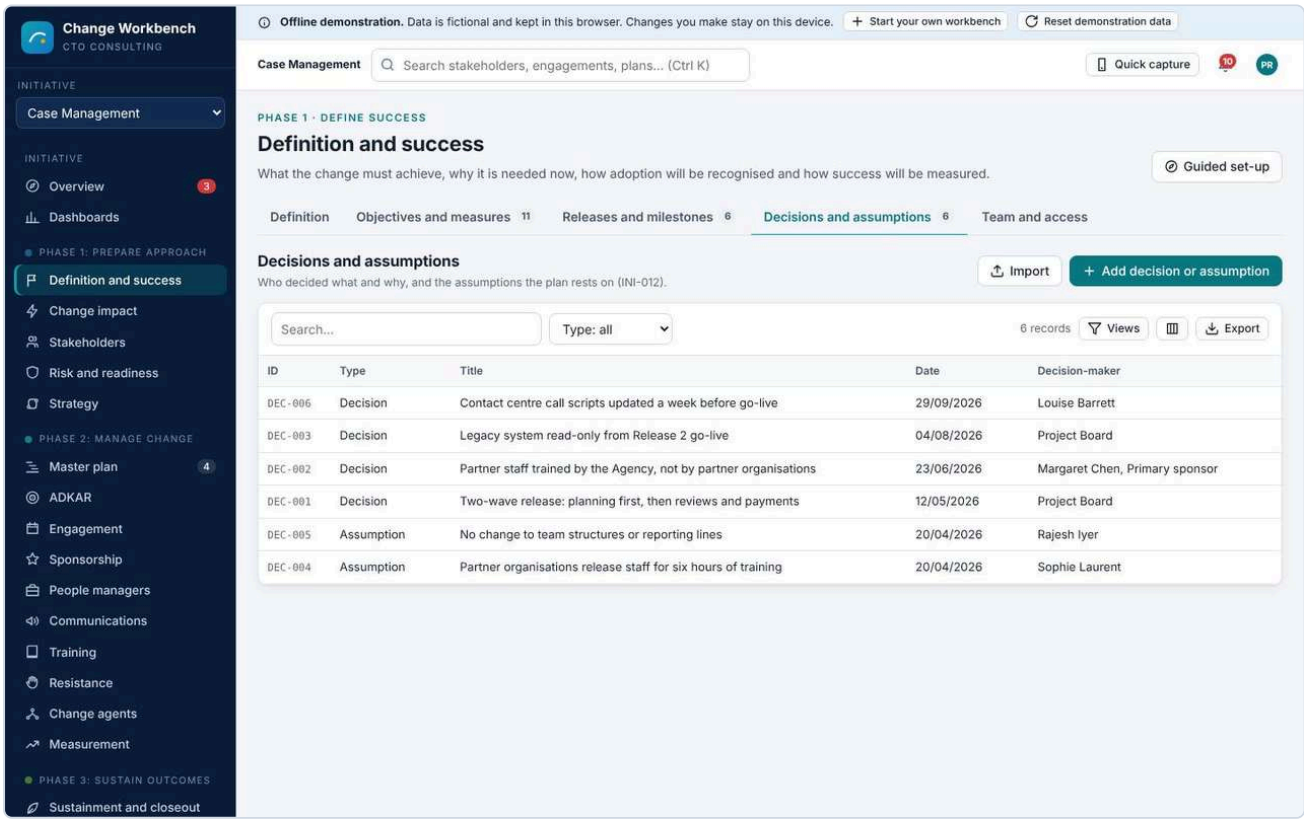

27 Definition and success · Releases and milestones

Releases and milestones, which plans and engagements are scheduled against, imported from Microsoft Project or a spreadsheet.

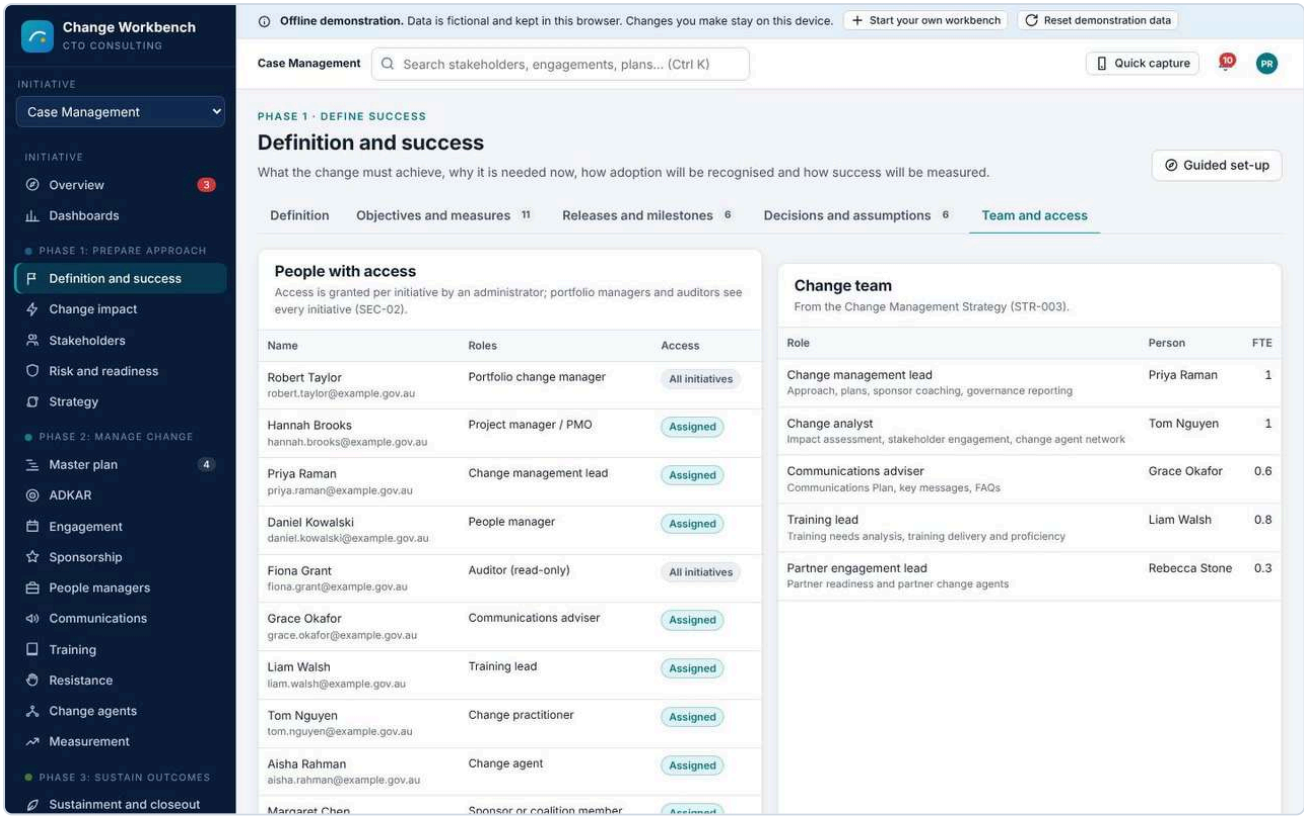

28 Definition and success · Decisions and assumptions

Decisions and assumptions, with who made each one and when.

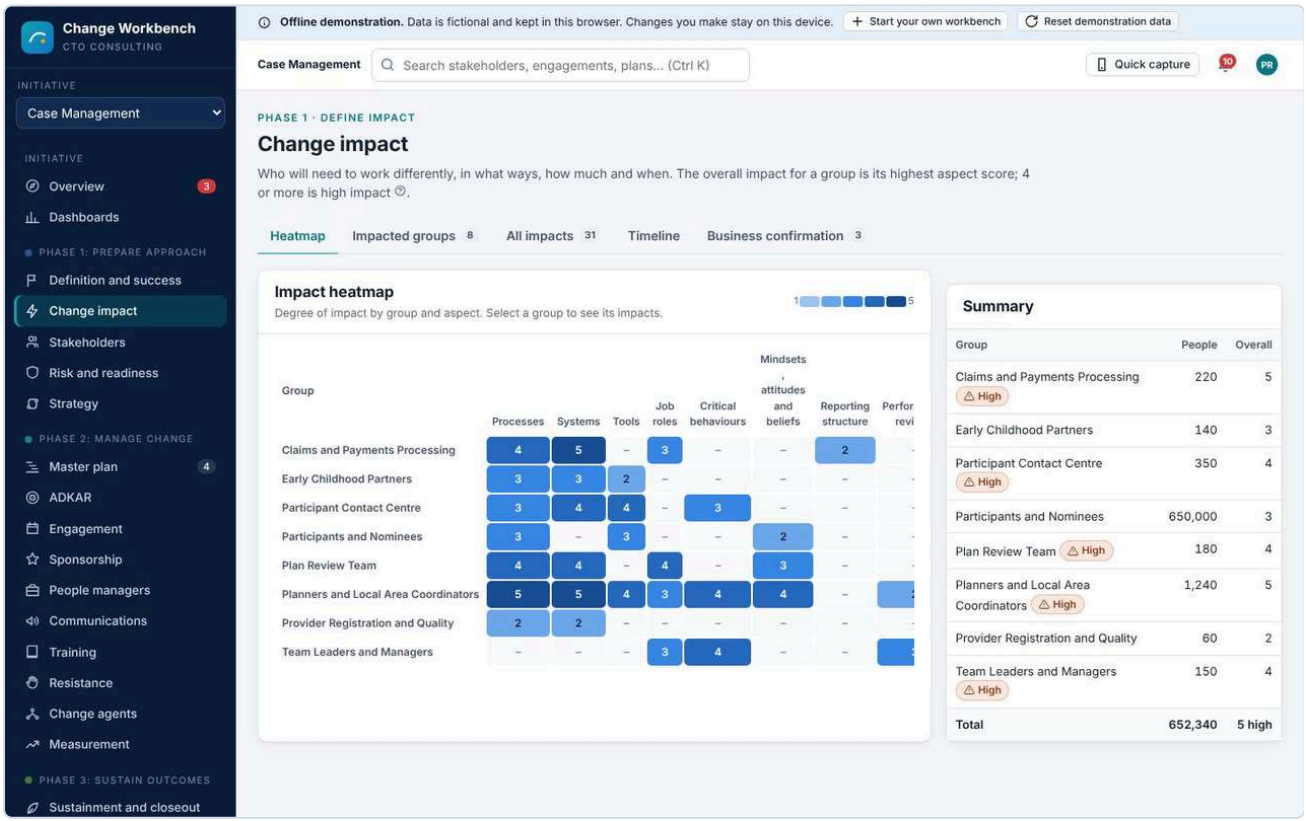

29 Definition and success · Team and access

Who can work on the initiative and in which role, and the change team with each member's time commitment.

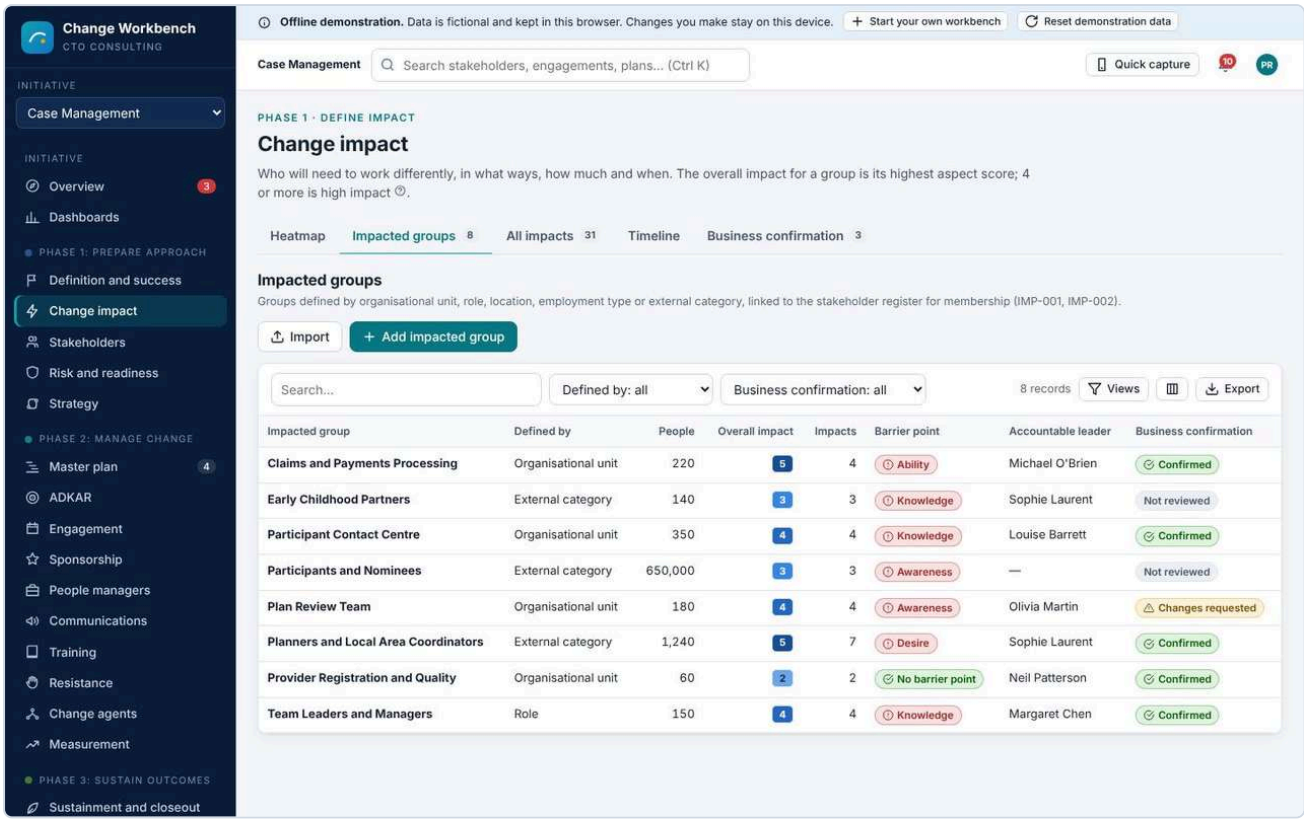

30 Change impact · Heatmap

The impact heatmap: how much each group is affected in each aspect of change (processes, systems, tools, job roles and more), with the overall rating and headcount.

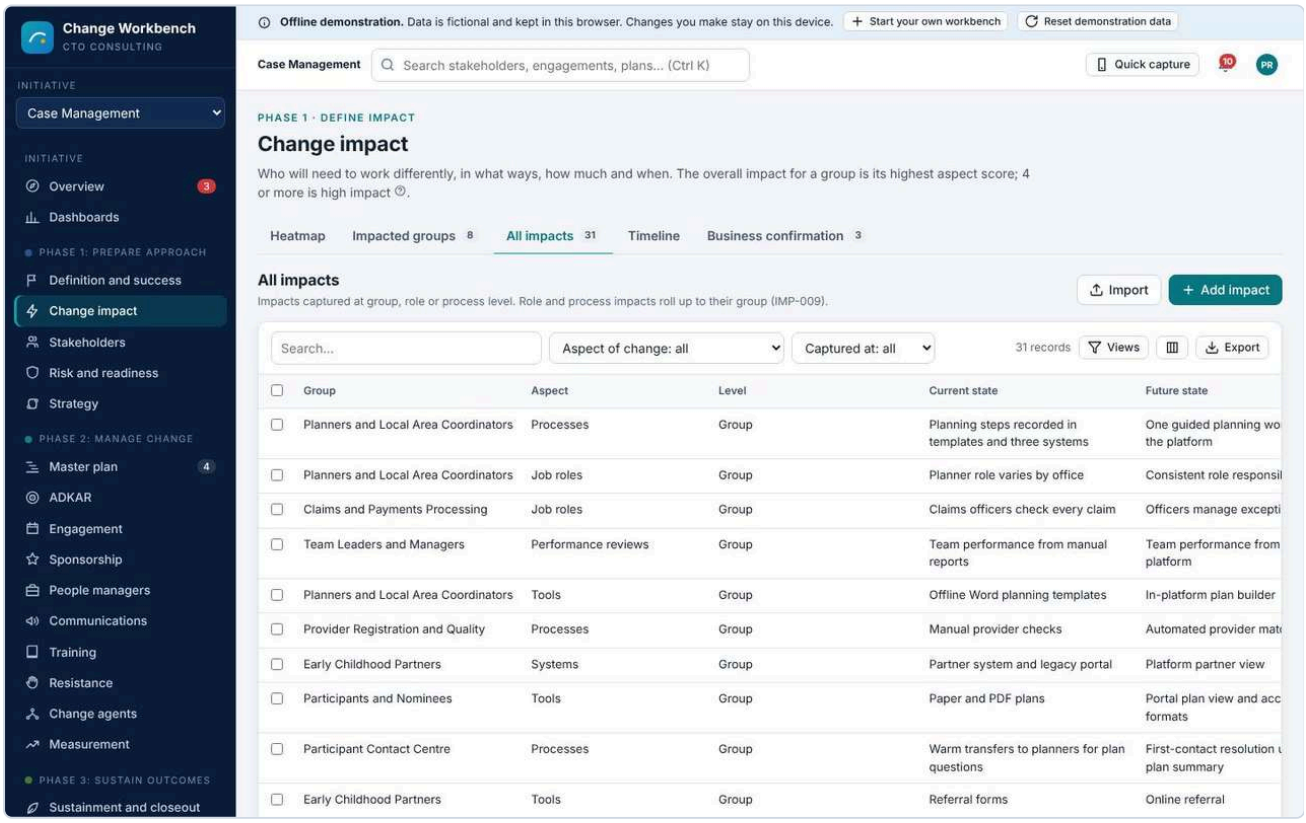

31 Change impact · Impacted groups

Impacted groups, defined by organisational unit, role, location, employment type or external category, with their overall impact, barrier point and business confirmation.

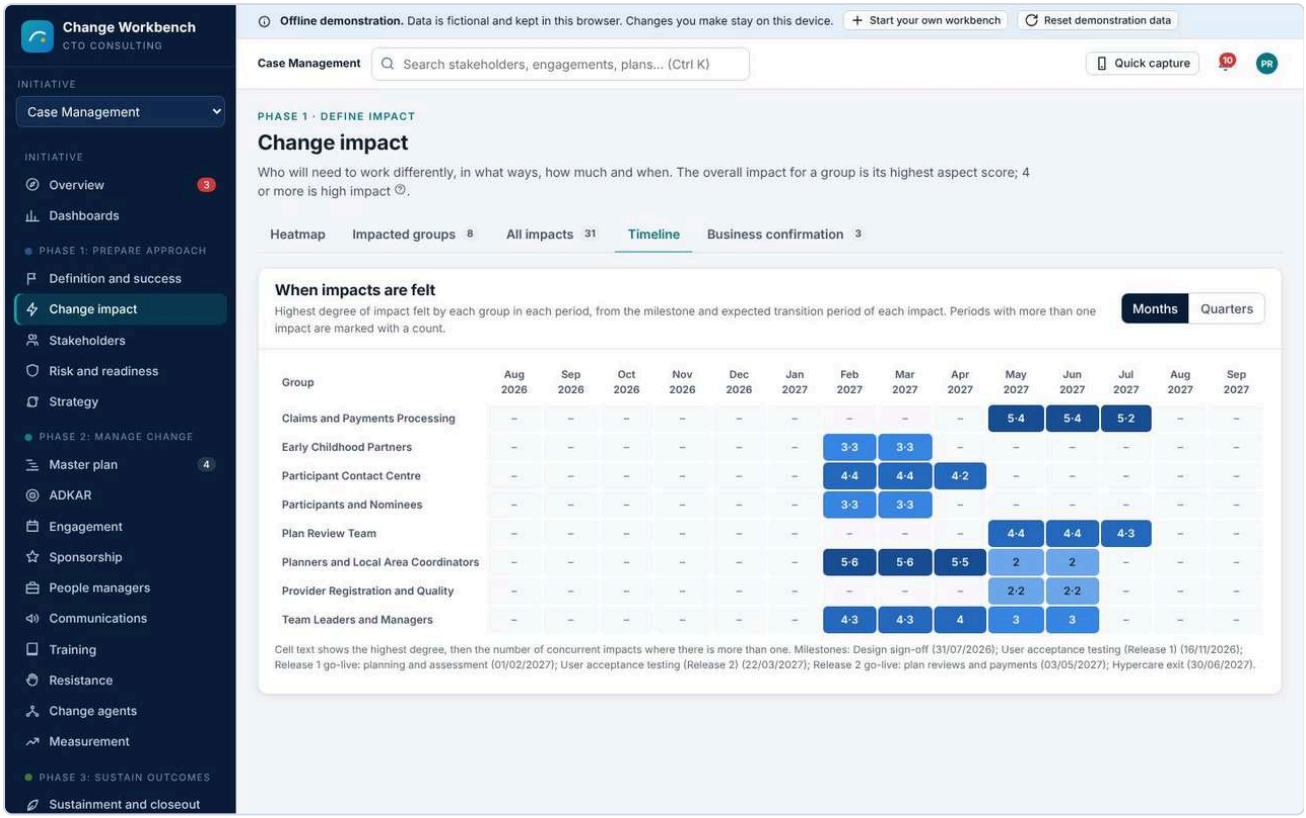

32 Change impact · All impacts

Every impact by group and aspect of change, with the current and future state and the degree of change.

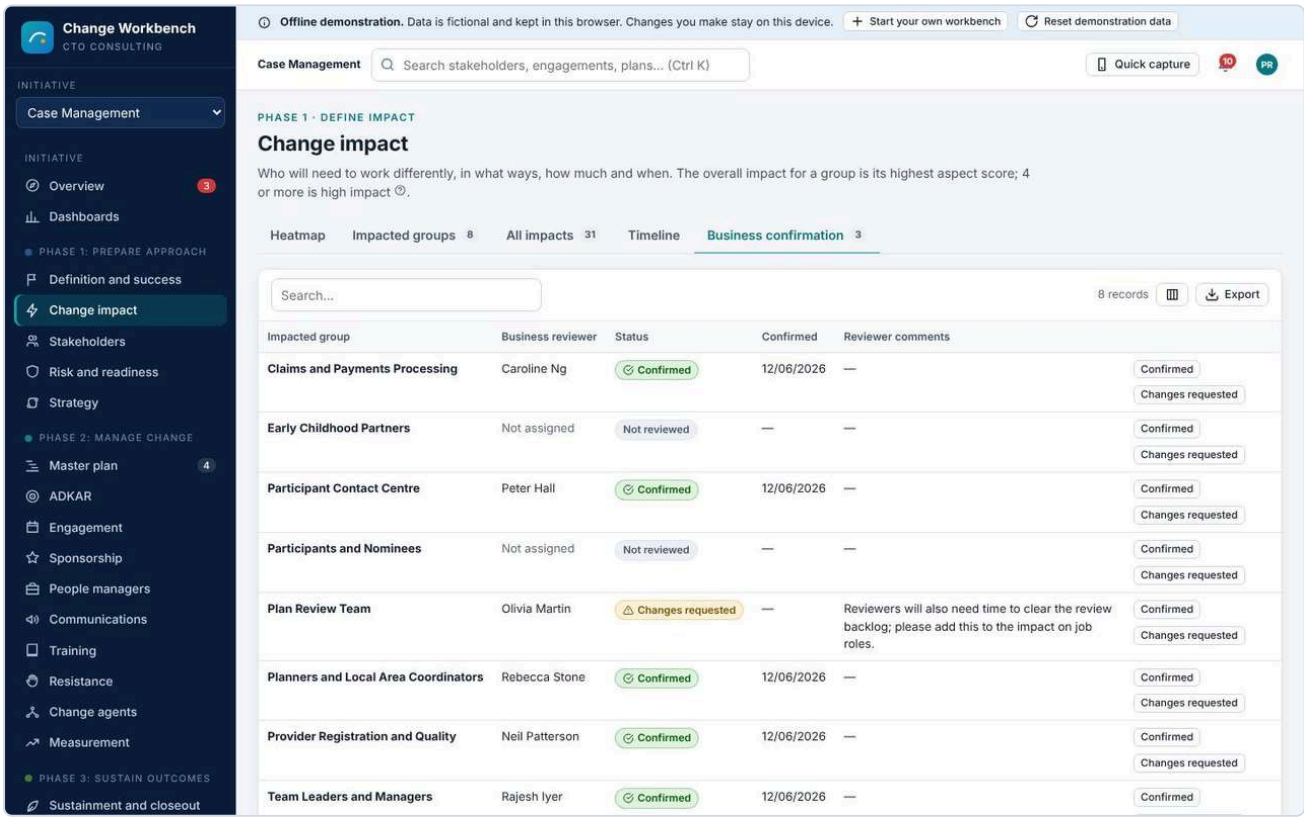

33 Change impact · Timeline

When the impacts are felt: each group's overall impact by month or quarter, so peaks can be planned around.

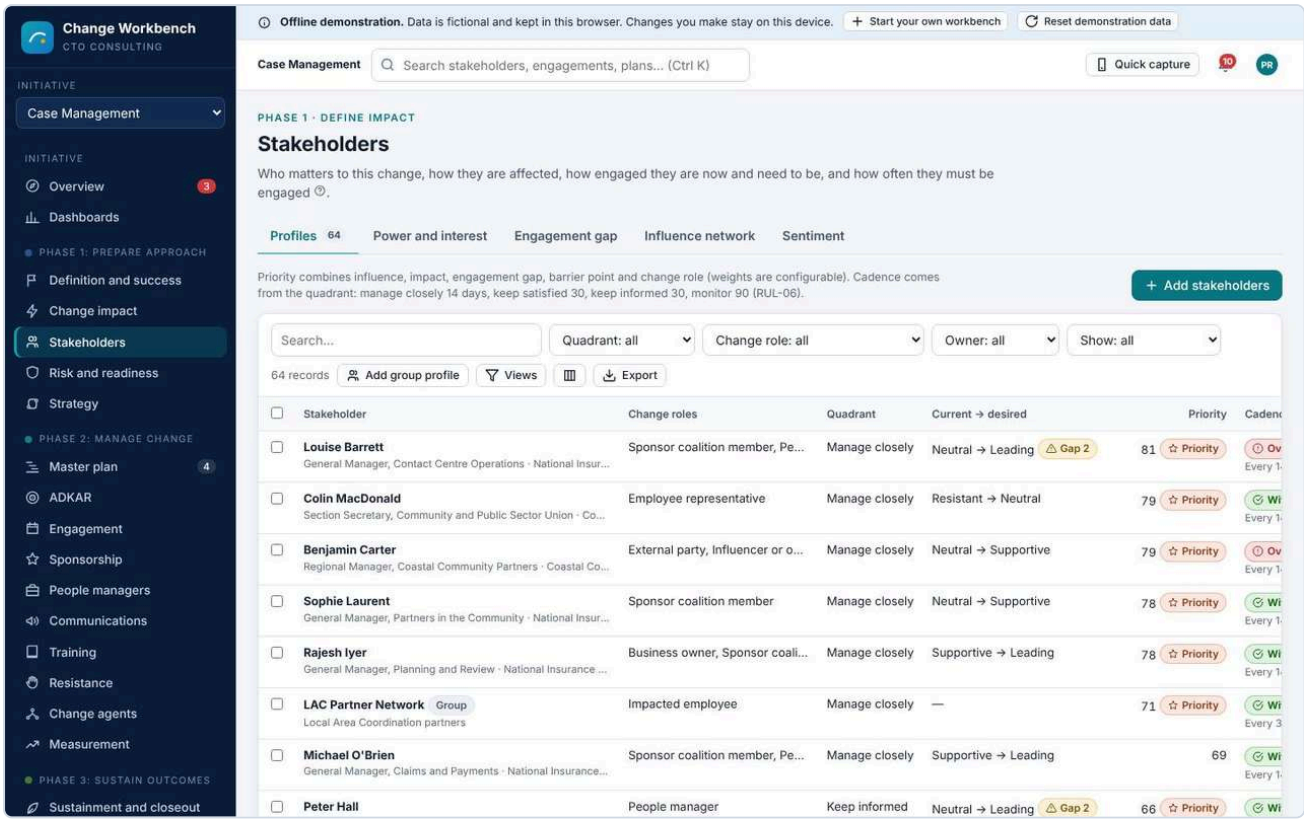

34 Change impact · Business confirmation

Business confirmation: a reviewer for each group confirms the assessed impacts or asks for changes.

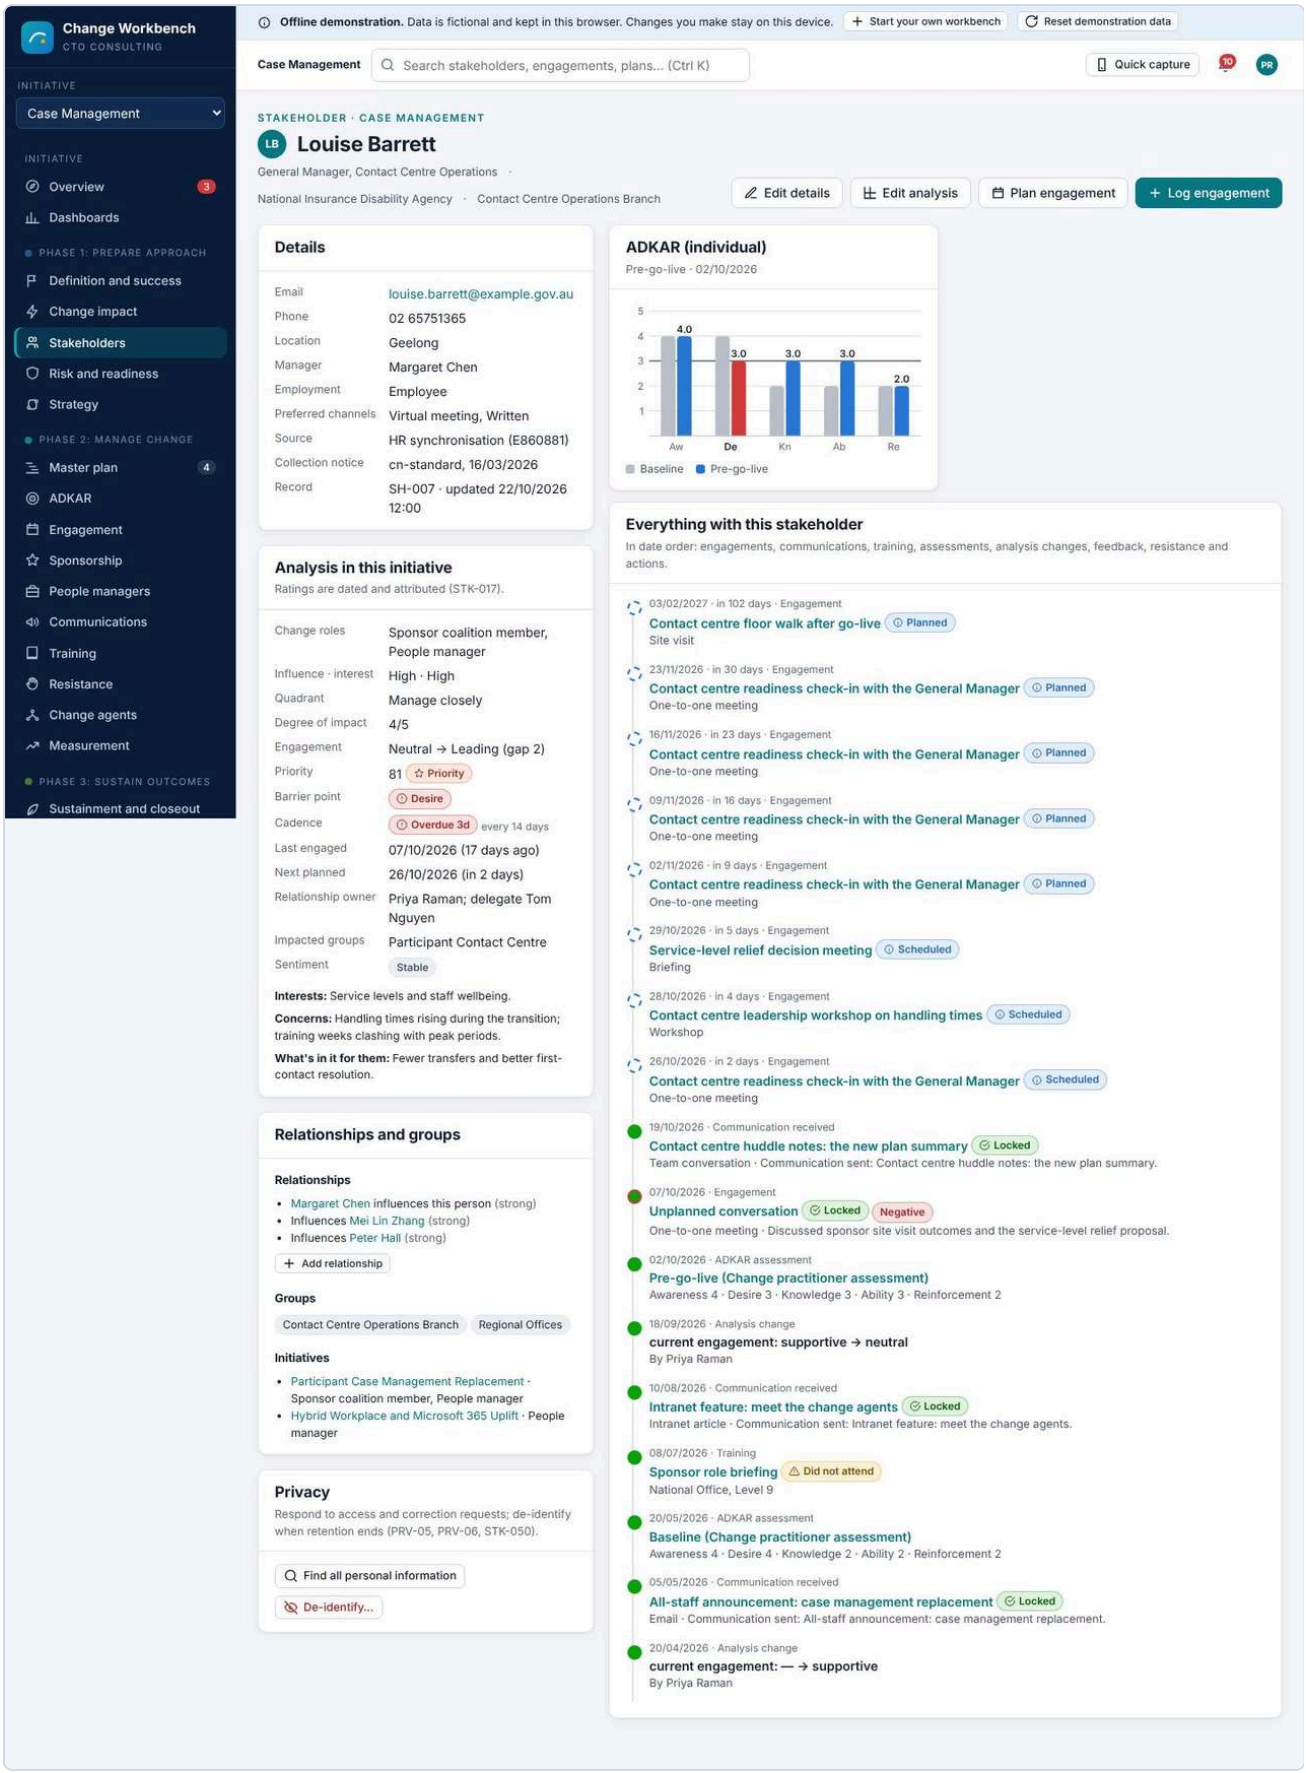

35 Stakeholders · Profiles

Stakeholder profiles in this initiative: change roles, quadrant, current and desired engagement, priority and cadence. Each profile builds on the shared stakeholder master.

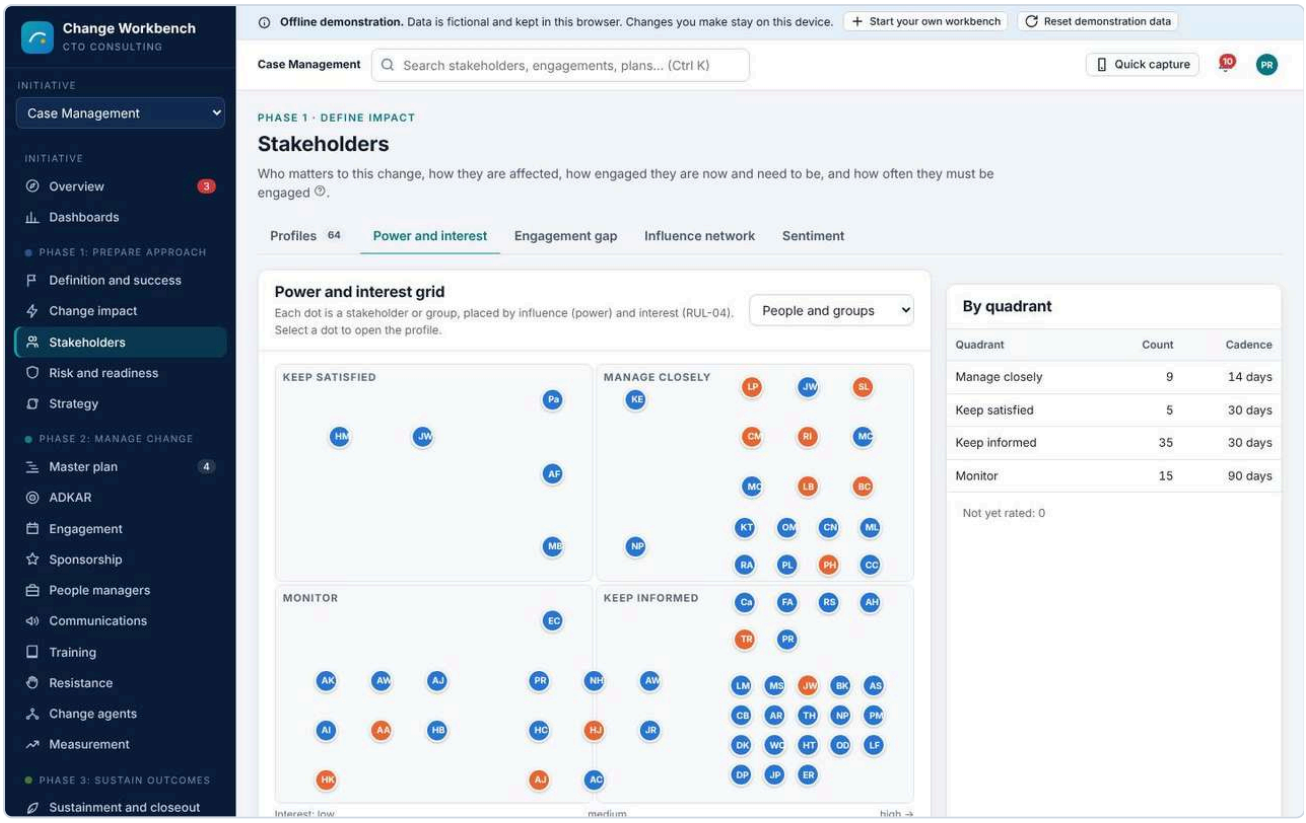

36 Stakeholders · A stakeholder's profile

A stakeholder's profile in the initiative: their details and analysis, their ADKAR results over time, and everything with them in date order.

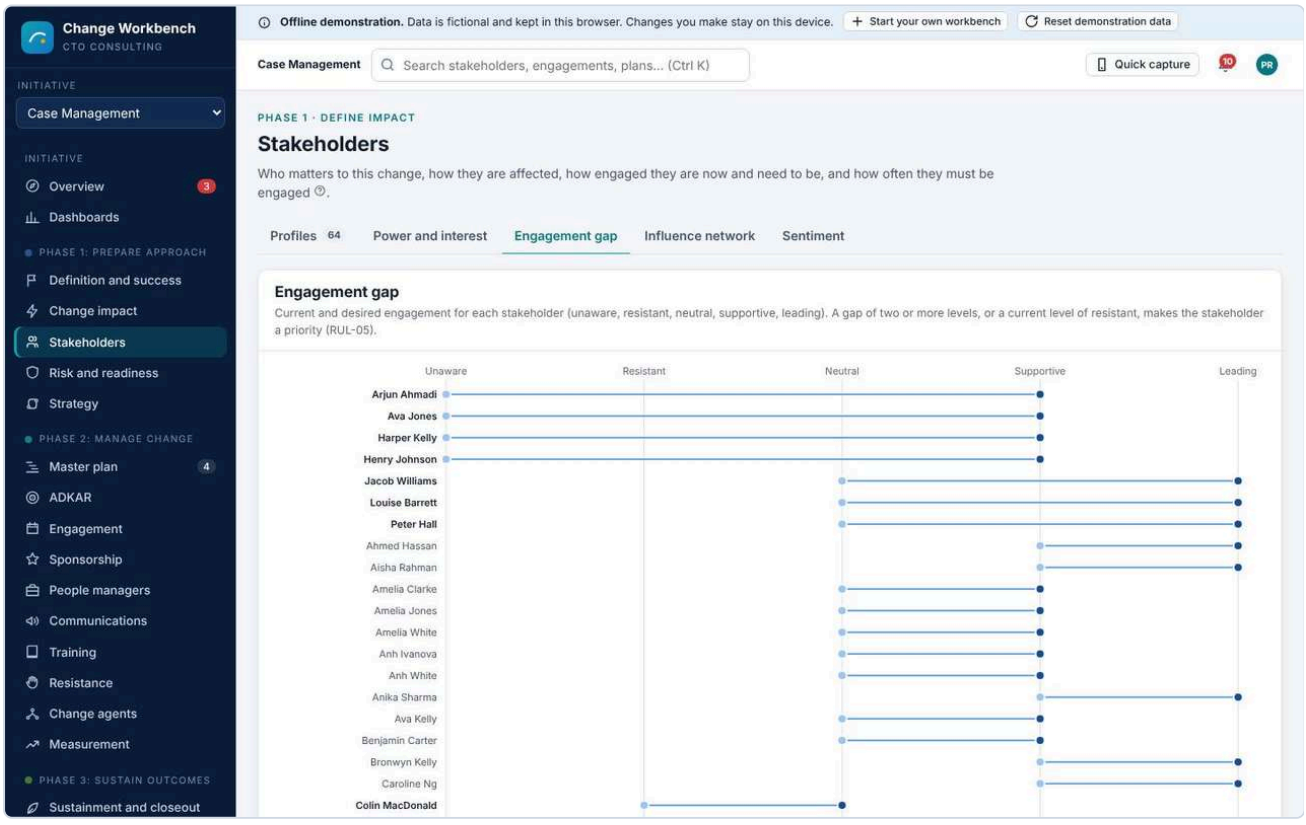

37 Stakeholders · Power and interest

The power and interest grid places each stakeholder in a quadrant, which sets how closely and how often they are engaged.

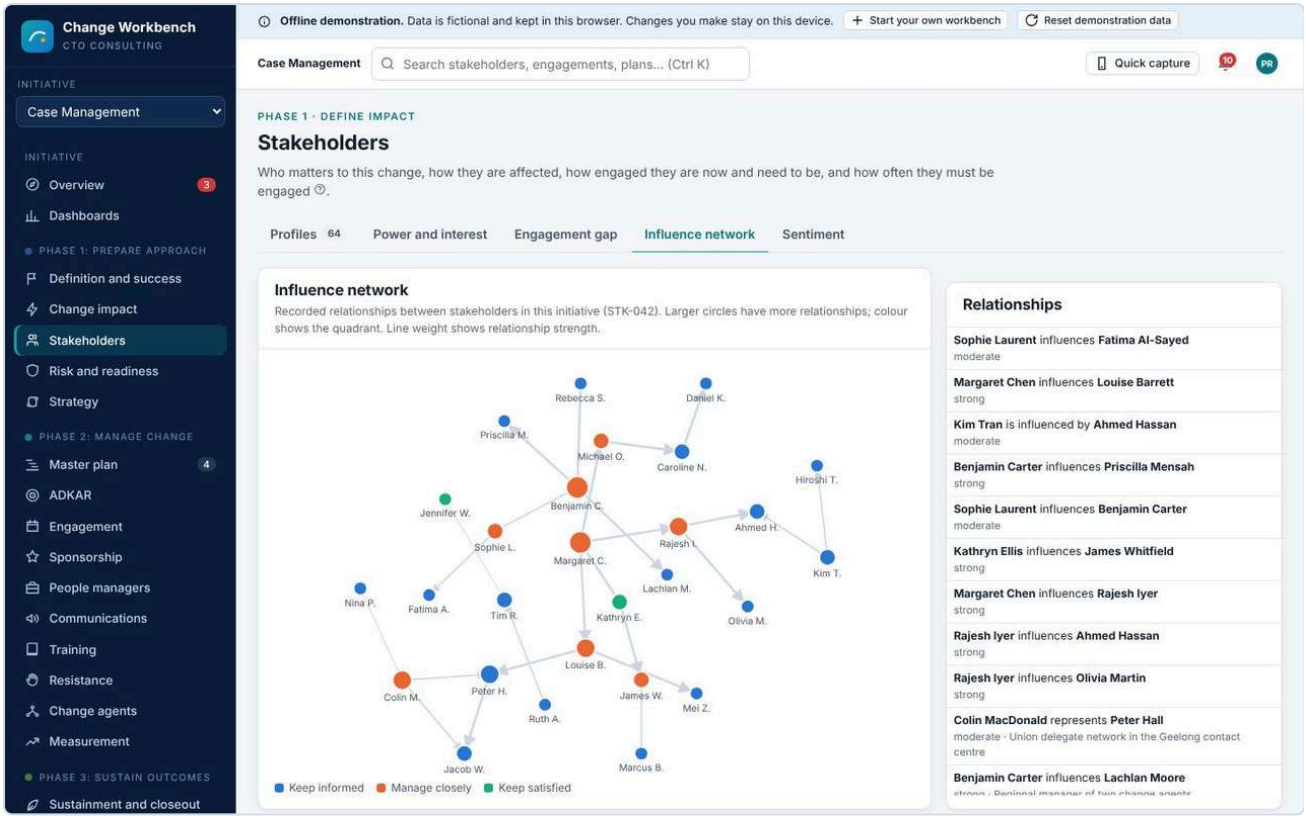

38 Stakeholders · Engagement gap

The engagement gap between each stakeholder's current and desired engagement, from unaware through resistant and neutral to supportive and leading.

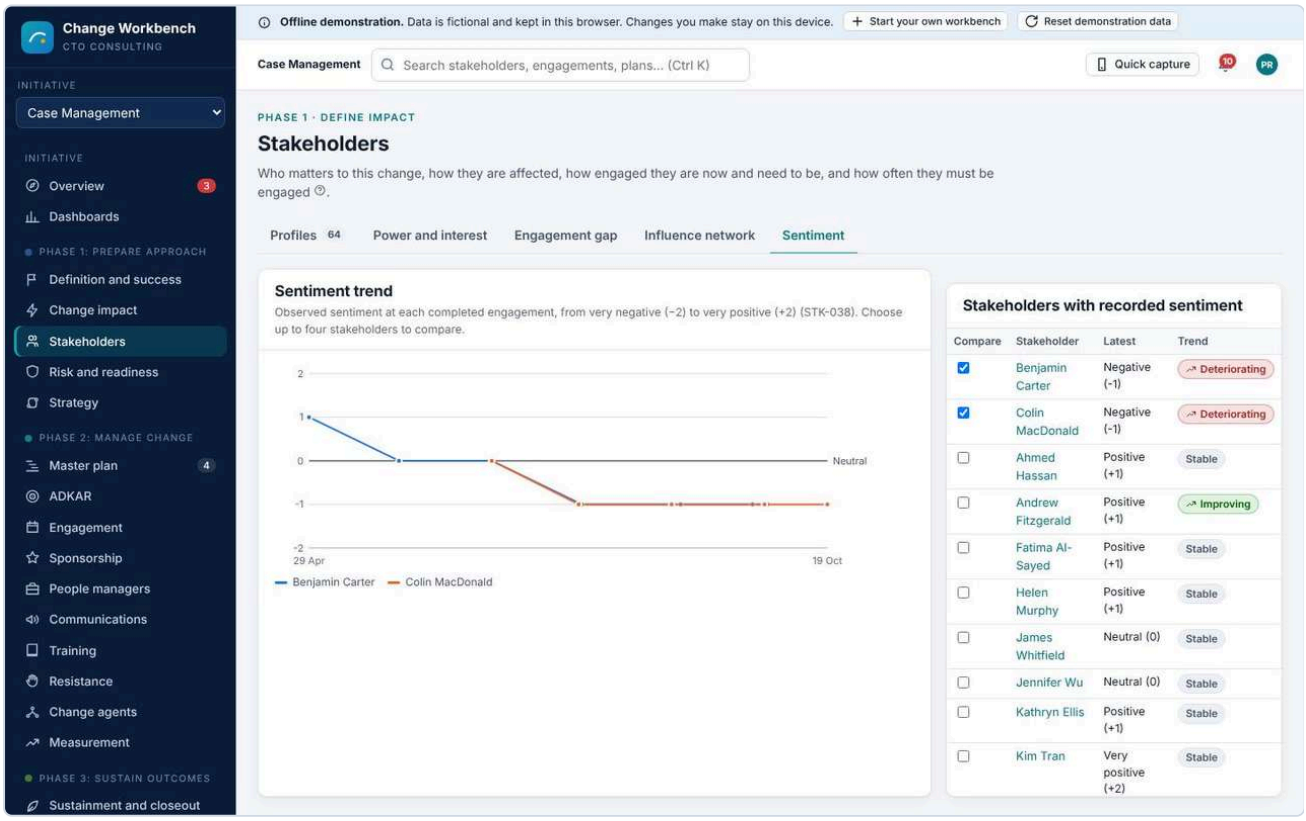

39 Stakeholders · Influence network

The influence network of recorded relationships, sized by connections, showing who influences whom.

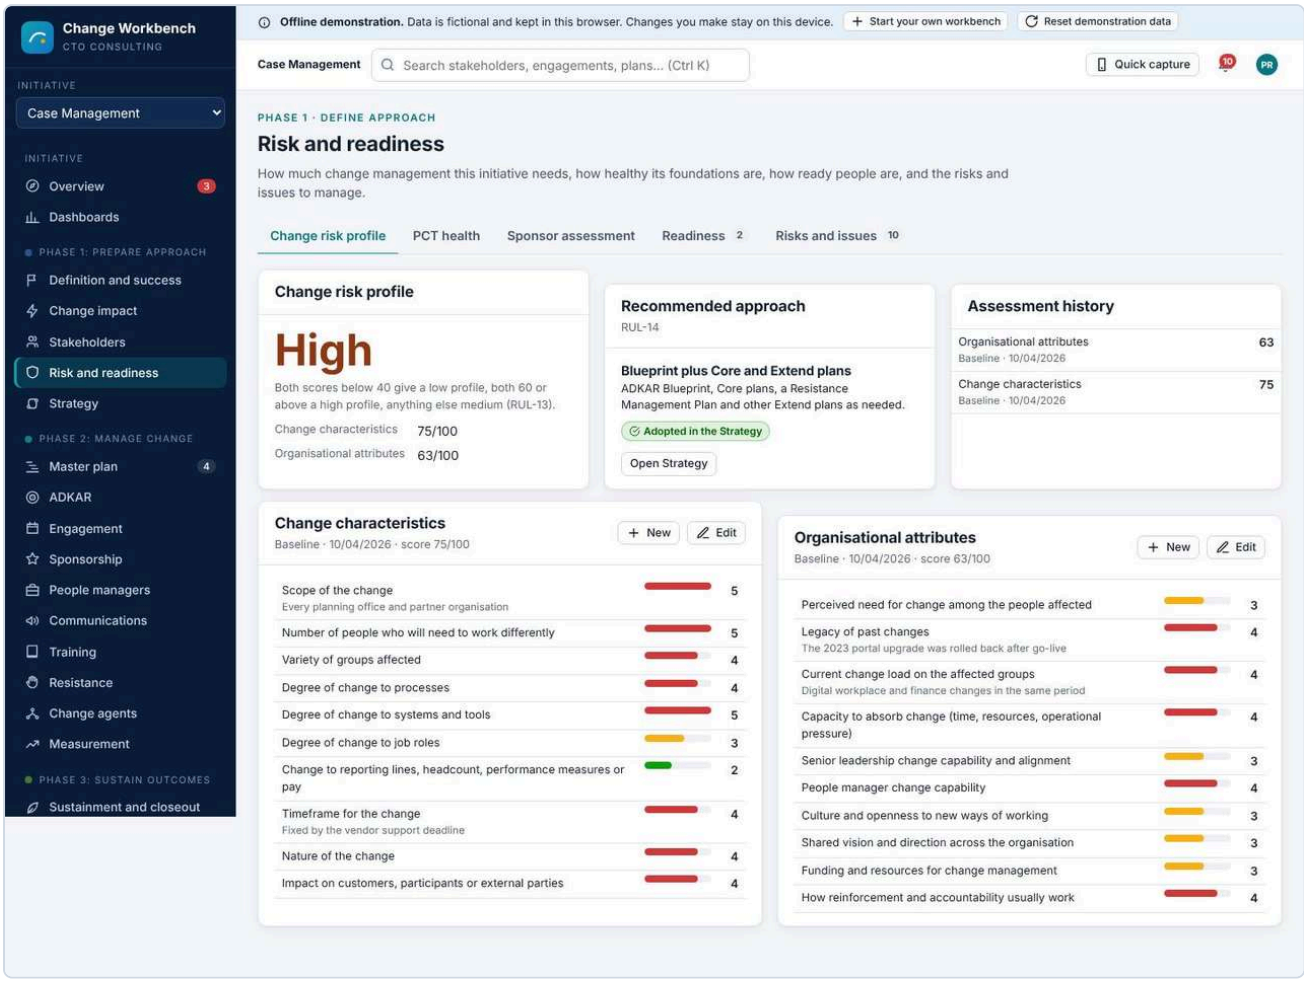

40 Stakeholders · Sentiment

Sentiment over time from completed engagements, flagging stakeholders whose sentiment is falling.

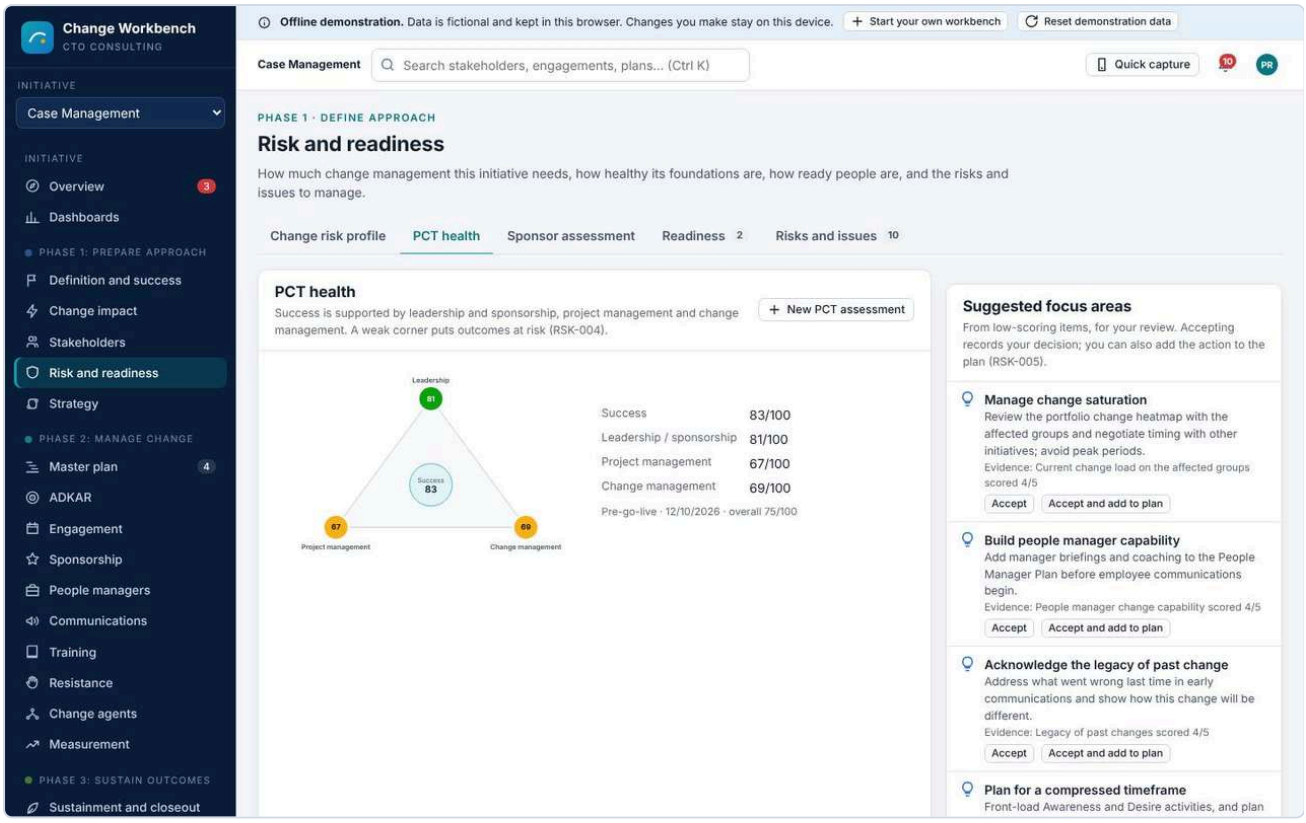

41 Risk and readiness · Change risk profile

The change risk profile: the characteristics of the change and the attributes of the organisation give the overall risk, which recommends how much of the Core and Extend plans is needed.

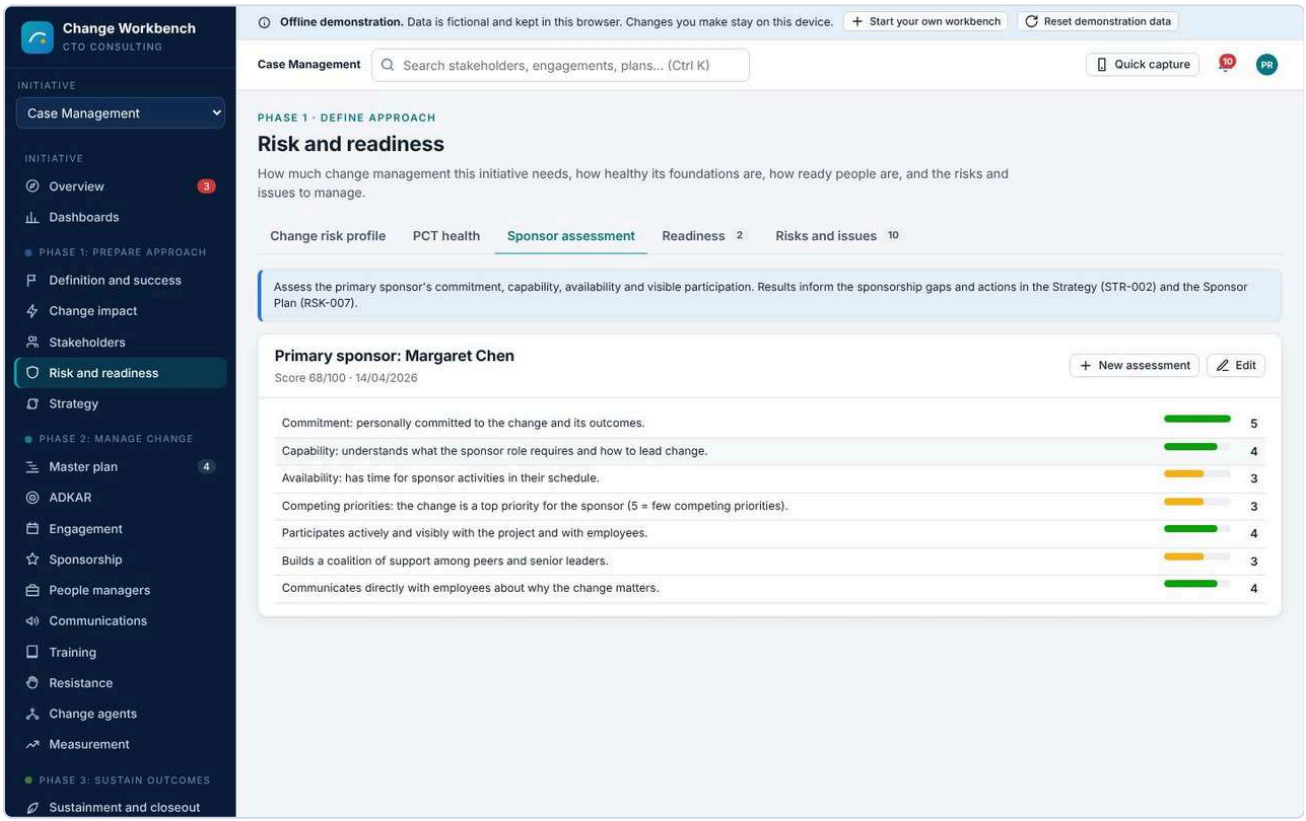

42 Risk and readiness · PCT health

PCT health: success, leadership and sponsorship, project management and change management, with suggested areas of focus.

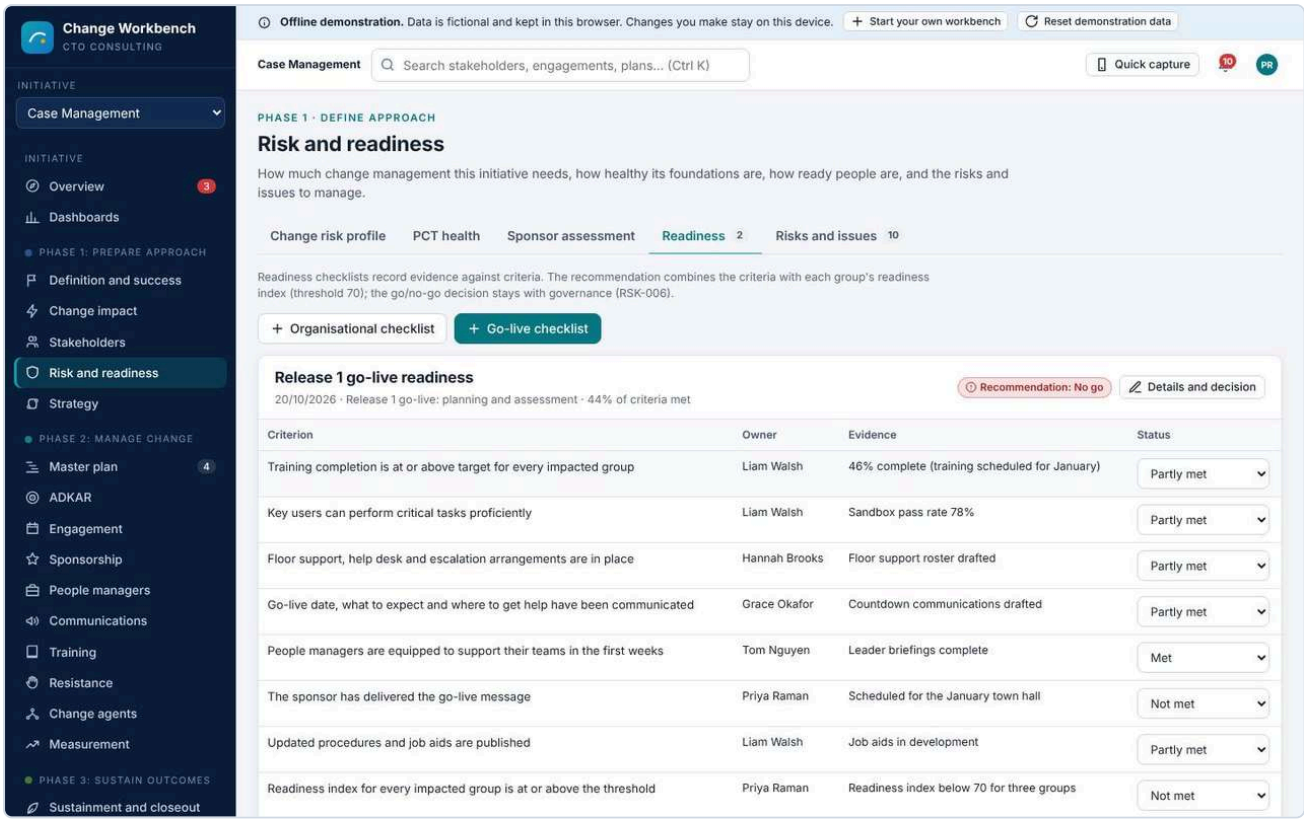

43 Risk and readiness · Sponsor assessment

The sponsor assessment of the primary sponsor's commitment, capability, availability and visible participation.

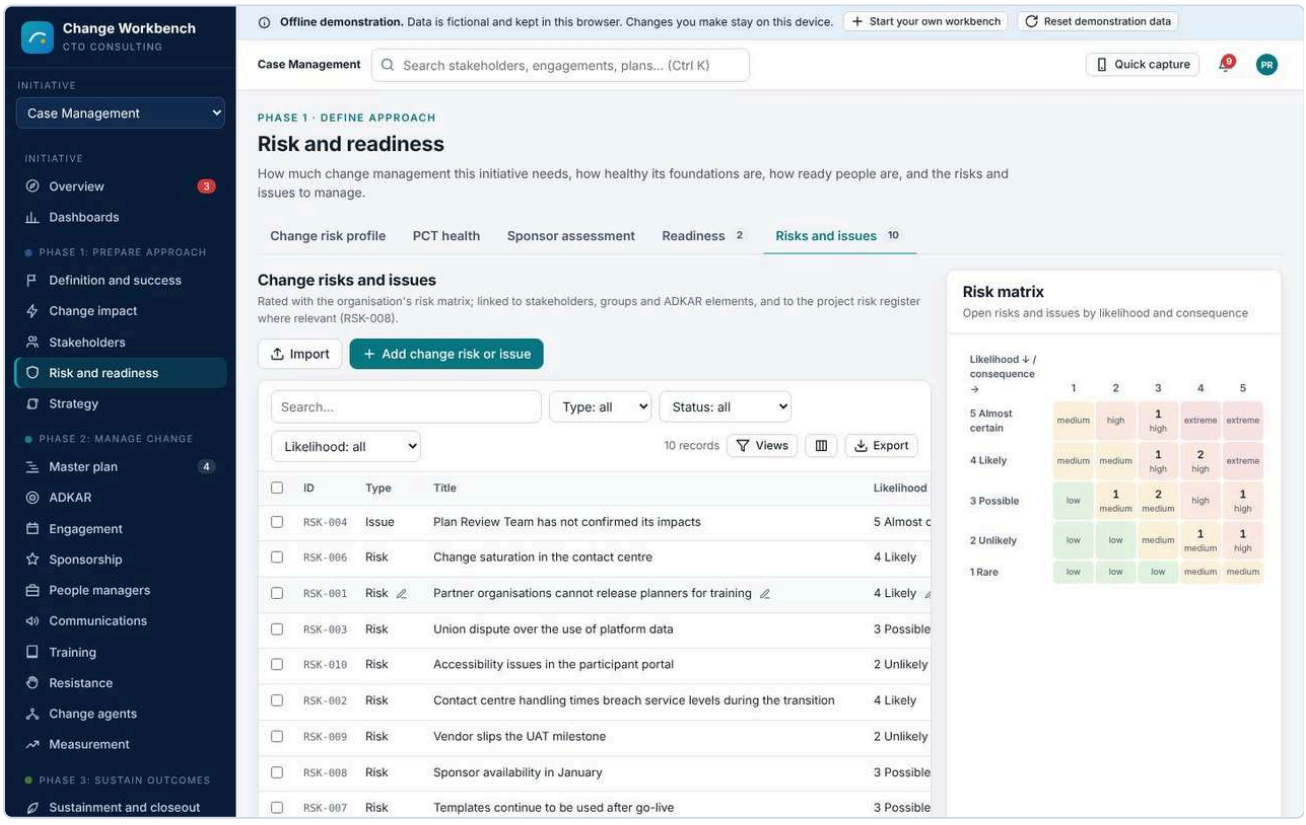

44 Risk and readiness · Readiness

Readiness checklists for each release, with the evidence, owner and status of each criterion and a go-live recommendation.

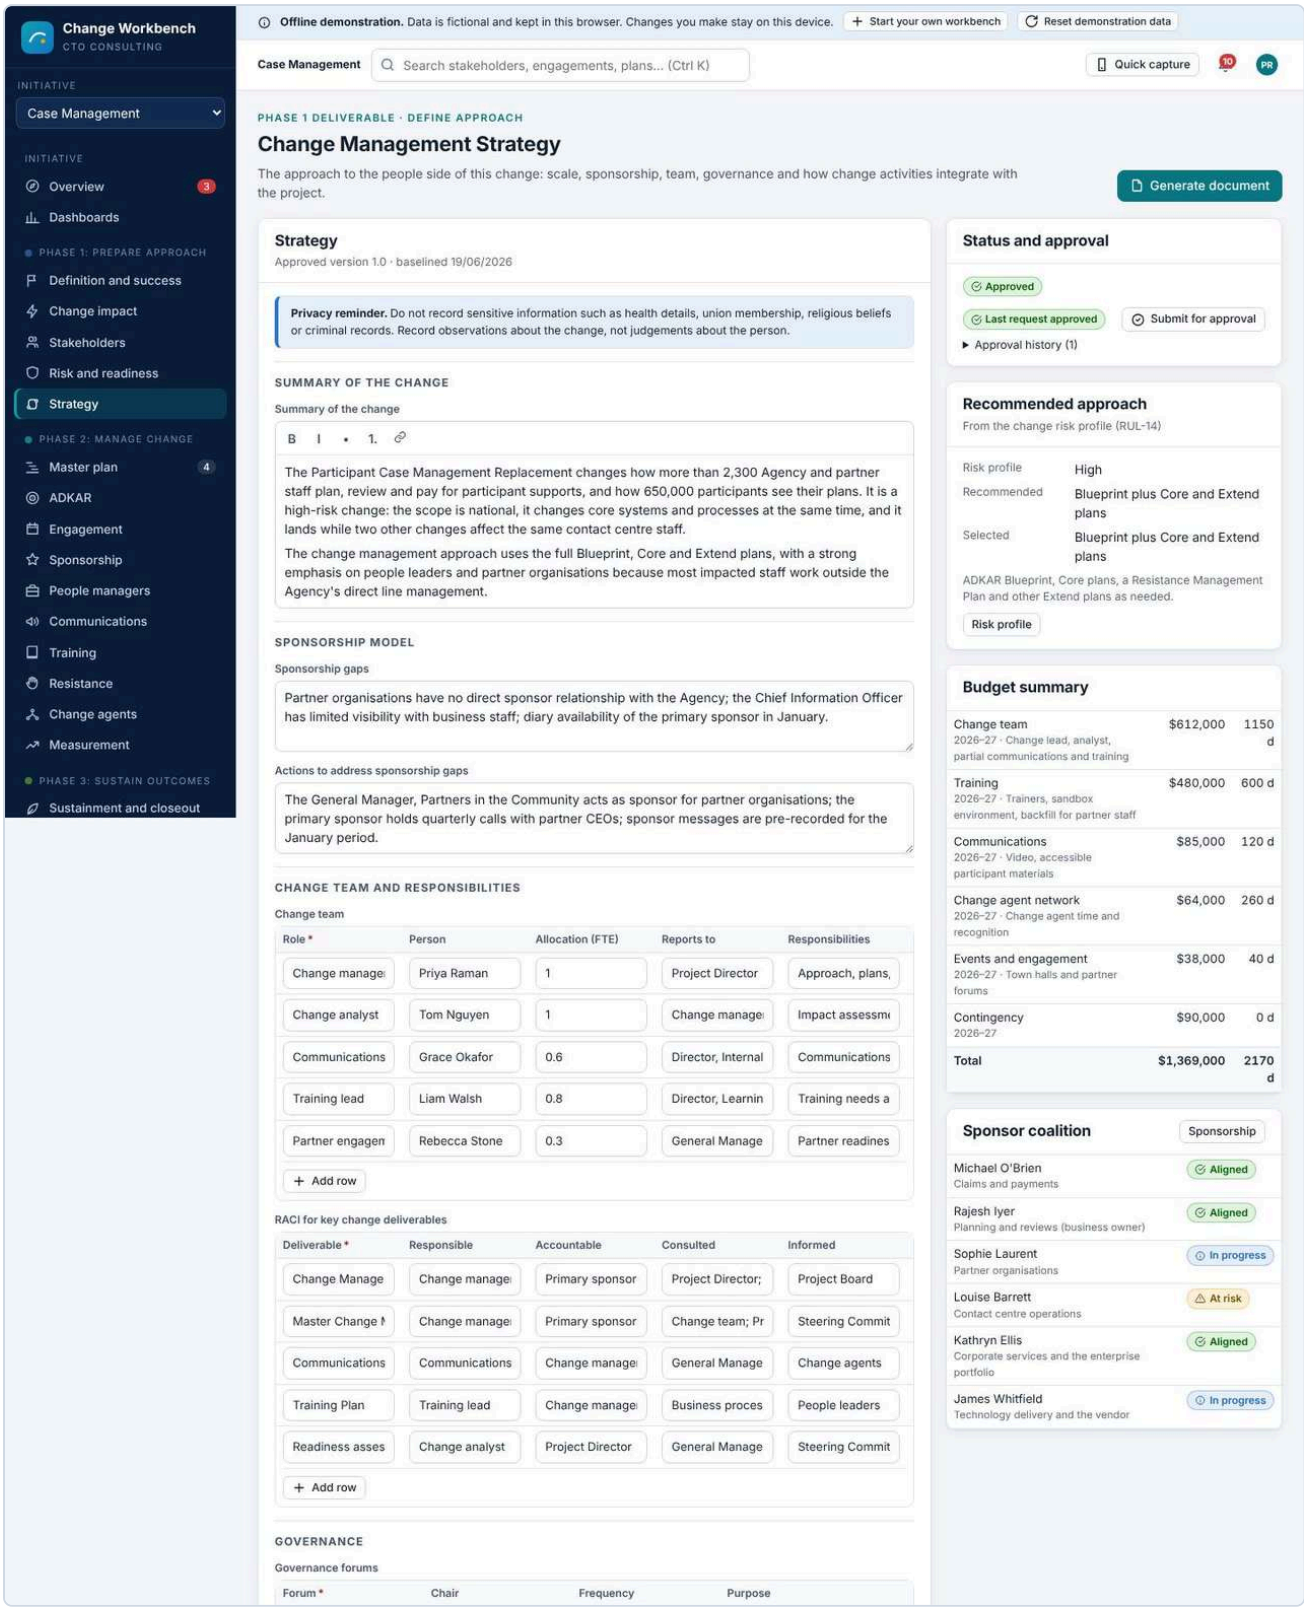

45 Risk and readiness · Risks and issues

Change risks and issues, rated with the organisation's risk matrix and linked to stakeholders, groups and ADKAR elements.

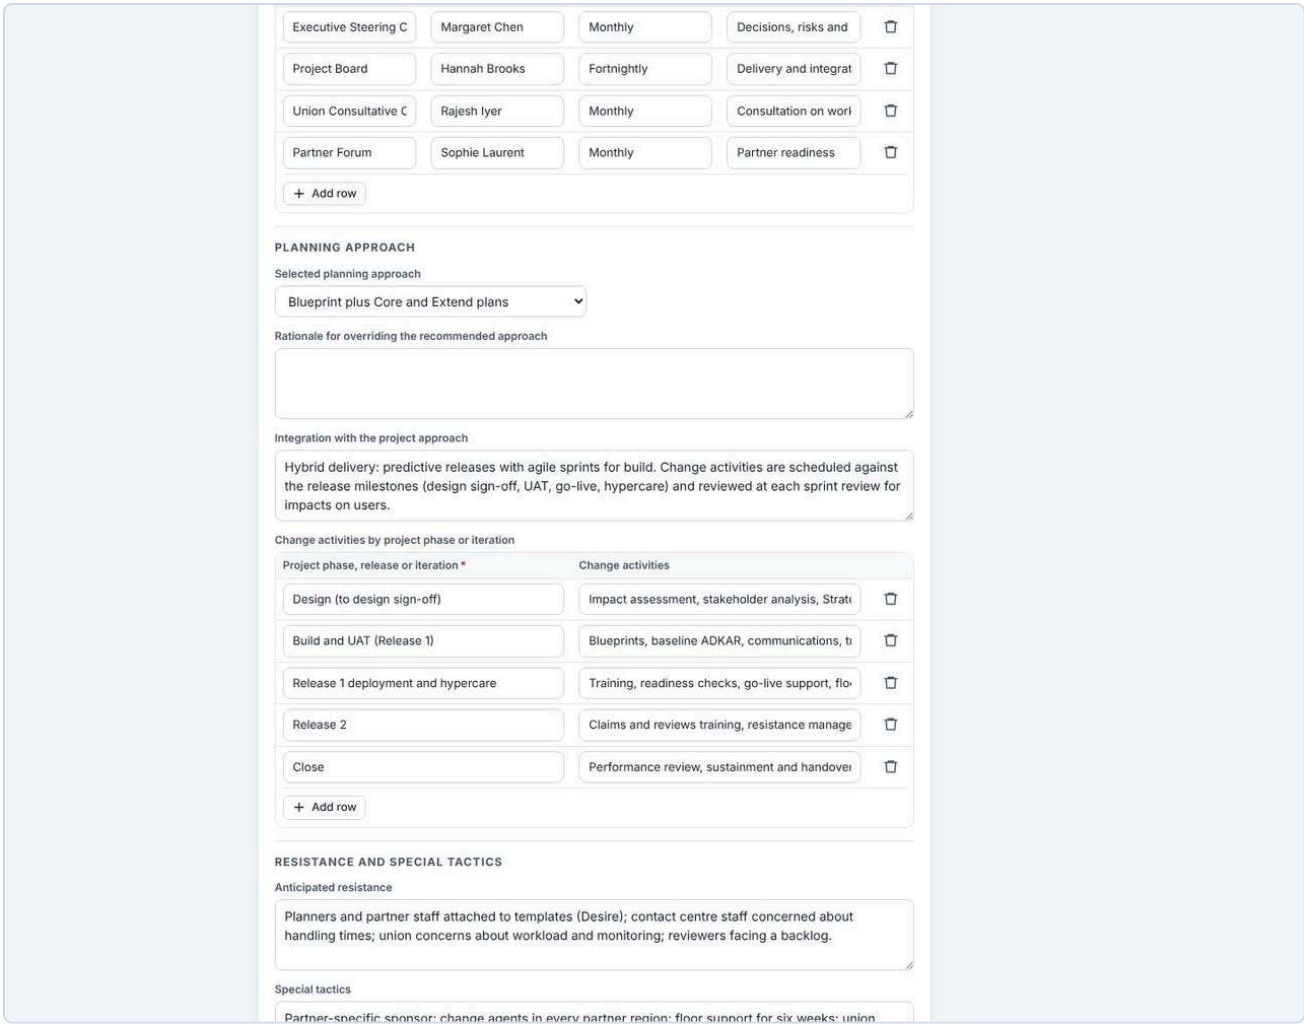

46 Change Management Strategy

The Change Management Strategy: summary of the change, sponsorship model, change team, approach, budget, status and approval, ready to generate as a document.

46 Change Management Strategy (continued, 2 of 2)

PLANNING APPROACH

Selected planning approach

Blueprint plus Core and Extend plans

Rationale for overriding the recommended approach

Integration with the project approach

Hybrid delivery: predictive releases with agile sprints for build. Change activities are scheduled against the release milestones (design sign-off, UAT, go-live, hypercare) and reviewed at each sprint review for impacts on users.

Change activities by project phase or iteration

Project phase, release or iteration *	Change activities
Design (to design sign-off)	Impact assessment, stakeholder analysis, Strat
Build and UAT (Release 1)	Blueprints, baseline ADKAR, communications, t
Release 1 deployment and hypercare	Training, readiness checks, go-live support, flo
Release 2	Claims and reviews training, resistance manage
Close	Performance review, sustainment and handover

+ Add row

RESISTANCE AND SPECIAL TACTICS

Anticipated resistance

Planners and partner staff attached to templates (Desire); contact centre staff concerned about handling times; union concerns about workload and monitoring; reviewers facing a backlog.

Special tactics

Partner-specific sponsor; change agents in every partner region; floor support for six weeks; union

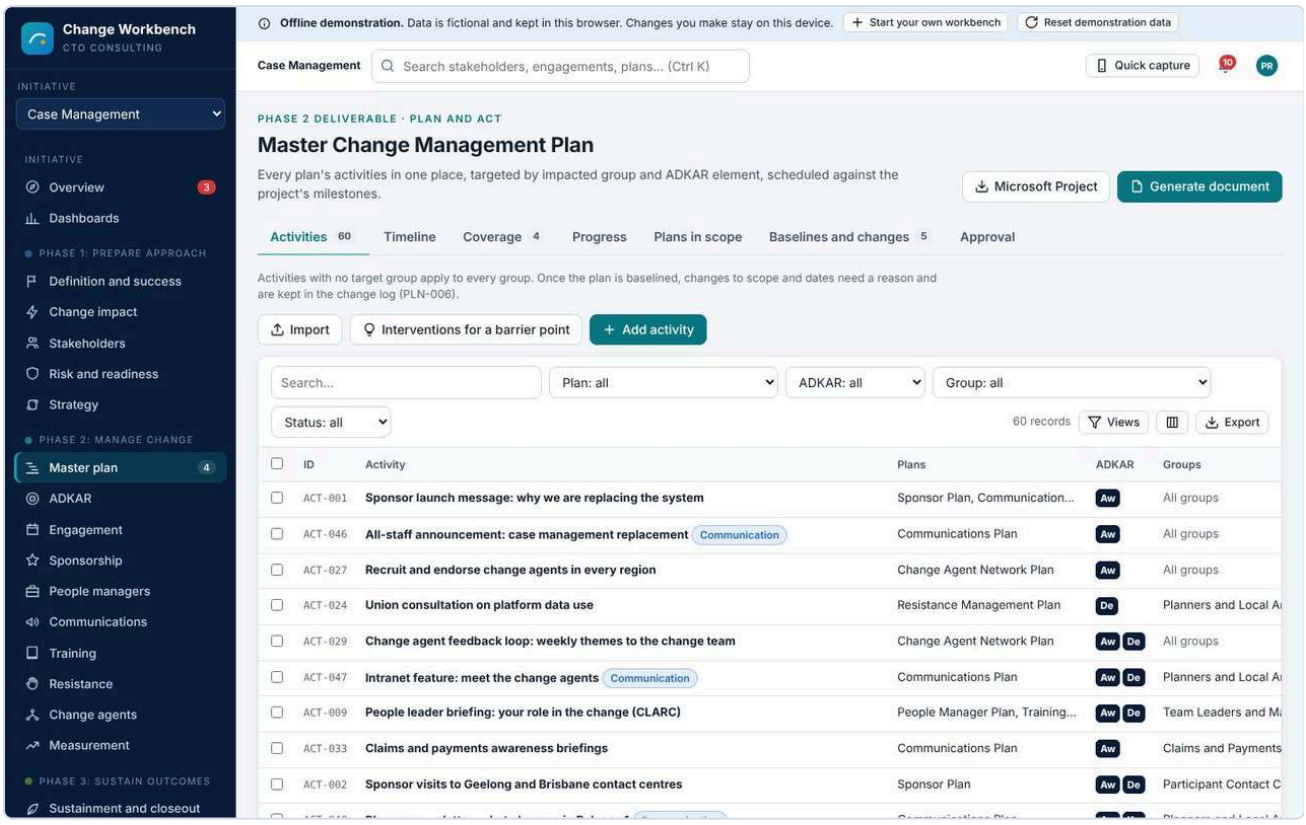

PART 6 OF 14

Phase 2 · Manage Change

Plan and act through the Master Change Management Plan and ADKAR assessments, then the Core and Extend plans: sponsorship, people managers, communications, training, resistance and change agents. Measurement tracks whether it is working.

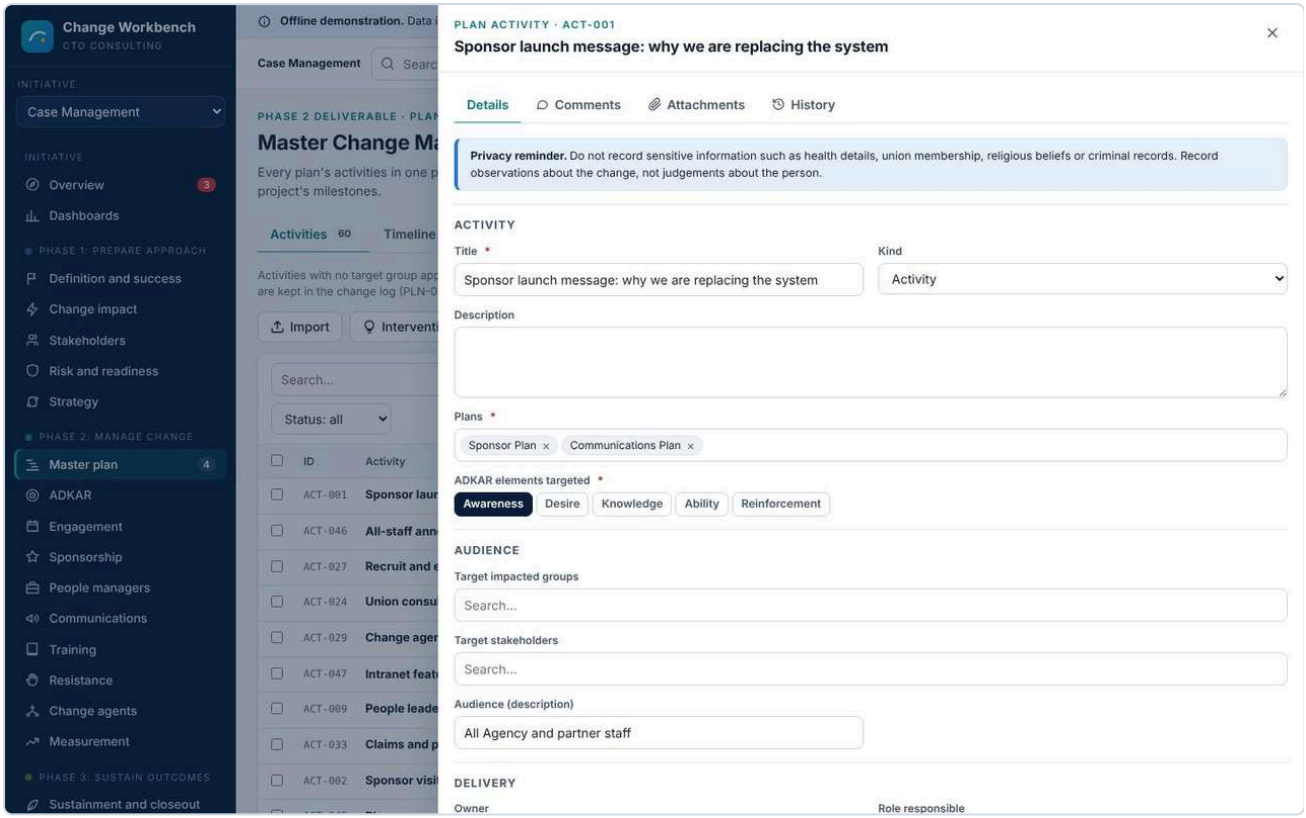

47 Master plan · Activities

Activities in the Master Change Management Plan, across every plan, each targeted at groups and ADKAR elements and scheduled against the project's milestones.

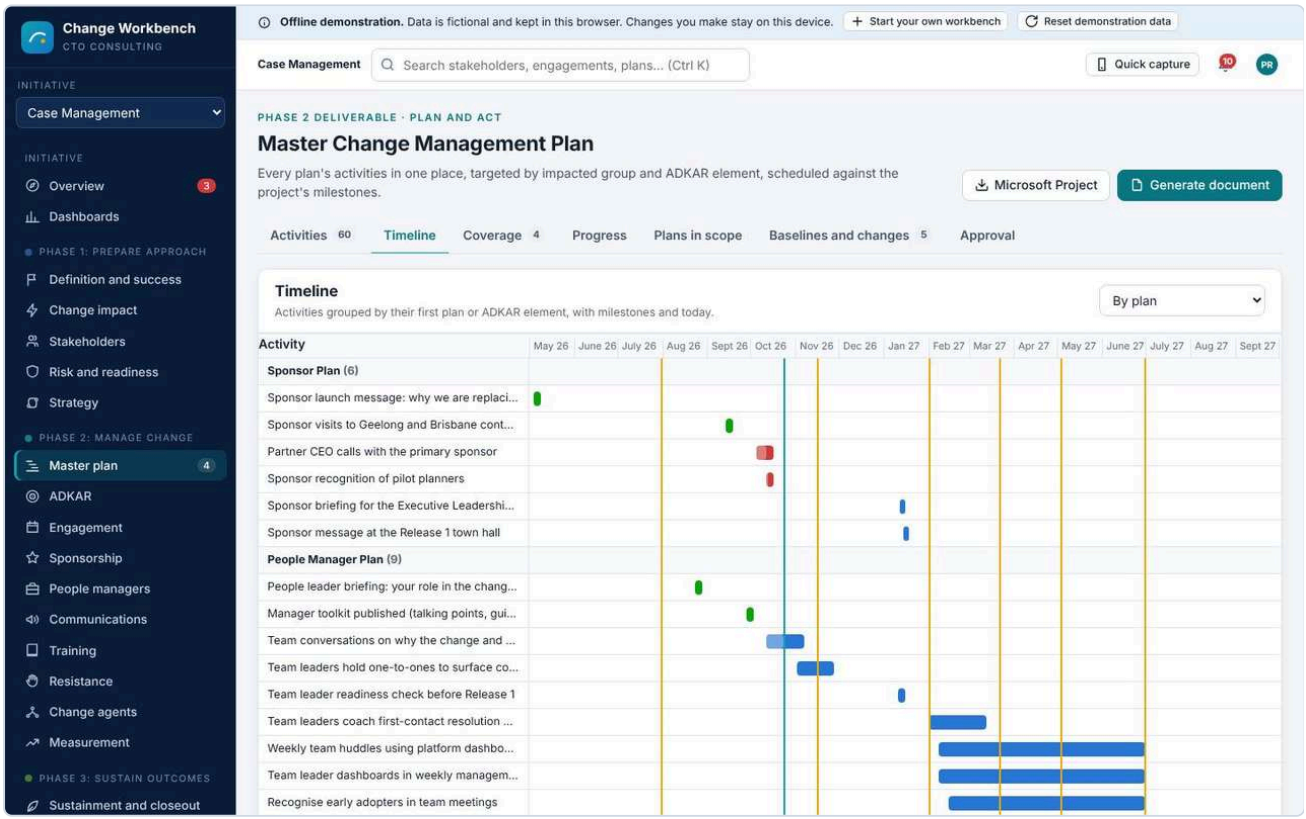

48 Master plan · An activity

An activity in the side panel, with its details, comments, attachments and history.

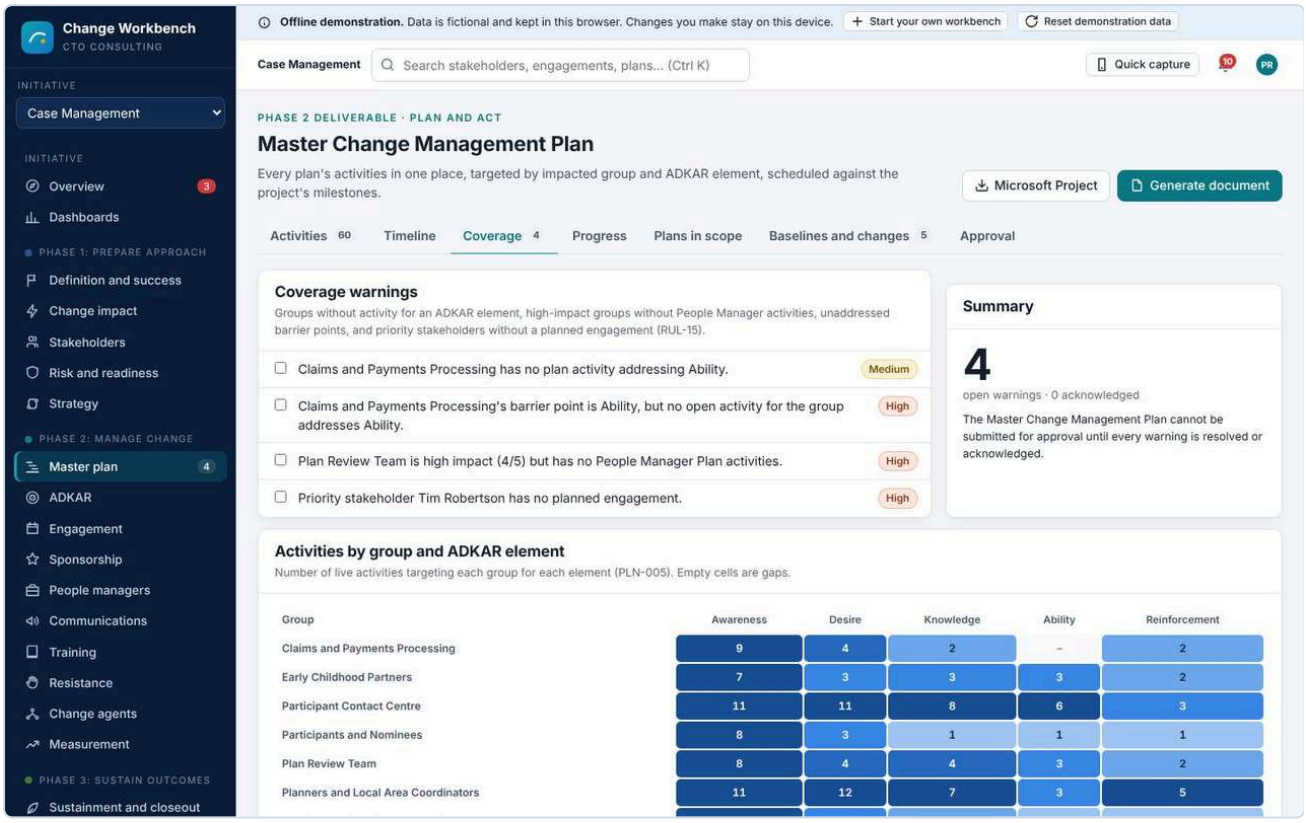

49 Master plan · Timeline

The plan as a timeline, grouped by plan, with the milestones marked.

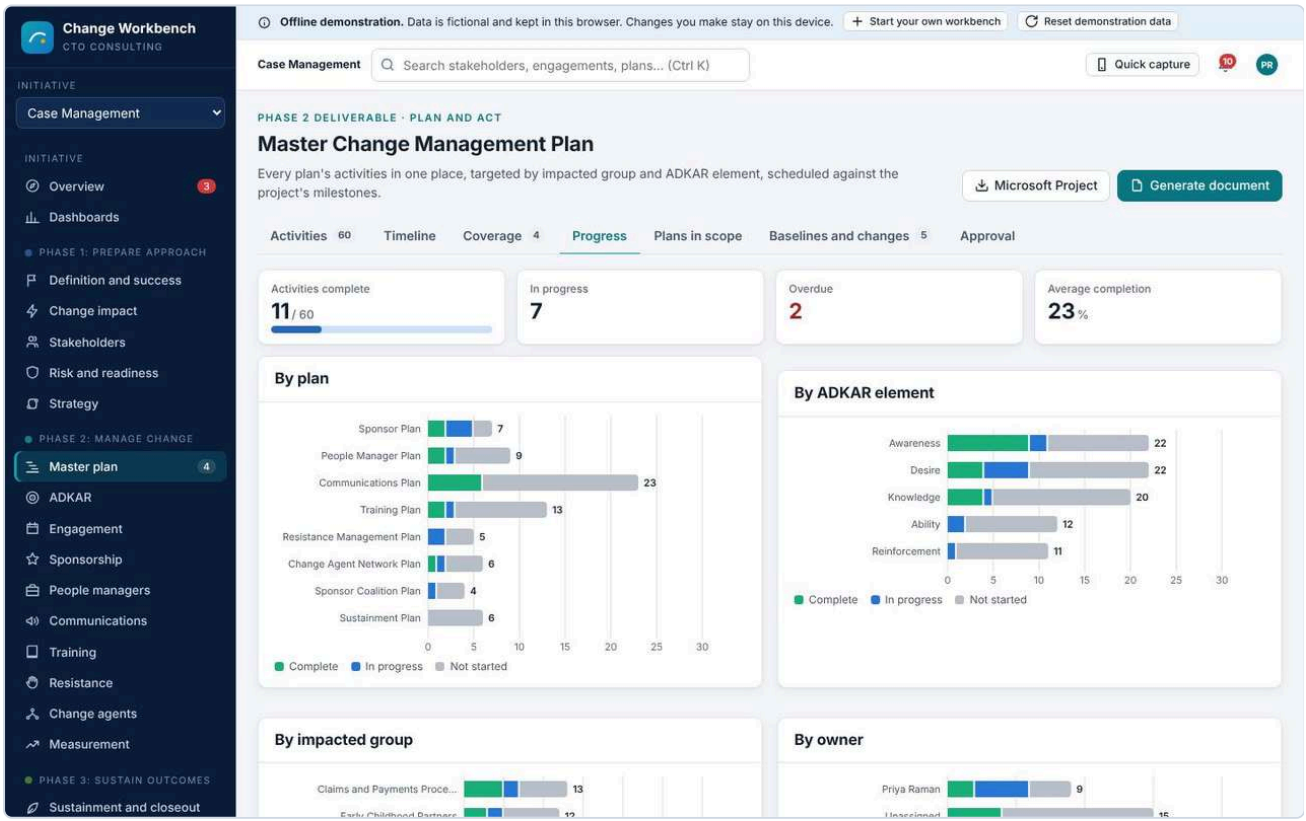

50 Master plan · Coverage

Coverage warnings, such as a group with nothing planned at its barrier point, and activities counted by group and ADKAR element.

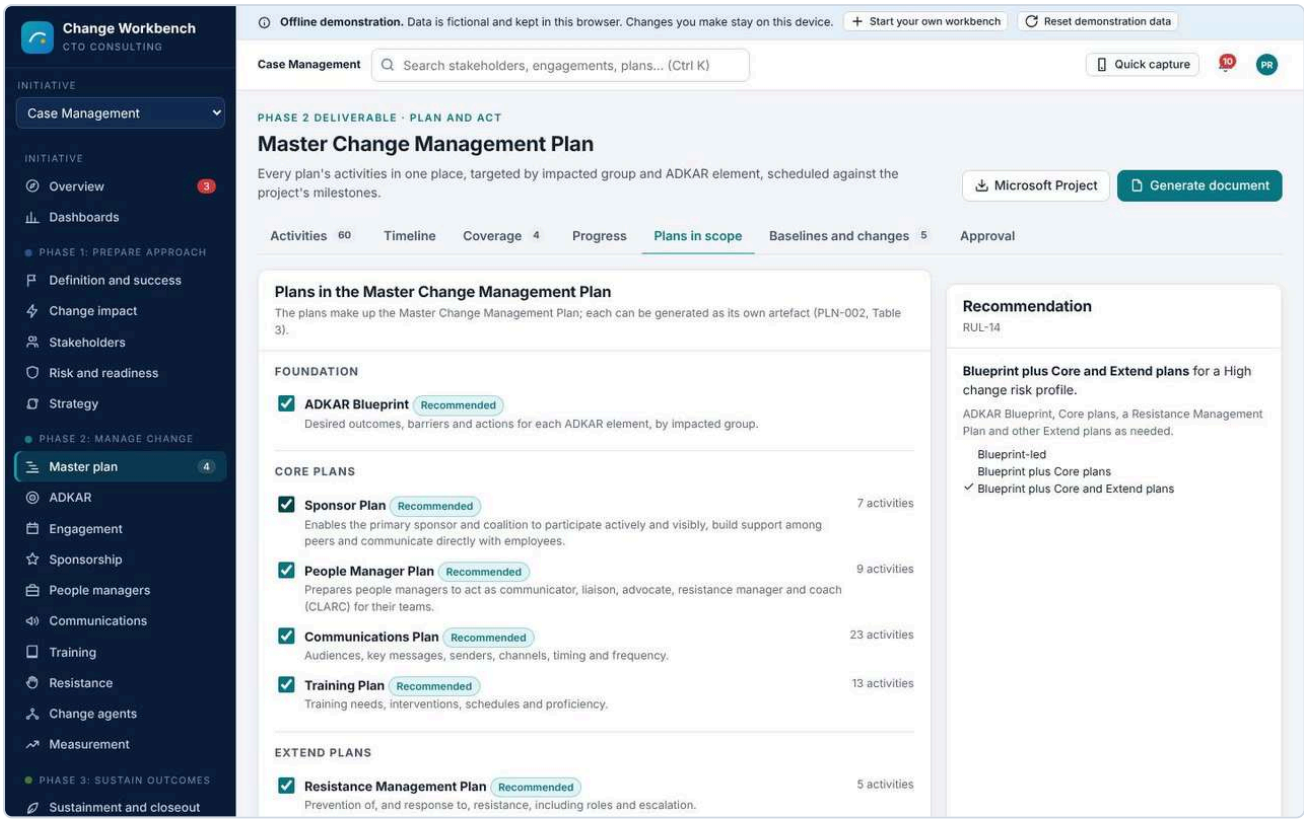

51 Master plan · Progress

Progress by plan, ADKAR element, impacted group and owner.

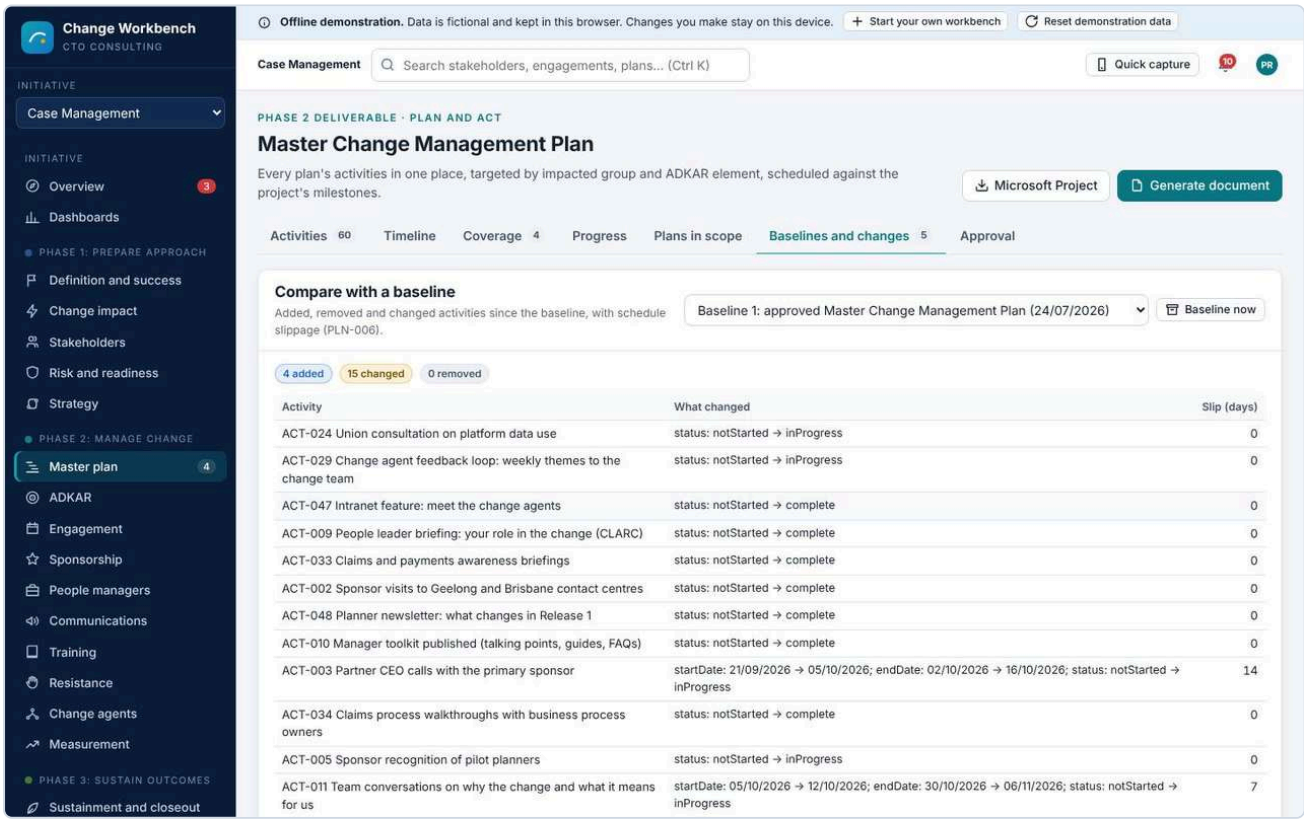

52 Master plan · Plans in scope

The plans in scope: the ADKAR Blueprint, the Core plans and the Extend plans recommended by the risk profile.

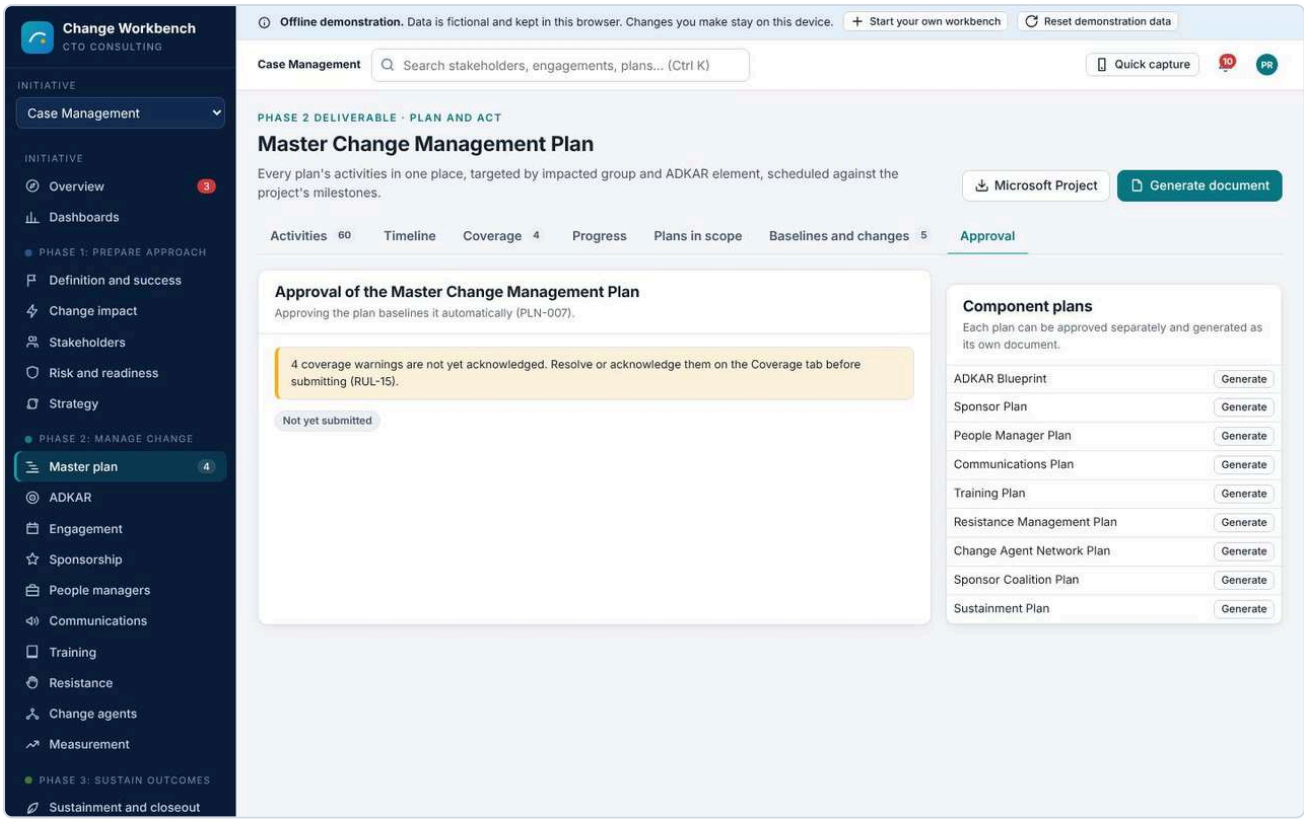

53 Master plan · Baselines and changes

Baselines and changes: the plan compared with an approved baseline, showing what was added, changed or removed.

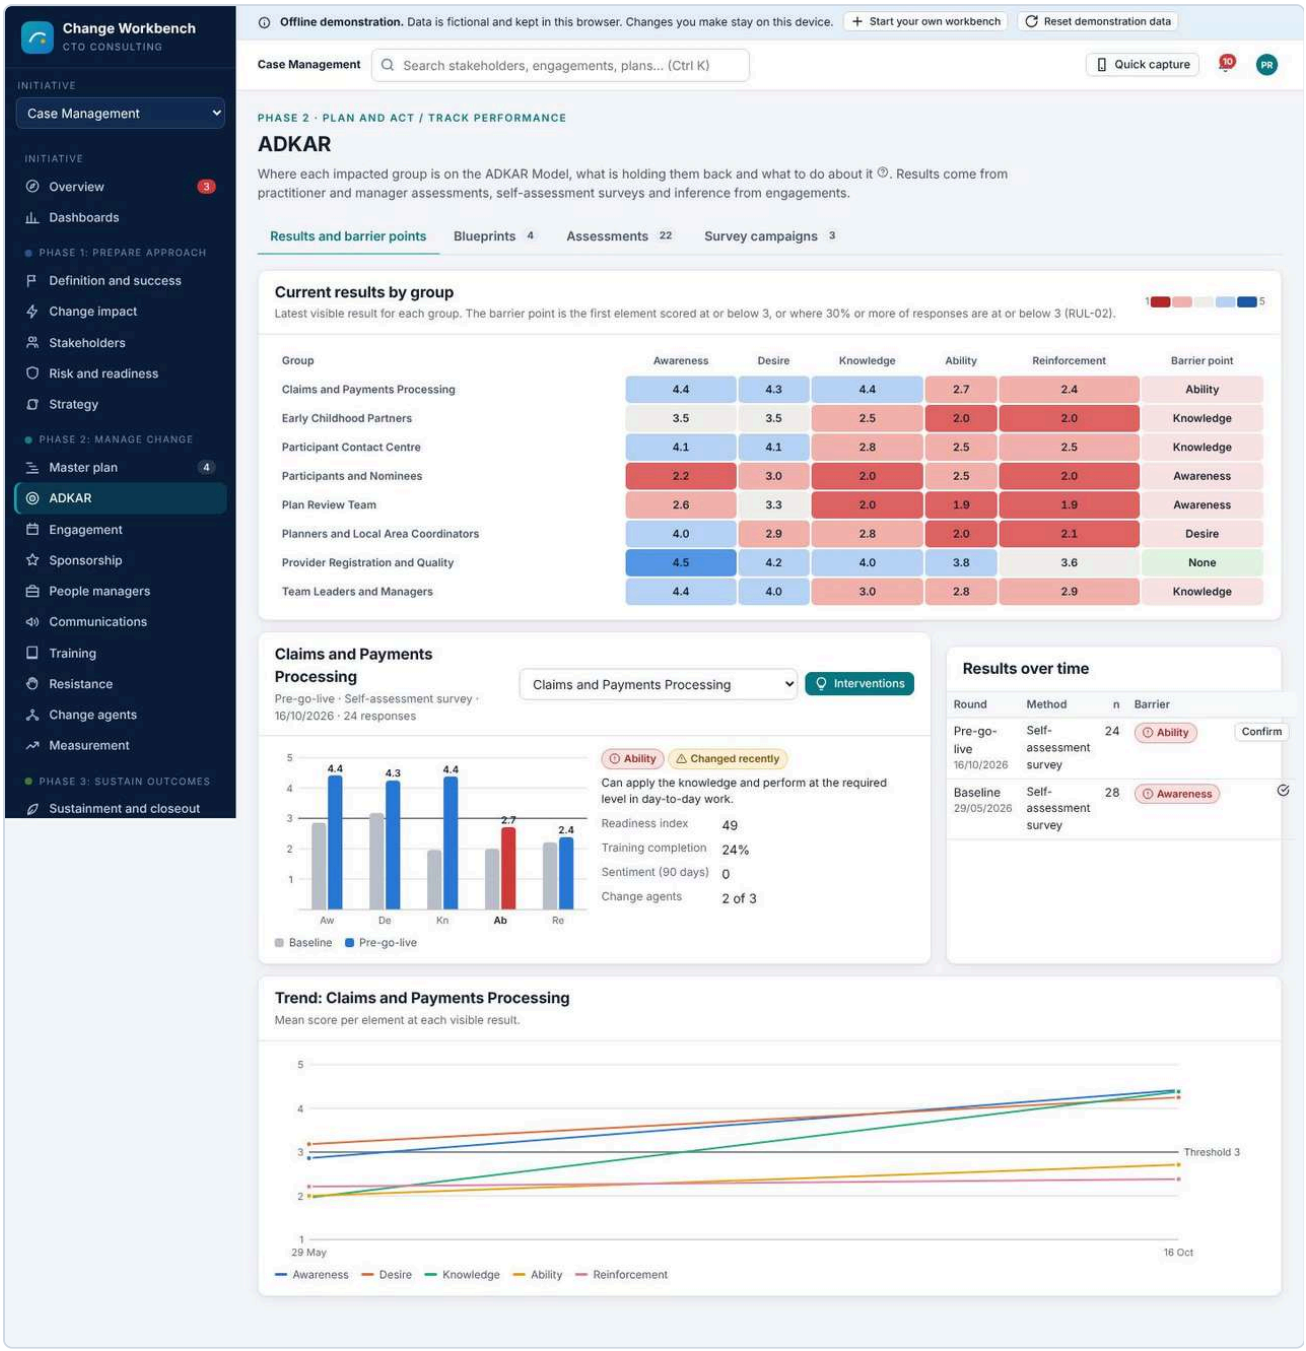

54 Master plan · Approval

Approval of the Master Change Management Plan, with each component plan generated or approved on its own.

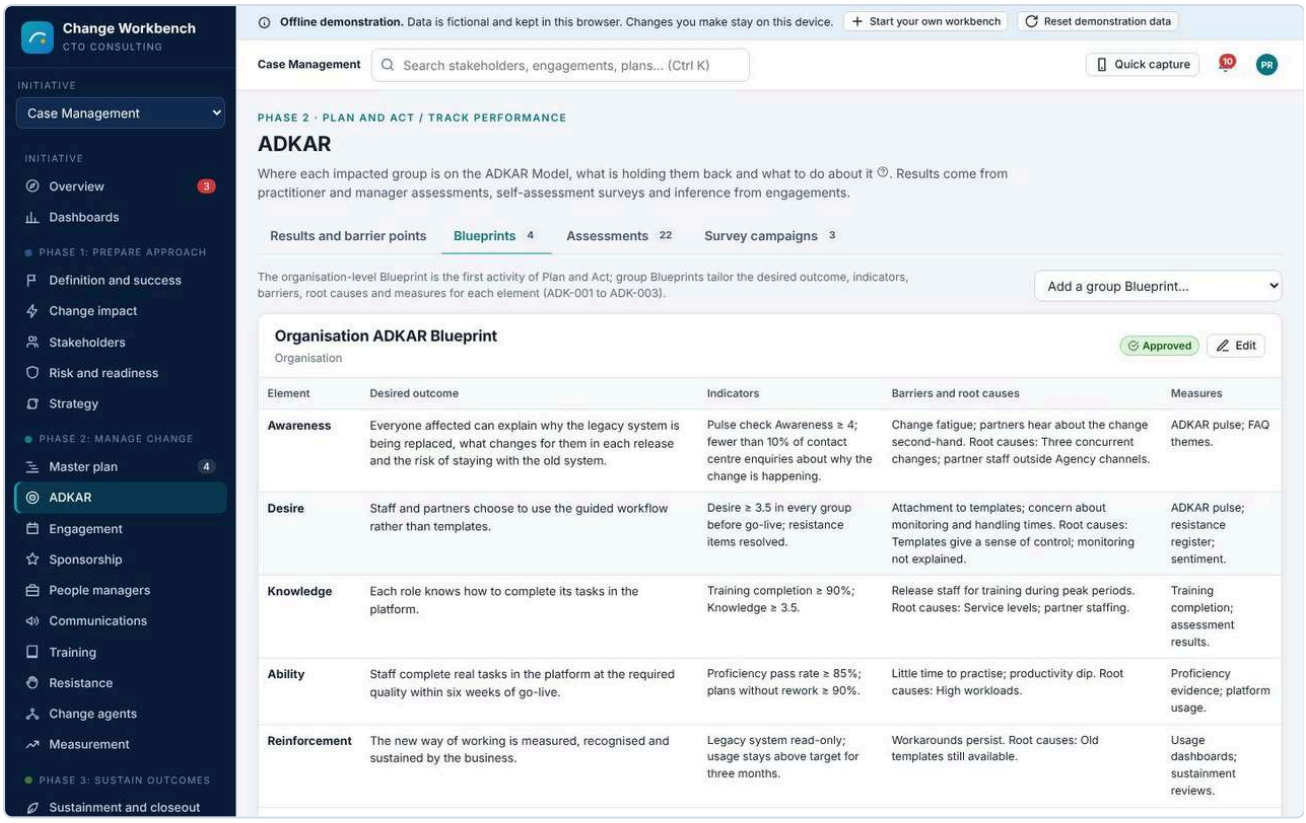

55 ADKAR · Results and barrier points

ADKAR results by group with each group's barrier point, the selected group's profile and suggested interventions, and results over time.

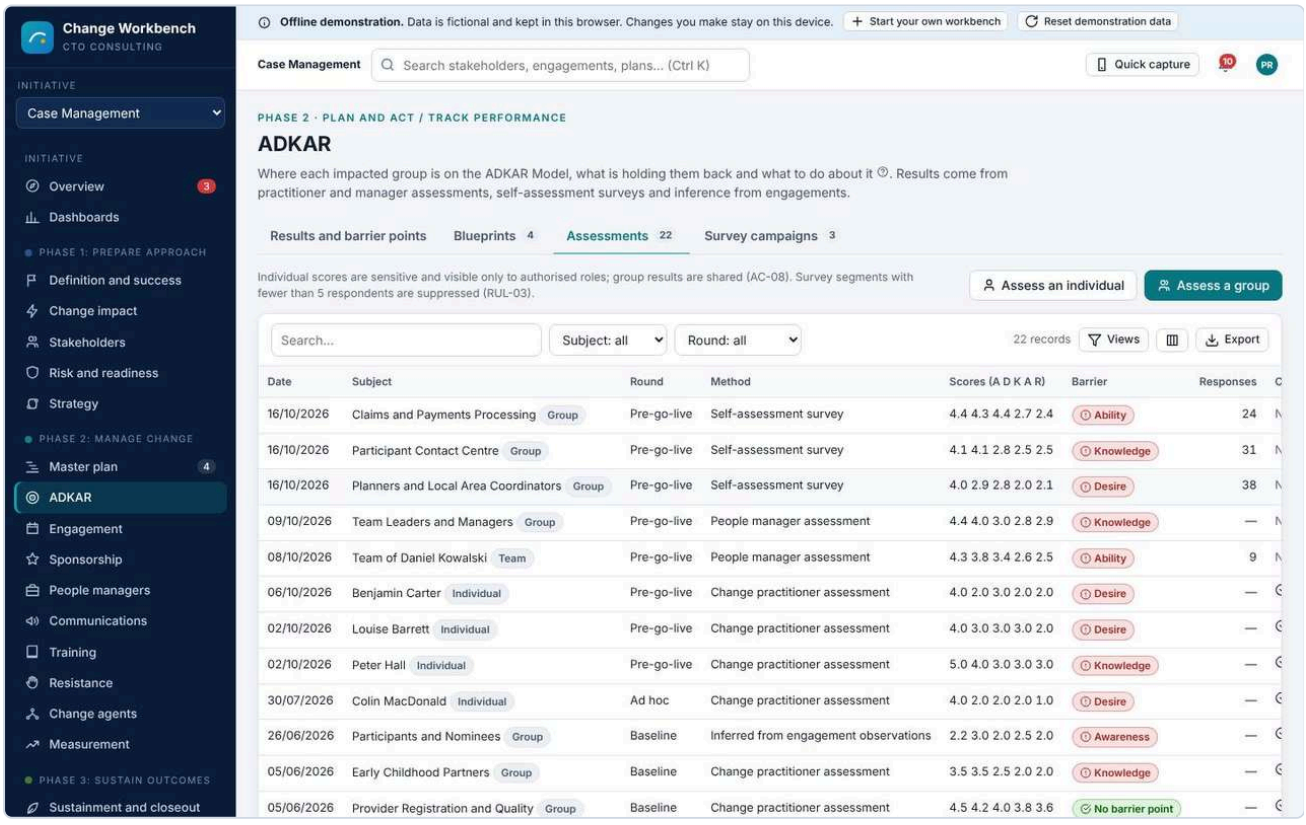

56 ADKAR · Blueprints

ADKAR Blueprints for the organisation and each group: desired outcomes, indicators, barriers and measures for each element.

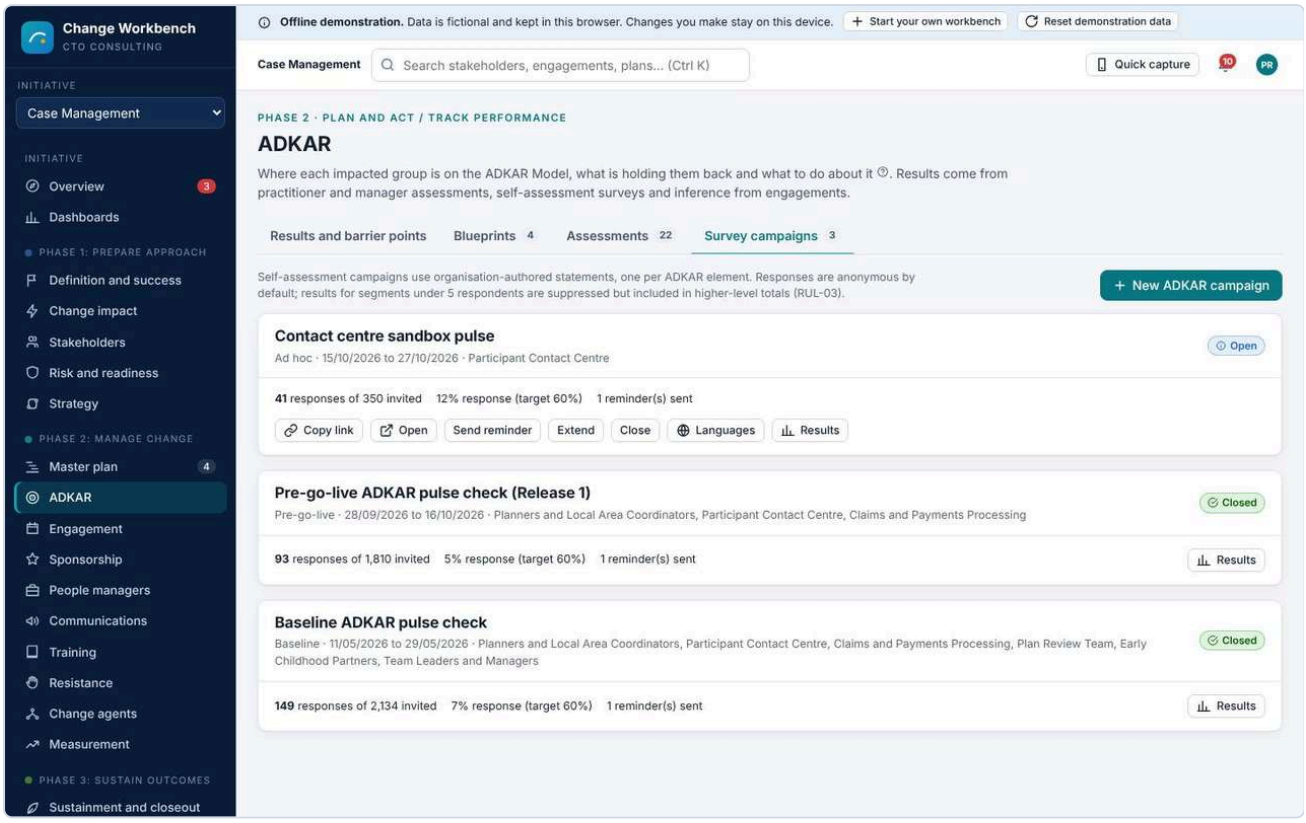

57 ADKAR · Assessments

ADKAR assessments of groups, teams and individuals, by practitioners, managers, surveys or inference from engagements.

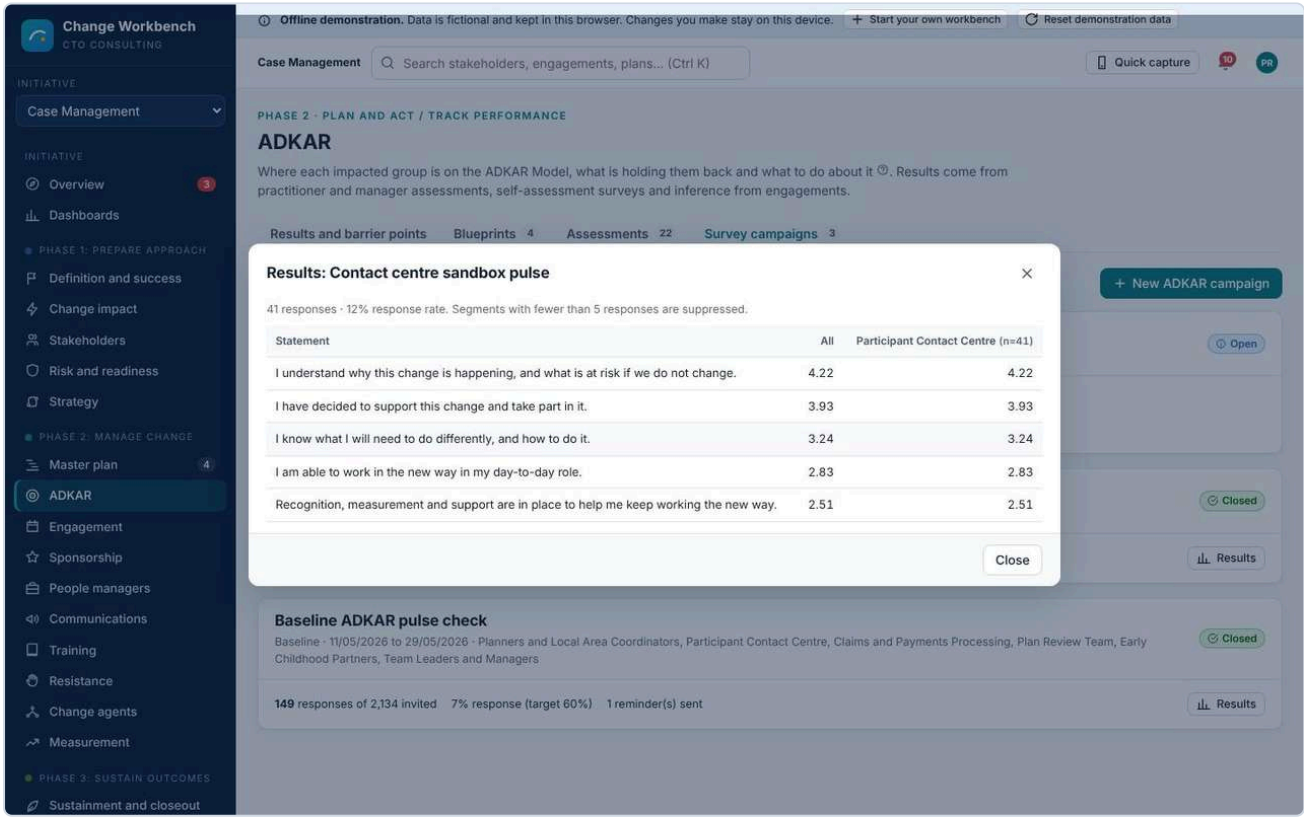

58 ADKAR · Survey campaigns

Survey campaigns: anonymous ADKAR self-assessments, with response rates, reminders, the survey link and results.

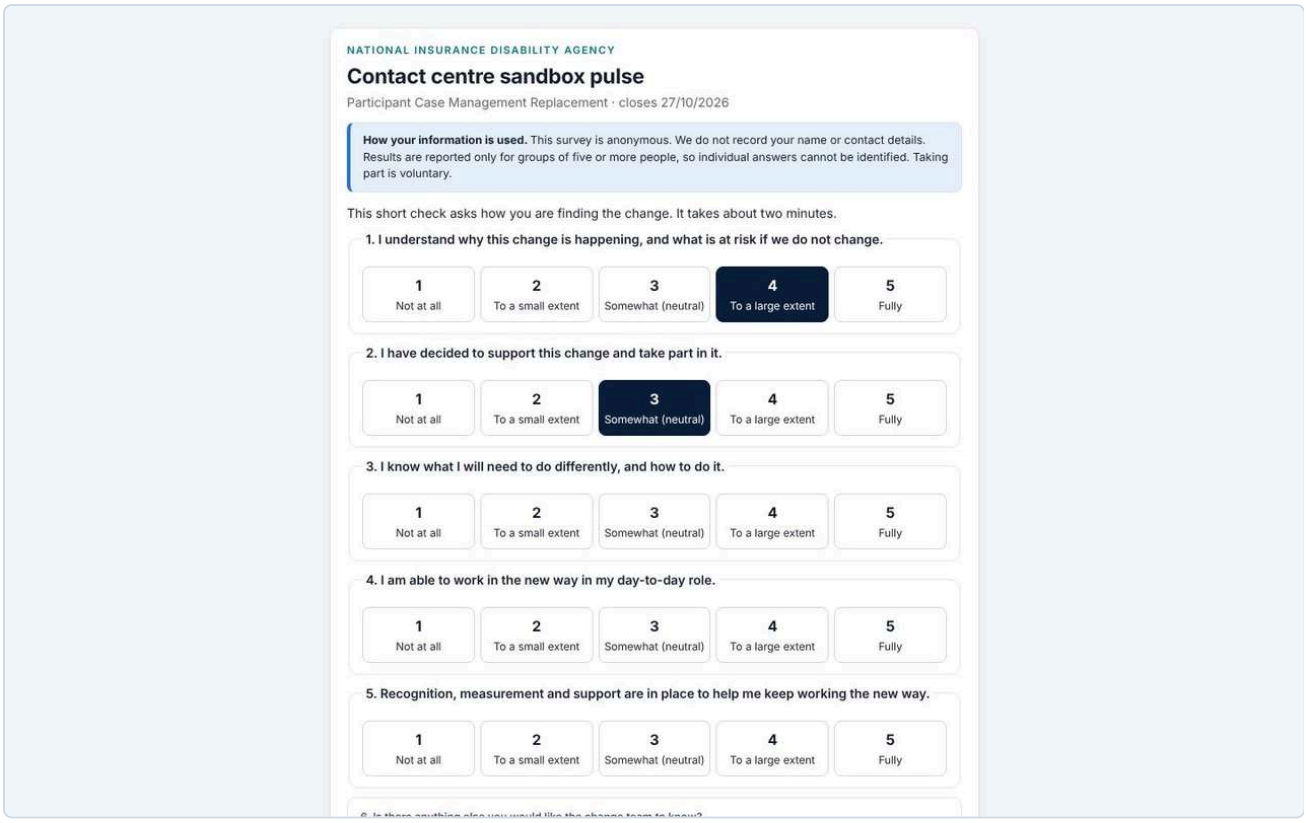

59 ADKAR · Survey results

Survey results by group, with groups below the minimum size suppressed to protect anonymity.

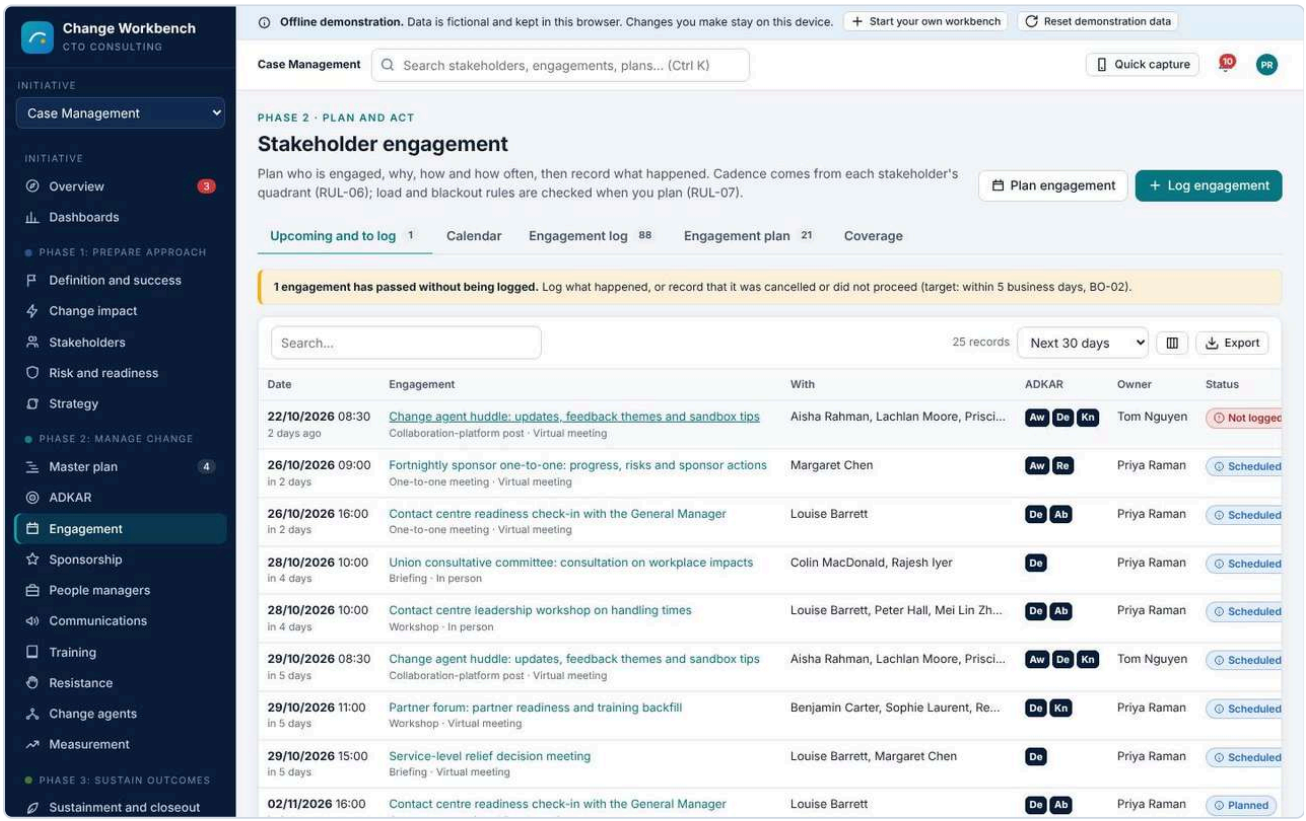

60 The survey, as a respondent sees it

The survey as respondents see it: how their information is used, then a five-point scale for each statement. Offline, responses are entered in this browser.

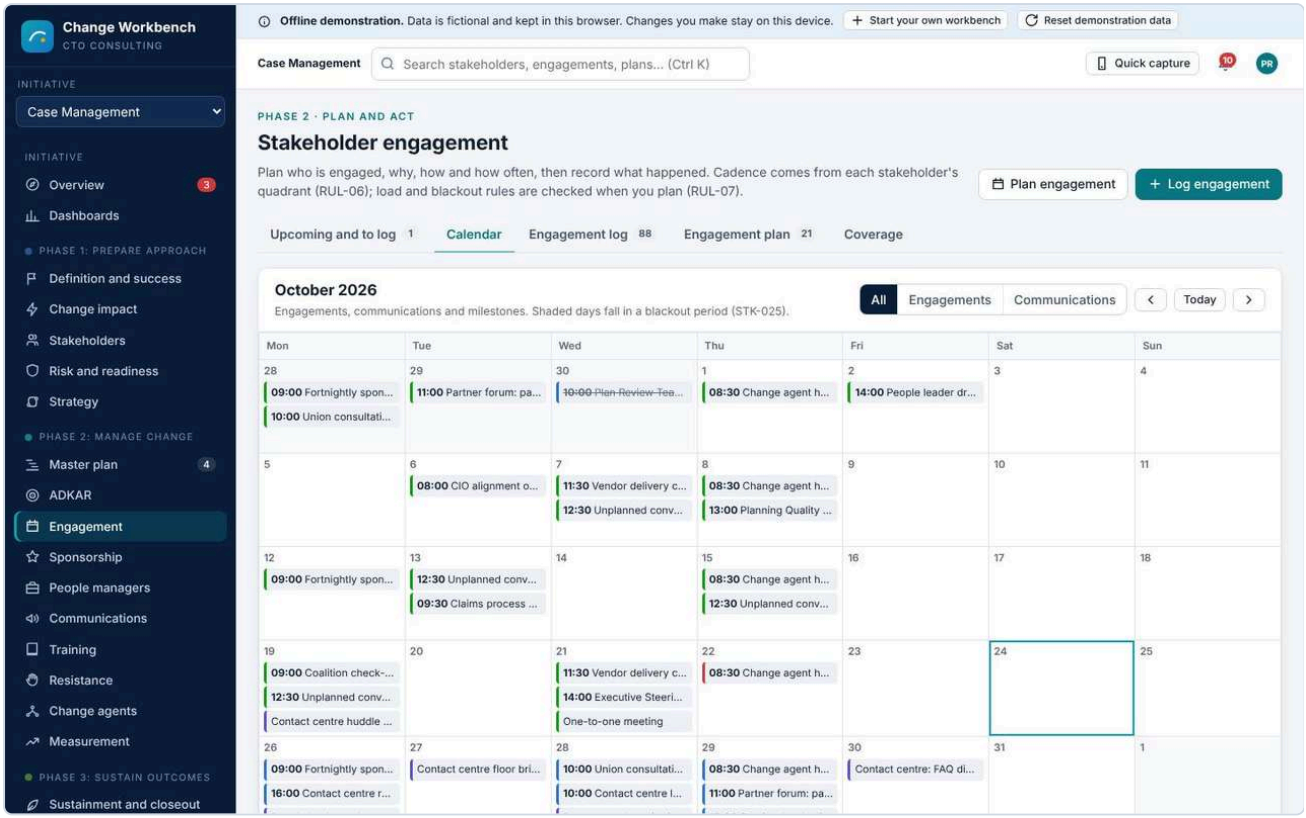

61 Engagement · Upcoming and to log

Engagements coming up, and any that have passed without being logged.

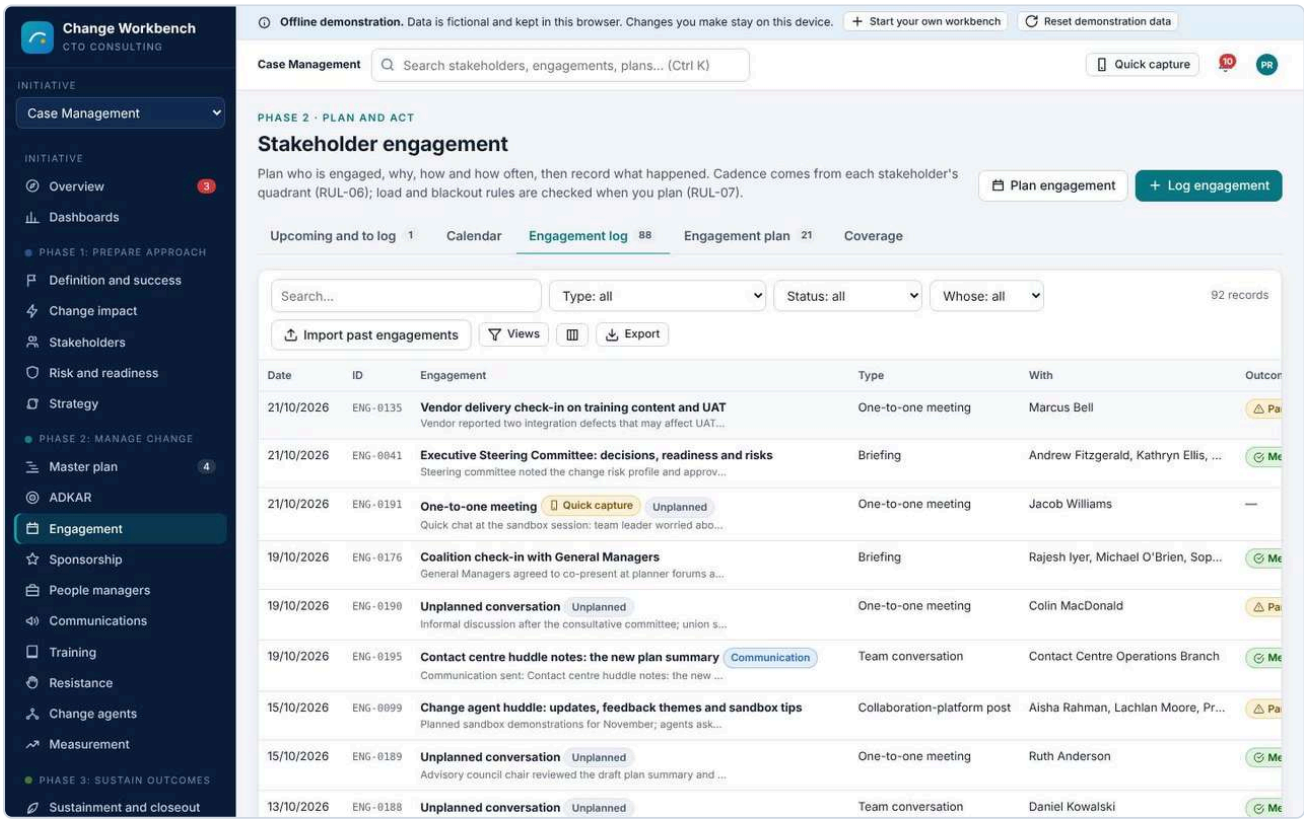

62 Engagement · Calendar

The engagement calendar of engagements, communications and milestones by month.

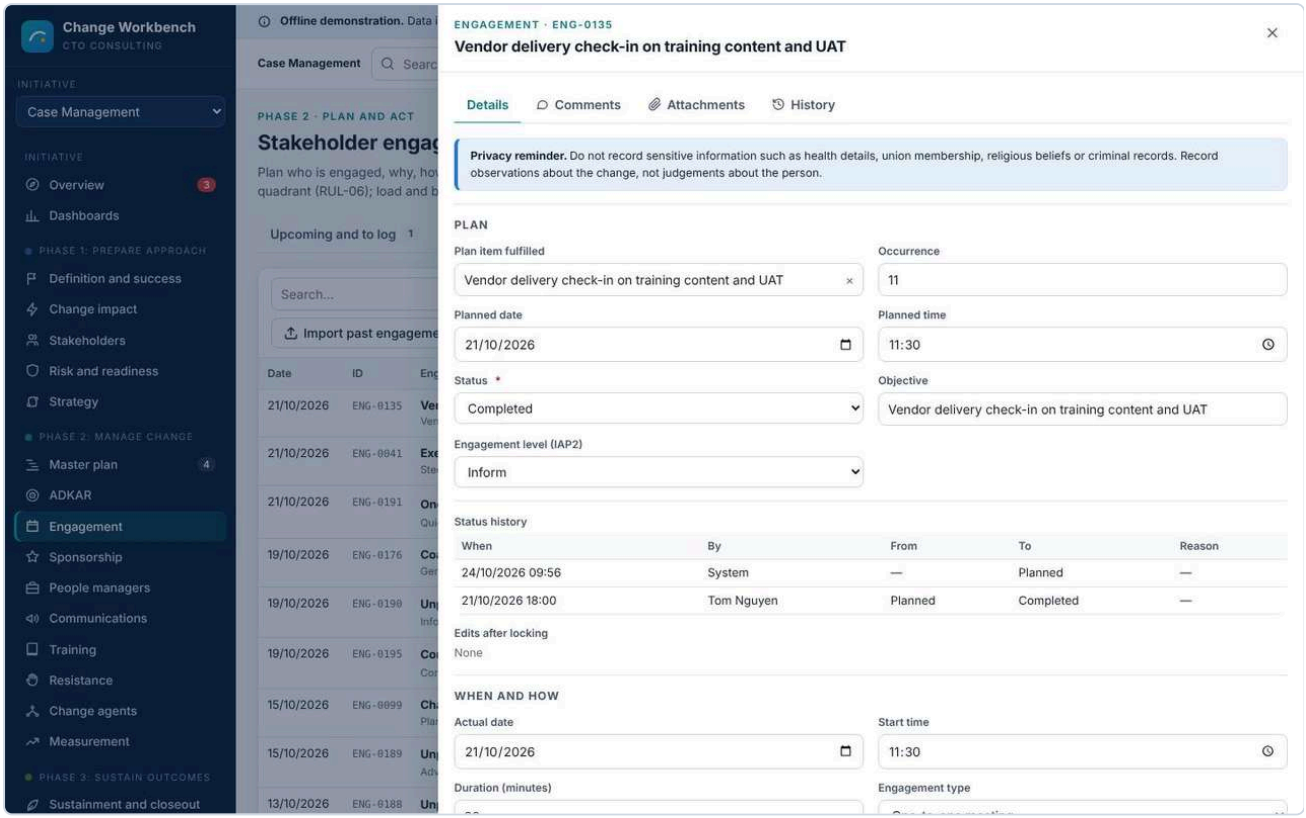

63 Engagement · Engagement log

The engagement log: completed engagements with their type, people, ADKAR focus and outcome. Entries lock ten business days after completion.

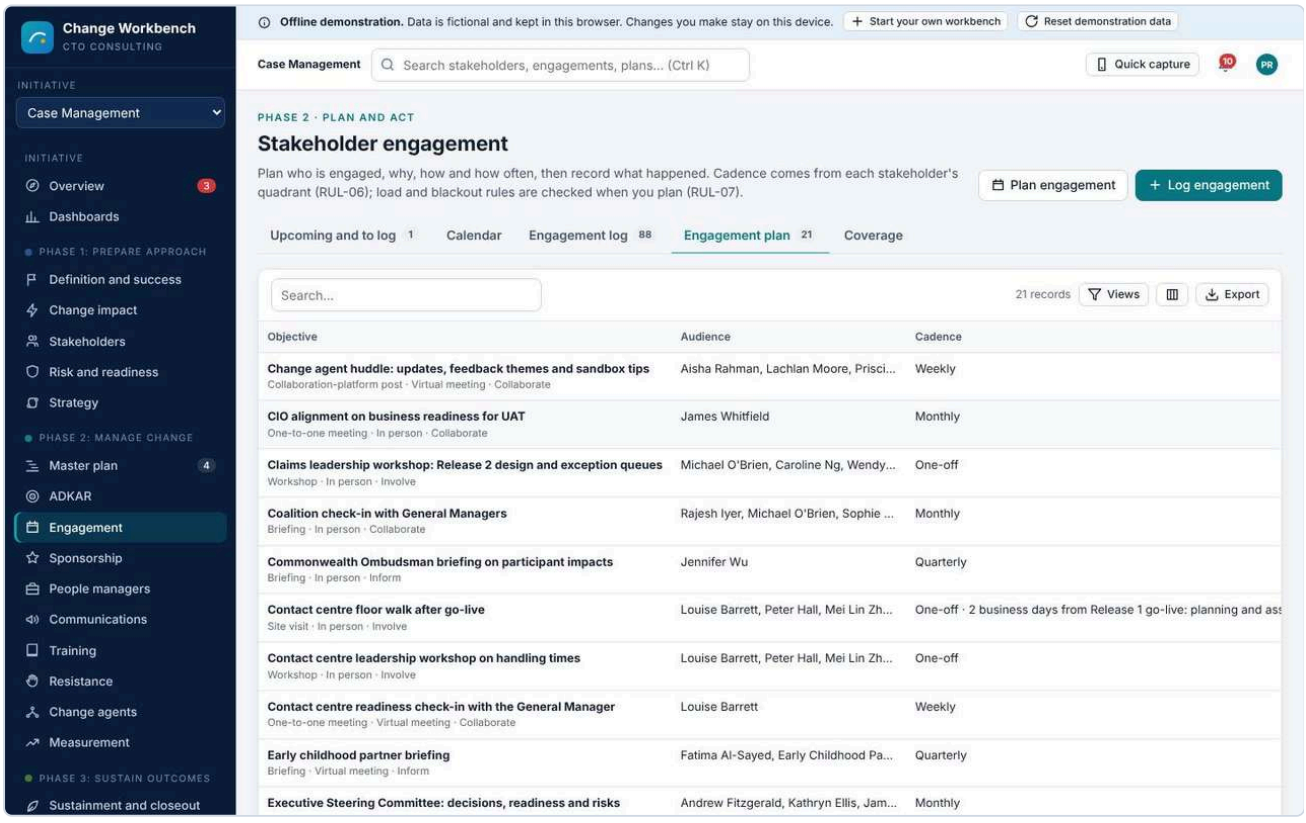

64 Engagement · A logged engagement

A logged engagement in the side panel, from the plan item it fulfils to its status history.

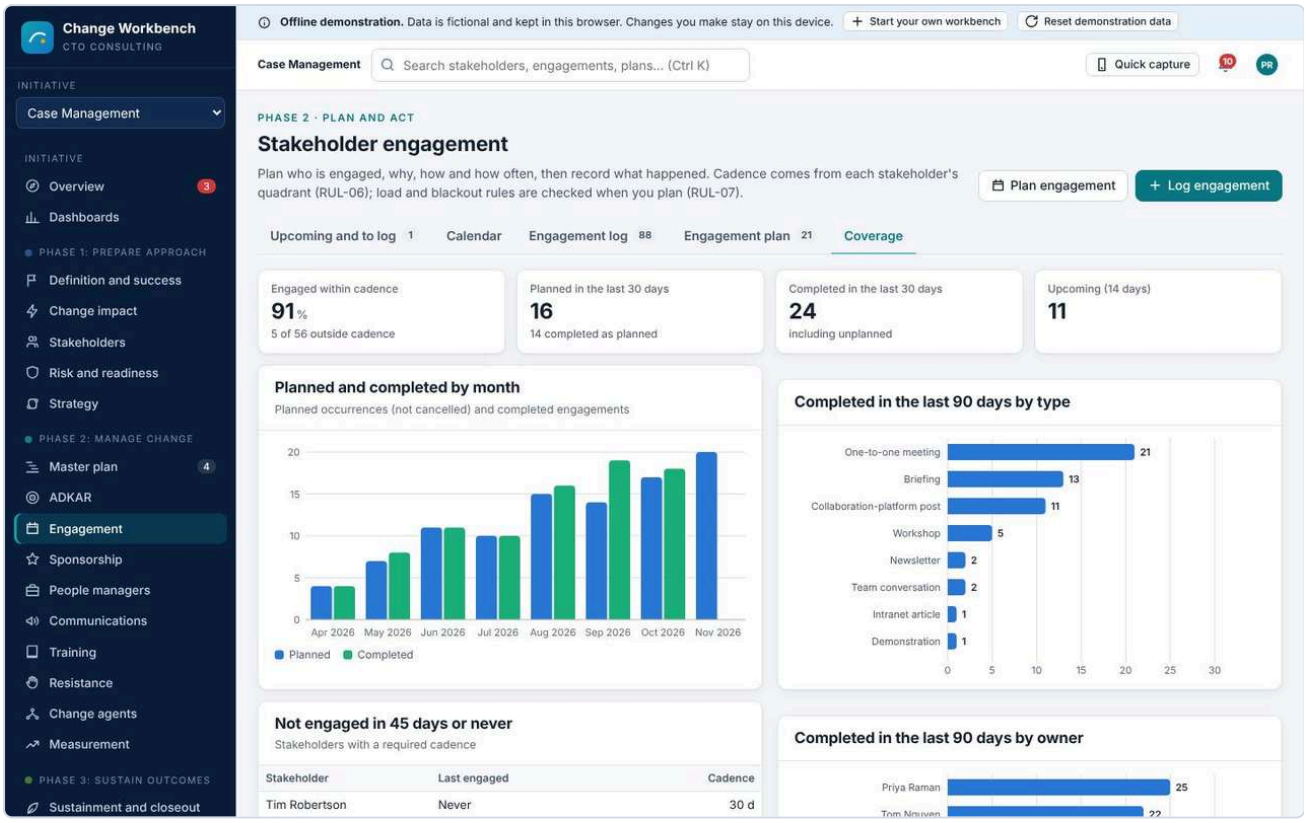

65 Engagement · Engagement plan

The engagement plan: recurring and one-off engagements by objective, audience and cadence.

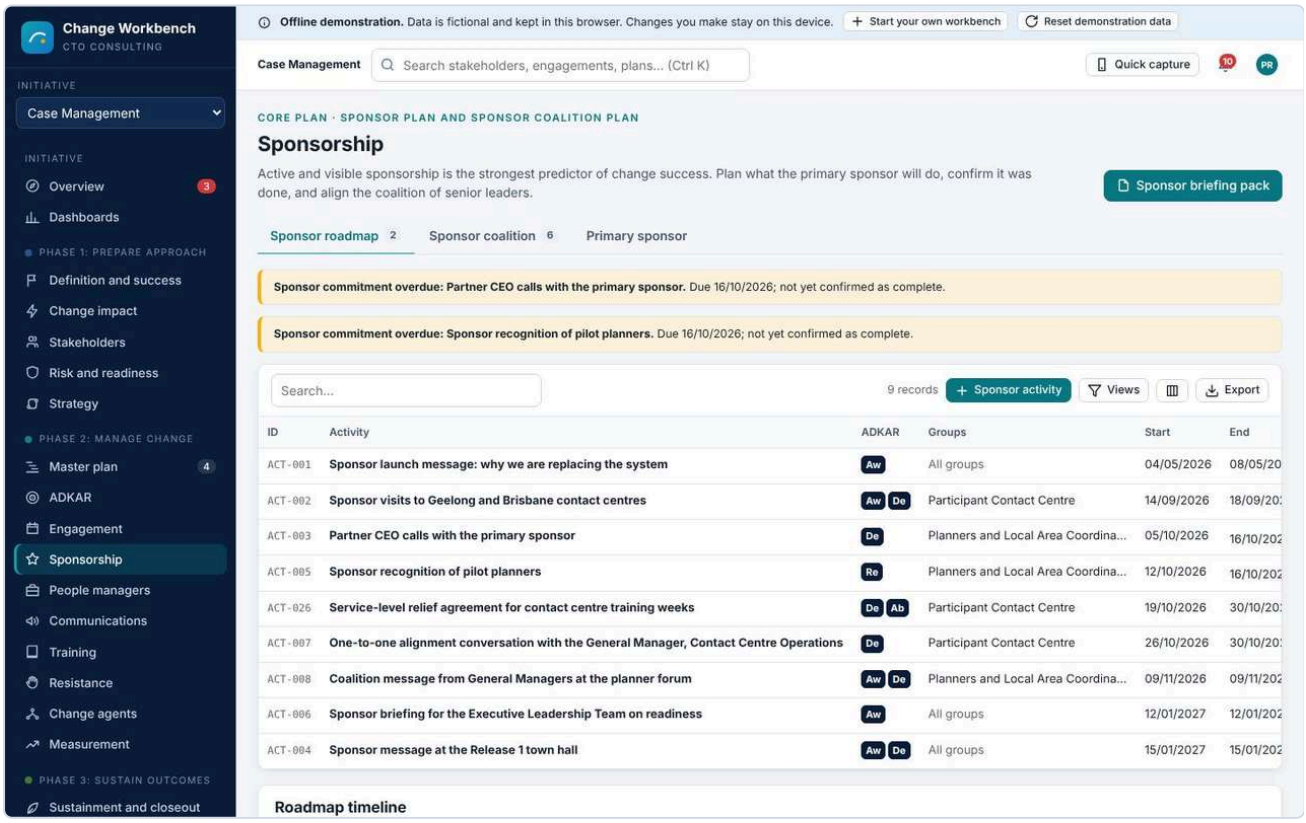

66 Engagement · Coverage

Engagement coverage: the share engaged within cadence, planned against completed by month, and who has not been engaged.

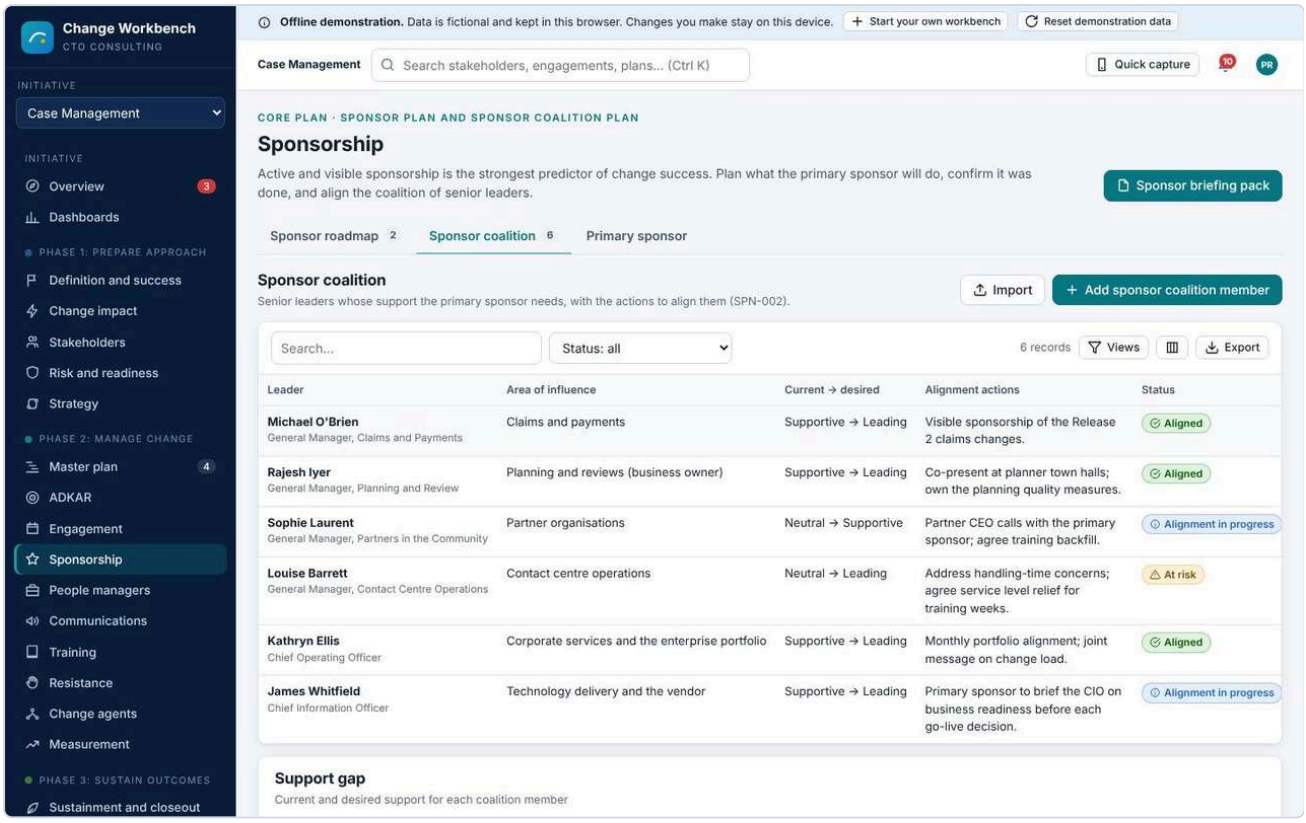

67 Sponsorship · Sponsor roadmap

The sponsor roadmap of the primary sponsor's activities, with overdue commitments flagged.

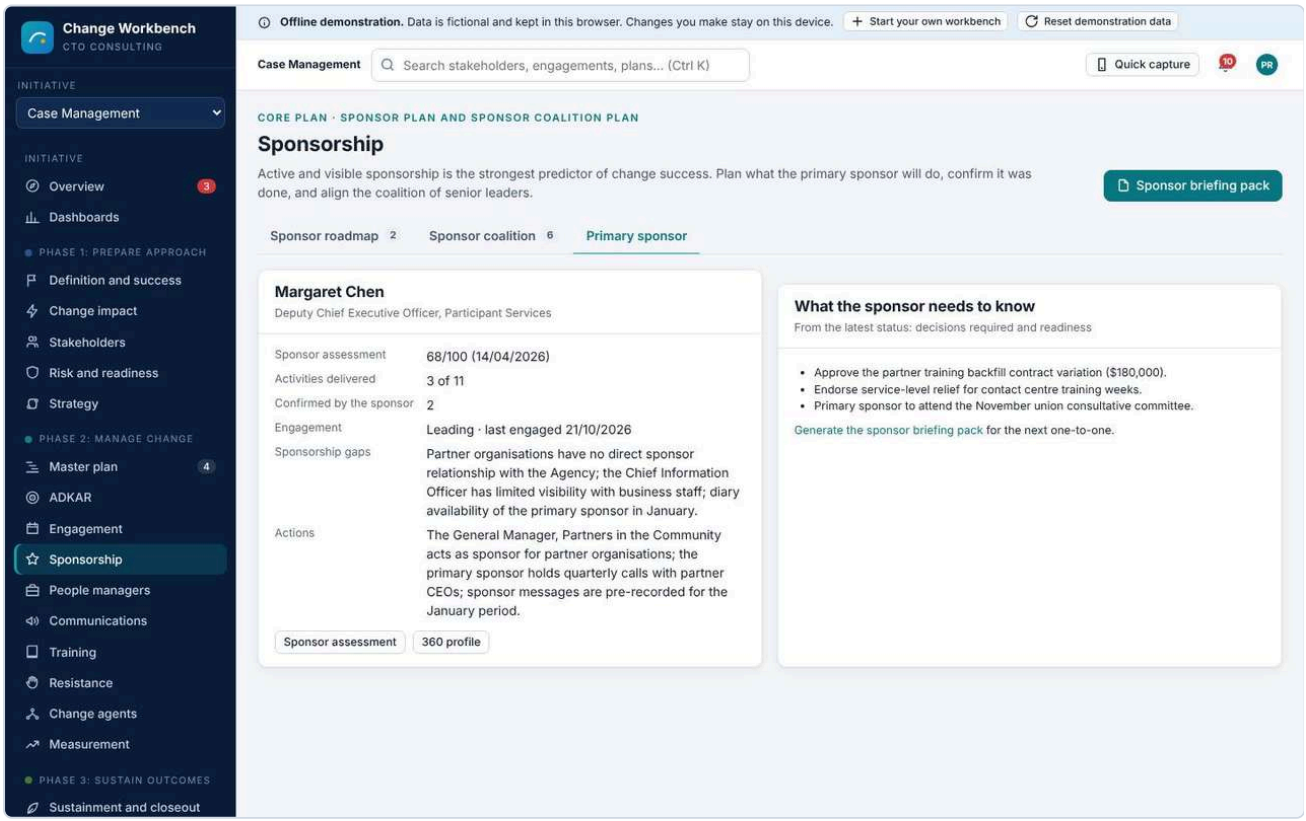

68 Sponsorship · Sponsor coalition

The sponsor coalition: the leaders the sponsor needs, their current and desired support, and the actions to close the gaps.

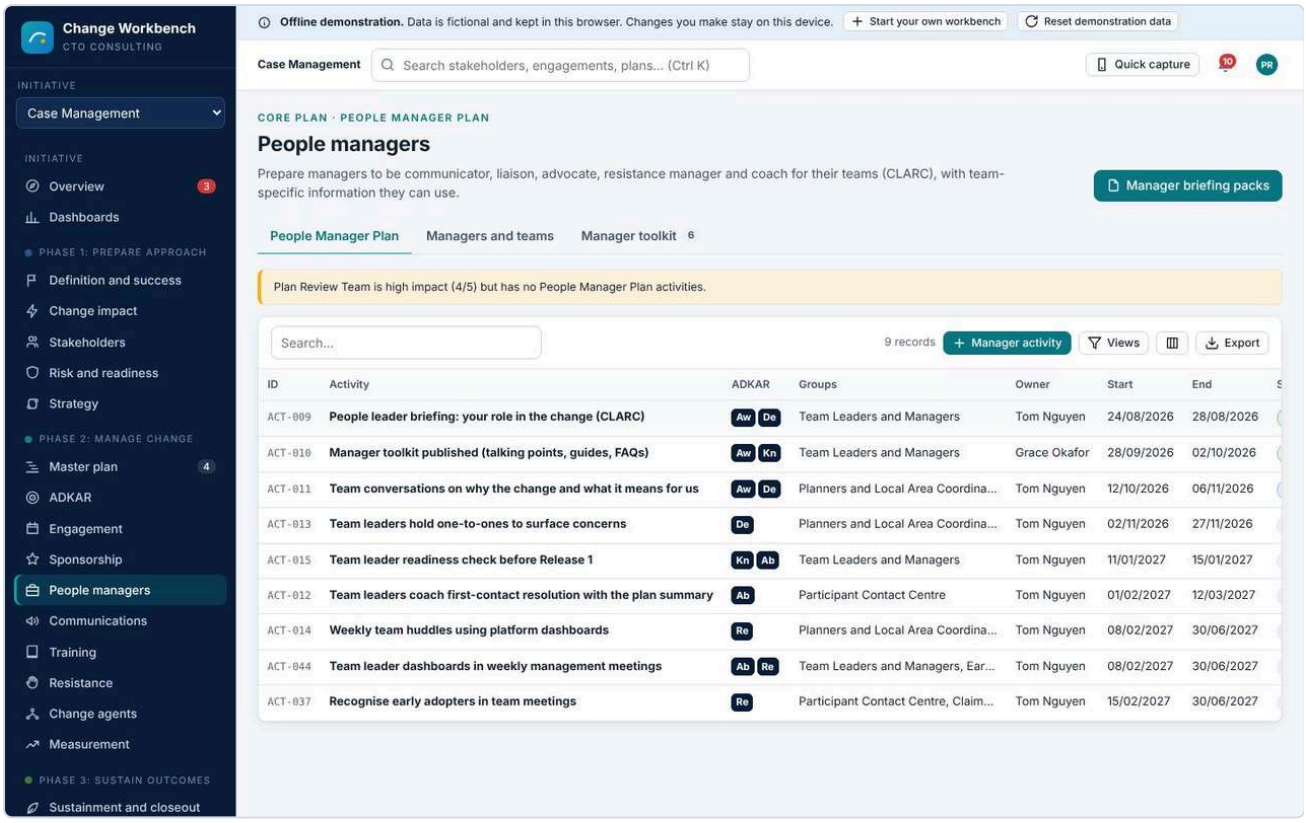

69 Sponsorship · Primary sponsor

The primary sponsor: their commitment, activities delivered, and what the sponsor needs to know now.

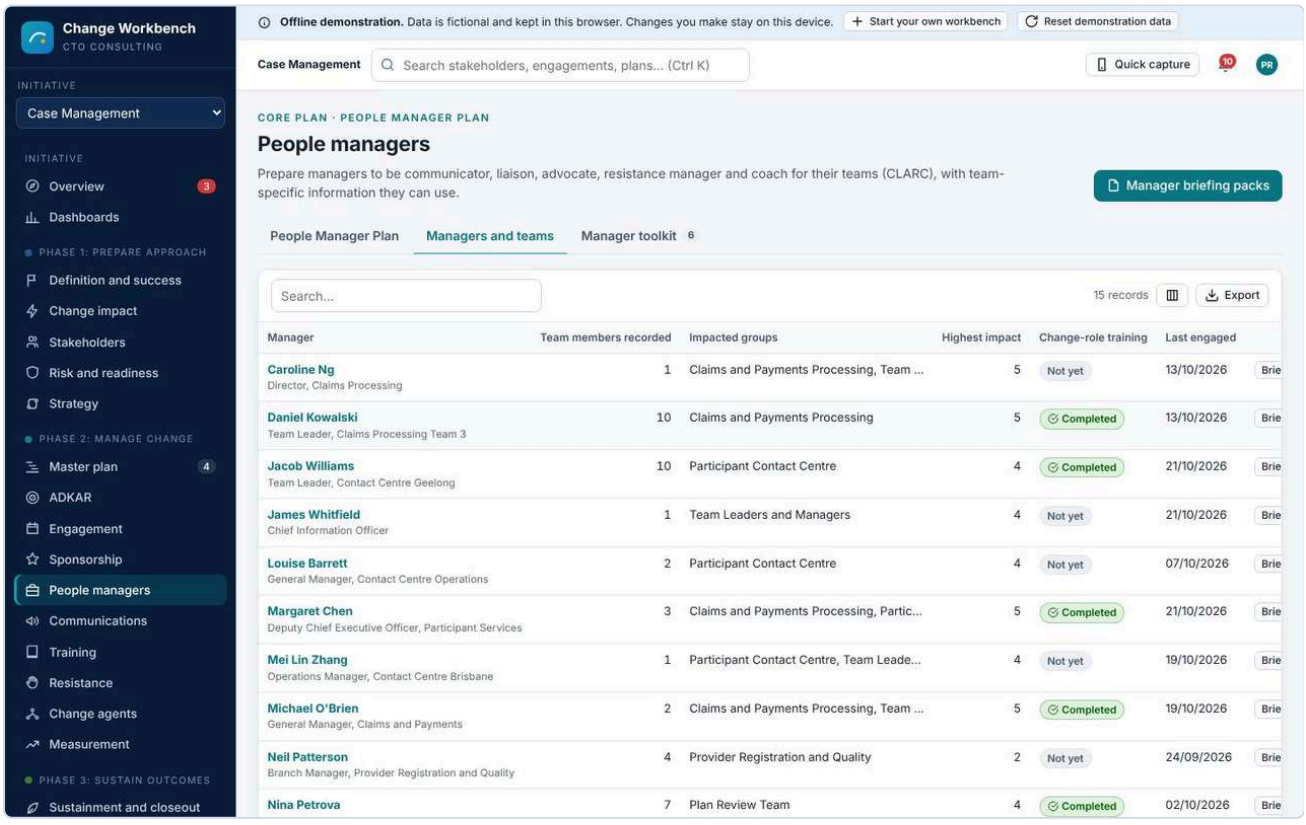

70 People managers · People Manager Plan

The People Manager Plan: activities that prepare managers for their roles as communicator, liaison, advocate, resistance manager and coach (CLARC).

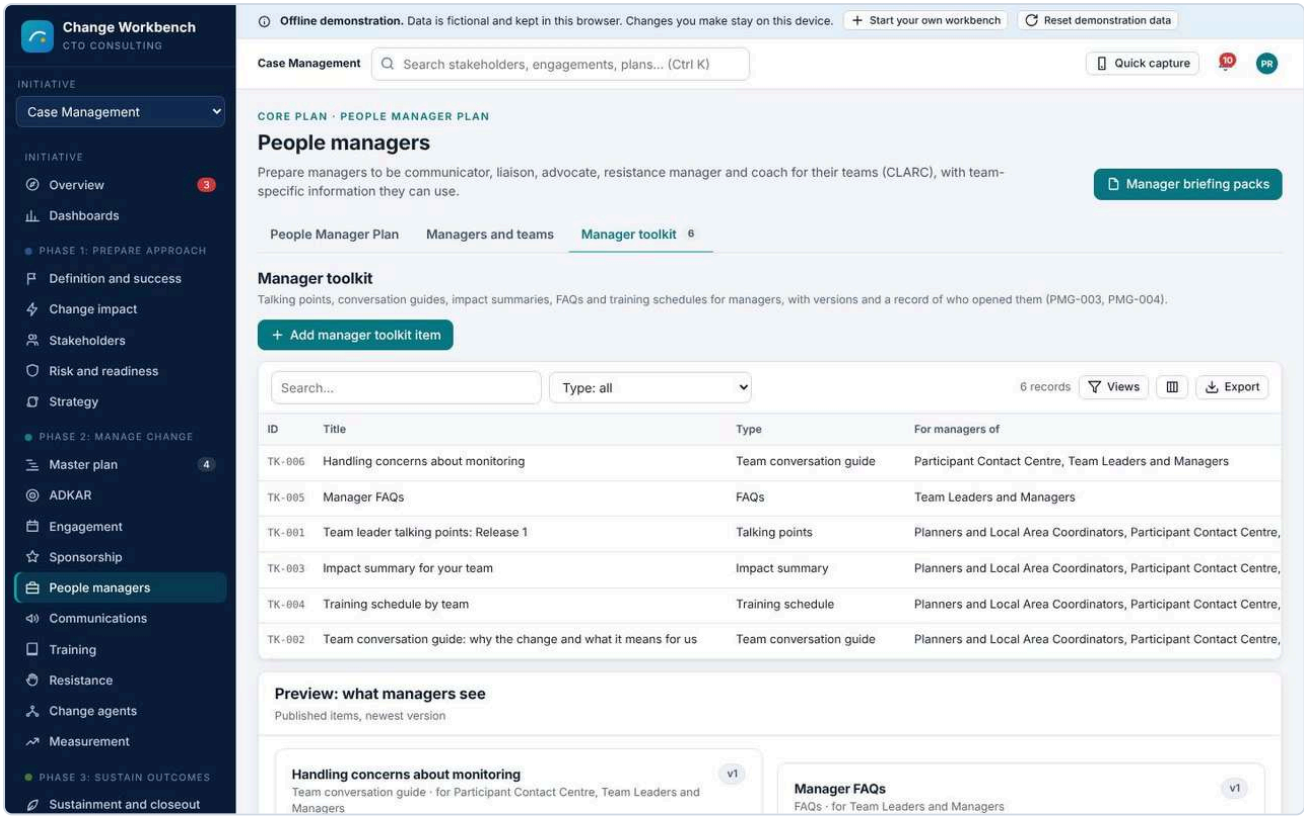

71 People managers · Managers and teams

Managers and their teams: people affected, impacted groups, the highest impact and whether each manager has been briefed.

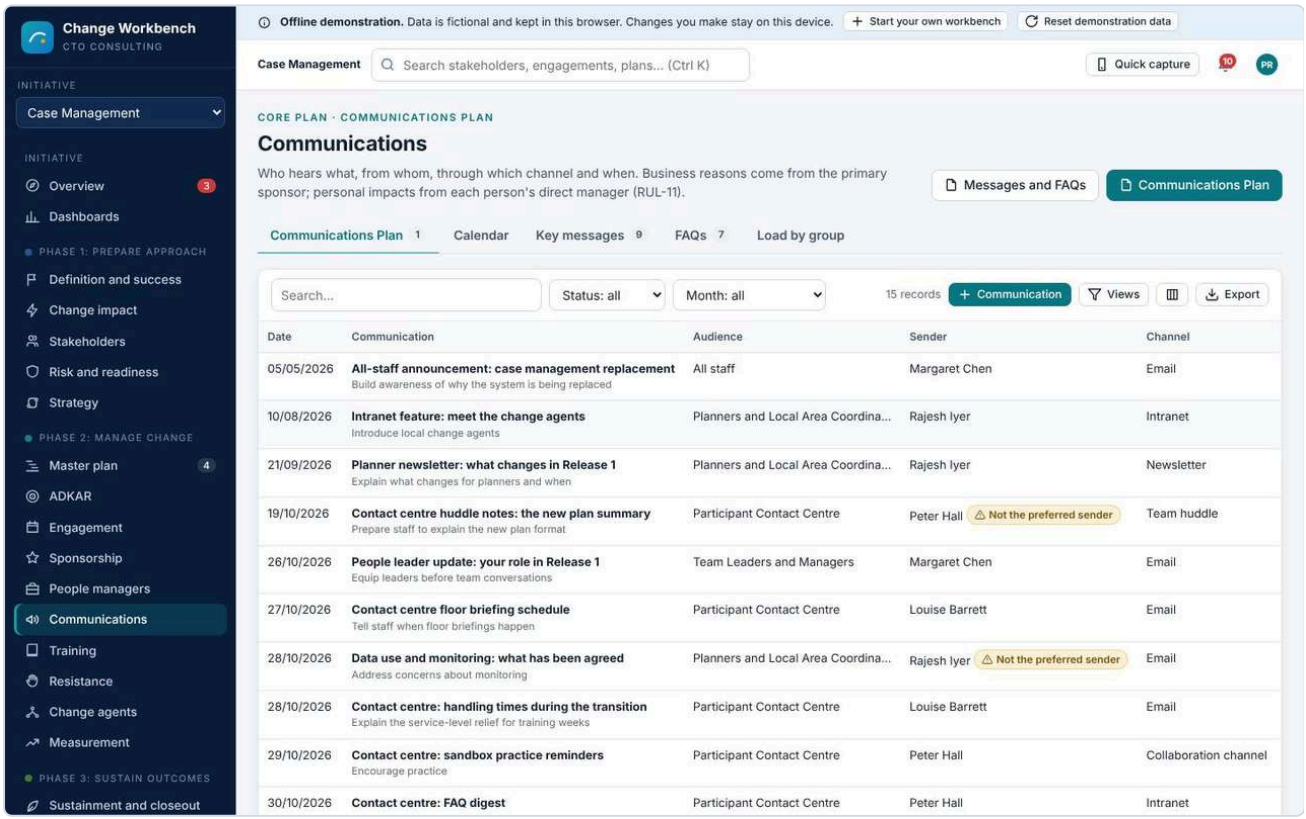

72 People managers · Manager toolkit

The manager toolkit of briefings, talking points and FAQs, with a preview of what managers see.

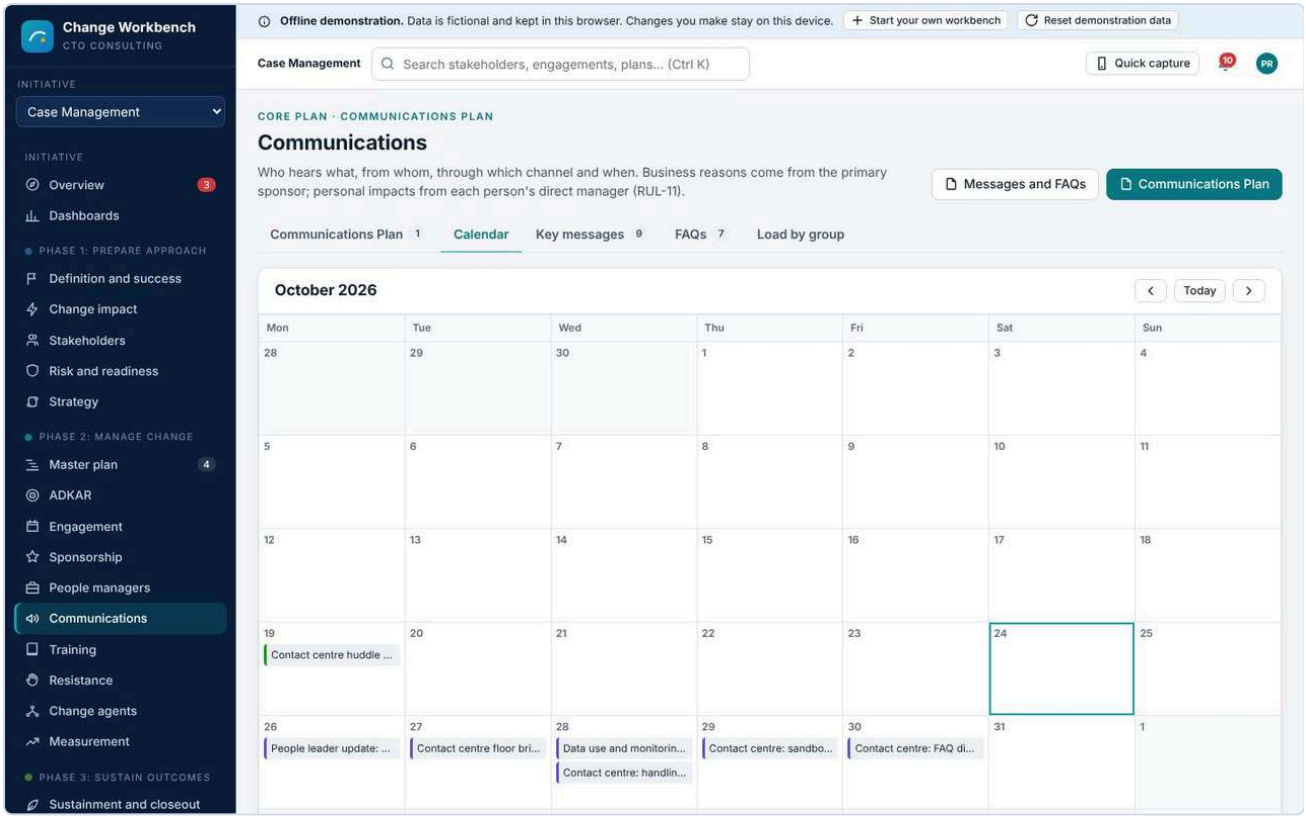

73 Communications · Communications Plan

The Communications Plan: who hears what, from whom, through which channel and when.

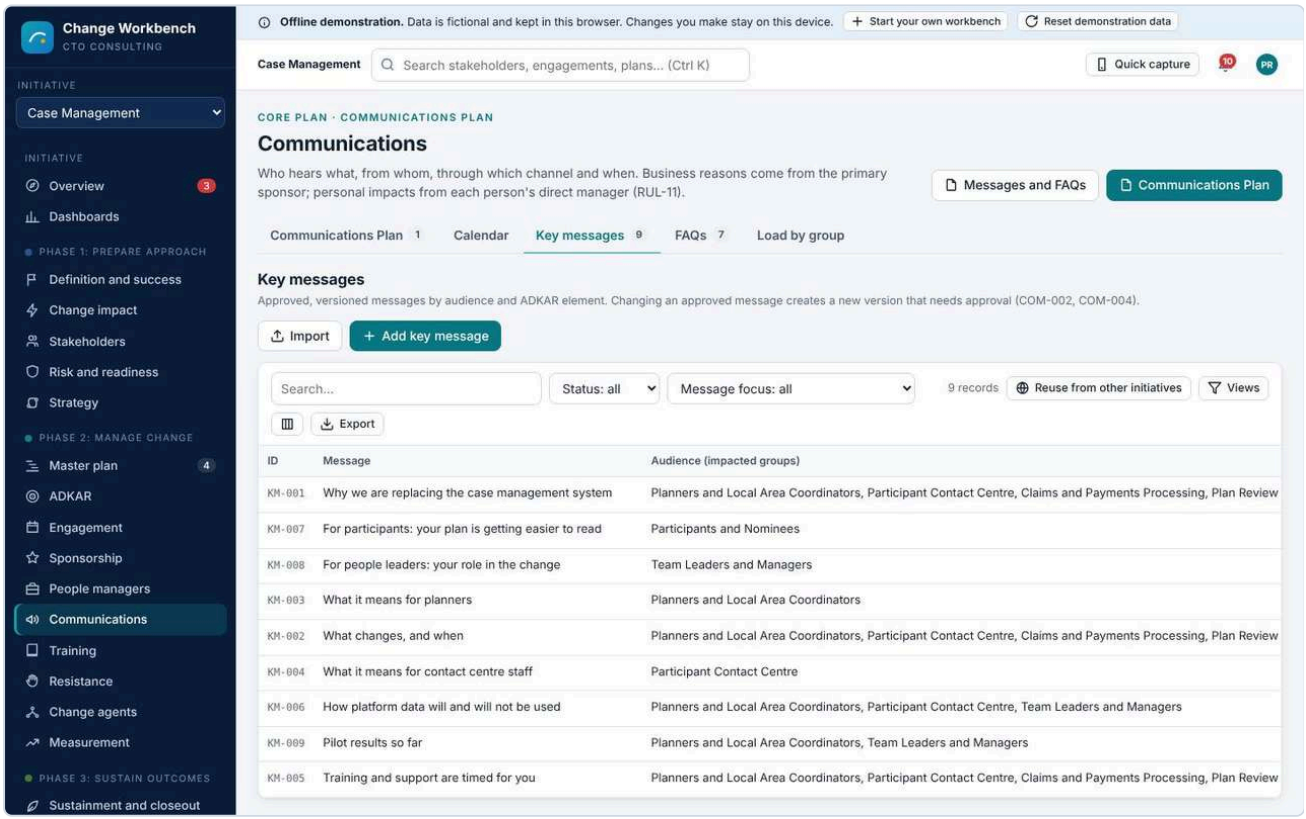

74 Communications · Calendar

Communications by month on a calendar.

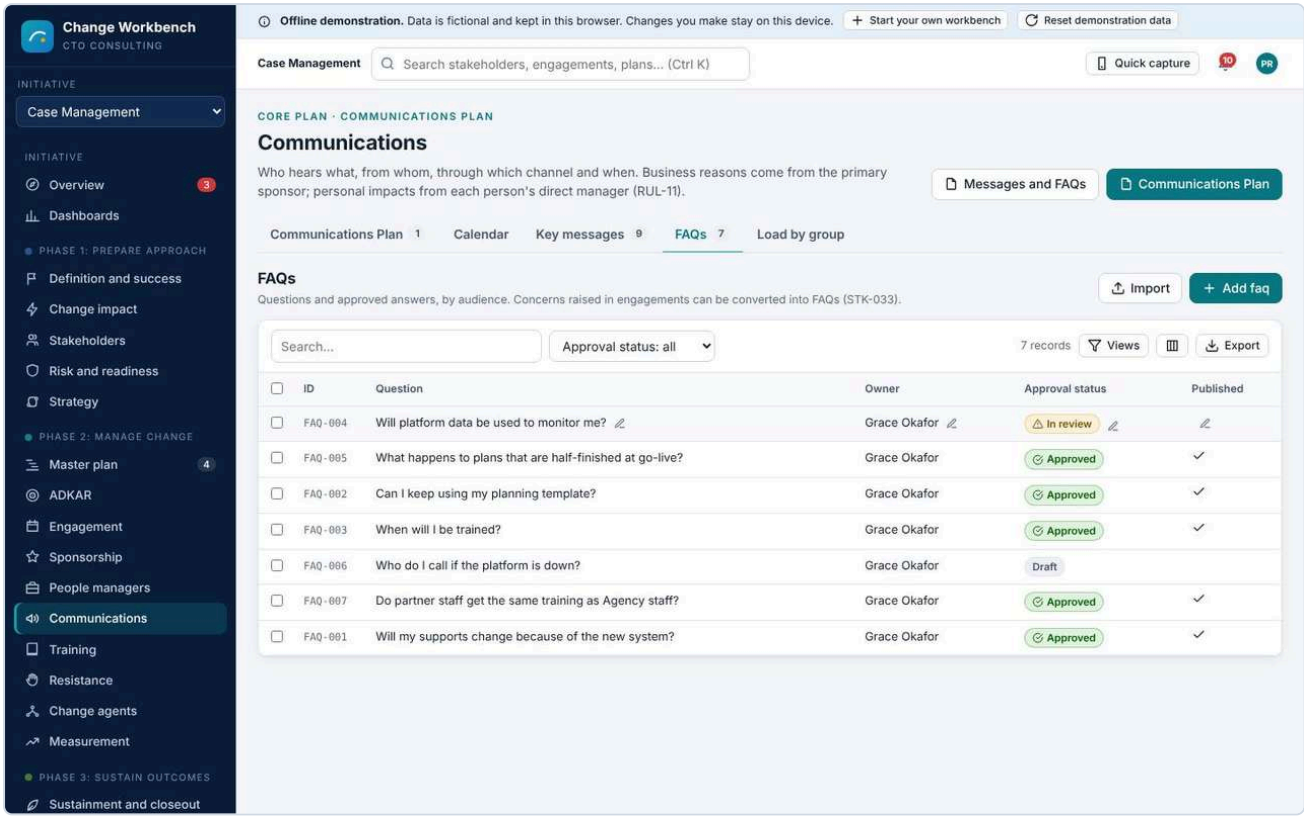

75 Communications · Key messages

Key messages by audience and ADKAR element, approved and versioned.

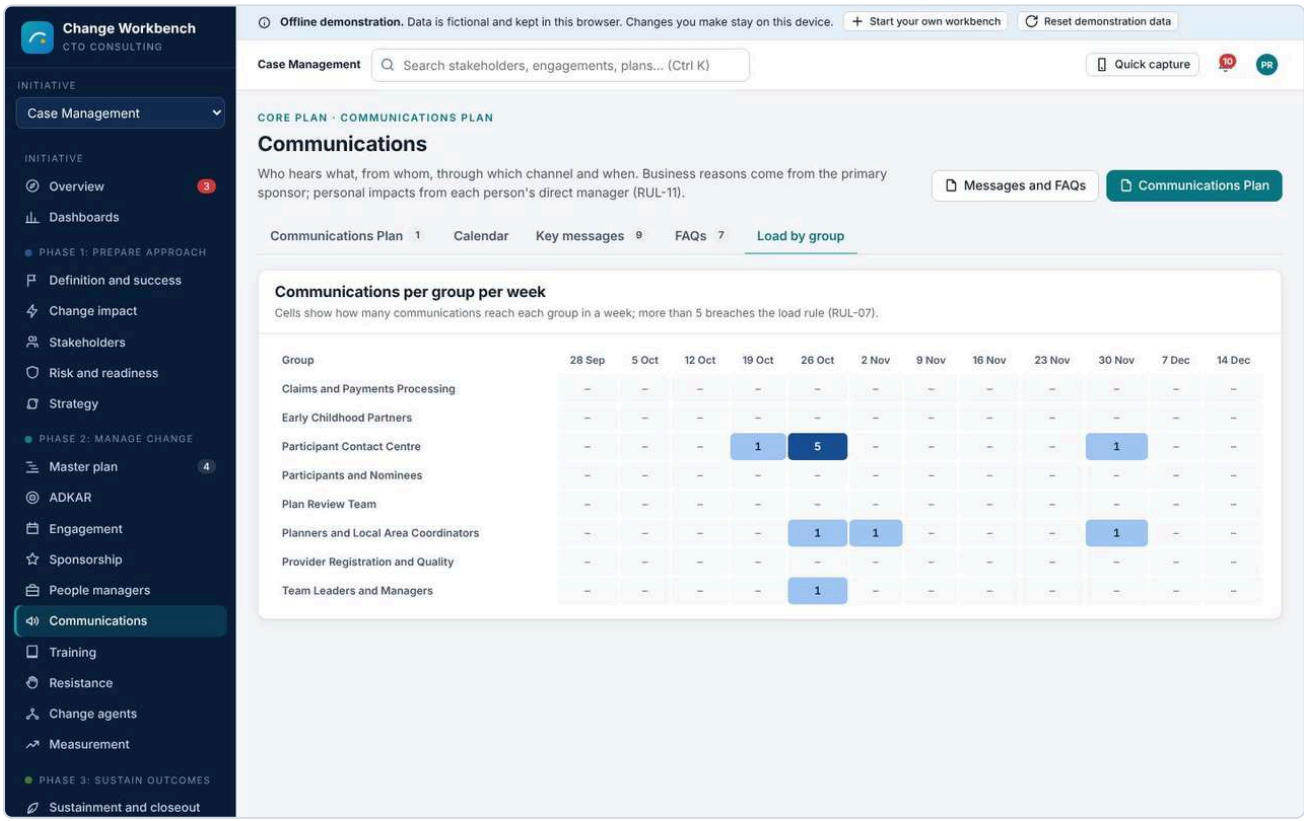

76 Communications · FAQs

FAQs with their owner, approval status and whether they are published.

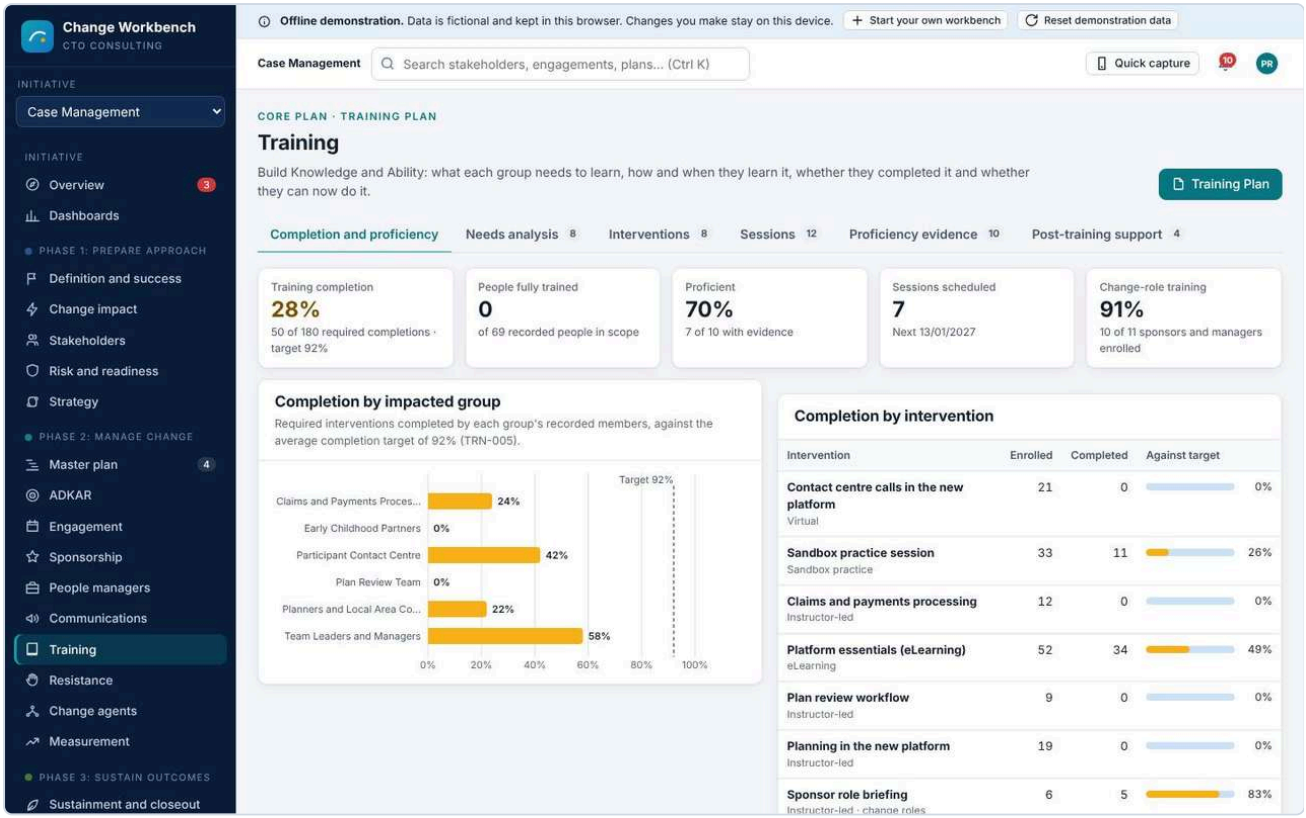

77 Communications · Load by group

Communications load: how many communications reach each group each week, flagging weeks that are too heavy.

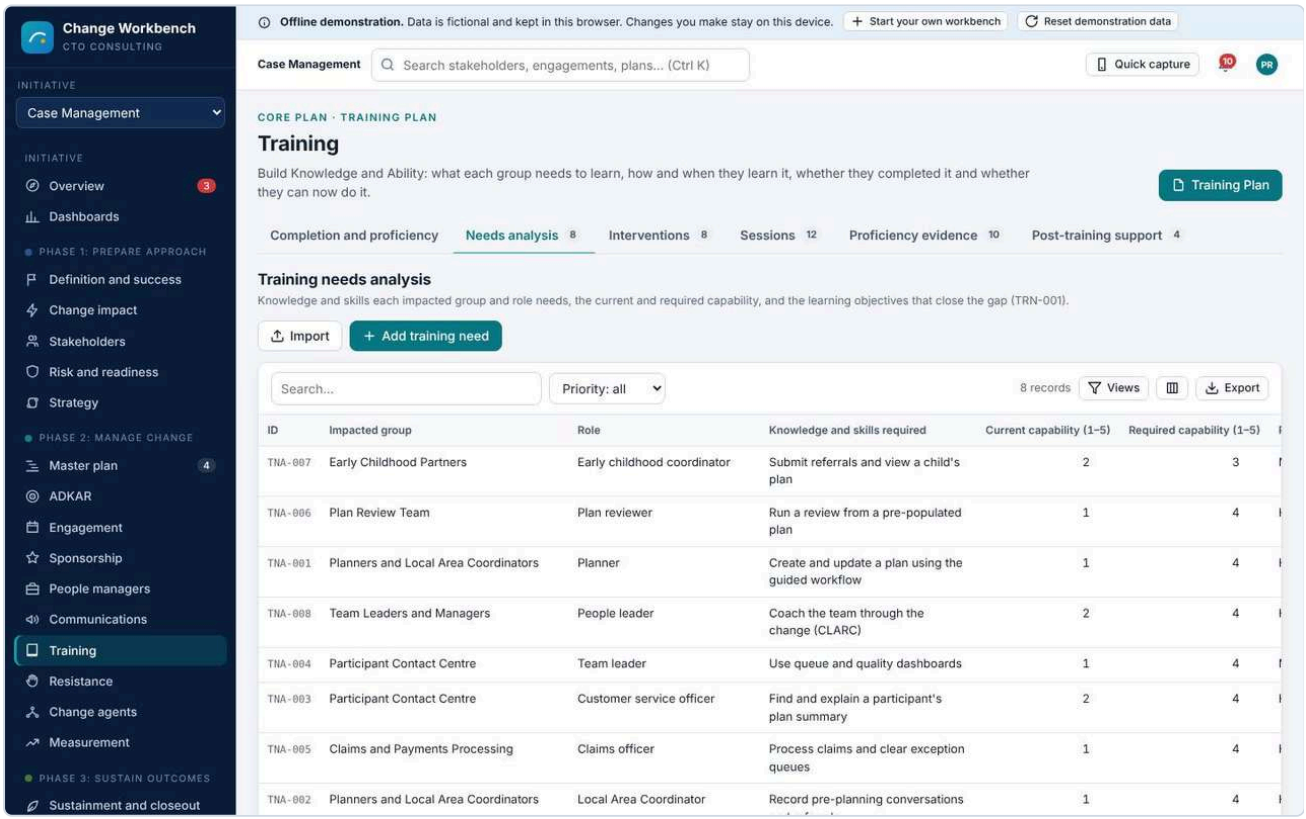

78 Training · Completion and proficiency

Training completion and proficiency by impacted group and by intervention, against targets.

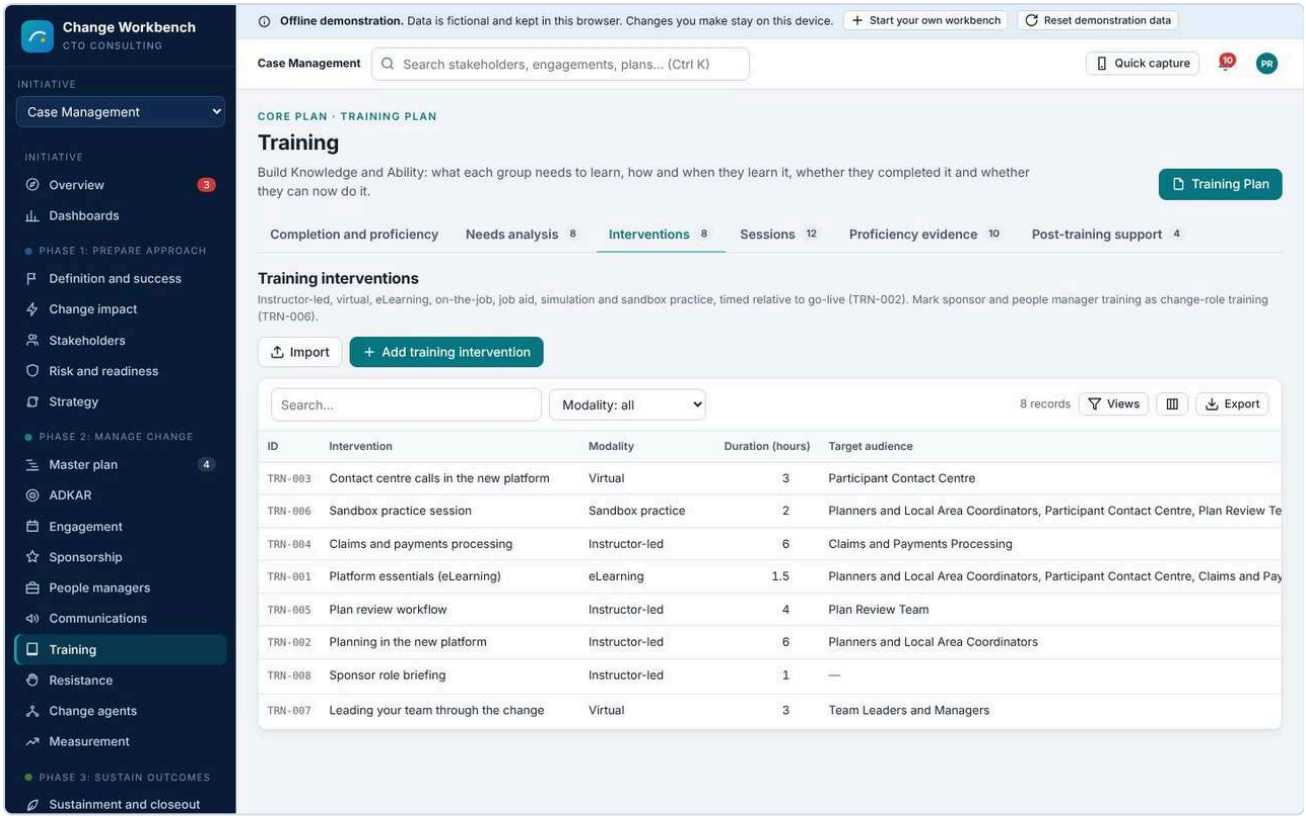

79 Training · Needs analysis

The training needs analysis: current and required capability for each group and role.

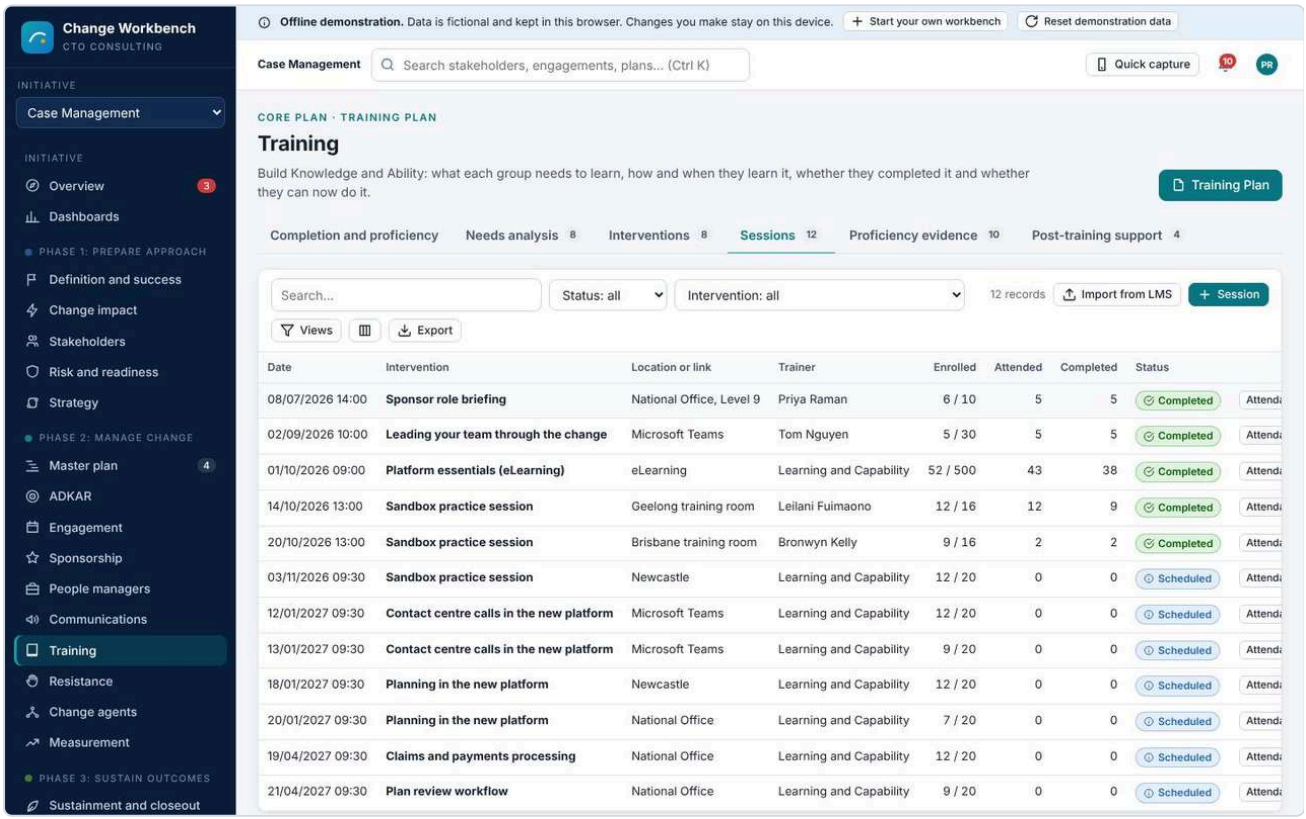

80 Training · Interventions

Training interventions with their modality, duration and target audience.

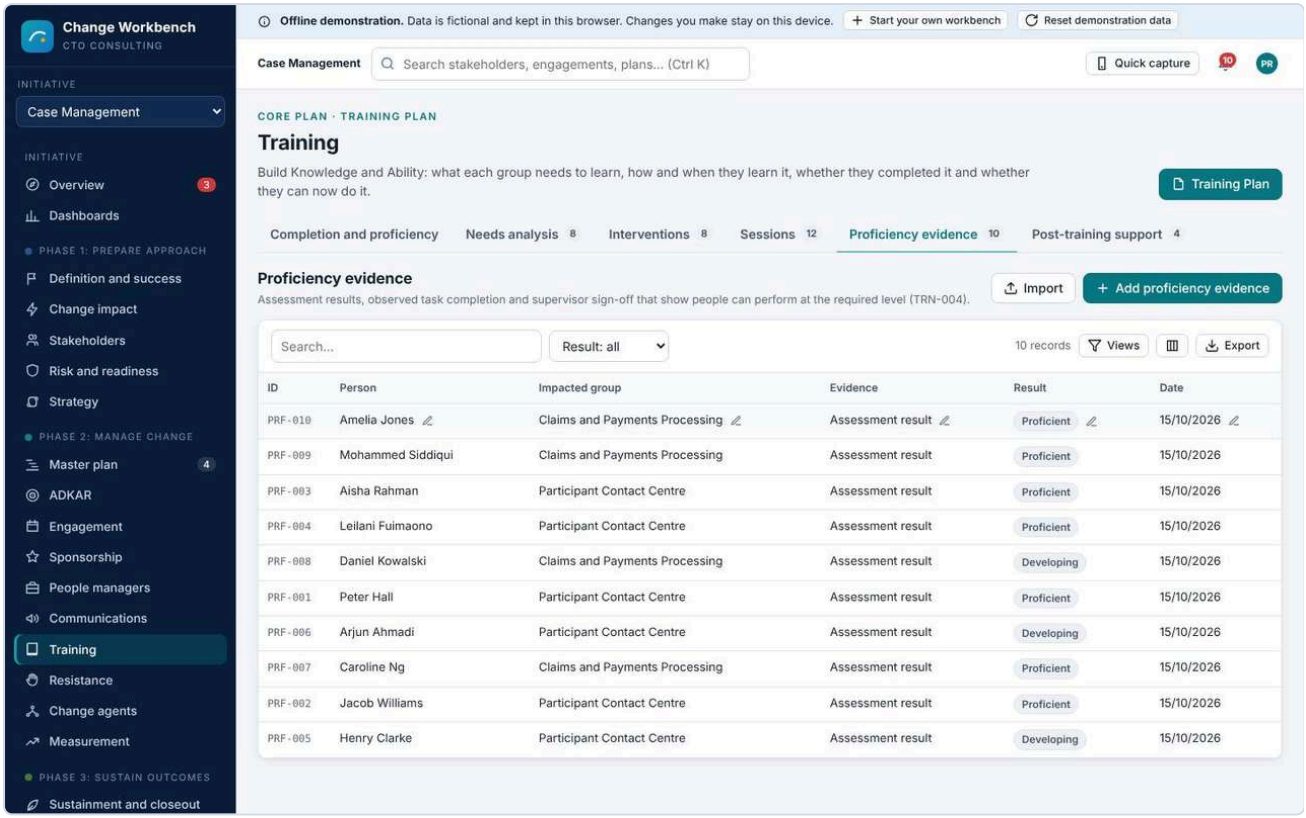

81 Training · Sessions

Training sessions with dates, location, trainer, enrolment, attendance and completion.

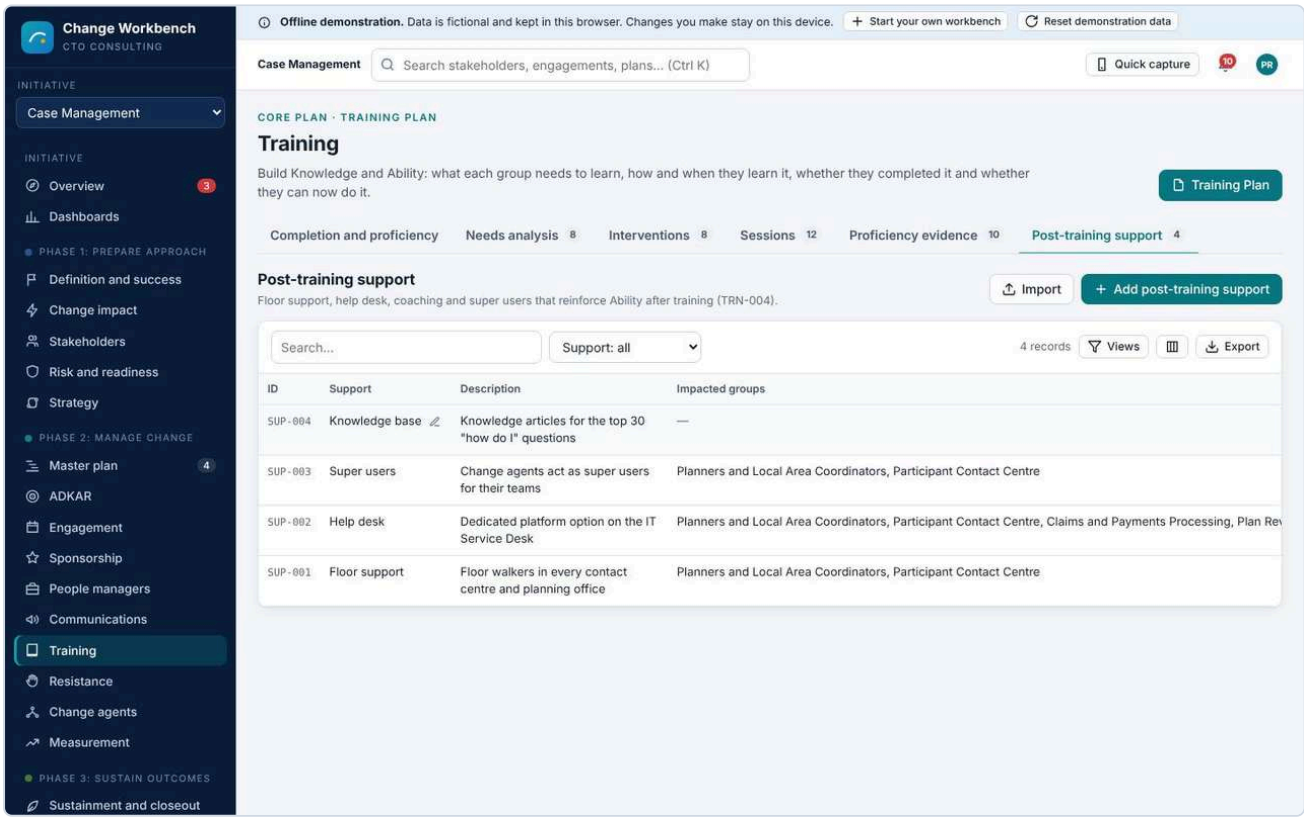

82 Training · Proficiency evidence

Proficiency evidence: assessment results by person and group.

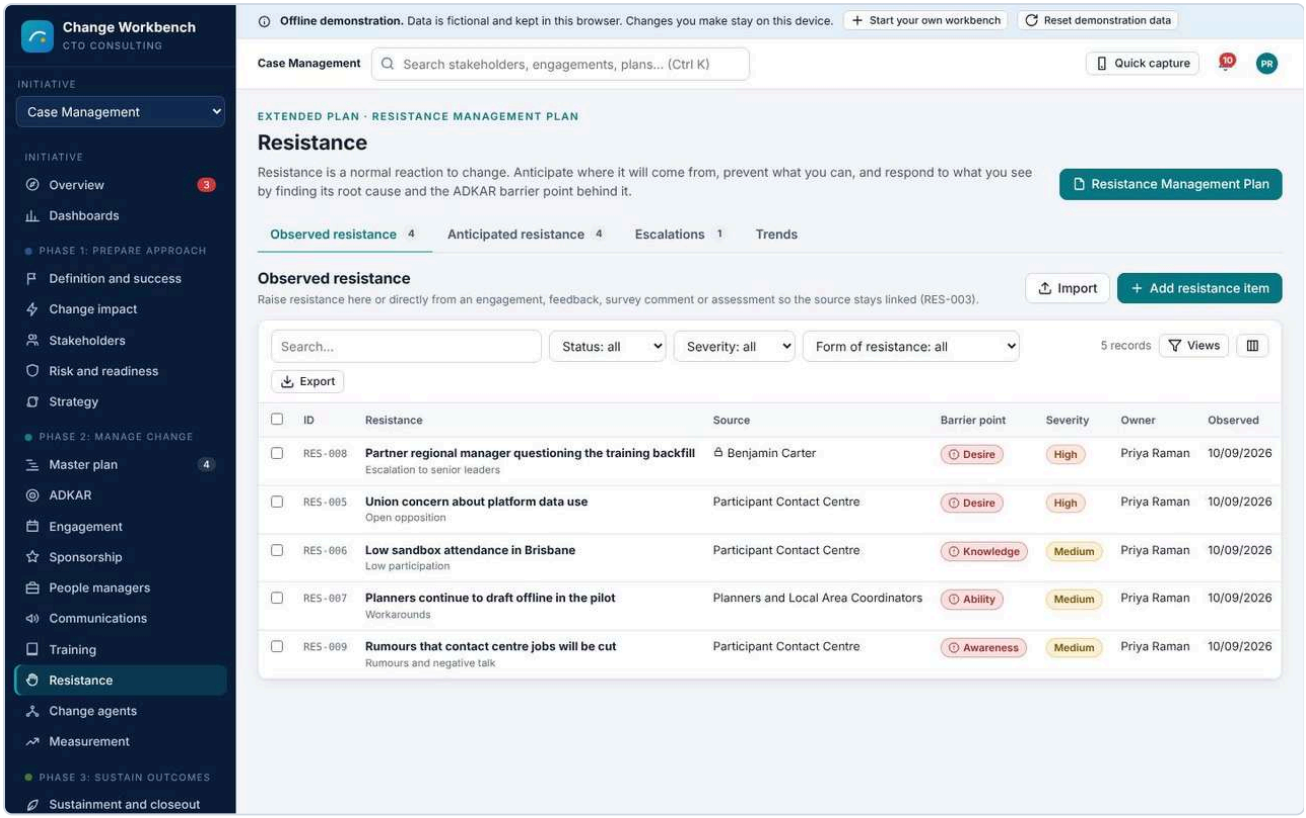

83 Training · Post-training support

Support after training: floor walkers, knowledge bases, help desks and super users.

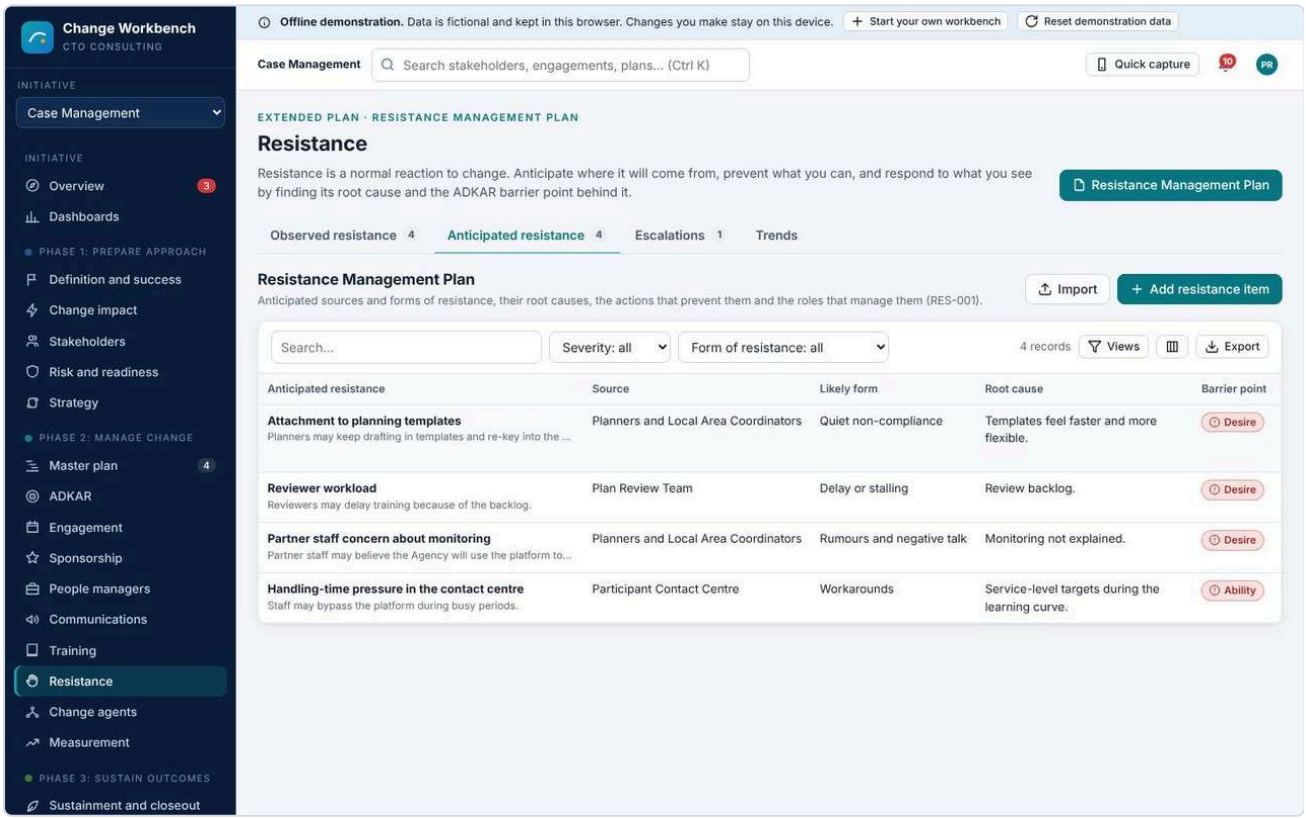

84 Resistance · Observed resistance

Observed resistance: its source, form, root cause, barrier point, severity and owner.

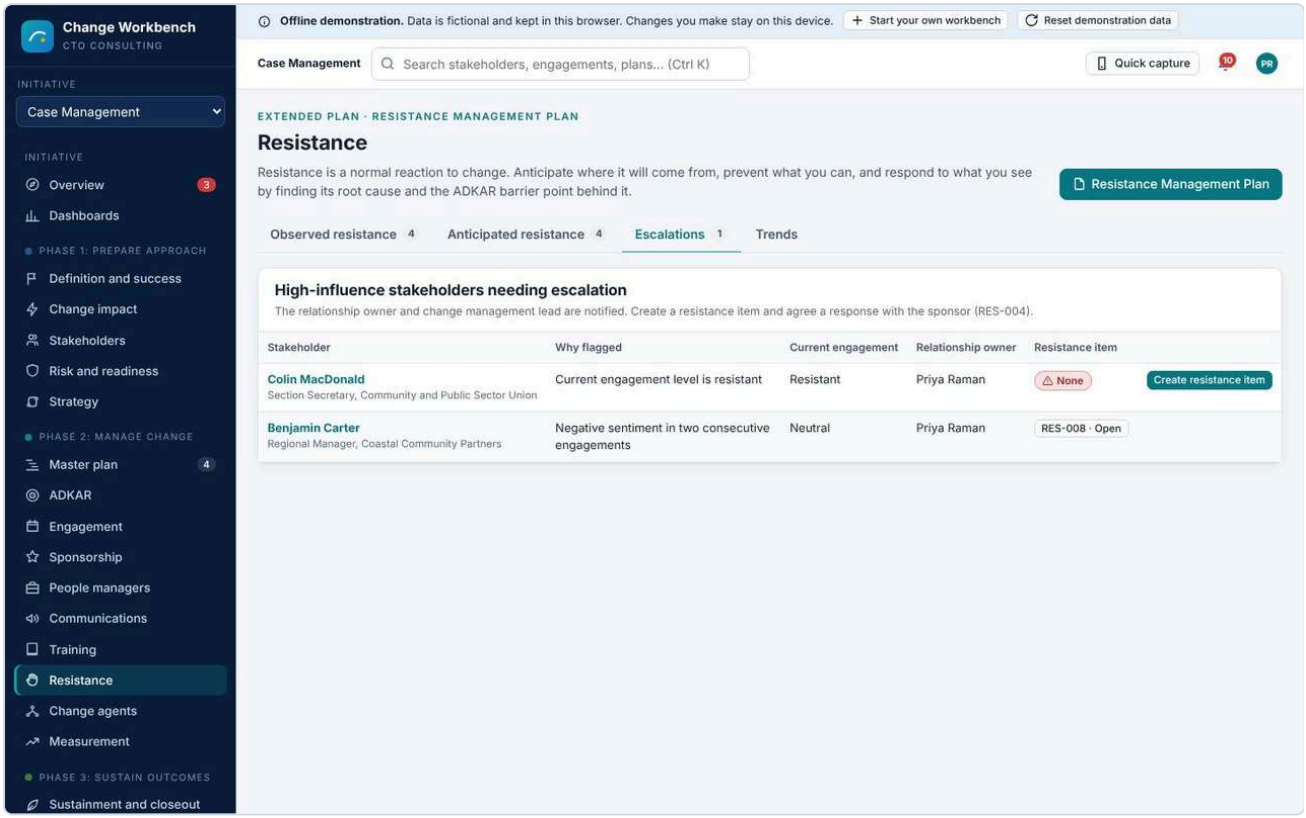

85 Resistance · Anticipated resistance

The Resistance Management Plan: resistance anticipated, its root causes and the actions that prevent it.

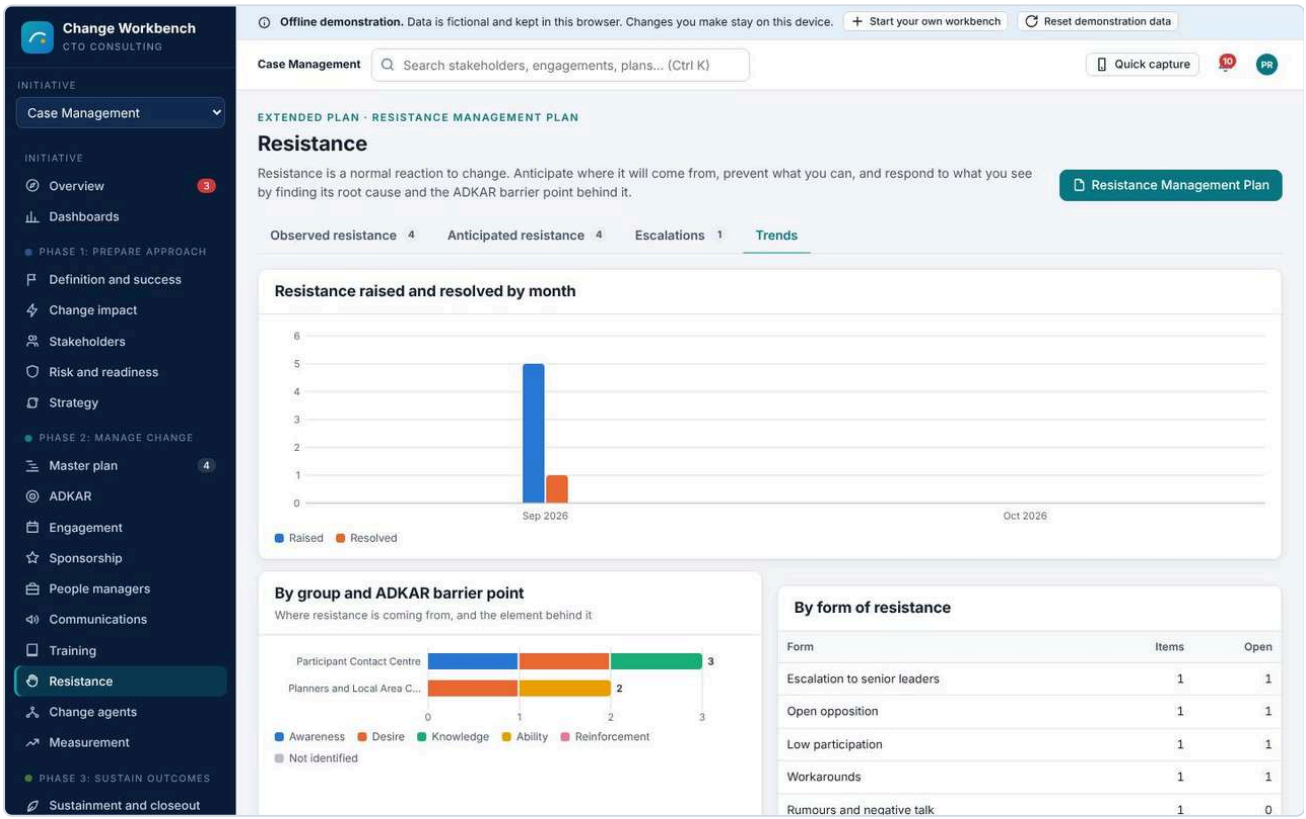

86 Resistance · Escalations

High-influence stakeholders who need escalation, with the reason and the response.

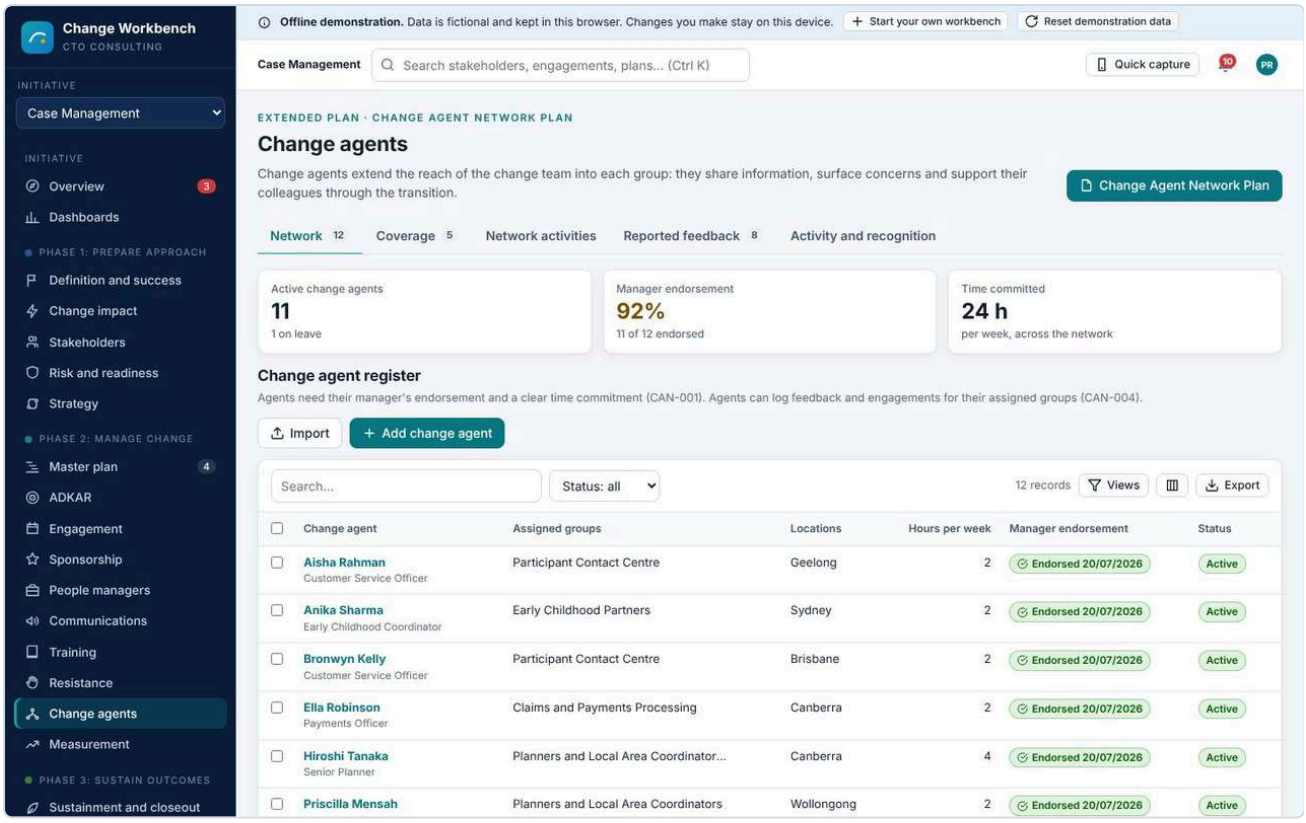

87 Resistance · Trends

Resistance raised and resolved by month, by group and barrier point, and by form.

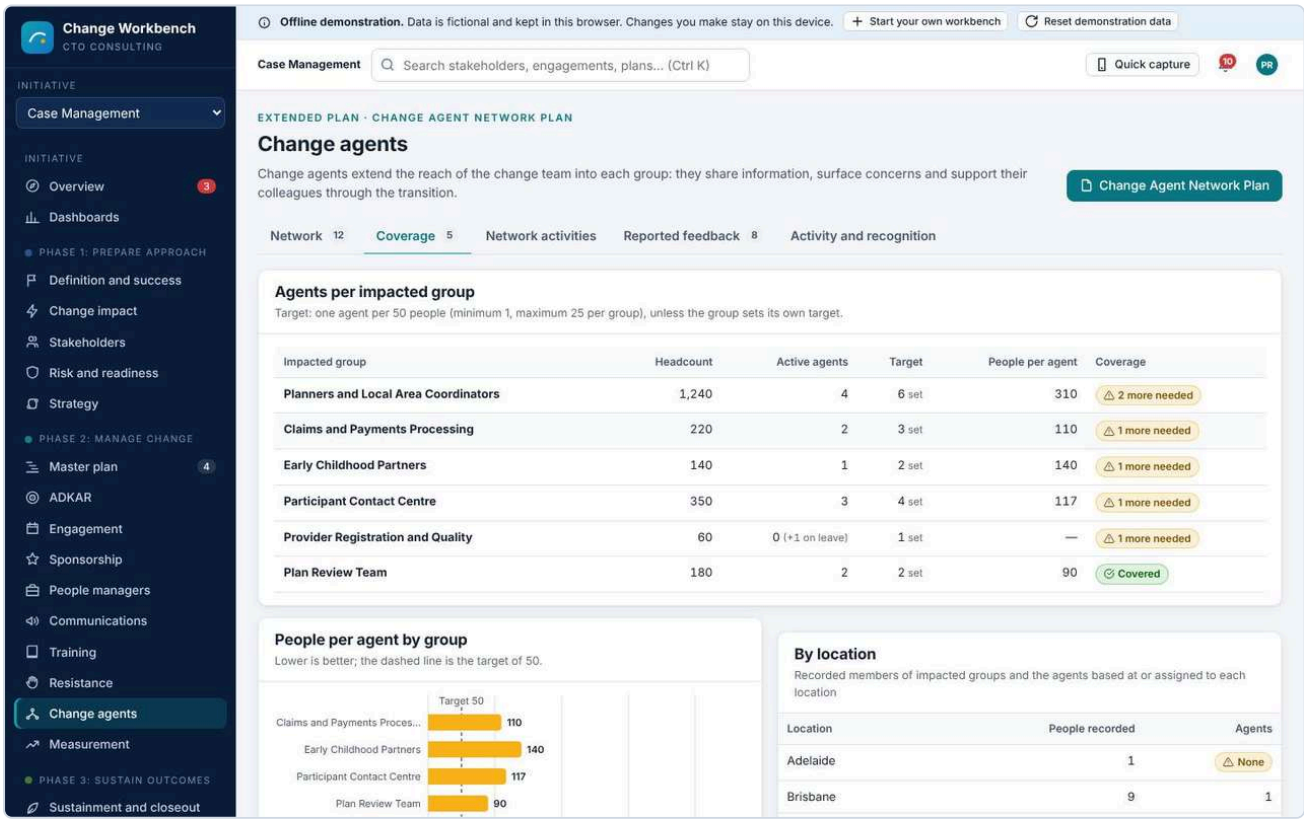

88 Change agents · Network

The change agent network: agents, the groups they cover, endorsement by their managers and time committed.

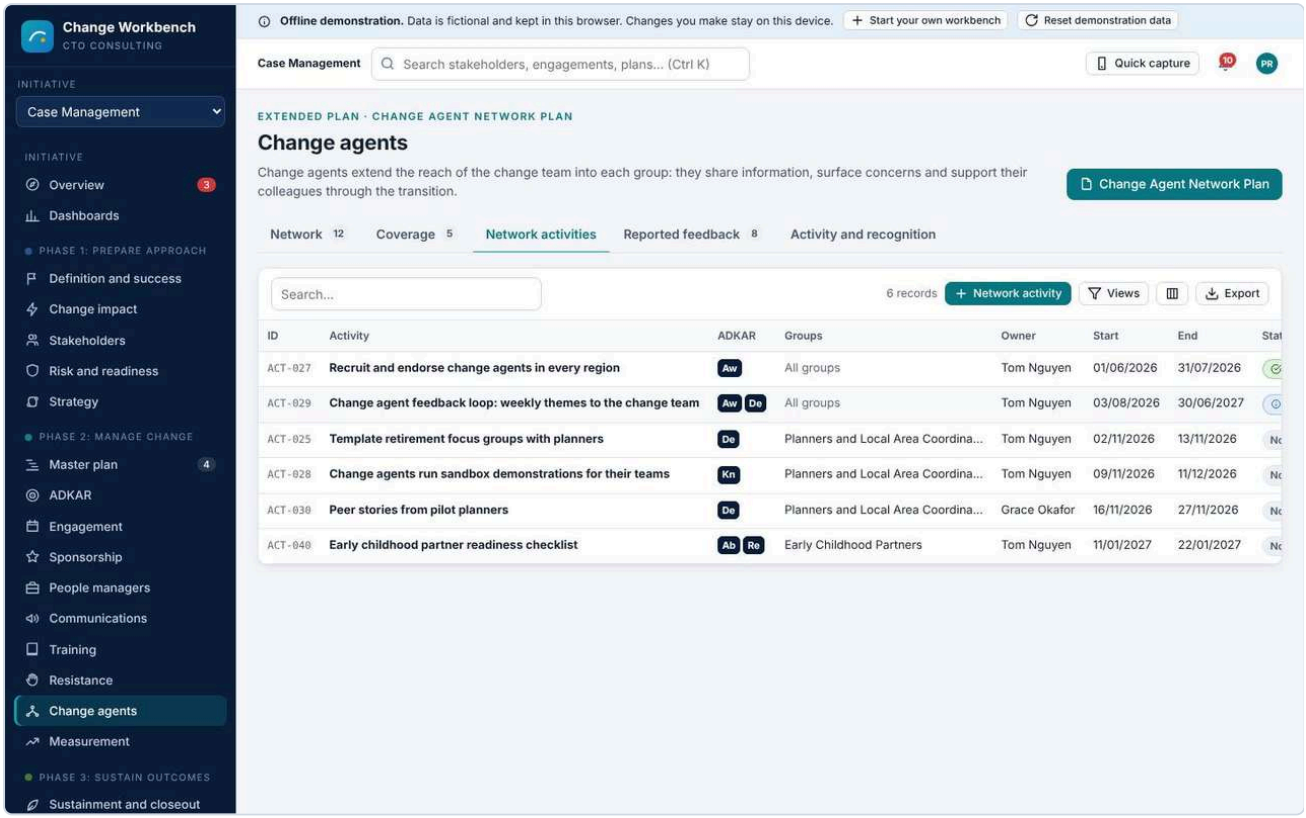

89 Change agents · Coverage

Change agent coverage for each impacted group against the target ratio, and by location.

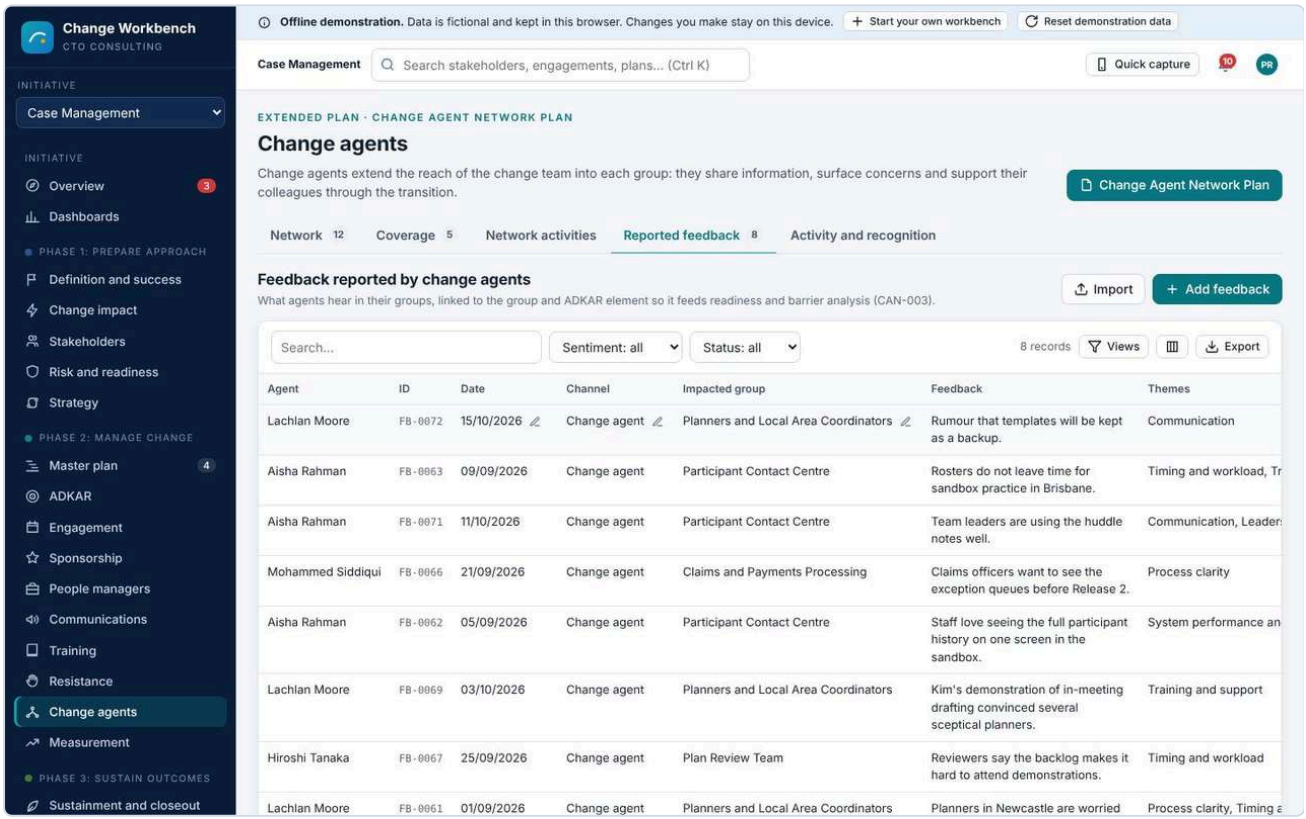

90 Change agents · Network activities

What the change agent network is doing, and when.

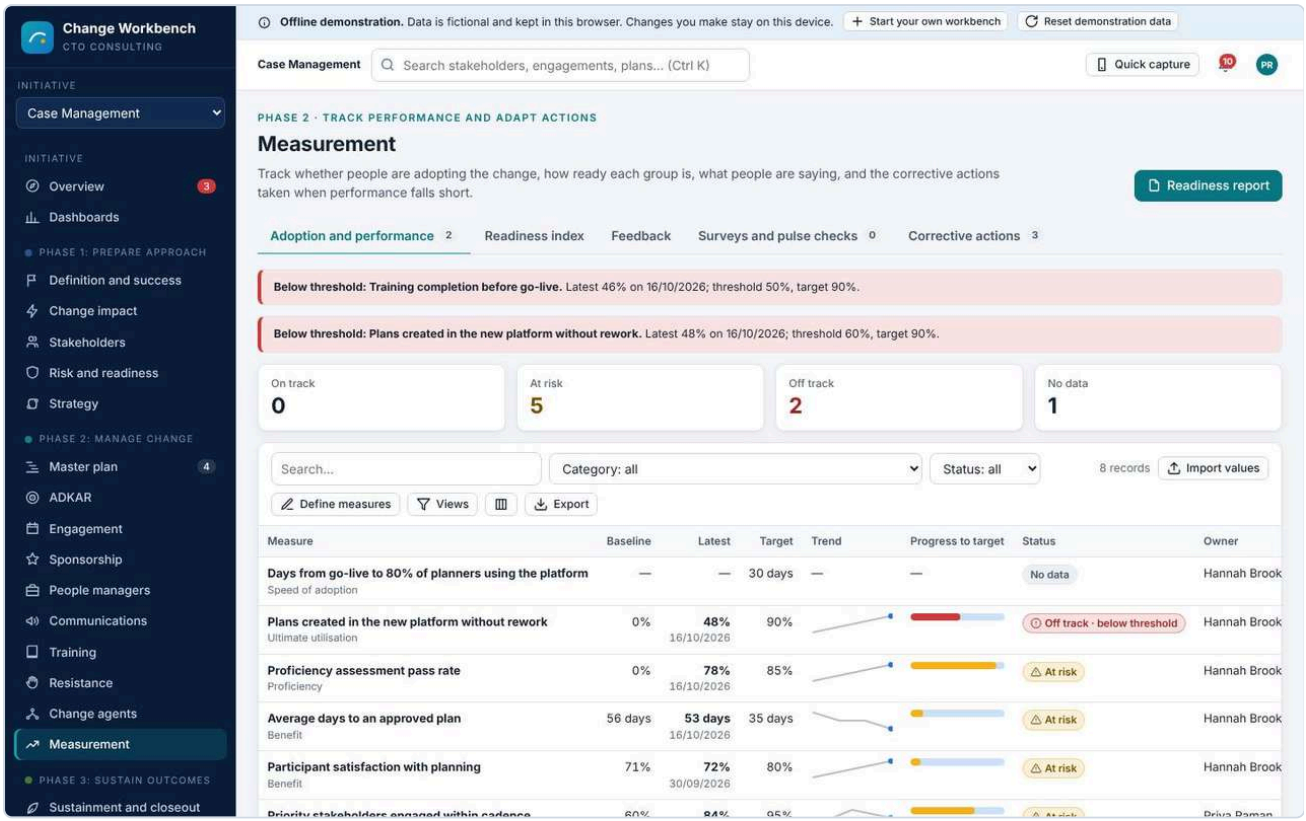

91 Change agents · Reported feedback

Feedback reported by change agents, with sentiment and themes.

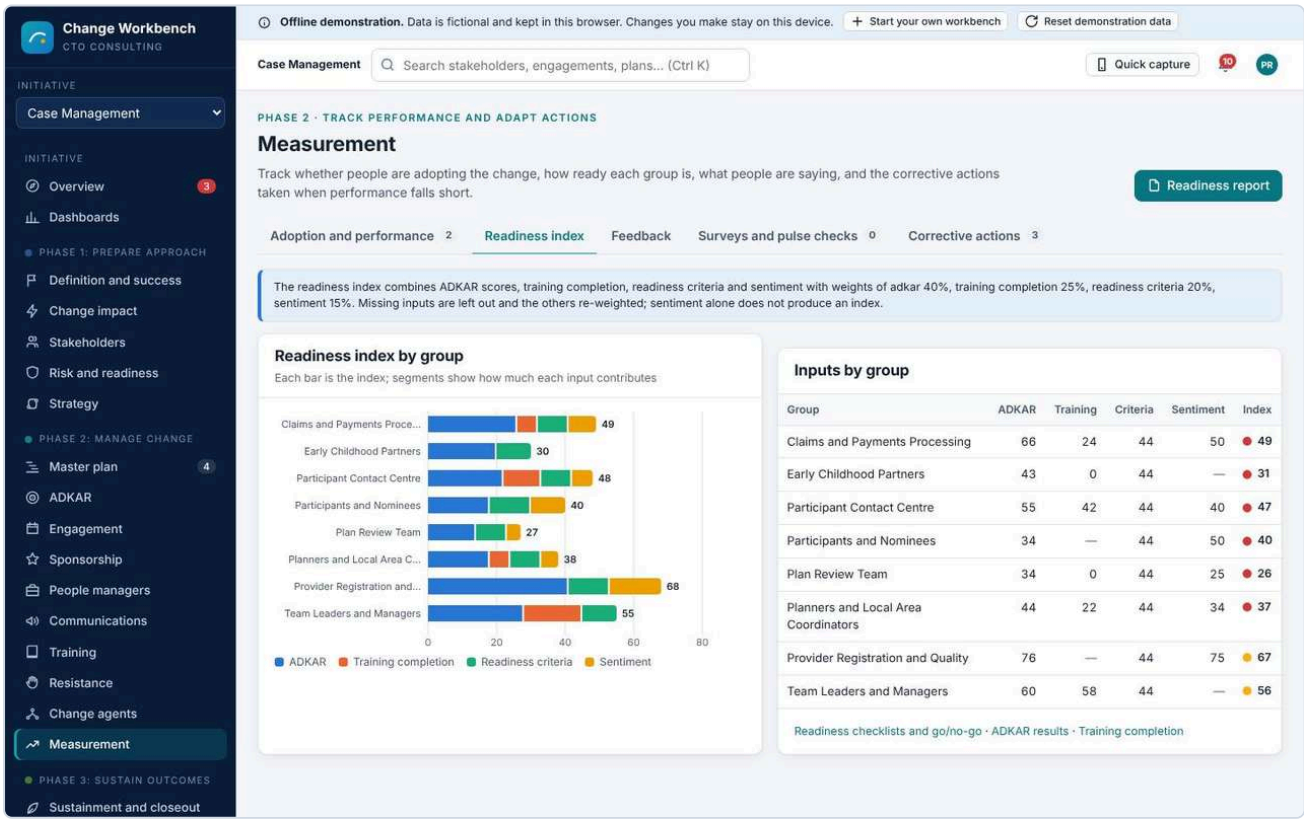

92 Measurement · Adoption and performance

Adoption and performance measures against baseline and target, with an alert when a measure falls below its threshold.

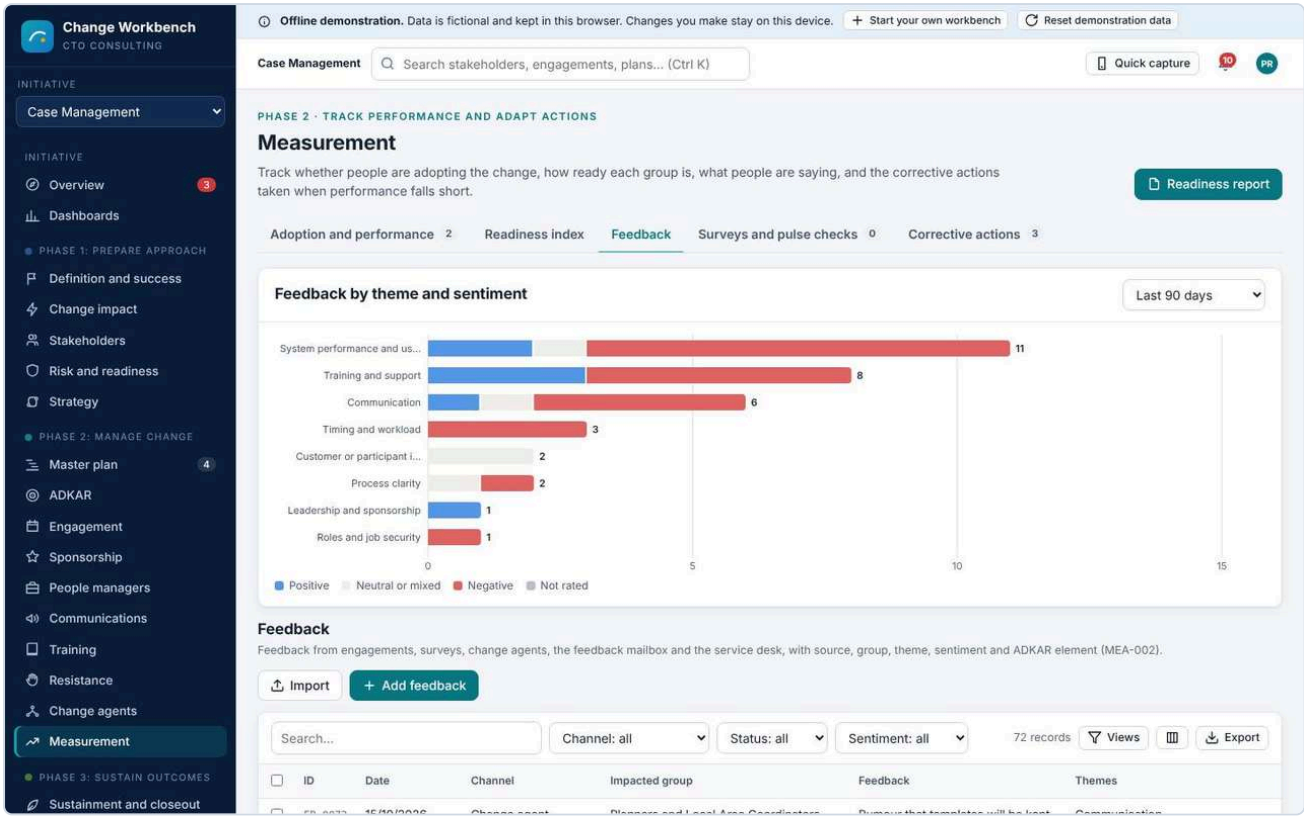

93 Measurement · Readiness index

The readiness index for each group, combining ADKAR results, training, readiness criteria and sentiment.

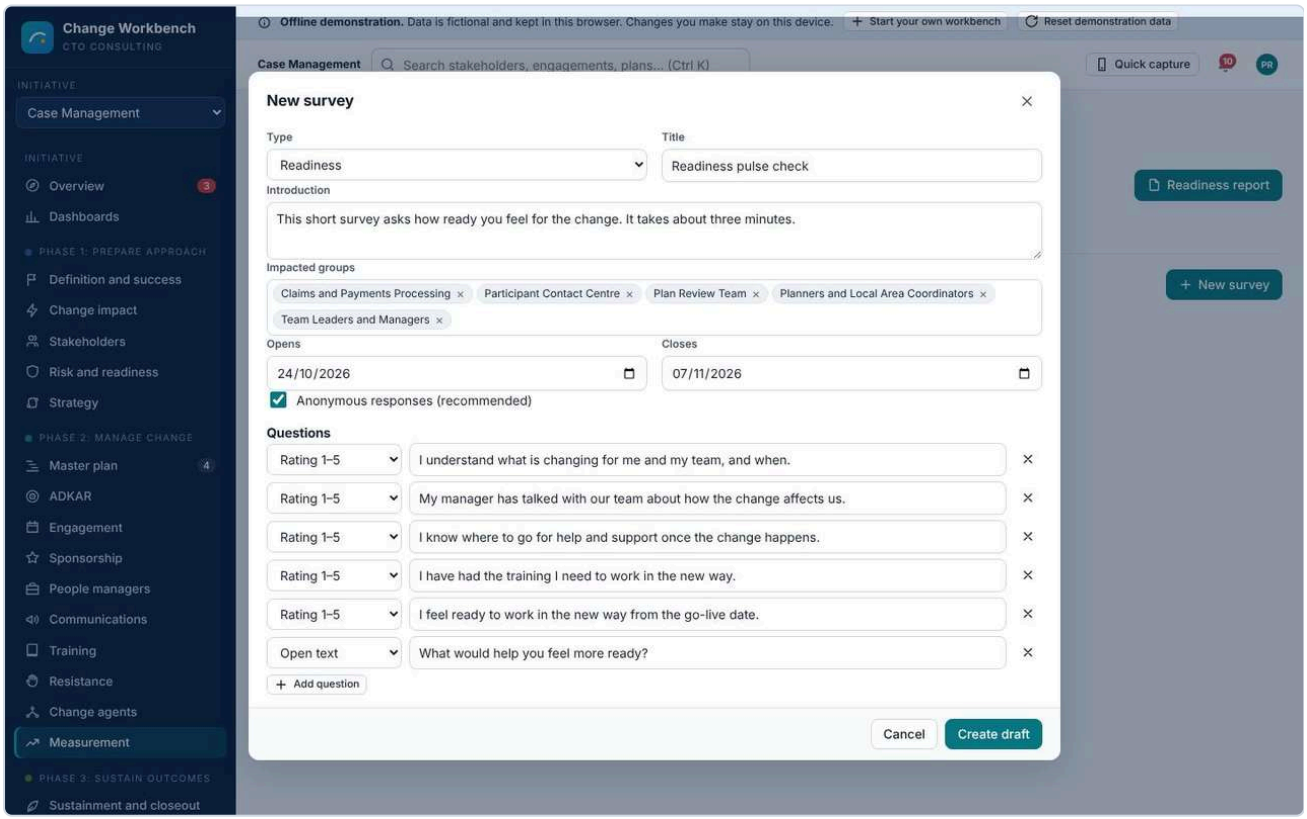

94 Measurement · Feedback

Feedback by theme and sentiment, from engagements, surveys, change agents and other channels.

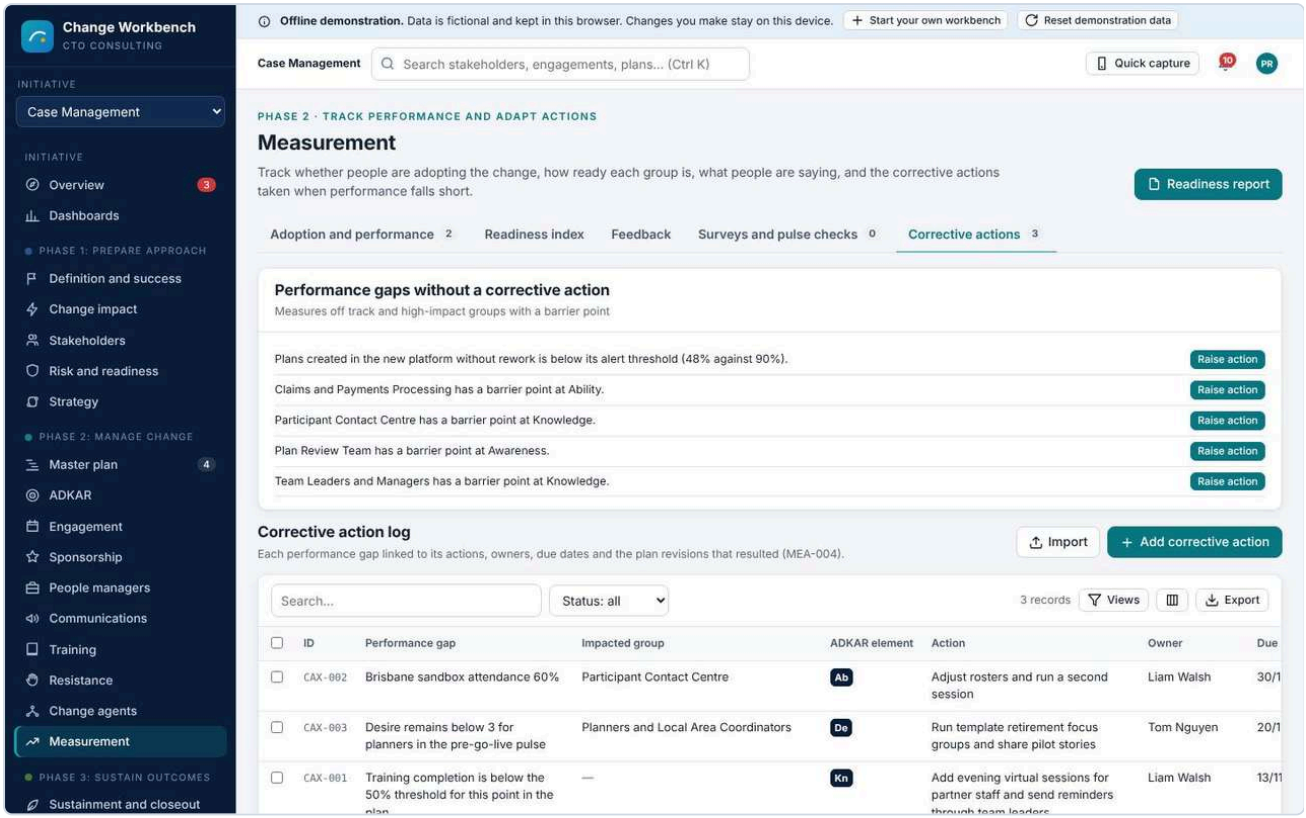

95 Measurement · A new pulse survey

A new readiness, sentiment or training evaluation survey, with questions suggested for each type.

96 Measurement · Corrective actions

Corrective actions for performance gaps, linked to the measure, group and ADKAR element.

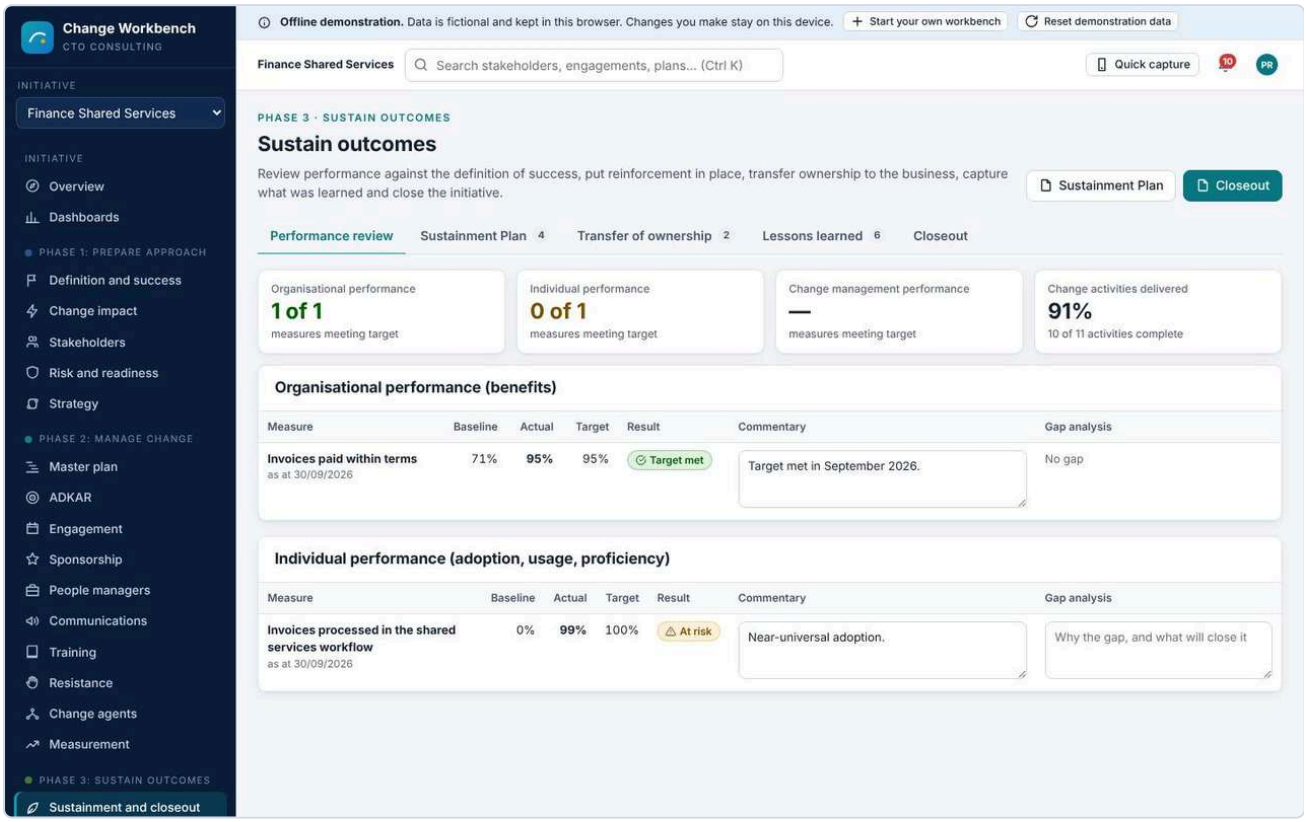

PART 7 OF 14

Phase 3 · Sustain Outcomes

Review performance against the definition of success, put reinforcement in place, hand ownership to the business and close out, capturing lessons for the next initiative.

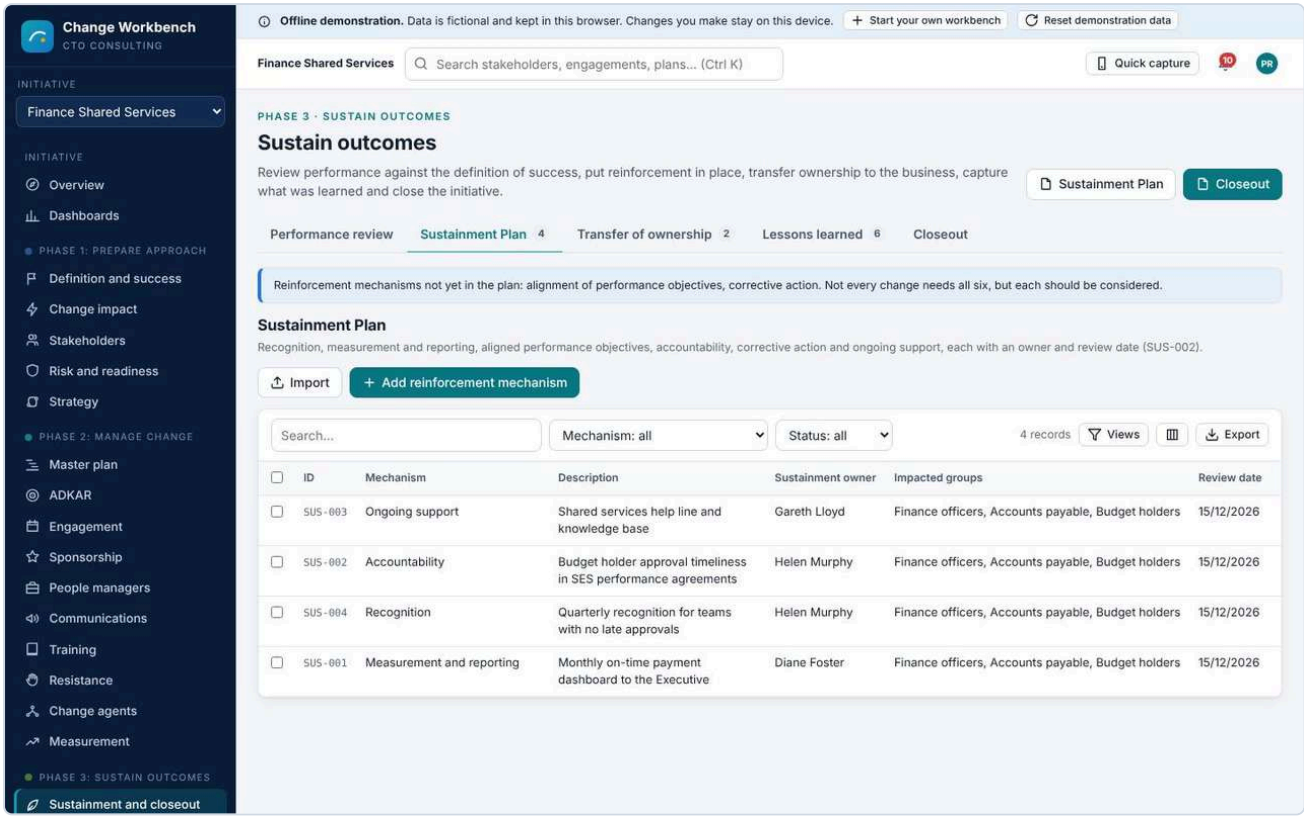

97 Sustainment · Performance review

The performance review: organisational, individual and change management performance against targets, with the gap analysis.

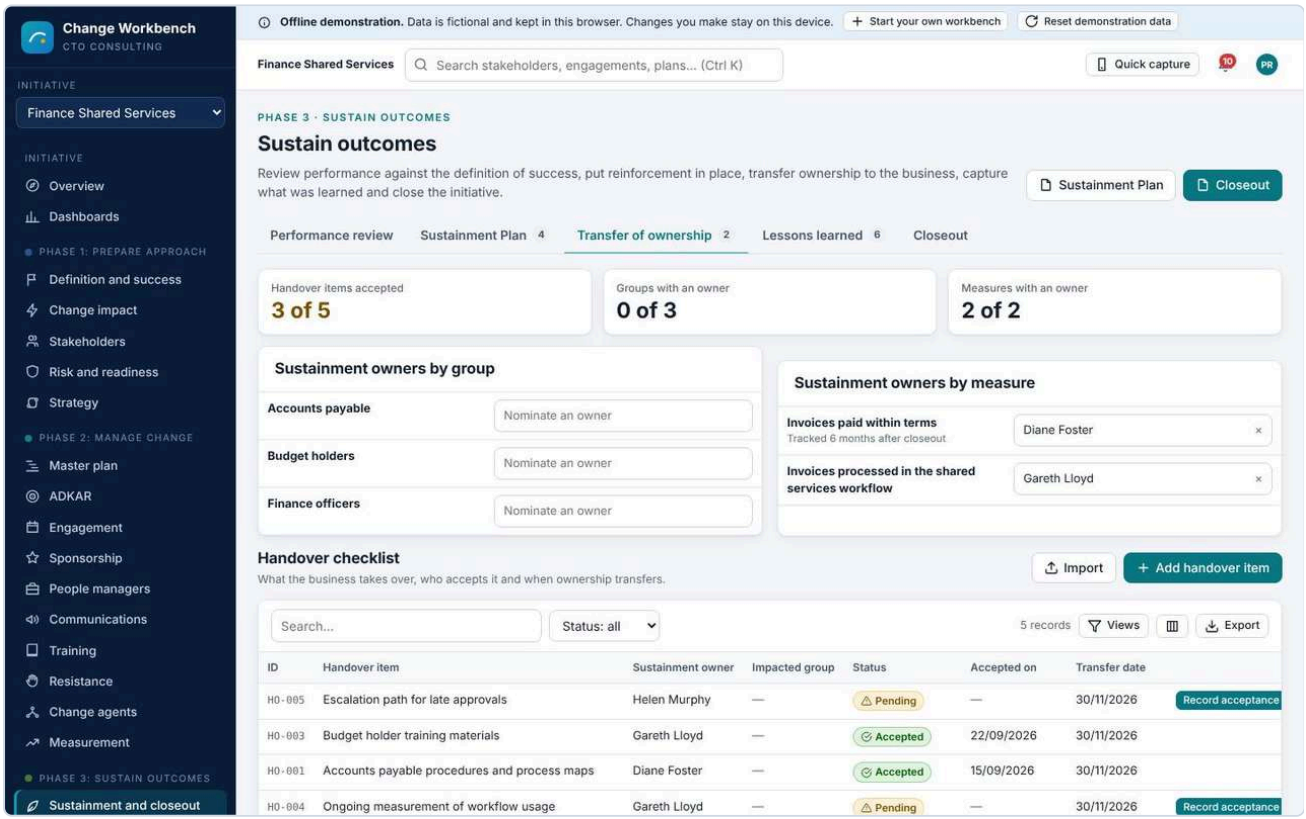

98 Sustainment · Sustainment Plan

The Sustainment Plan: reinforcement mechanisms, with owners and review dates.

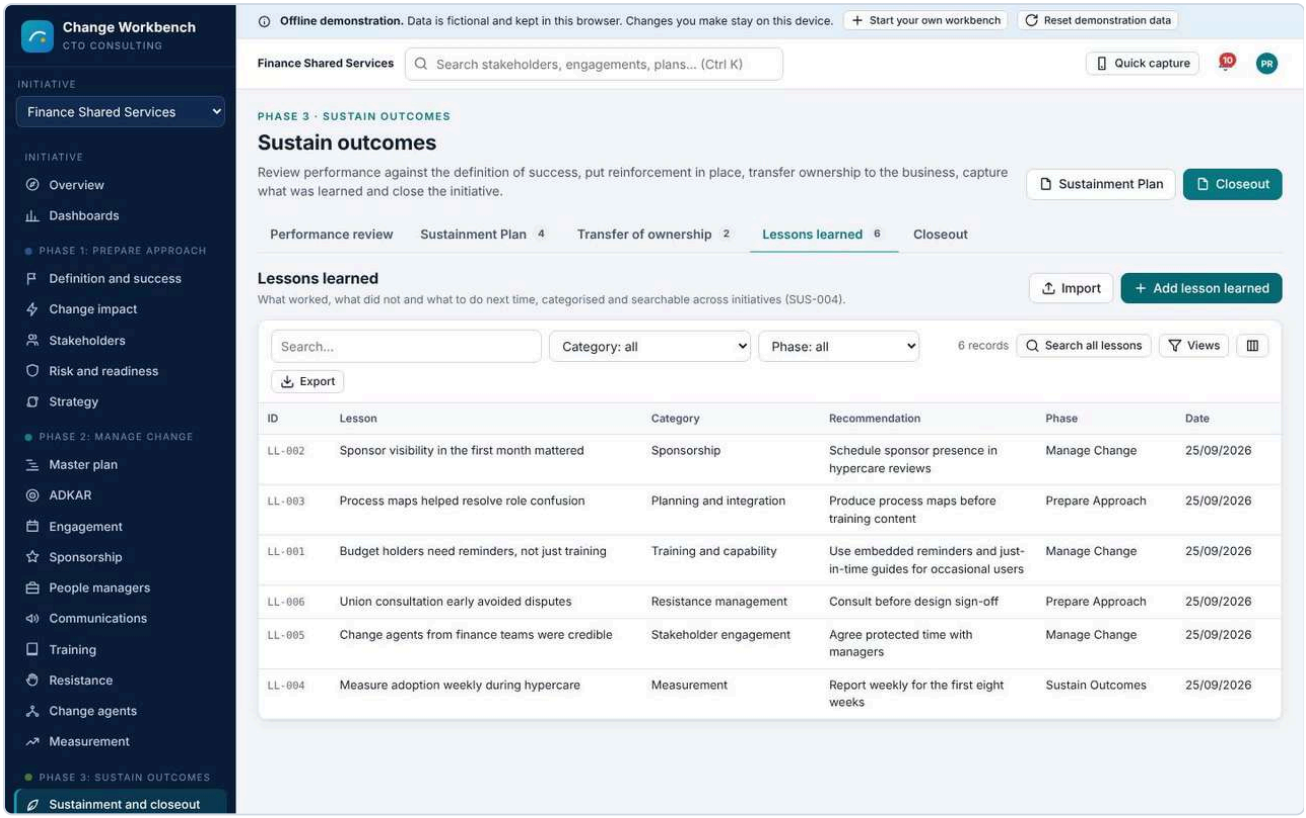

99 Sustainment · Transfer of ownership

Transfer of ownership: sustainment owners by group and by measure, and the handover checklist.

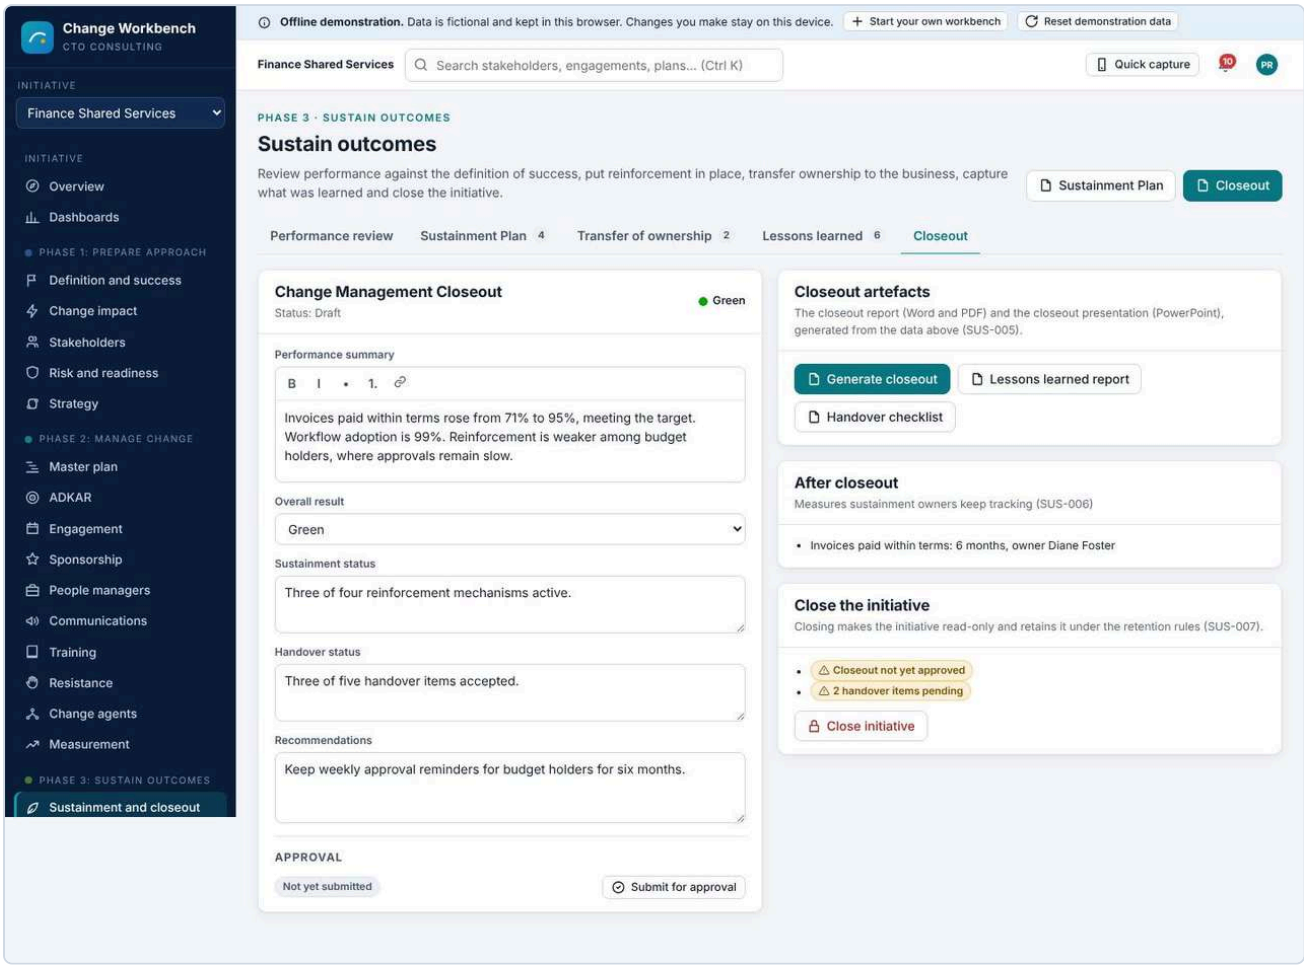

100 Sustainment · Lessons learned

Lessons learned, by category and phase, with recommendations.

101 Sustainment · Closeout

The Change Management Closeout: the performance summary and overall result, closeout artefacts, and closing the initiative, after which it is read-only.

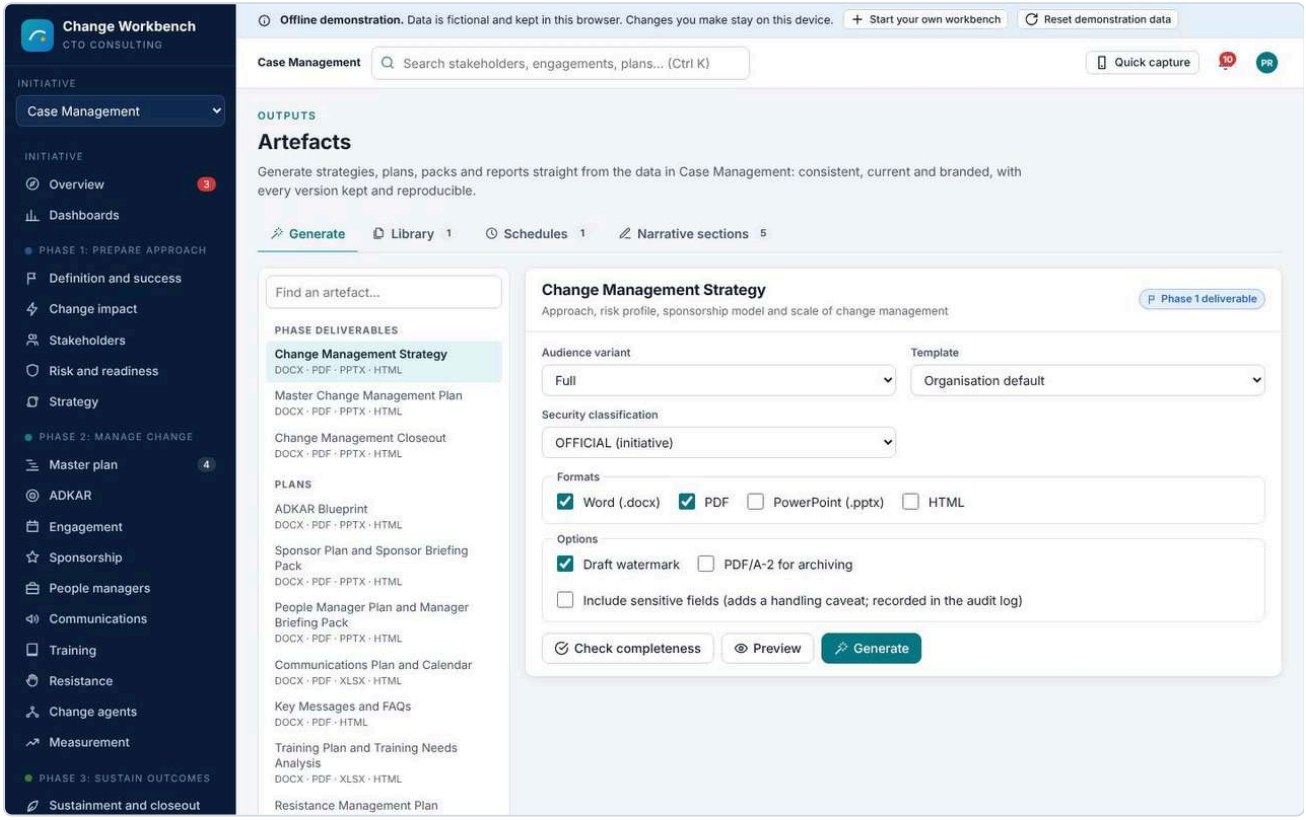

PART 8 OF 14

Artefacts

Strategies, plans, packs and reports are generated straight from the data, in Word, PowerPoint, PDF, Excel and HTML. A completeness check comes first, and every version is kept in a library with the data it was made from.

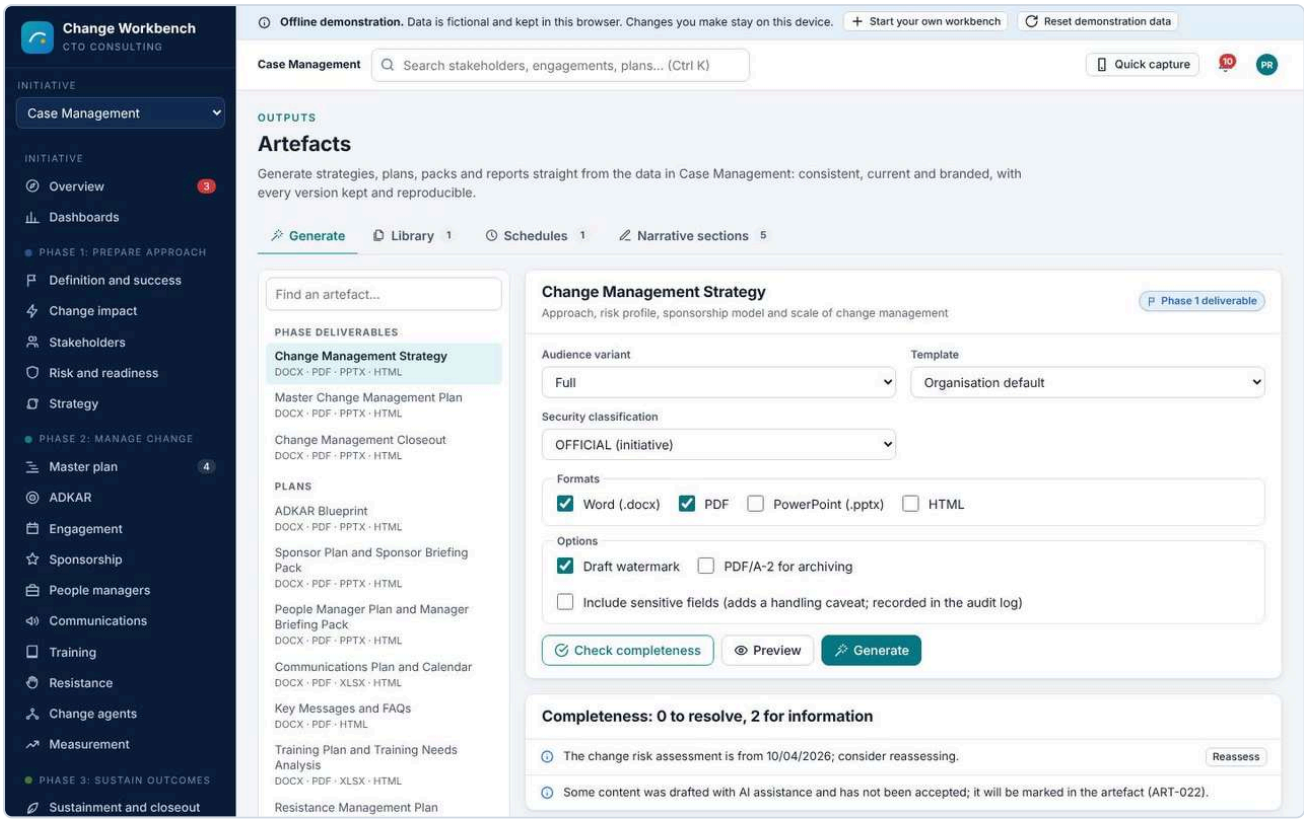

102 Artefacts · Generate

Generate any artefact from the data in Word, PowerPoint, PDF, Excel or HTML, choosing the audience, template, classification and options.

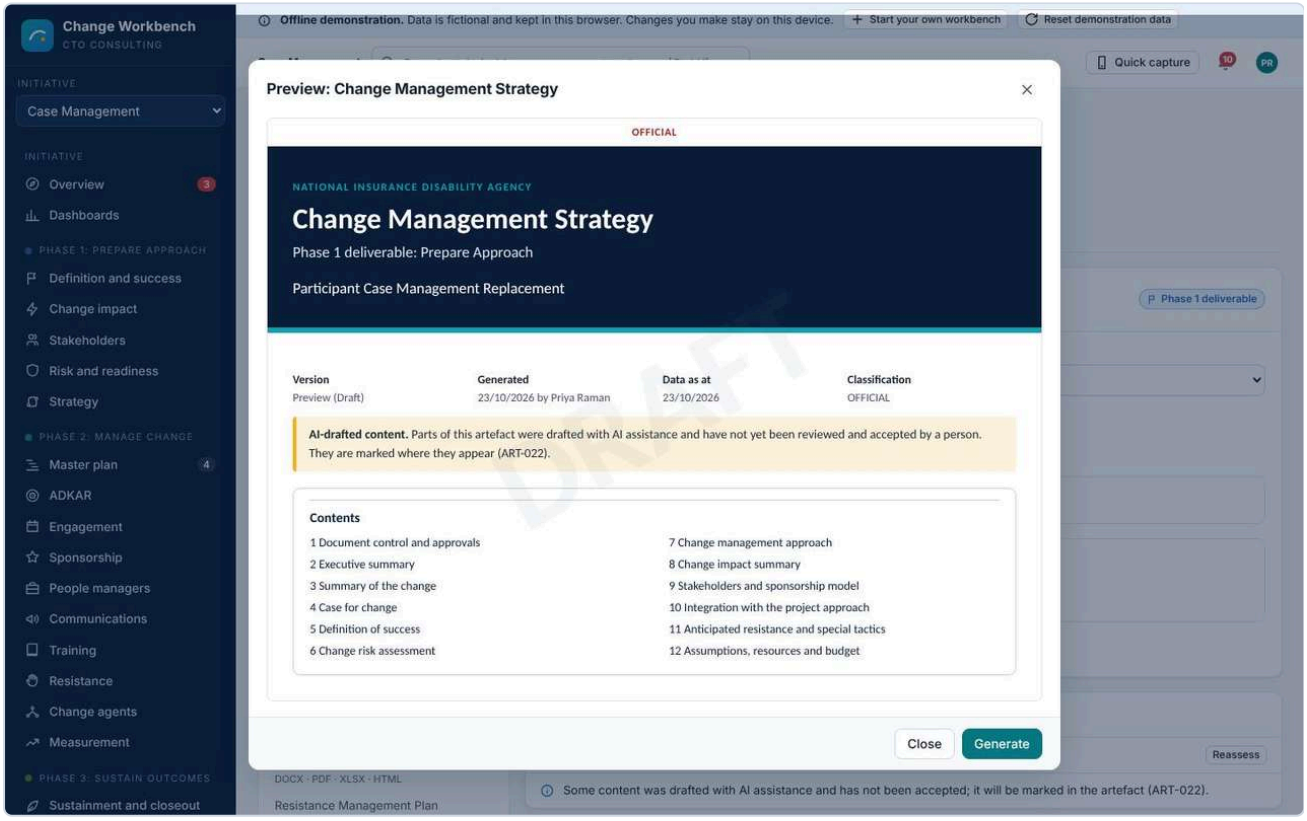

103 Artefacts · Completeness check

The completeness check lists what is missing before generating, so a draft can be finished first or generated with placeholders.

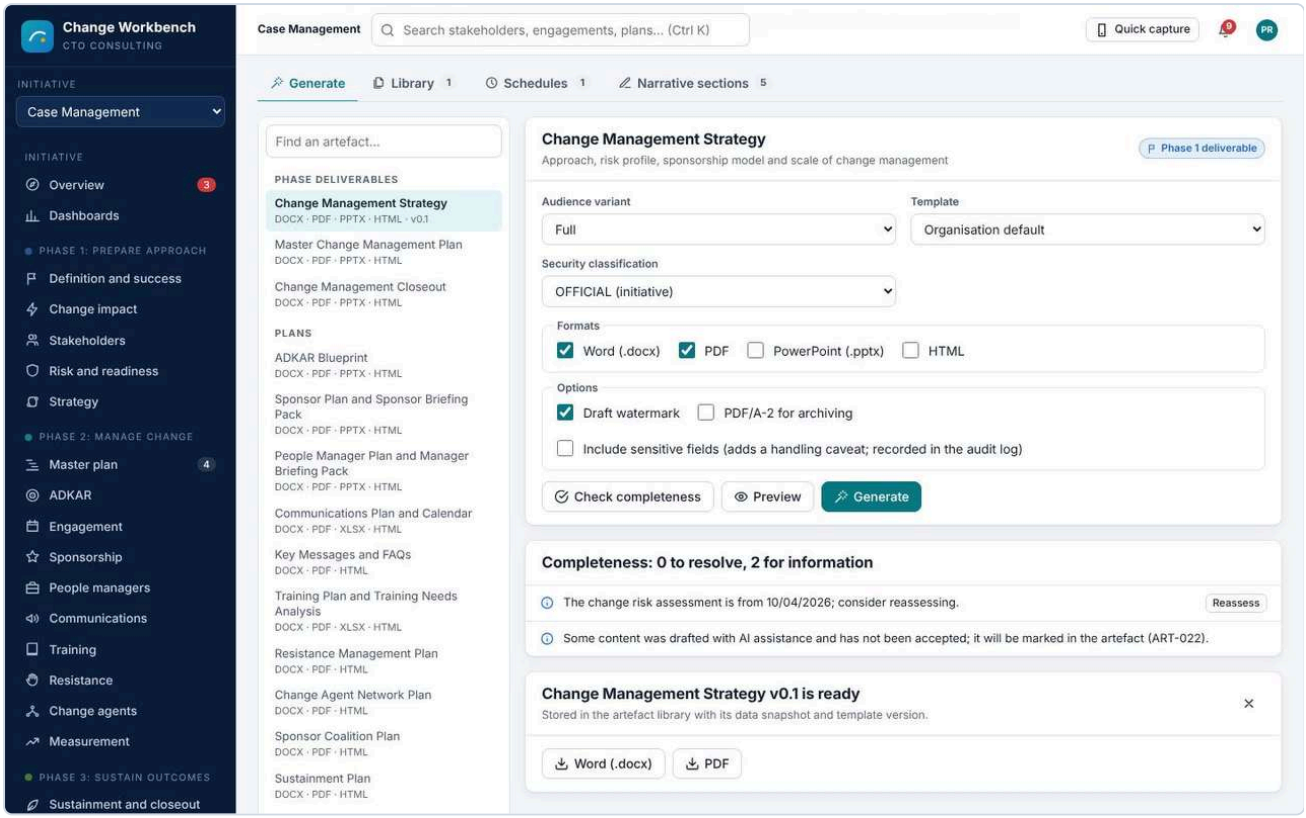

104 Artefacts · Preview

A preview of the document before it is generated.

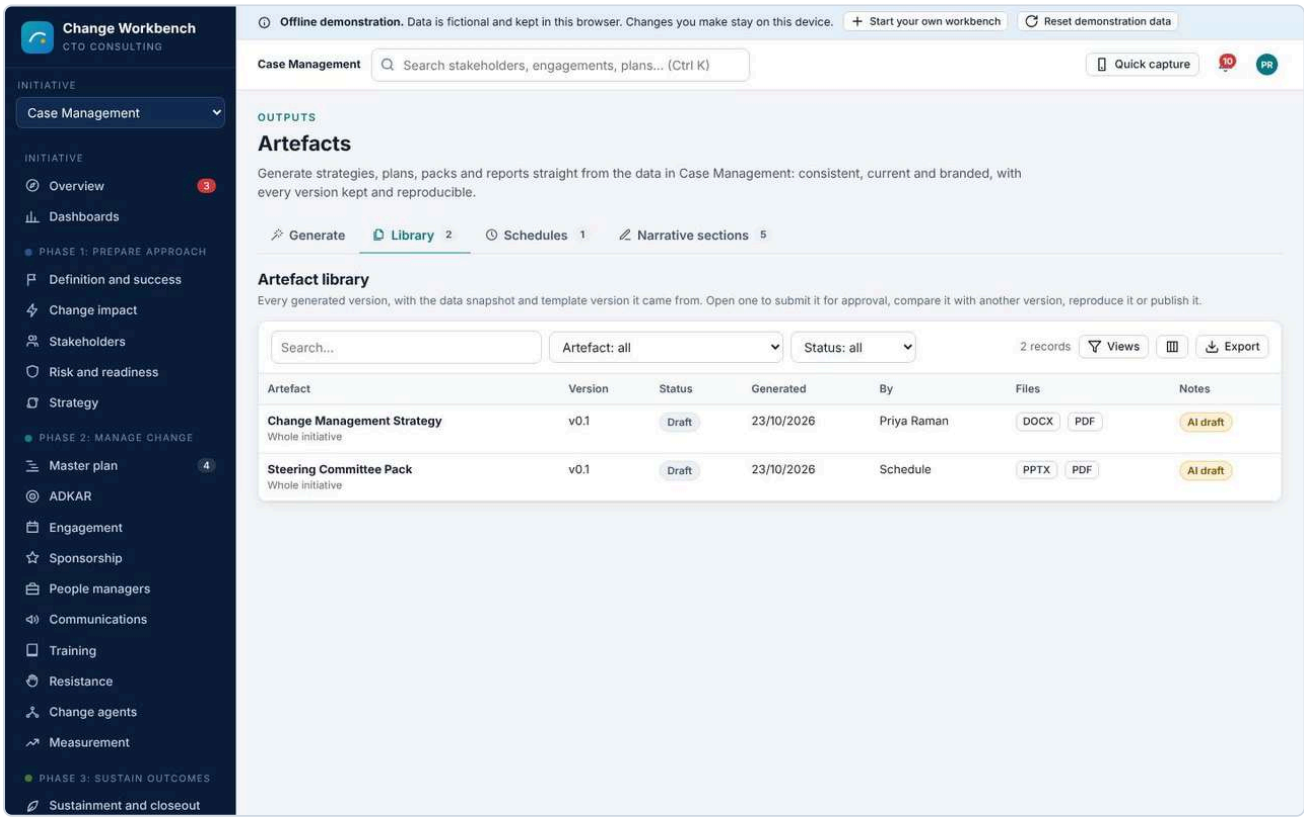

105 Artefacts · Generated and ready to download

Generated in the browser, ready to download, and recorded in the library.

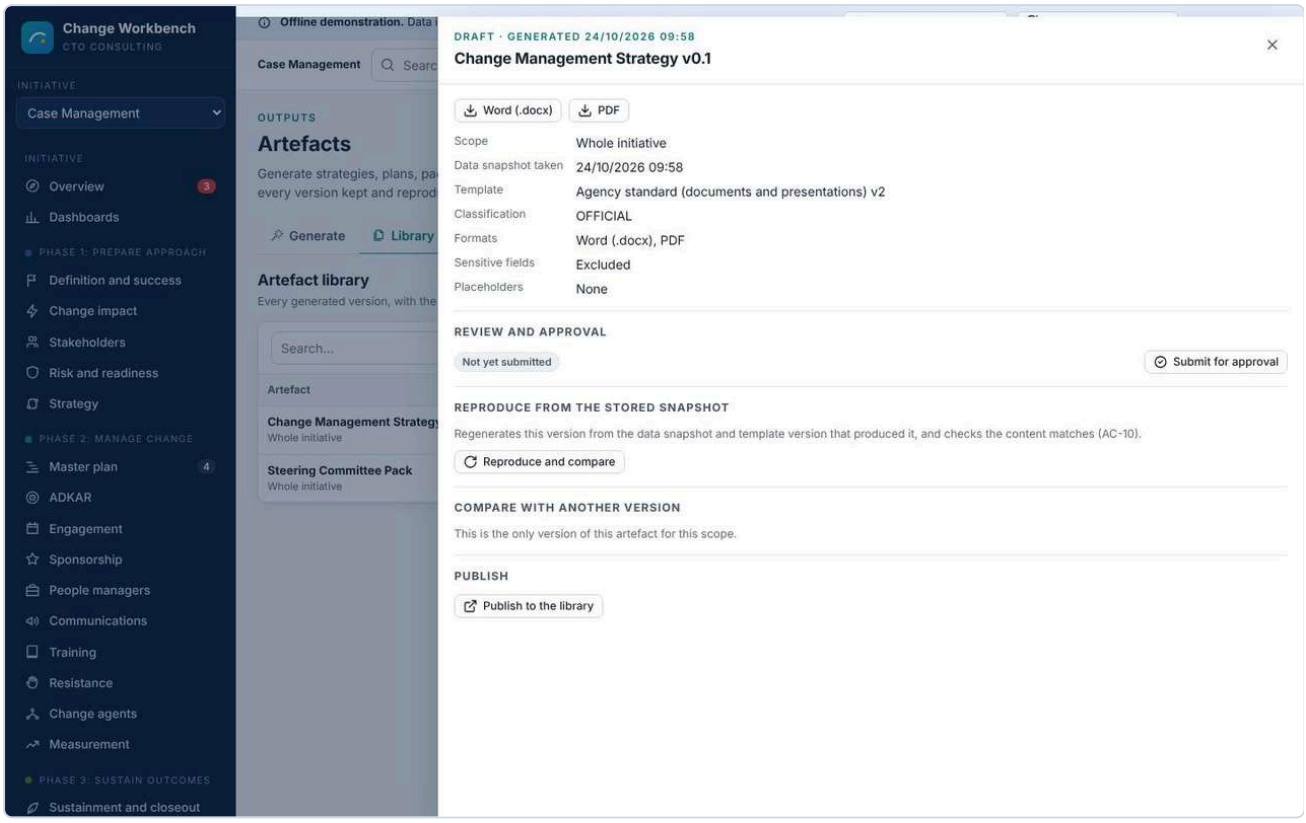

106 Artefacts · Library

The artefact library: every version generated, with its data snapshot, status, files and notes.

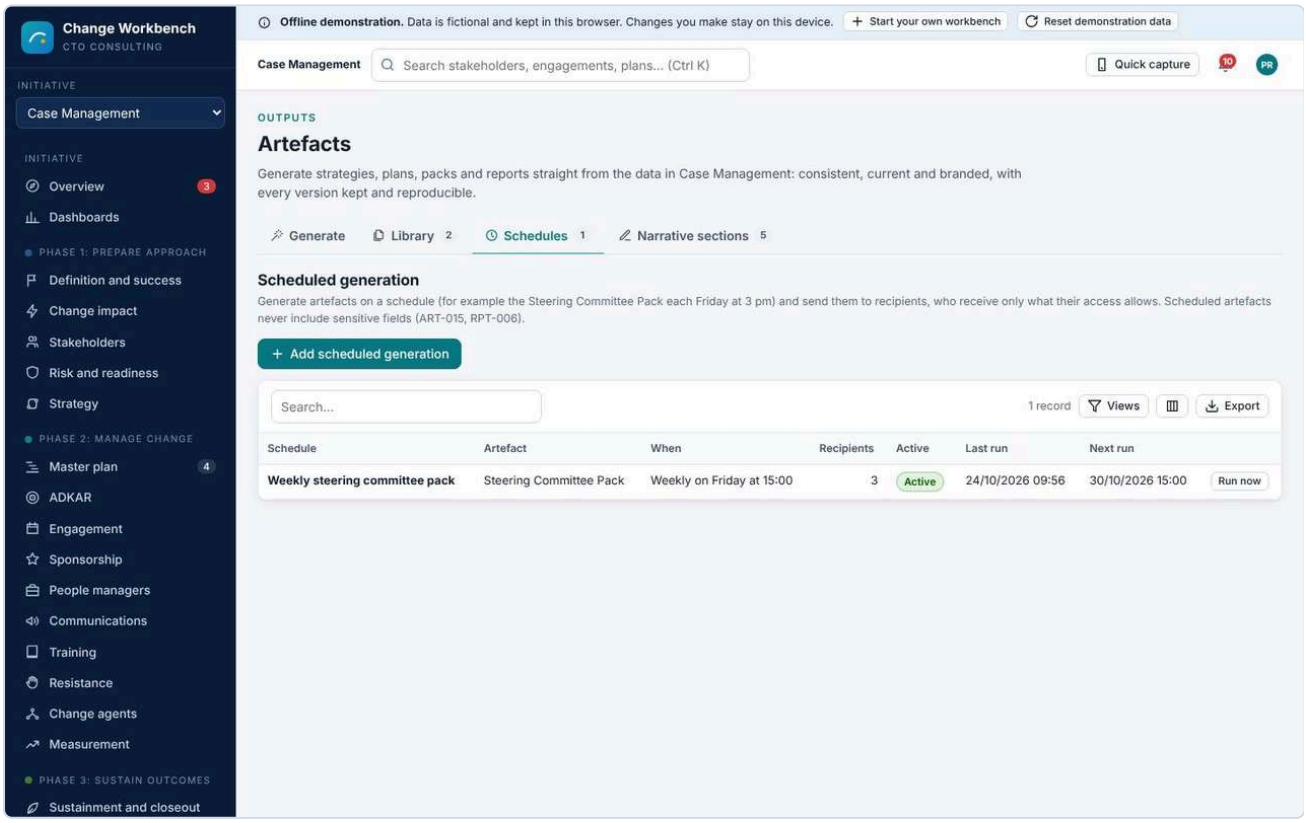

107 Artefacts · A library entry

A library entry: its files and settings, review and approval, reproduction from the stored snapshot, comparison with another version, and publishing.

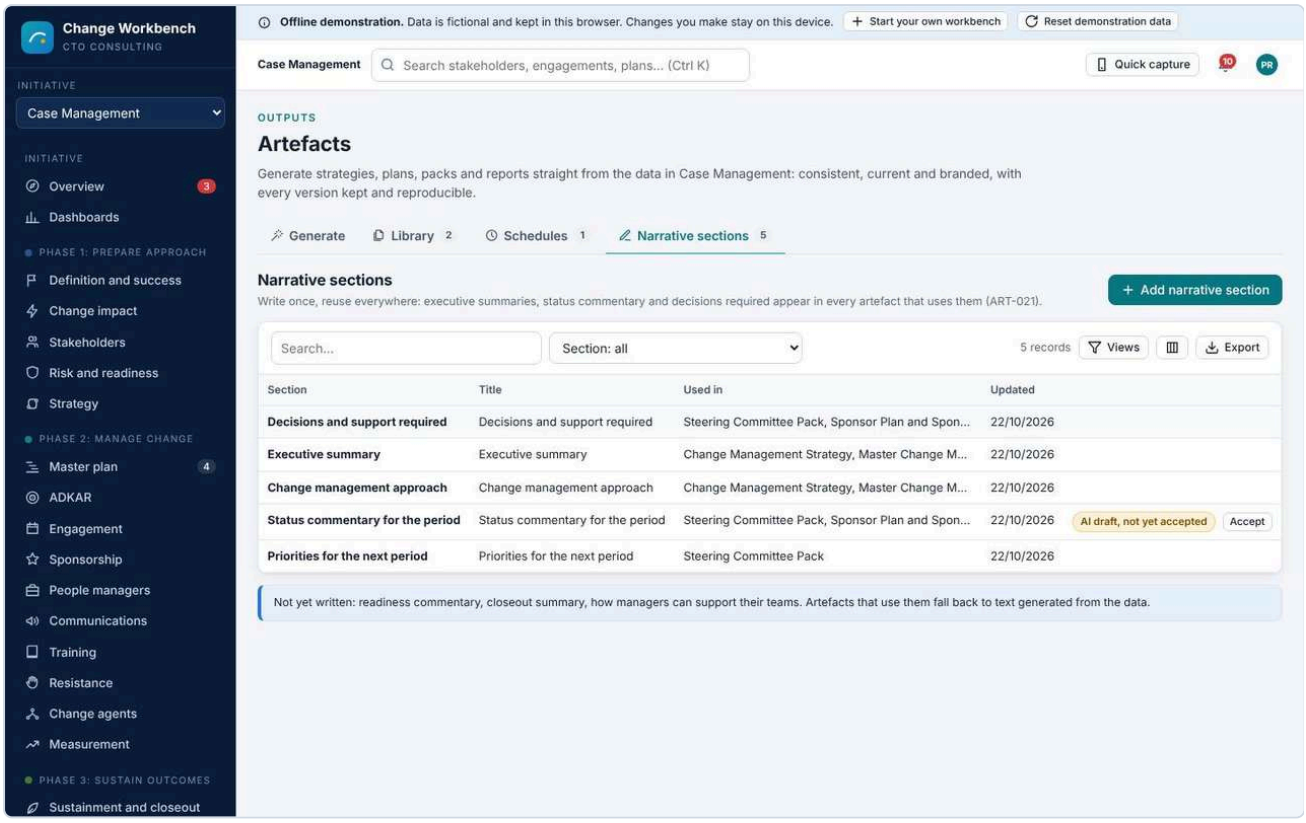

108 Artefacts · Schedules

Scheduled generation, such as the weekly Steering Committee Pack, with recipients and the next run.

109 Artefacts · Narrative sections

Narrative sections, written once and reused in every artefact that needs them, such as the executive summary.

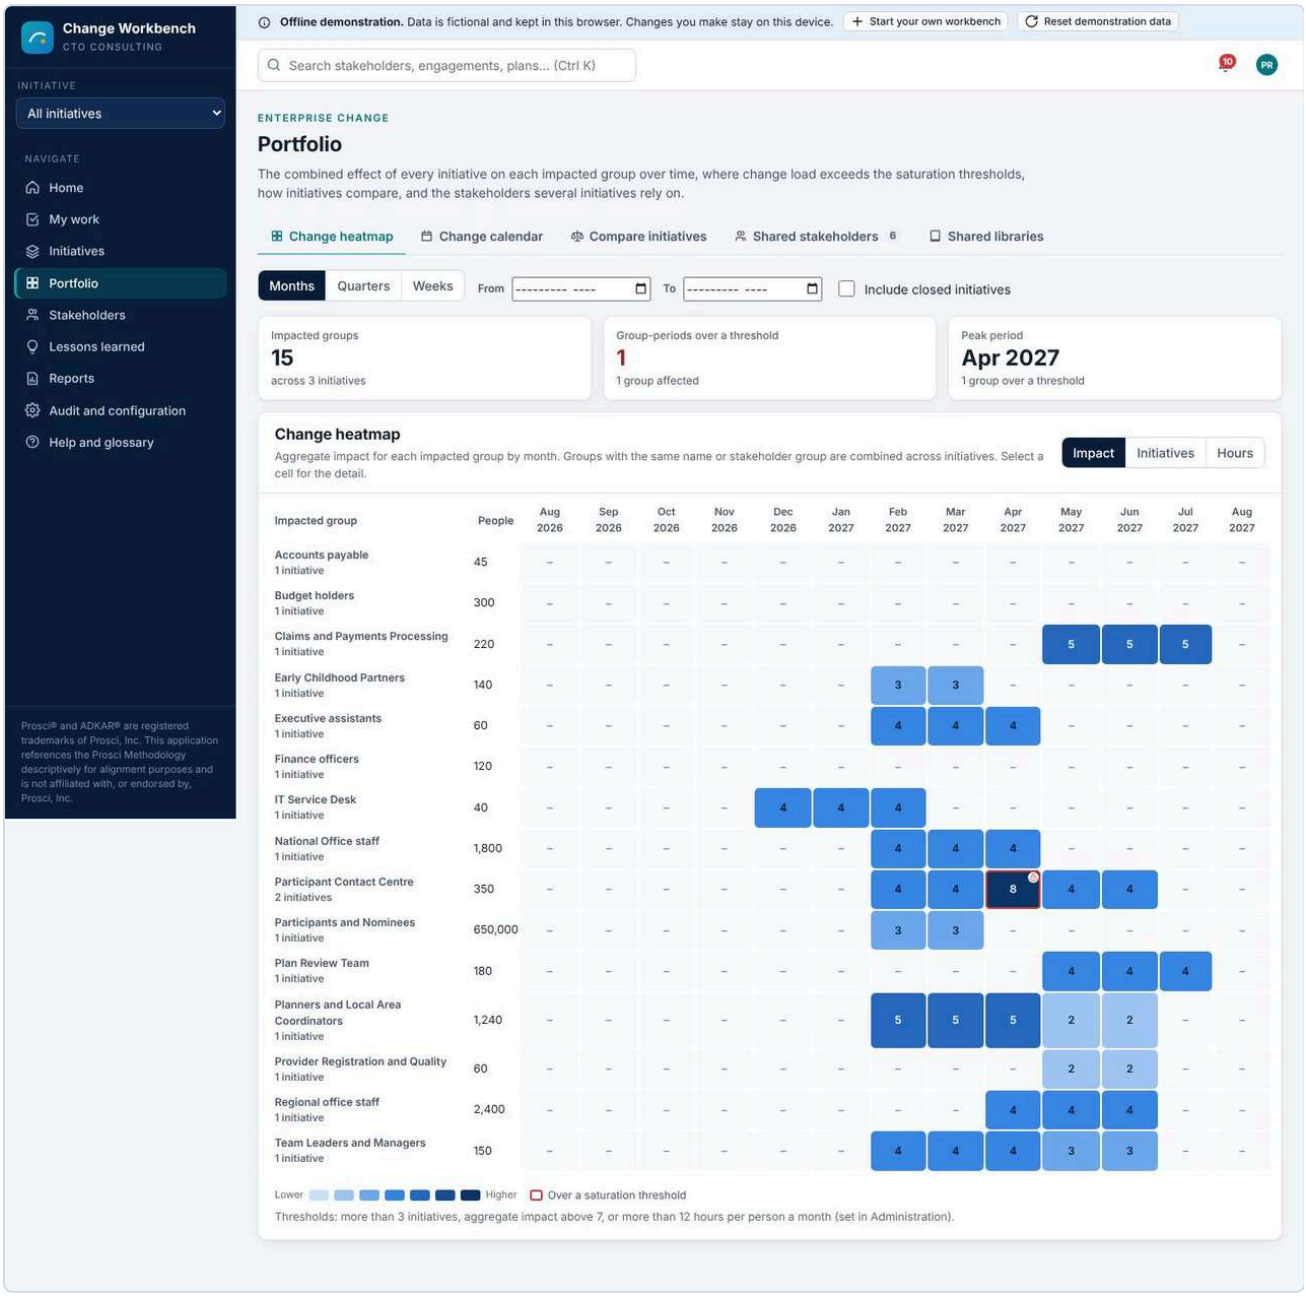

PART 9 OF 14

Portfolio and the stakeholder master

See the combined change load on every group across initiatives, and keep one record for each person and group, shared by all initiatives.

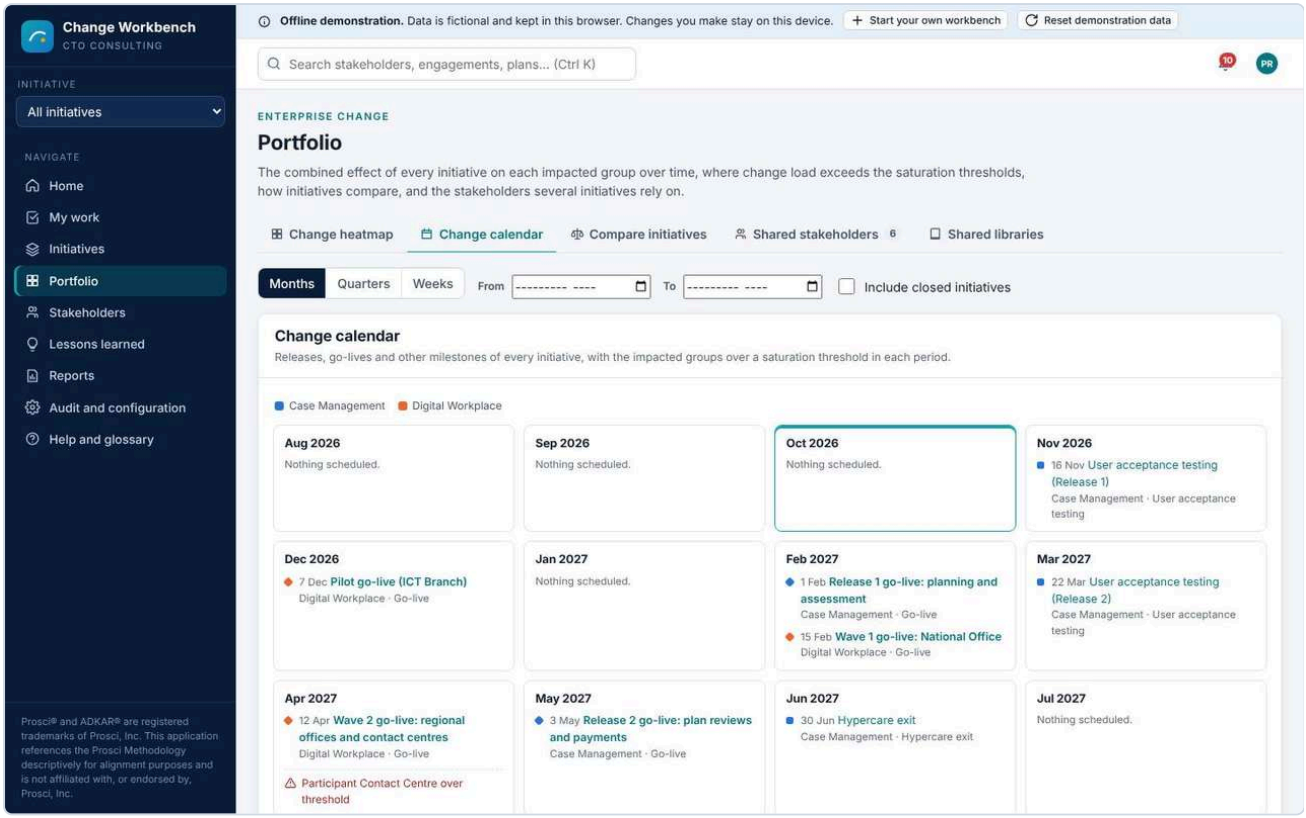

110 Portfolio · Change heatmap

The portfolio change heatmap: the combined impact of every initiative on each group over time, flagging groups past the saturation thresholds.

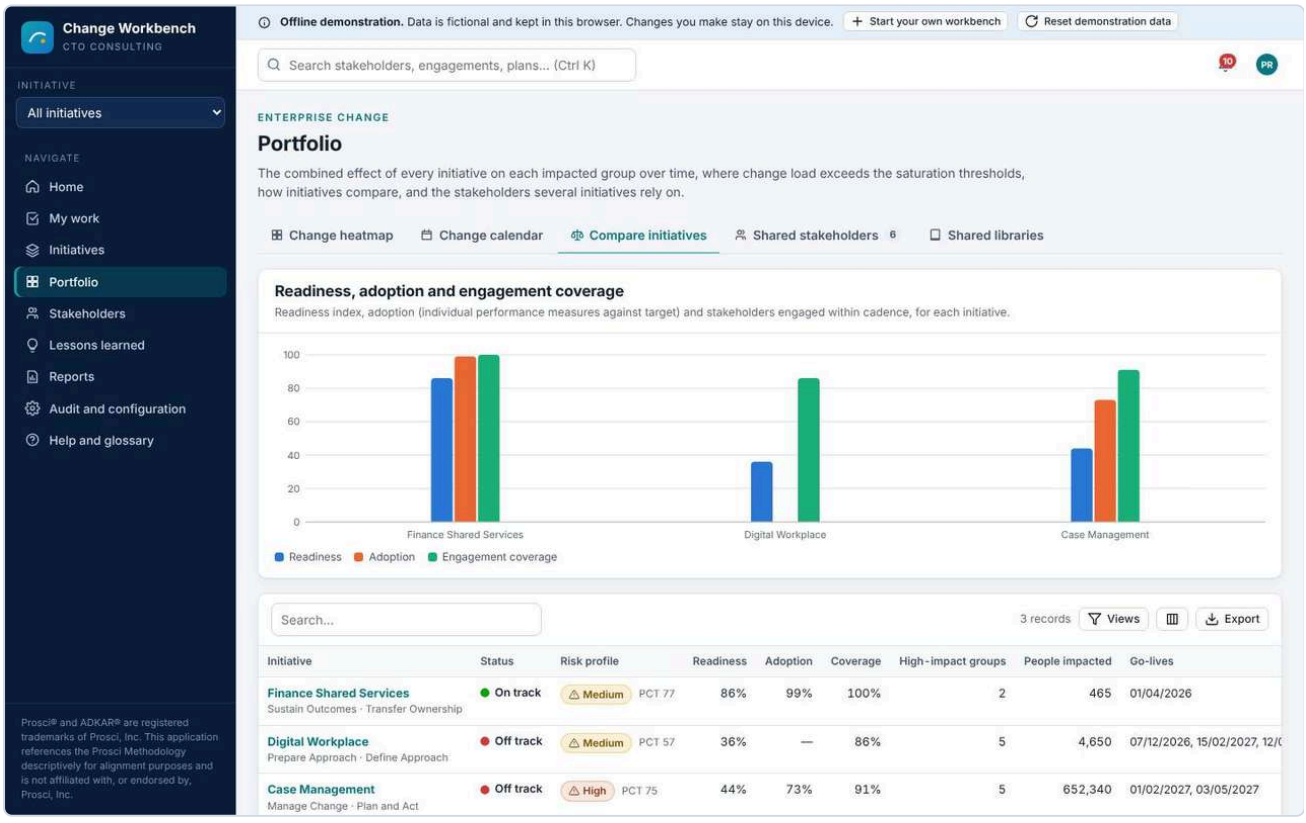

111 Portfolio · Change calendar

The change calendar of go-lives and milestones across initiatives.

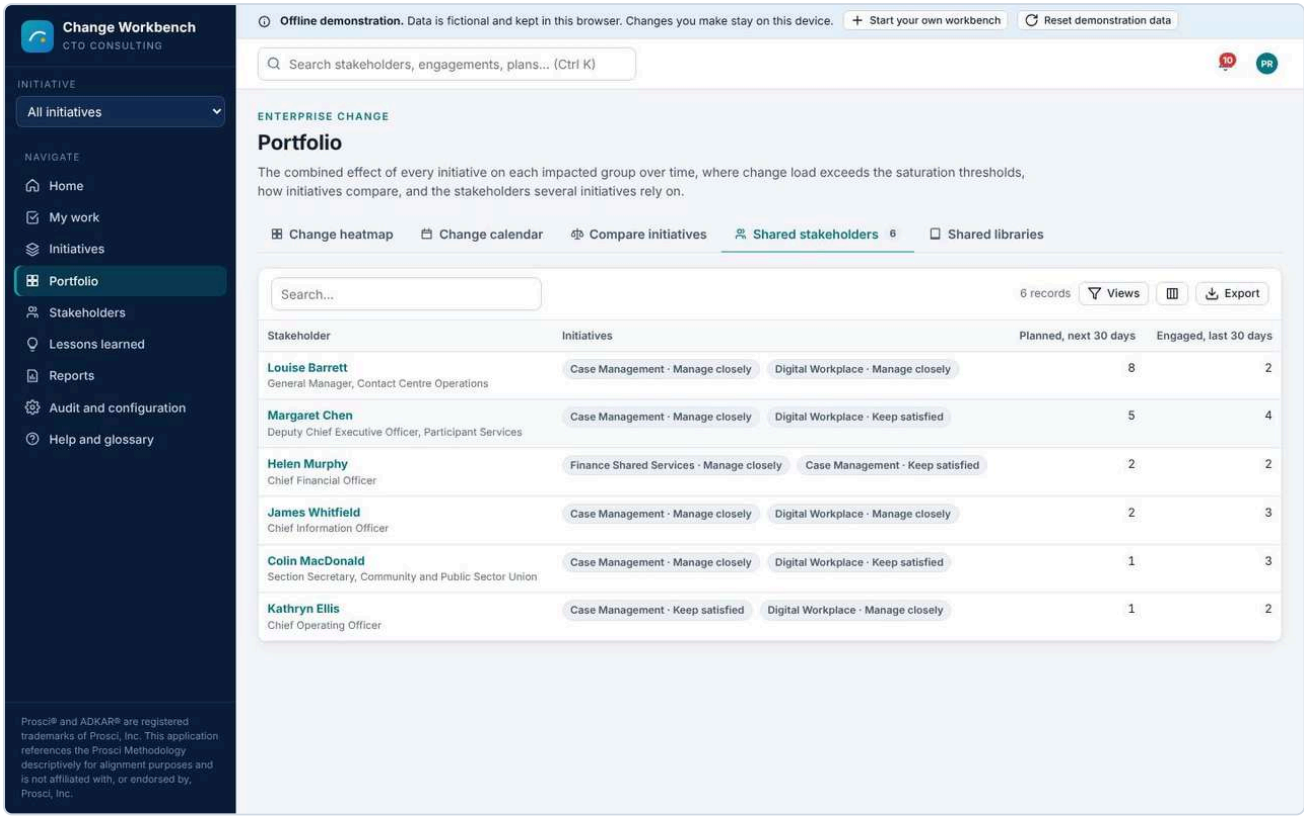

112 Portfolio · Compare initiatives

Initiatives compared on readiness, adoption, engagement coverage and risk.

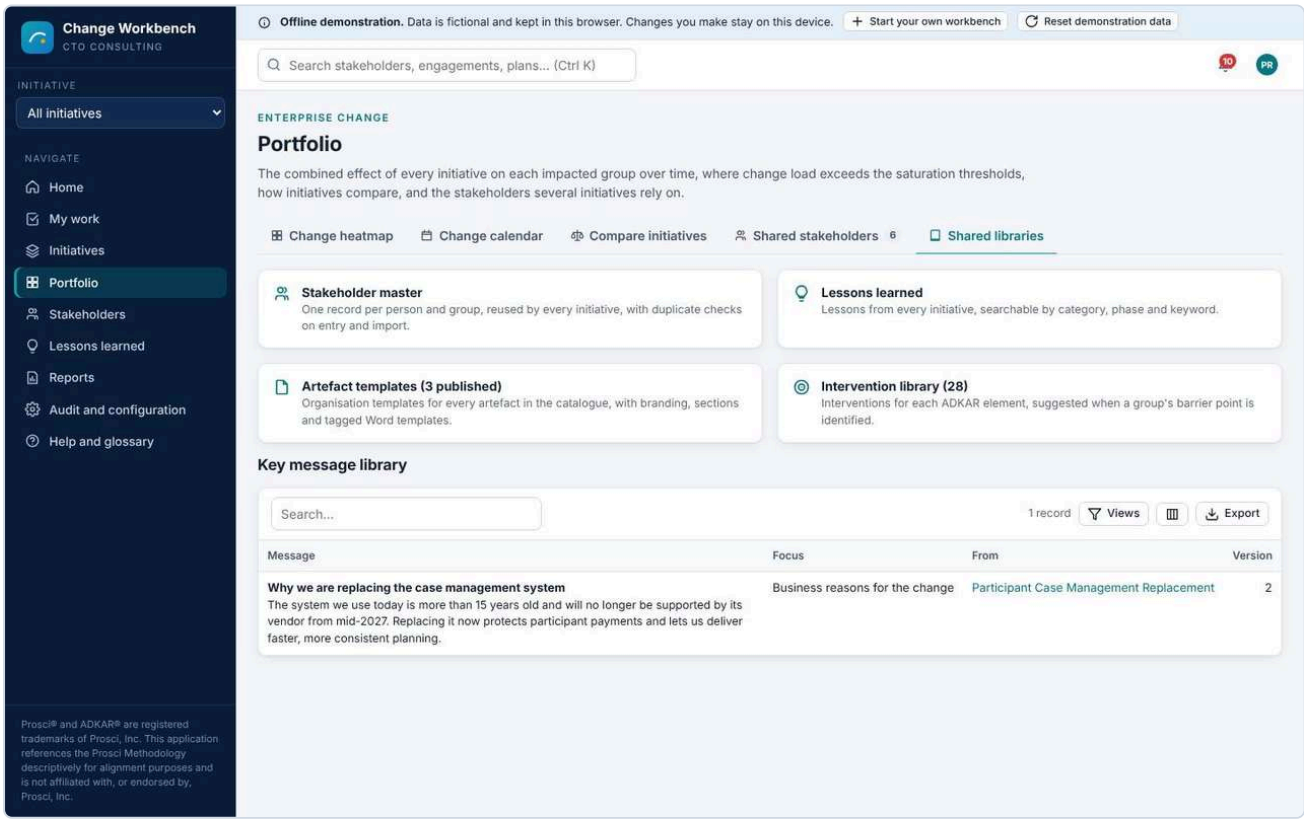

113 Portfolio · Shared stakeholders

Stakeholders shared across initiatives, and how often each is being engaged.

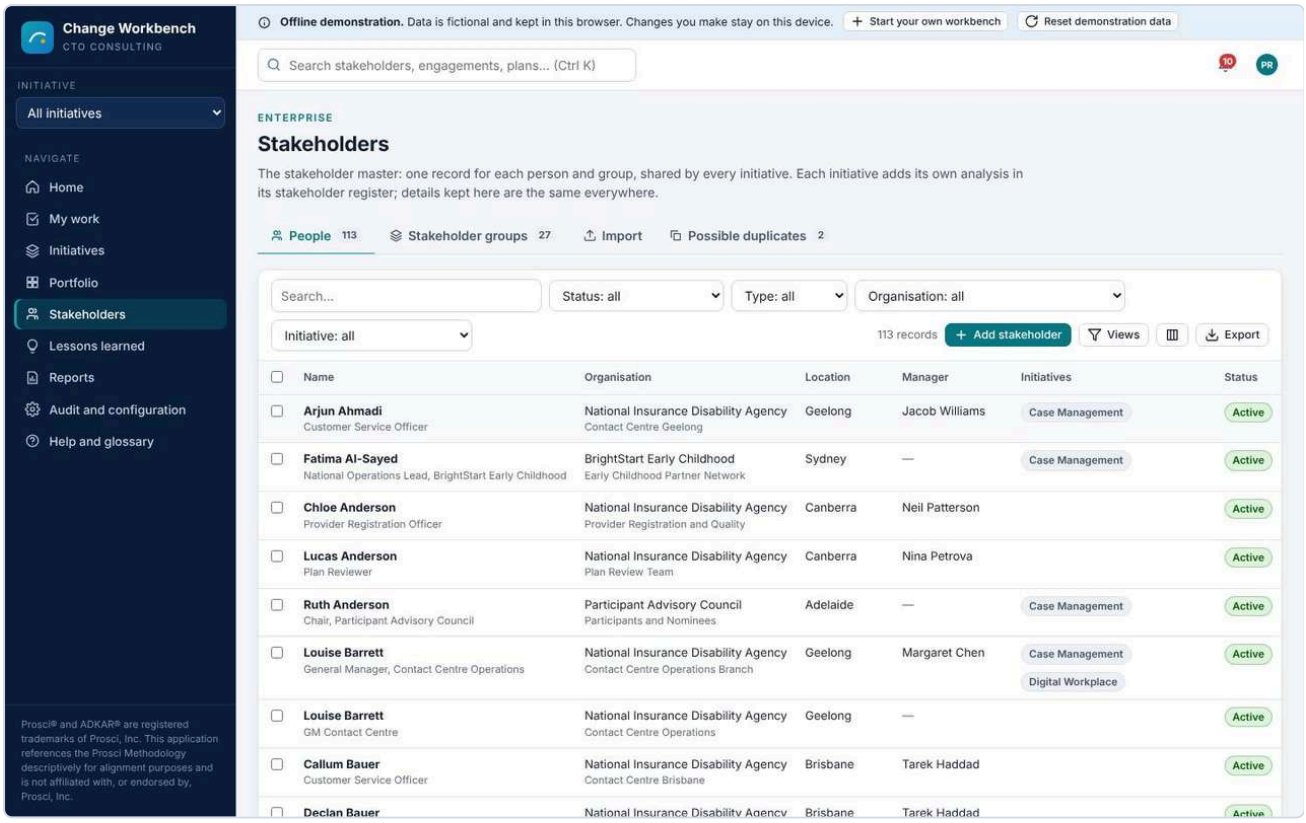

114 Portfolio · Shared libraries

Libraries shared across initiatives: the stakeholder master, lessons learned, templates, interventions and key messages.

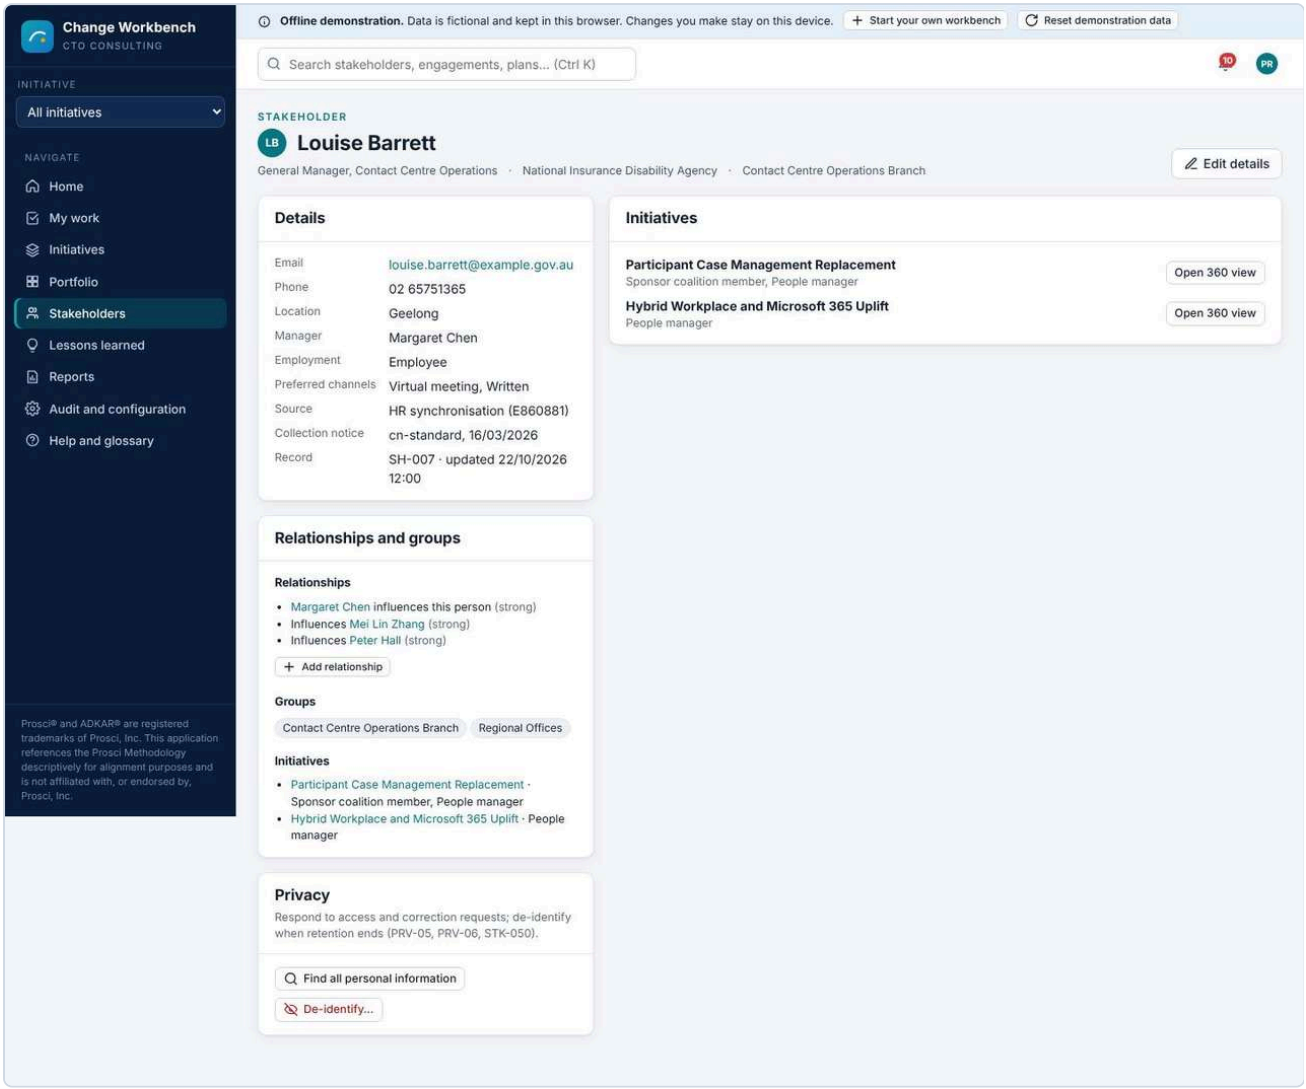

115 Stakeholder master · People

The stakeholder master: one record for each person, shared by every initiative, with organisation, location, manager and initiatives.

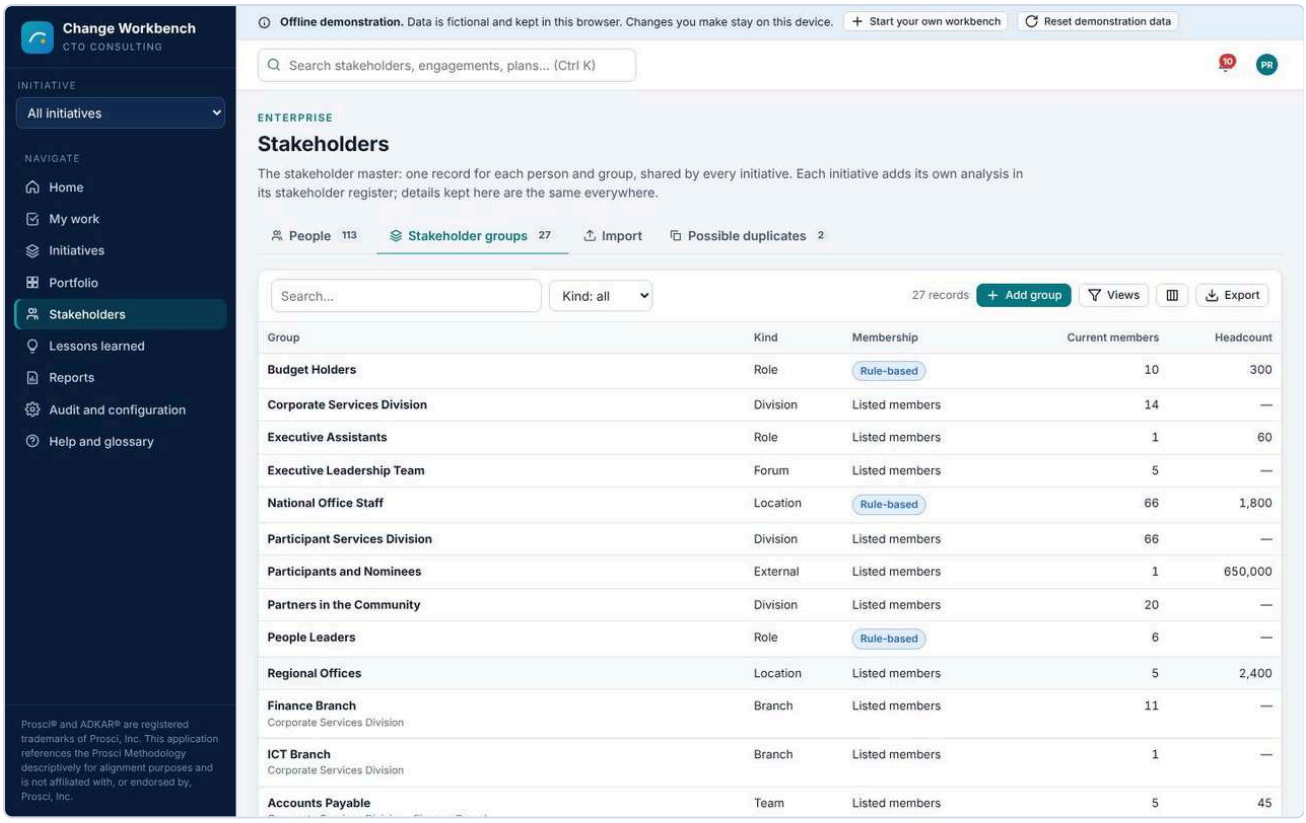

116 Stakeholder master · A person across initiatives

A person across initiatives: their details, the initiatives they are part of, and their relationships and groups.

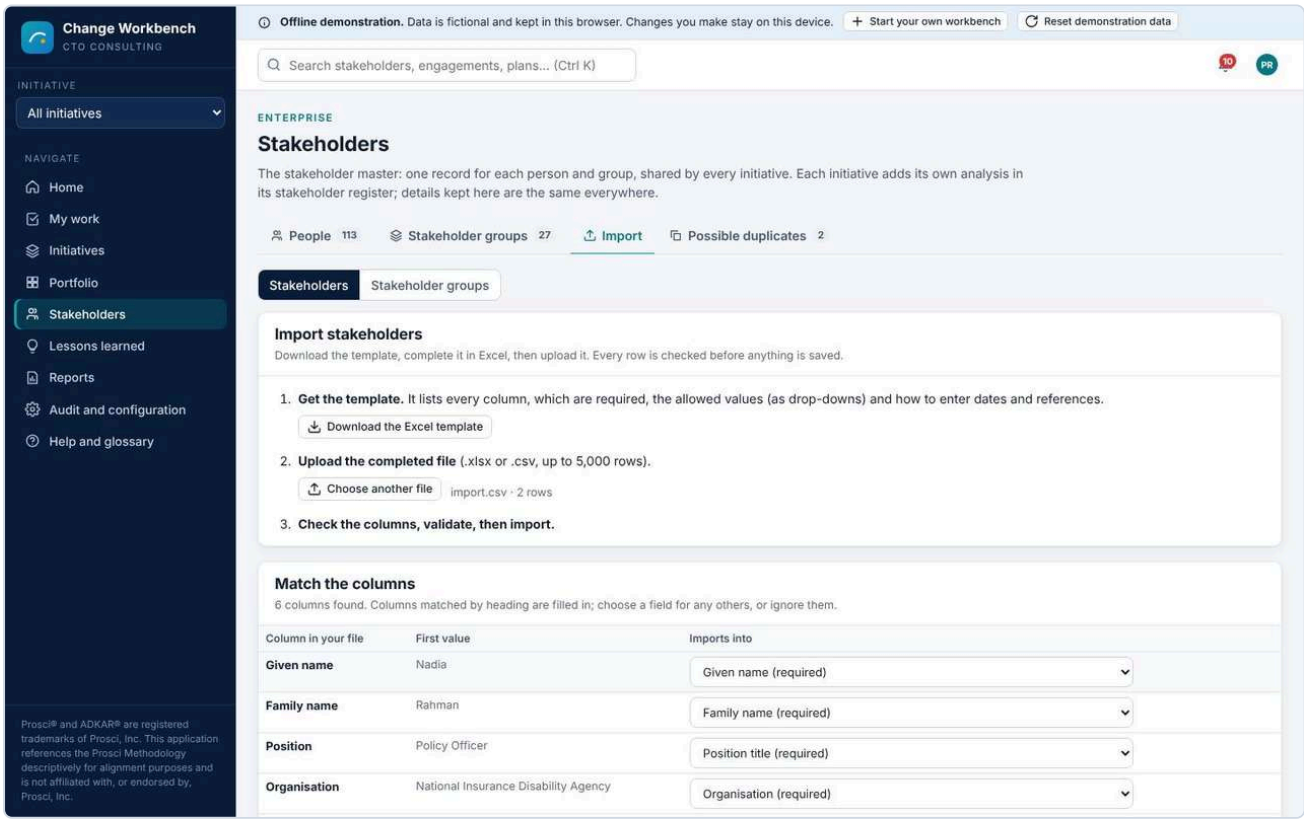

117 Stakeholder master · Stakeholder groups

Stakeholder groups: divisions, branches, roles, locations and external groups, with listed or rule-based membership.

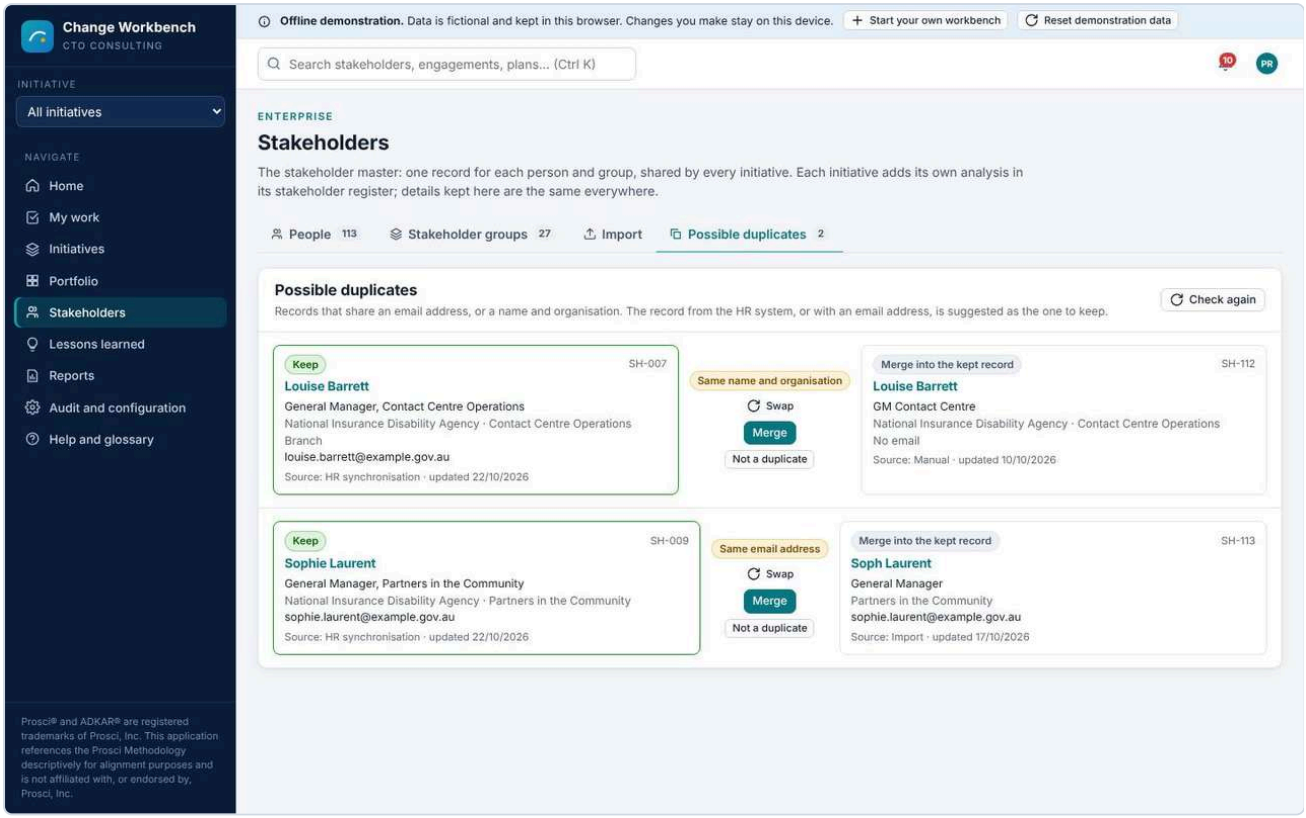

118 Stakeholder master · Import

Importing stakeholders from a spreadsheet: columns are matched automatically and everything is validated before it is imported.

119 Stakeholder master · Possible duplicates

Possible duplicates found by name, email and organisation, to keep, merge or confirm as different people.

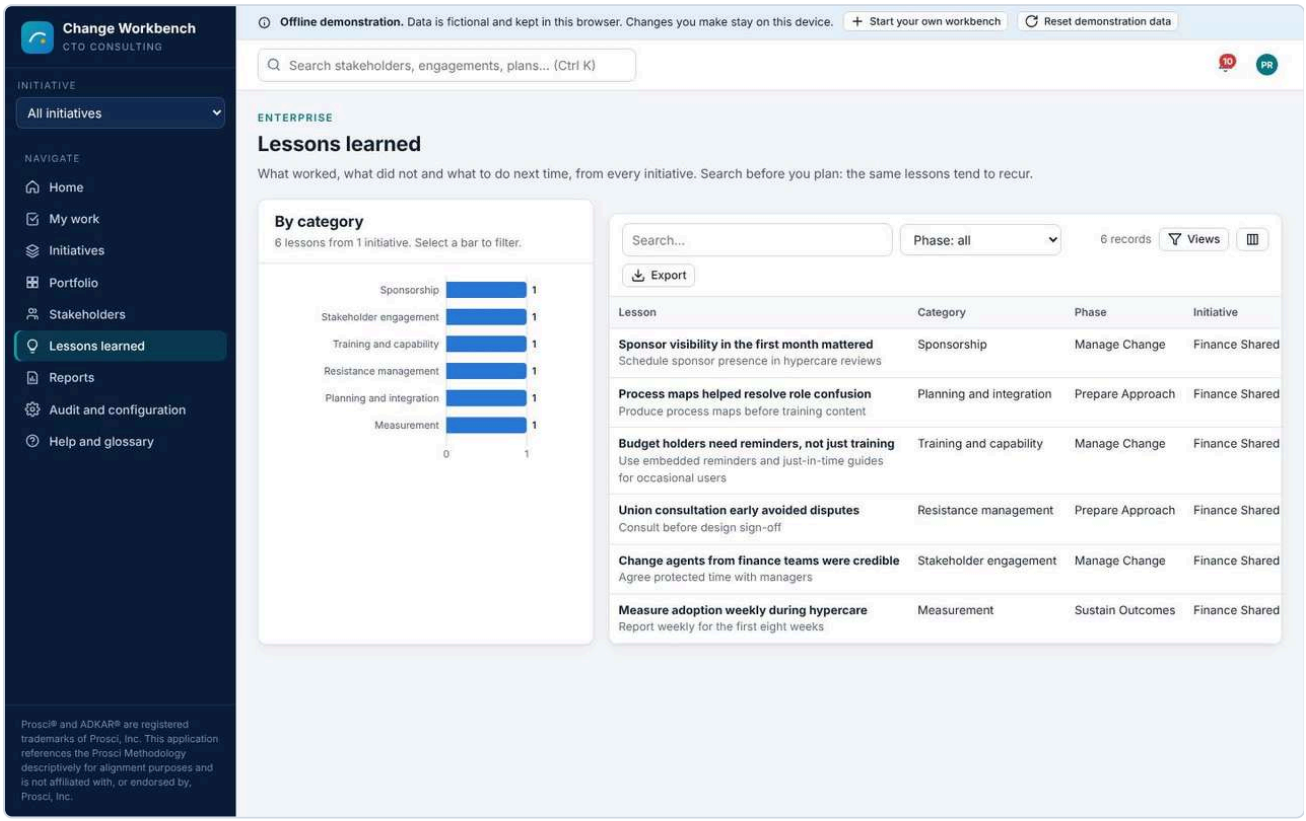

PART 10 OF 14

Lessons learned and reports

Search lessons learned from every initiative, run standard reports, build your own and feed business intelligence tools.

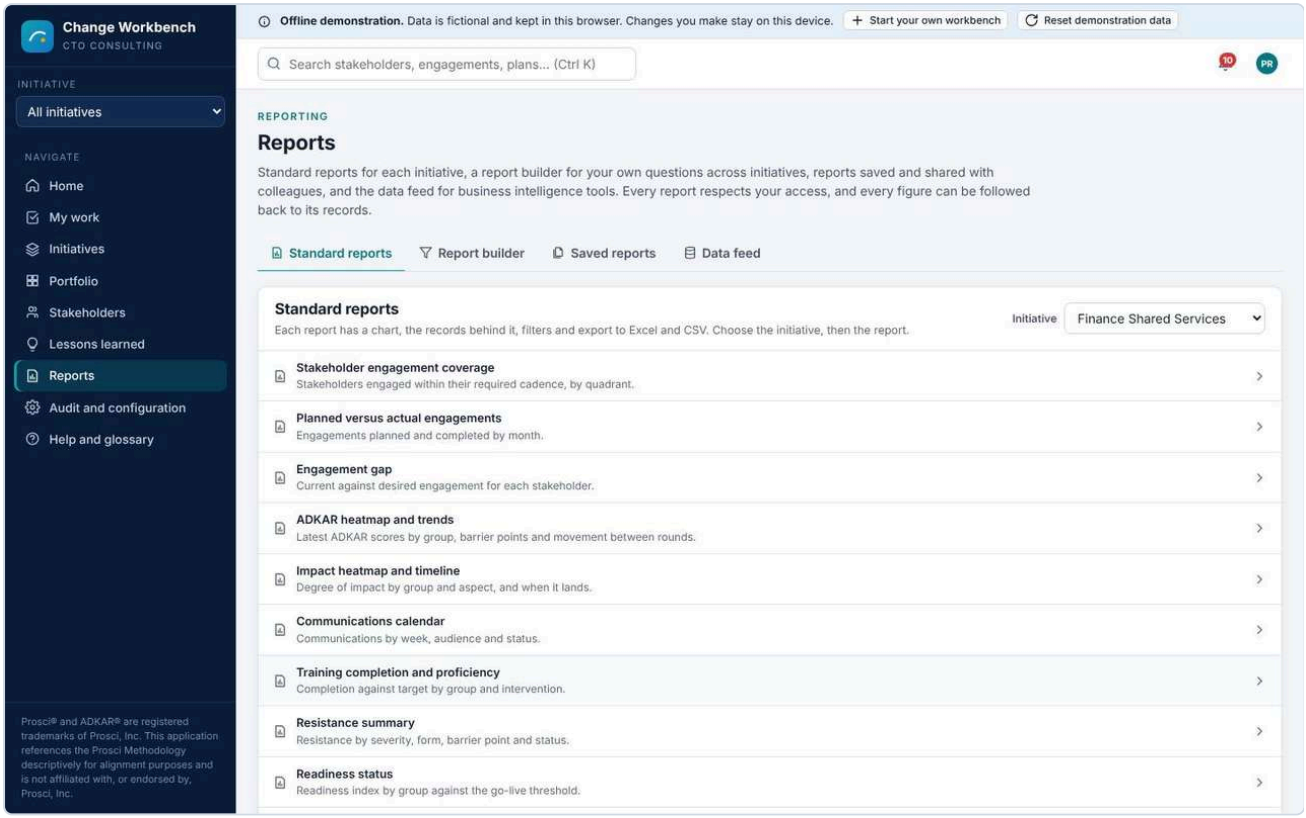

120 Lessons learned

Lessons learned from every initiative, by category, to search before planning a new one.

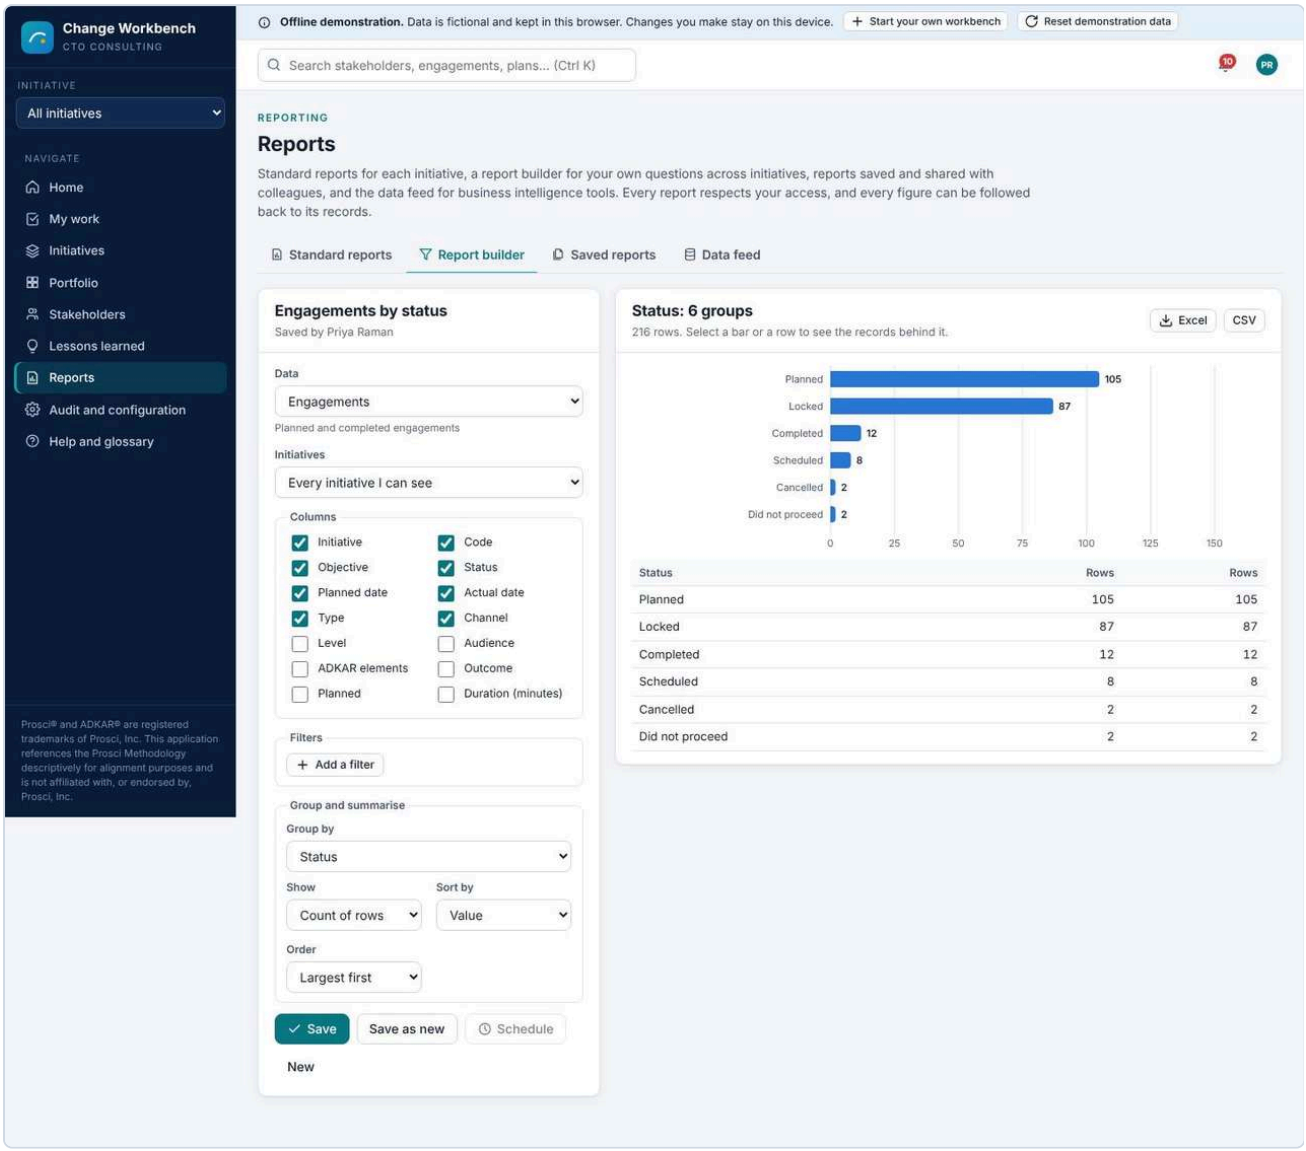

121 Reports · Standard reports

Standard reports for an initiative, each opening a chart and a table with export.

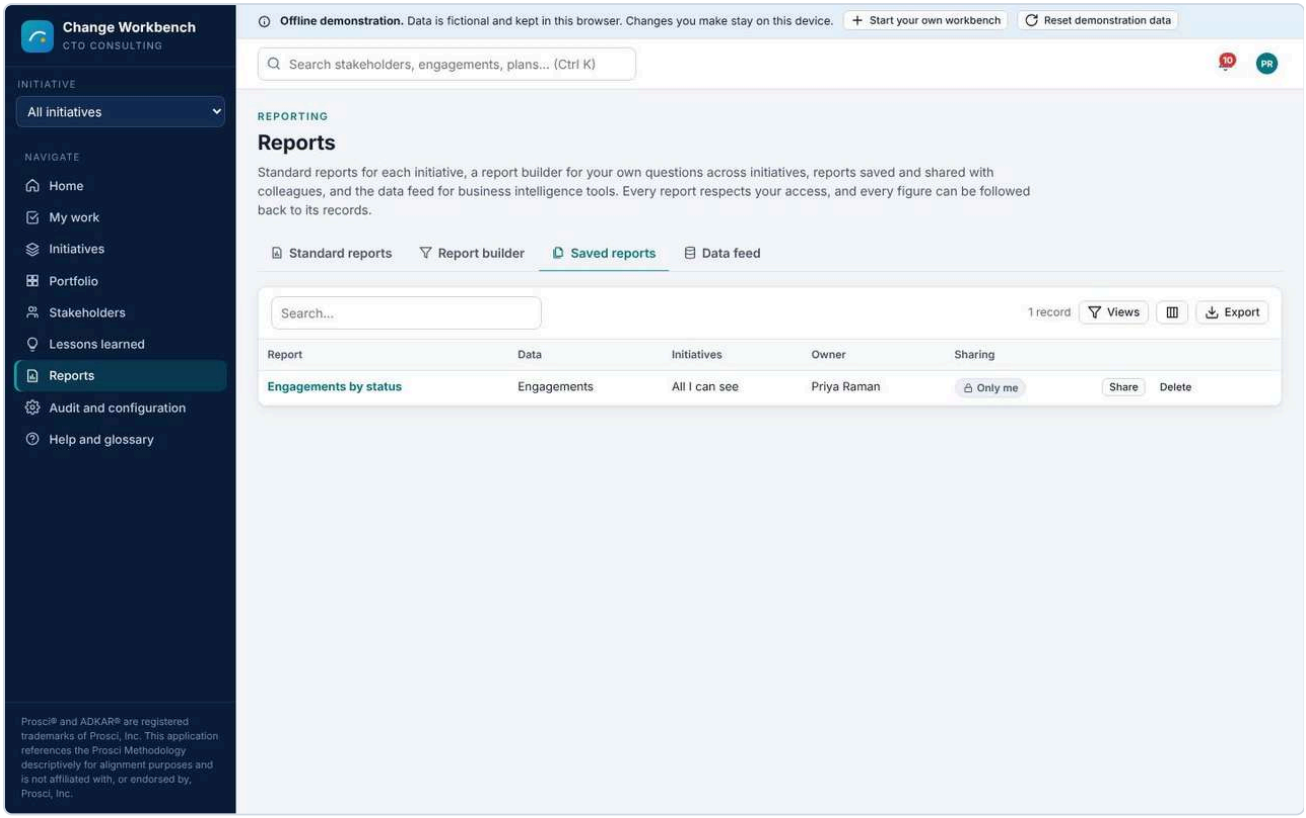

122 Reports · Report builder

The report builder: choose the data, columns, filters and grouping, see the result as a chart and table, then save it.

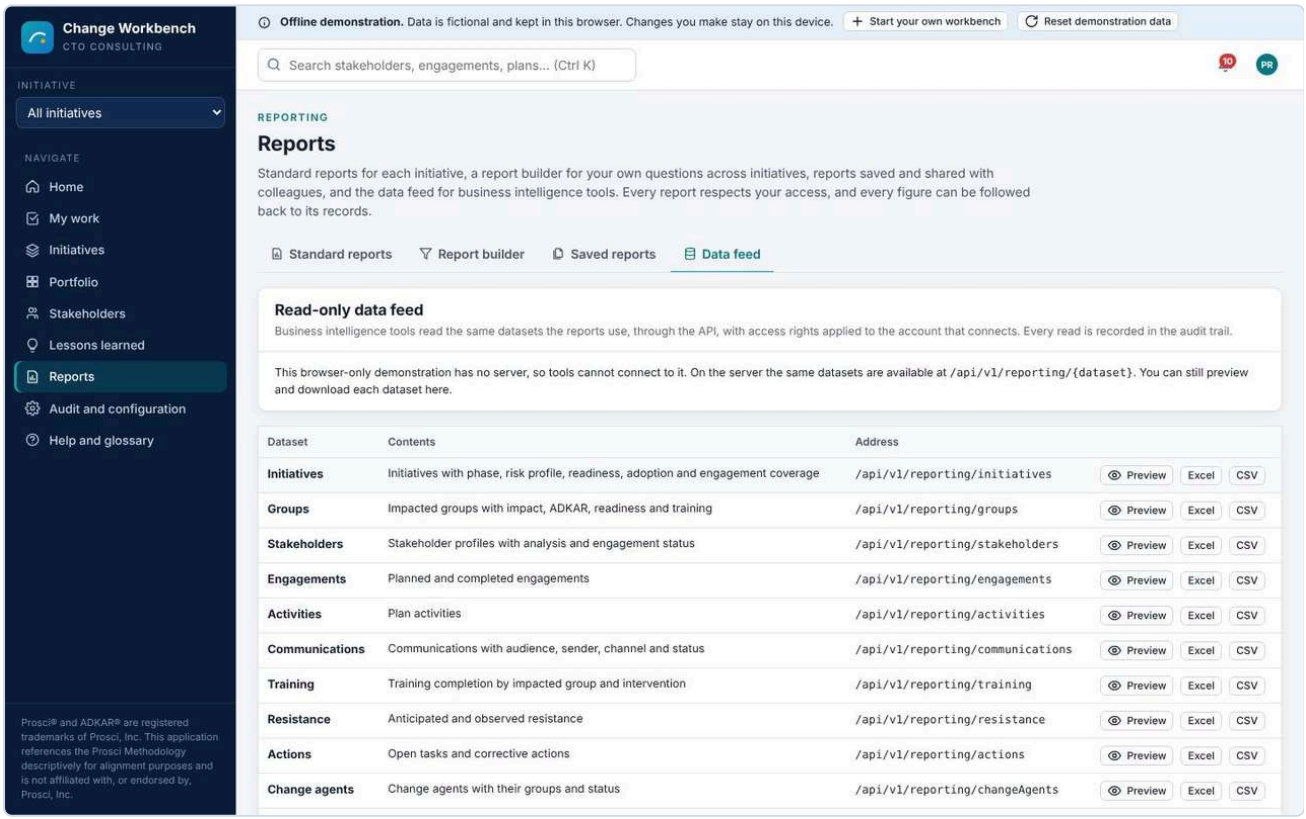

123 Reports · Saved reports

Saved reports, kept private or shared with colleagues, and run again or scheduled.

124 Reports · Data feed

The read-only data feed for business intelligence tools. Offline, each dataset can be previewed and exported.

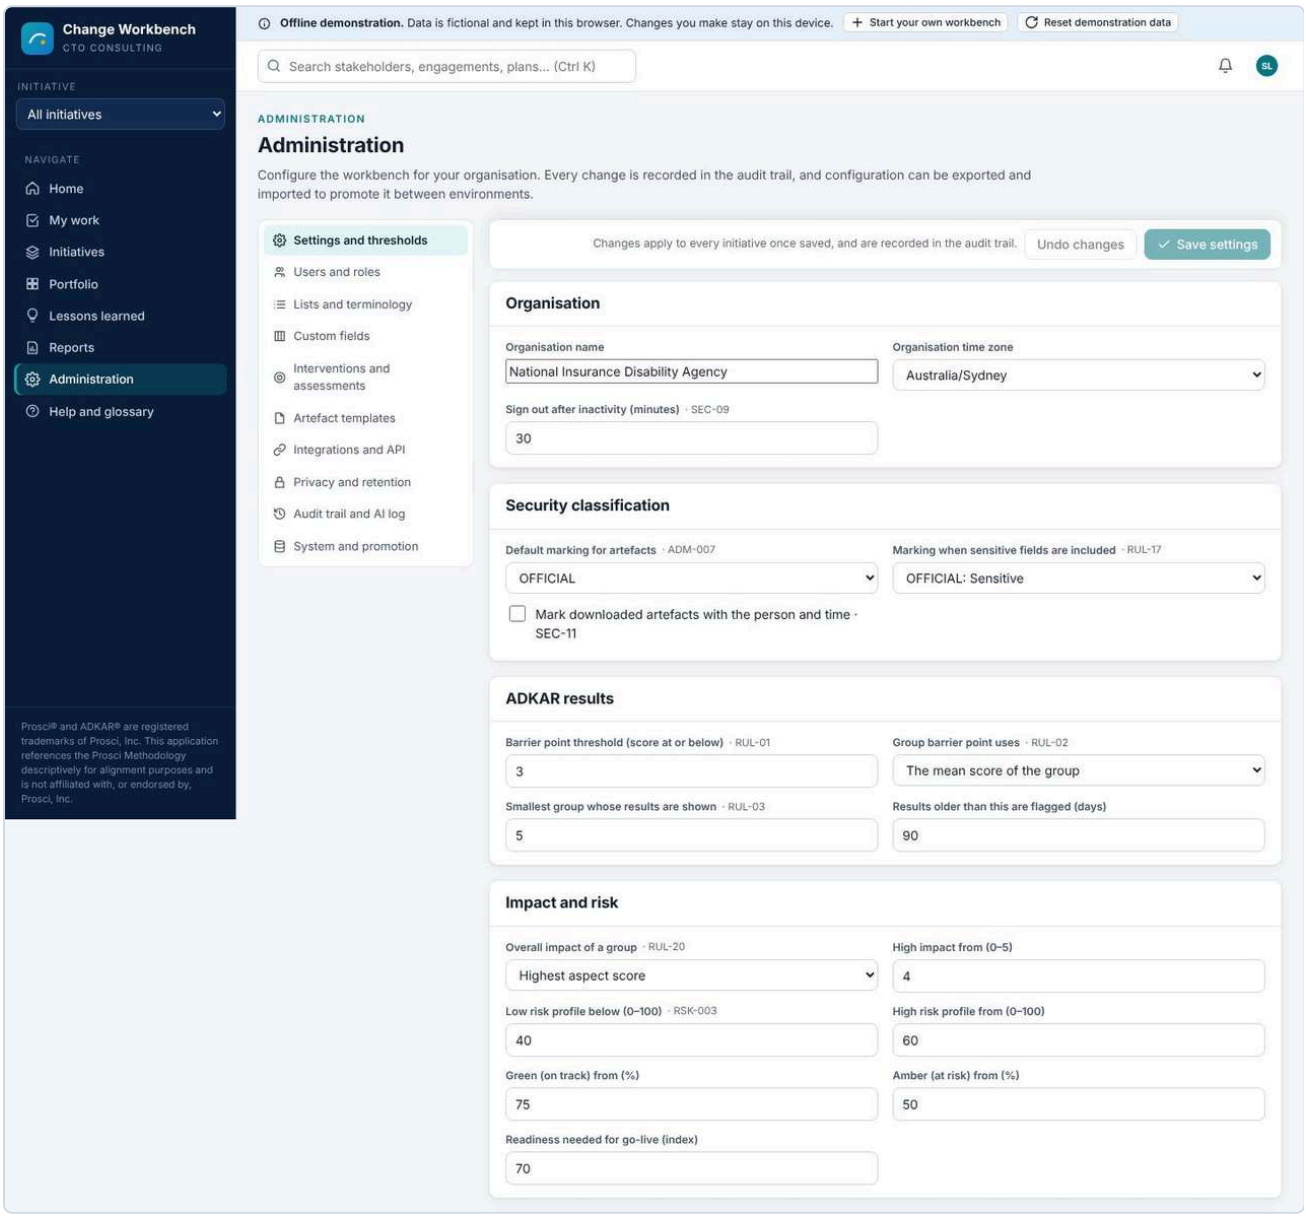

PART 11 OF 14

Administration

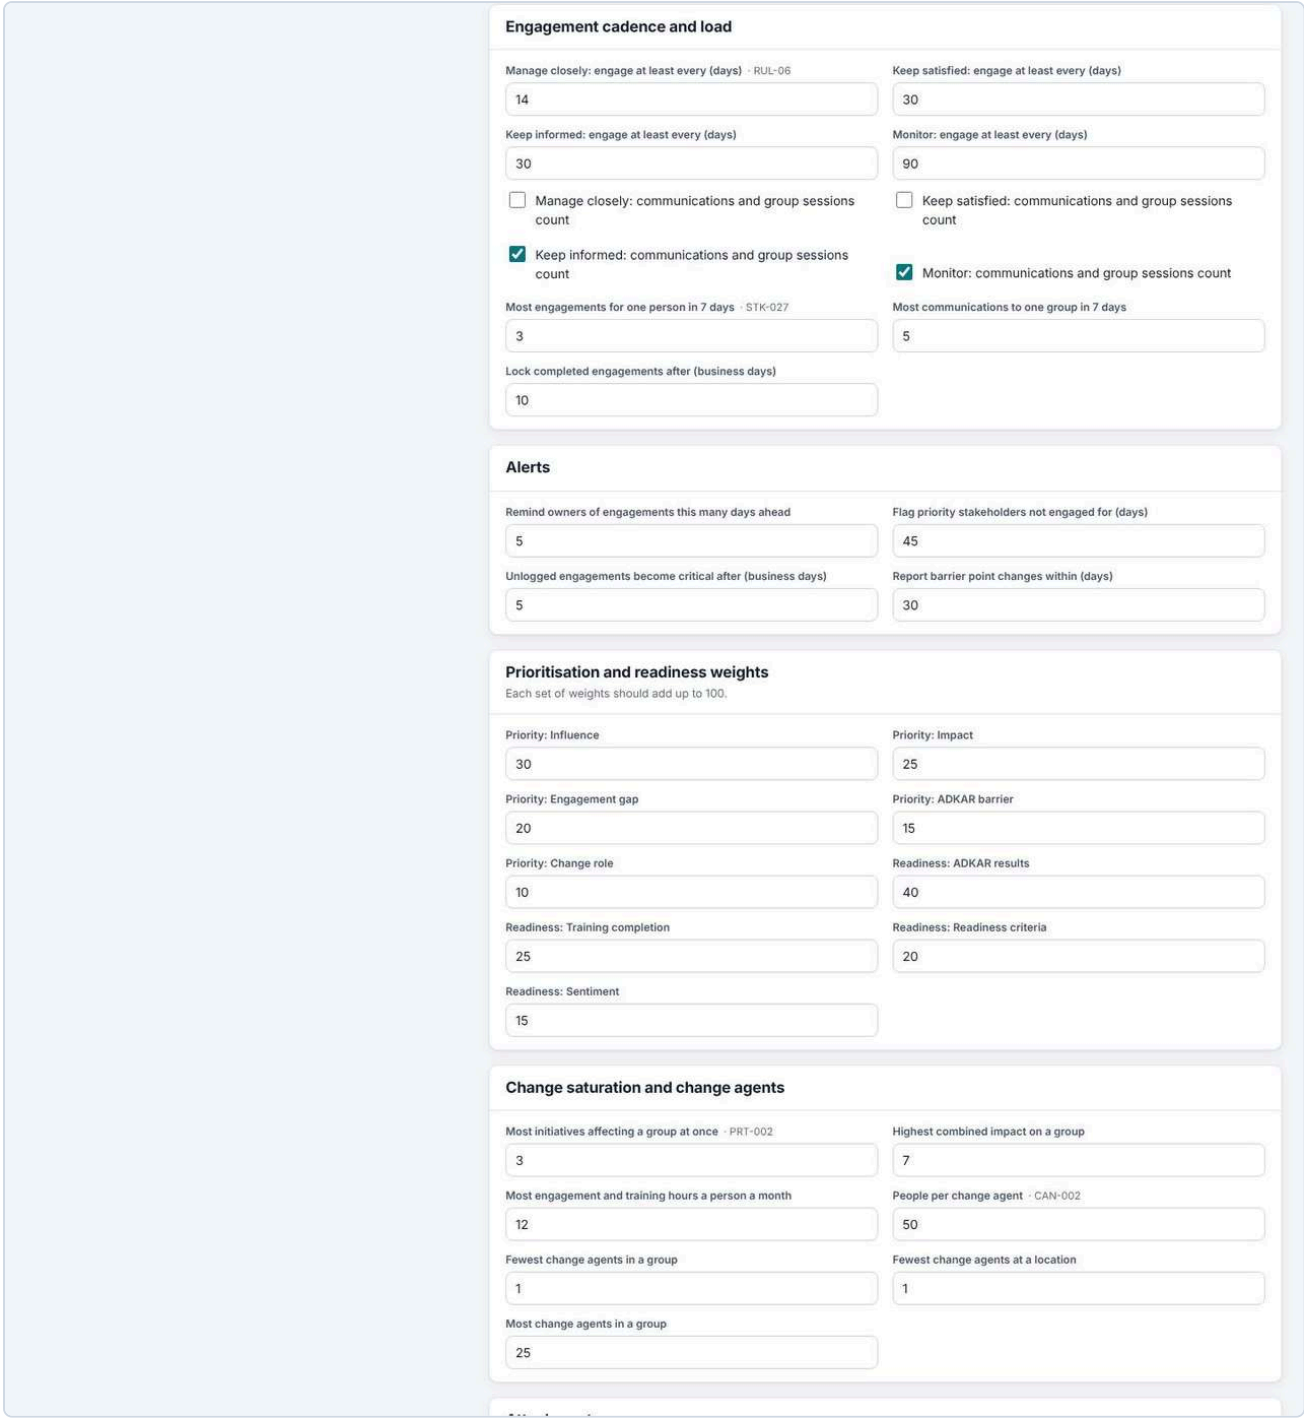

Administrators configure the workbench for the organisation: settings, users and roles, lists and terminology, custom fields, libraries, templates, integrations, privacy and the audit trail. These screens show the administrator, Sam Lee.

125 Settings and thresholds

Settings and thresholds: the organisation, security classification, ADKAR thresholds, engagement cadence, saturation, readiness weights and more.

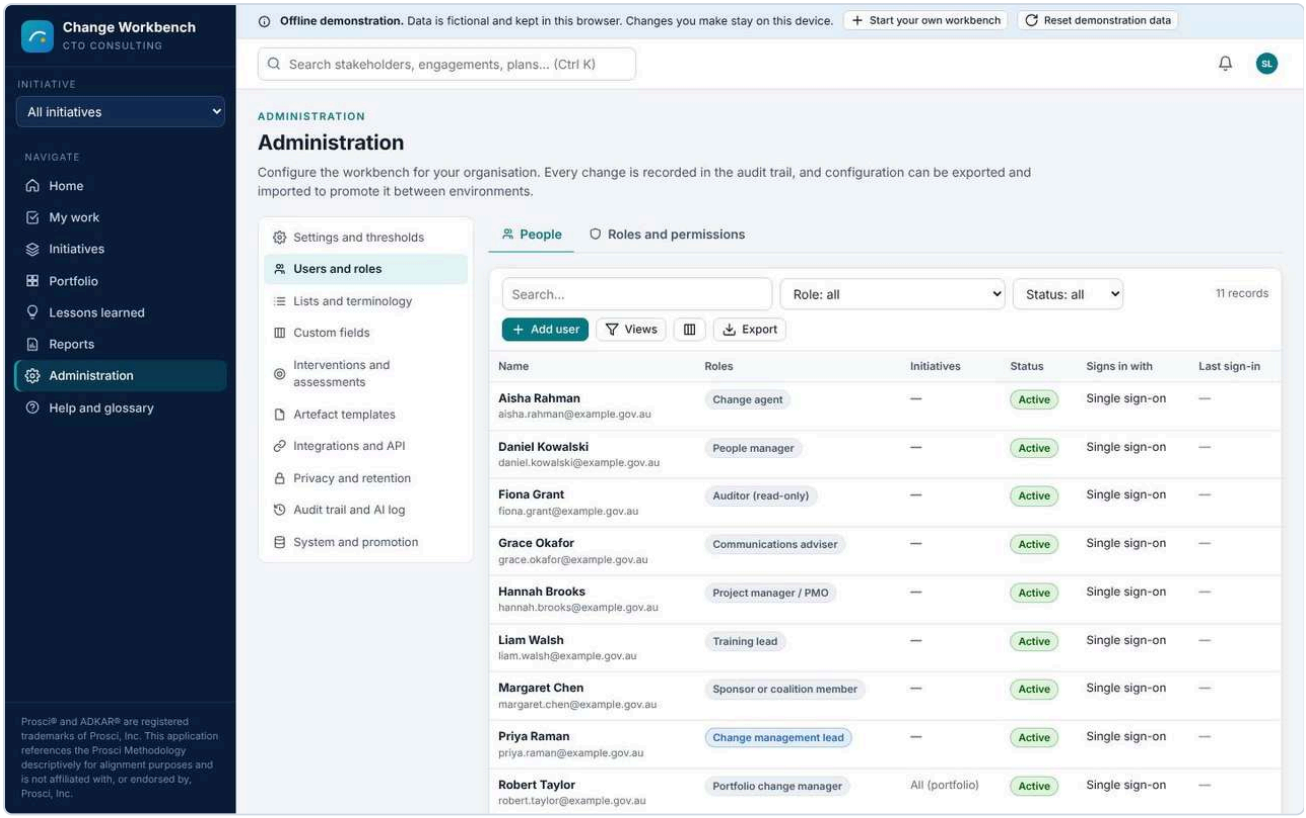

125 Settings and thresholds (continued, 2 of 2)

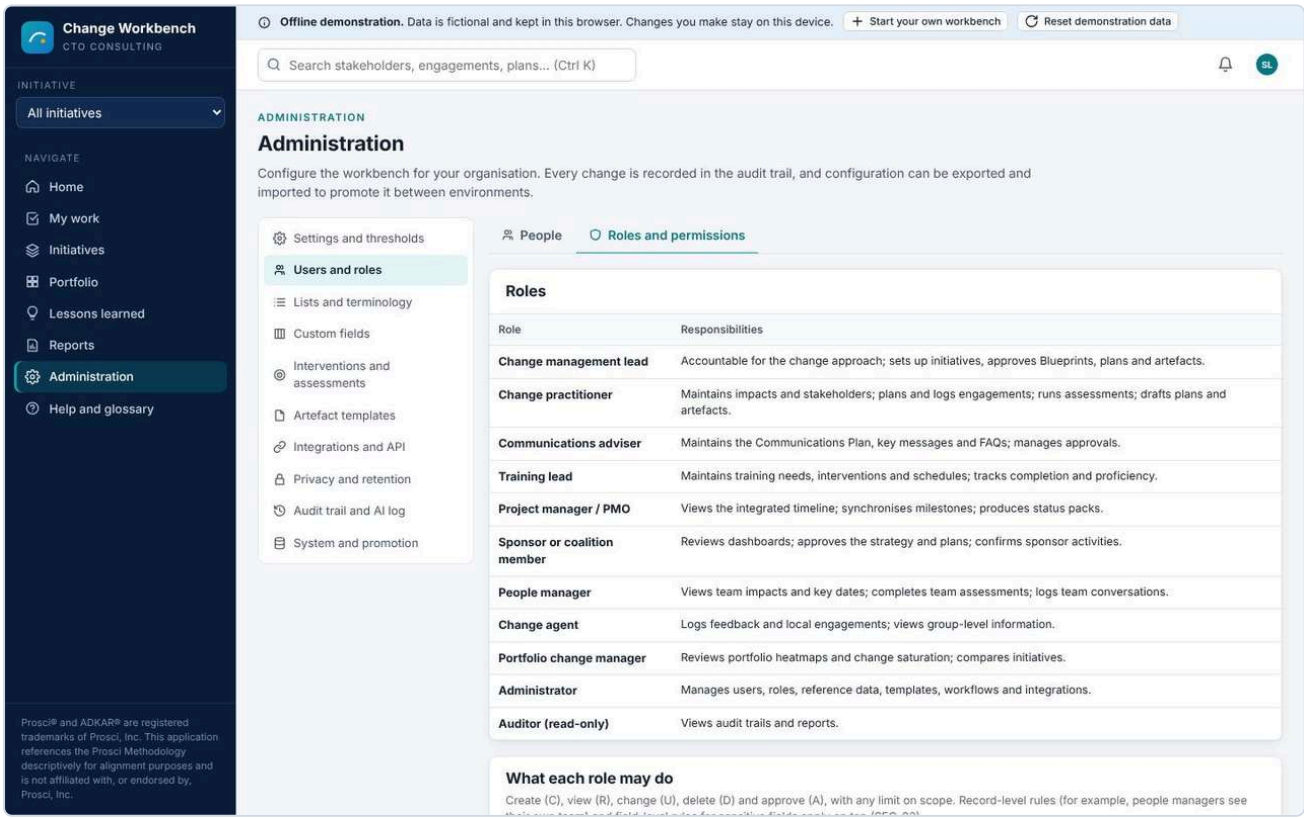

126 Users and roles · People

Users with their roles, initiatives, status and sign-in method.

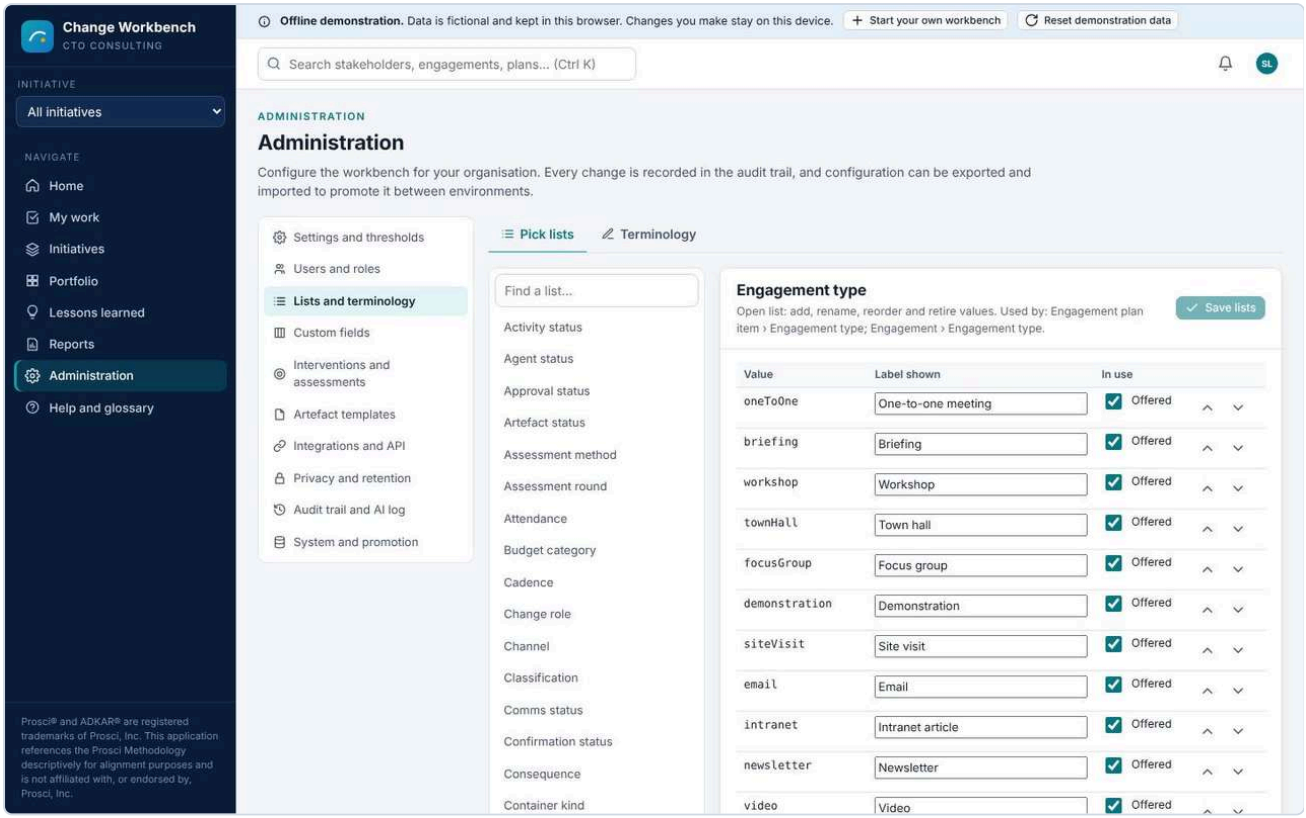

127 Users and roles · Roles and permissions

The roles, and what each one may do.

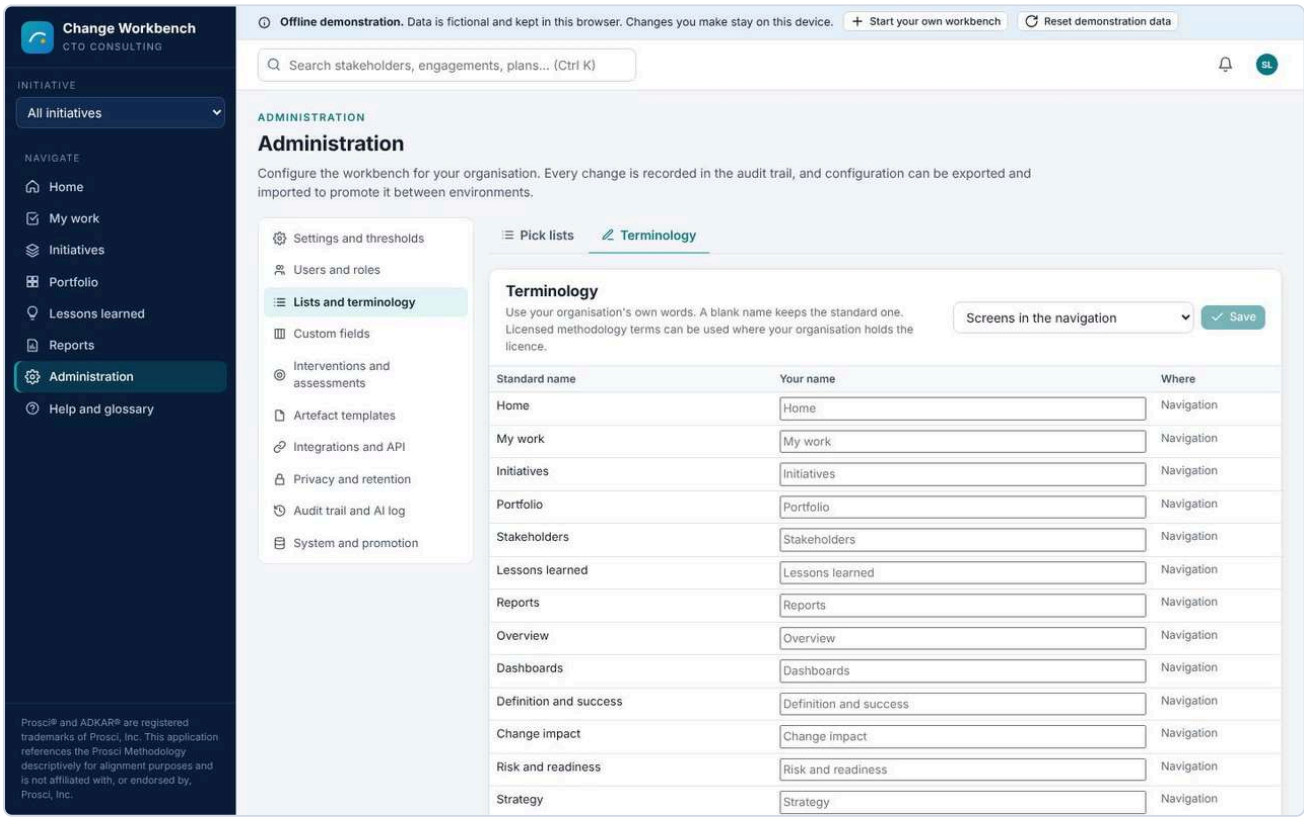

128 Lists and terminology · Pick lists

The pick lists used throughout, such as engagement types, with their labels and order.

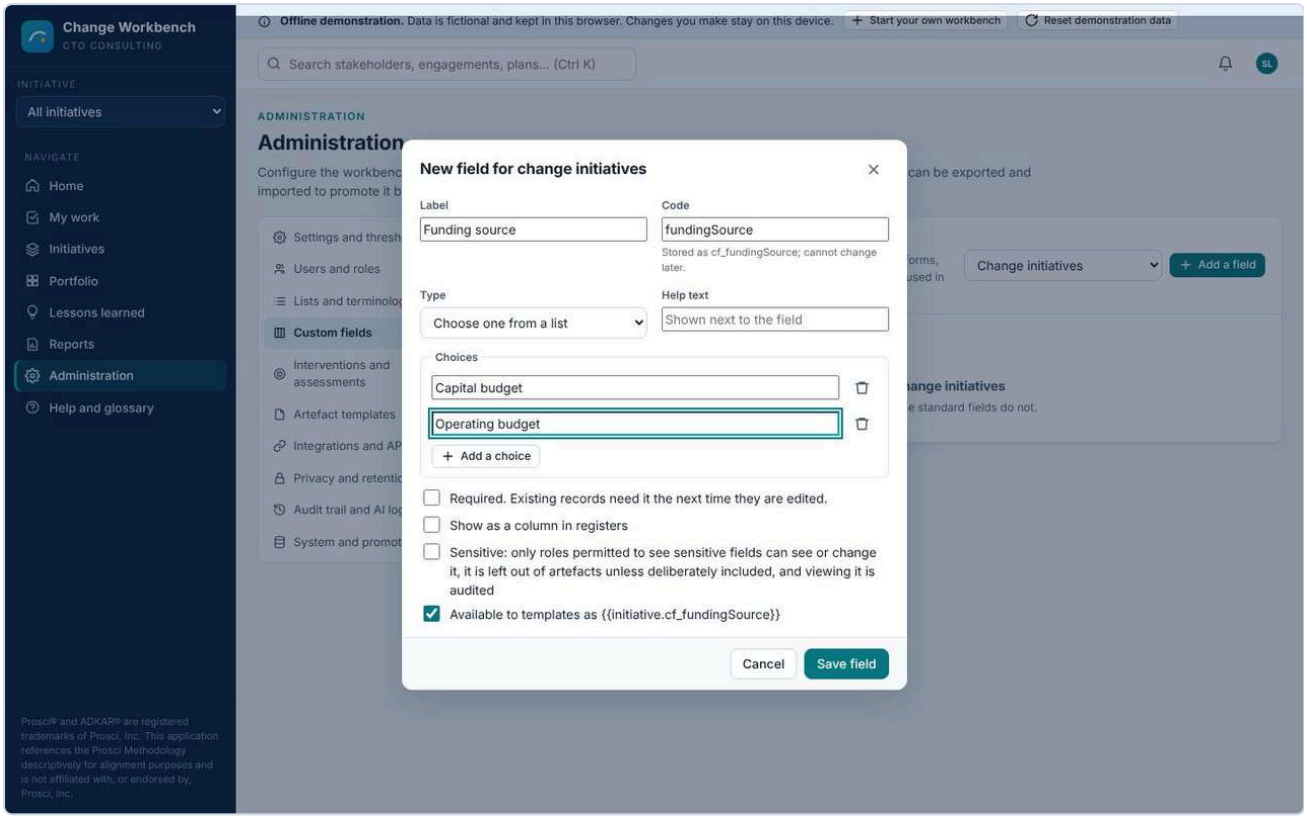

129 Lists and terminology · Terminology

Terminology: rename screens and terms to match the organisation's own language.

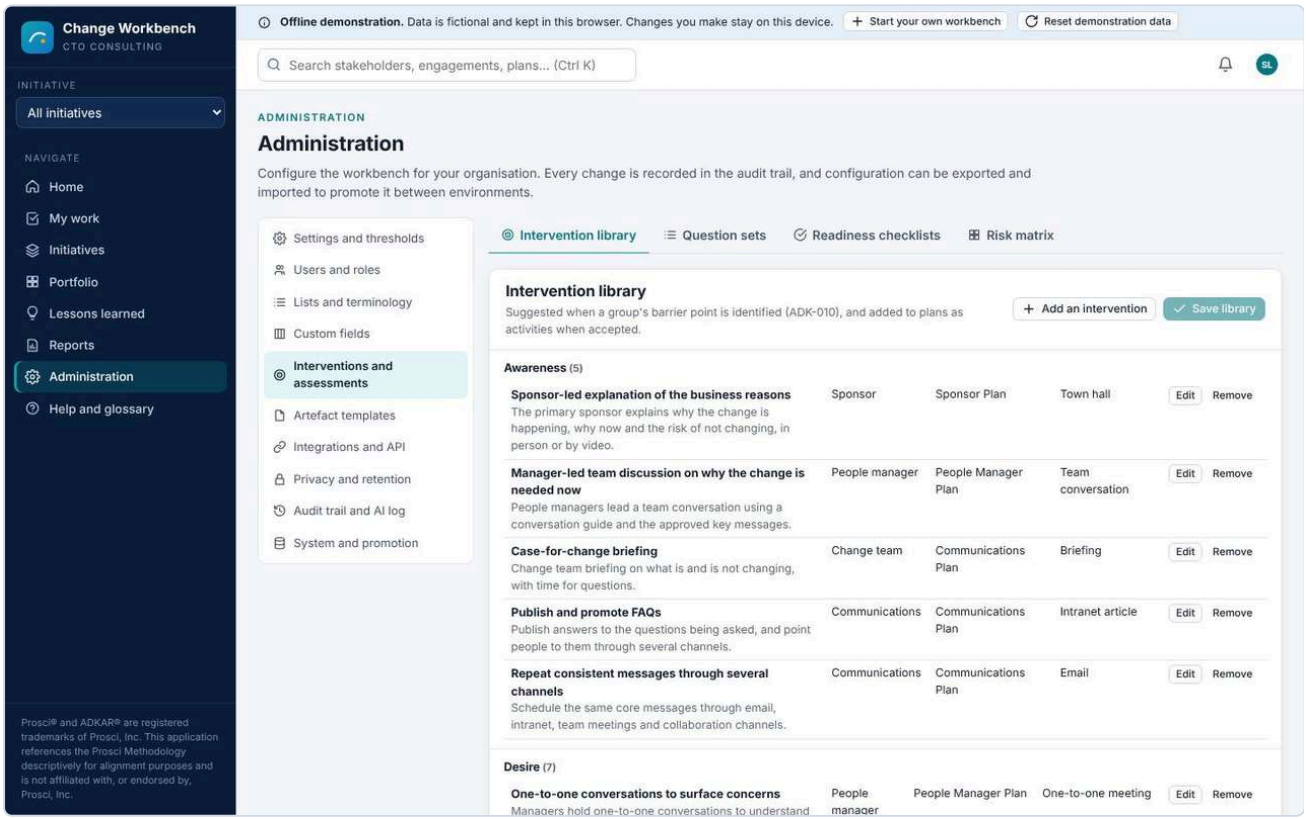

130 Custom fields · Adding a field

Adding a custom field, here a funding source chosen from a list, to a register.

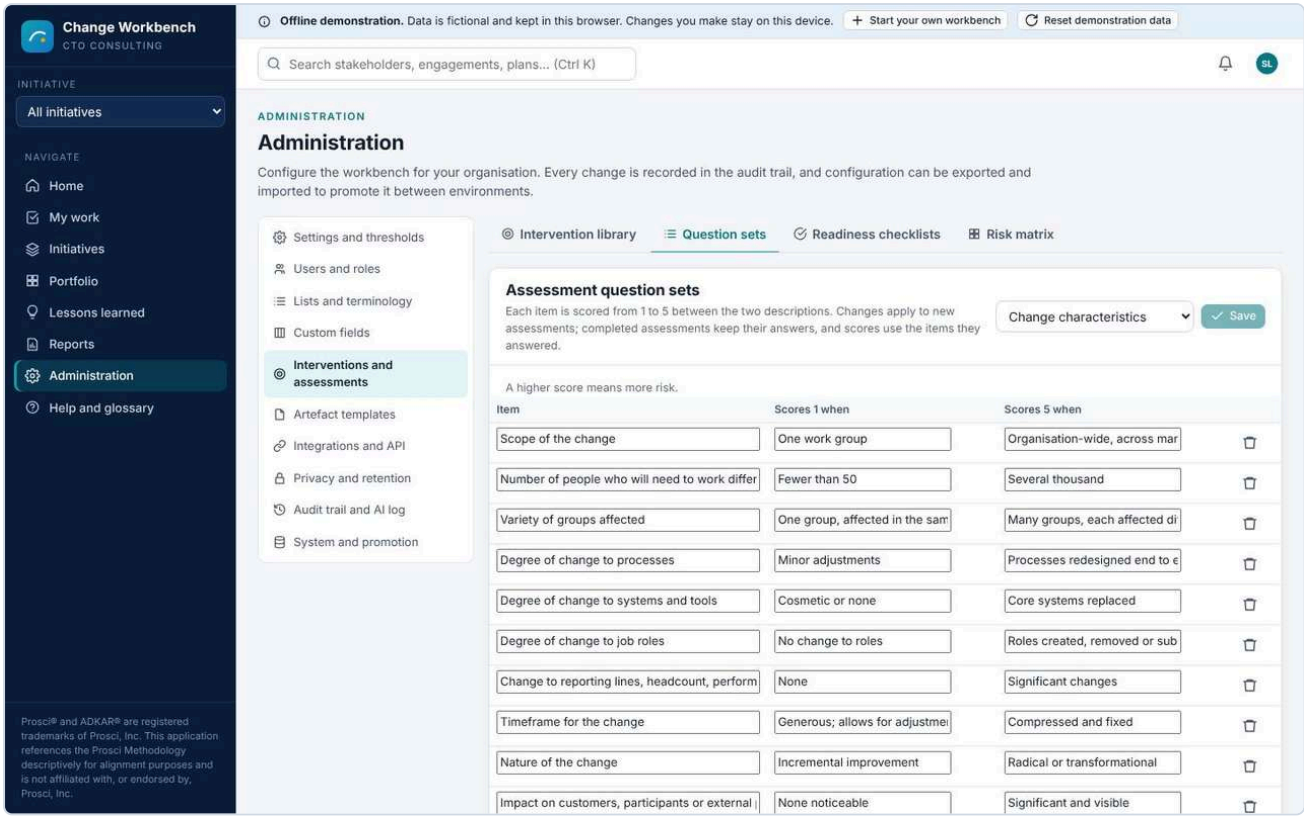

131 Interventions and assessments · Intervention library

The intervention library: actions suggested for each ADKAR barrier point.

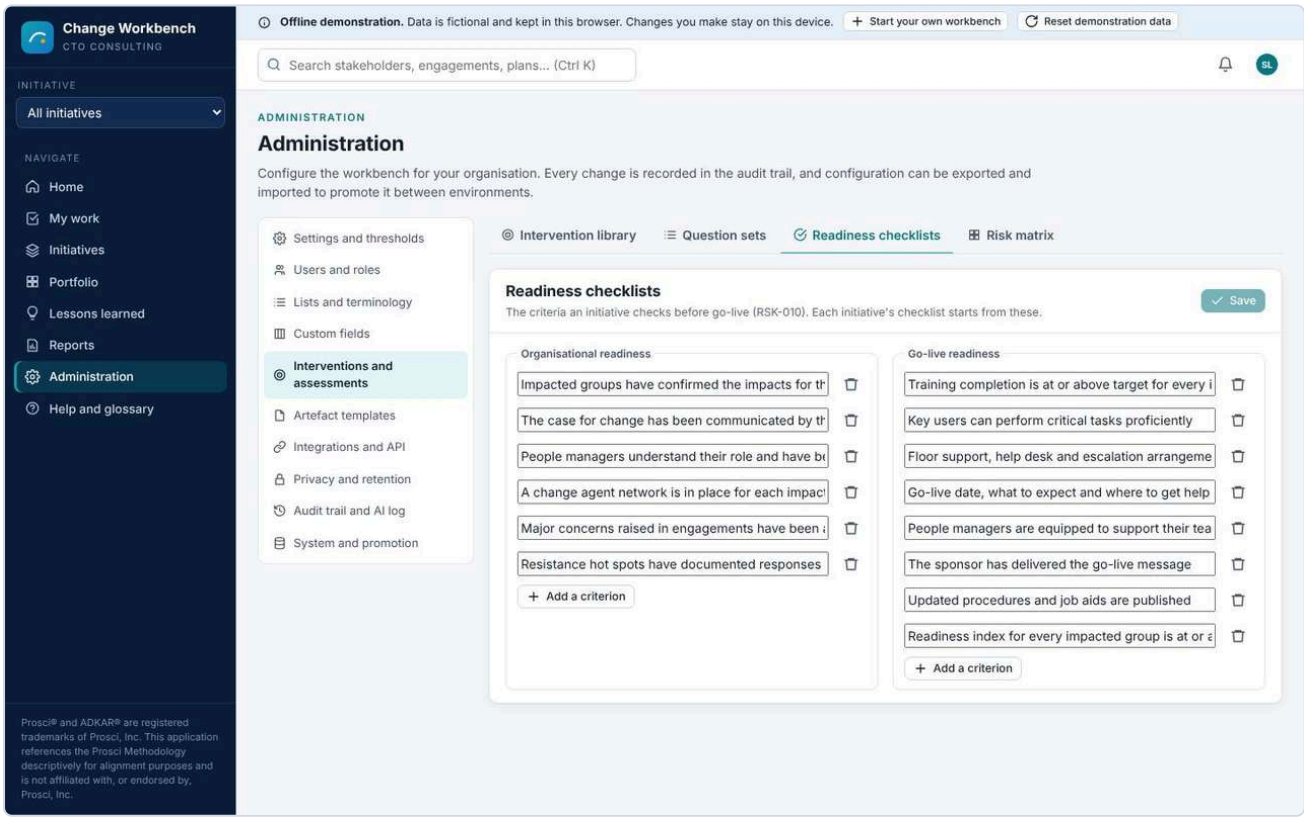

132 Interventions and assessments · Question sets

Question sets for the change characteristics and organisational attributes assessments.

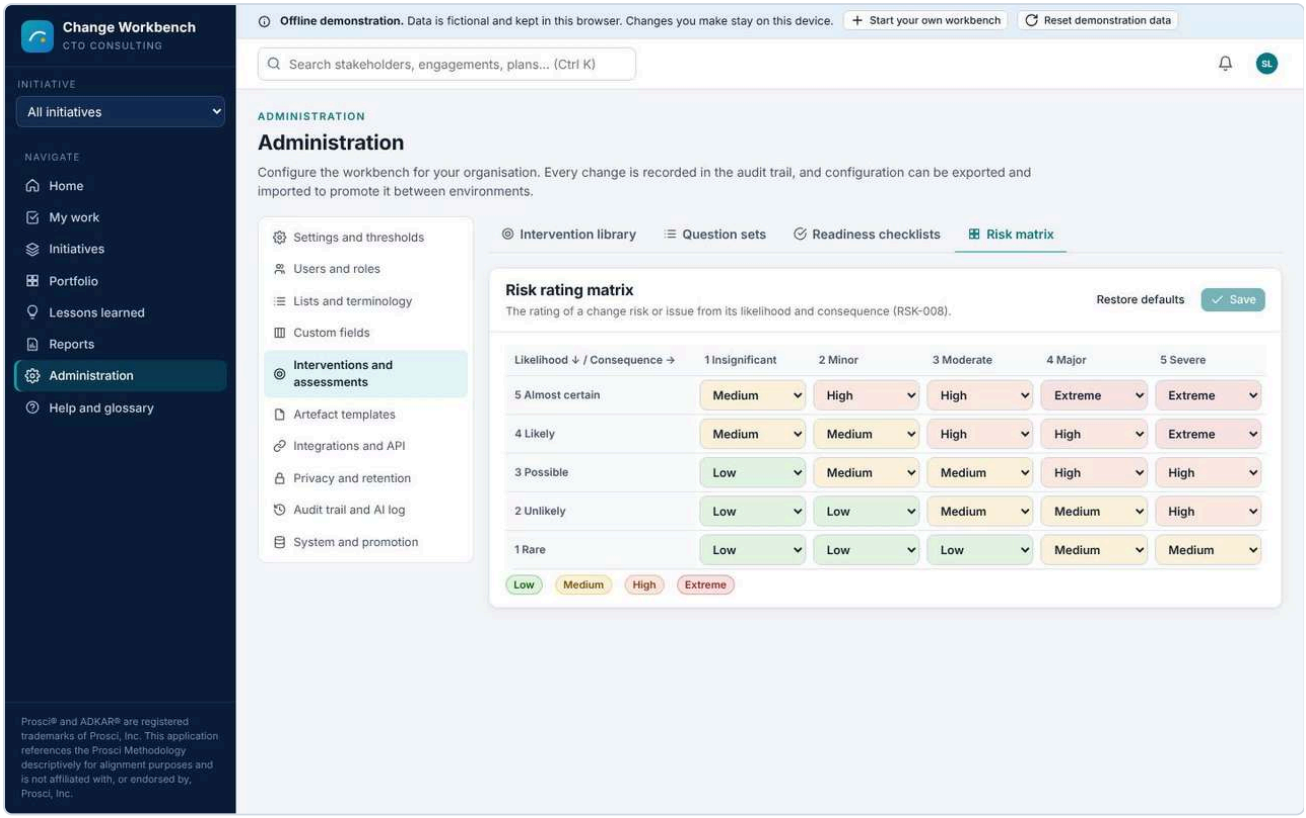

133 Interventions and assessments · Readiness checklists

Readiness checklists for go-live decisions.

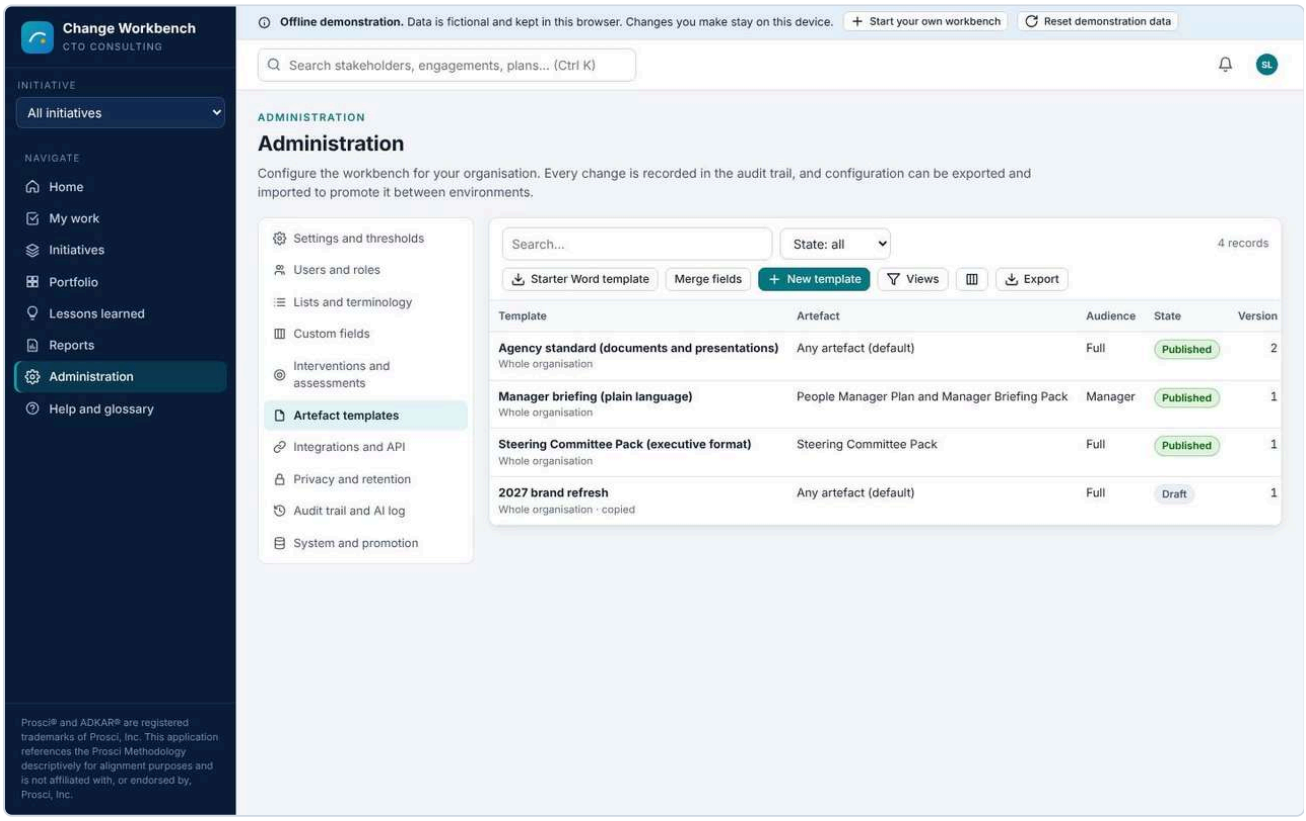

134 Interventions and assessments · Risk matrix

The risk rating matrix of likelihood and consequence.

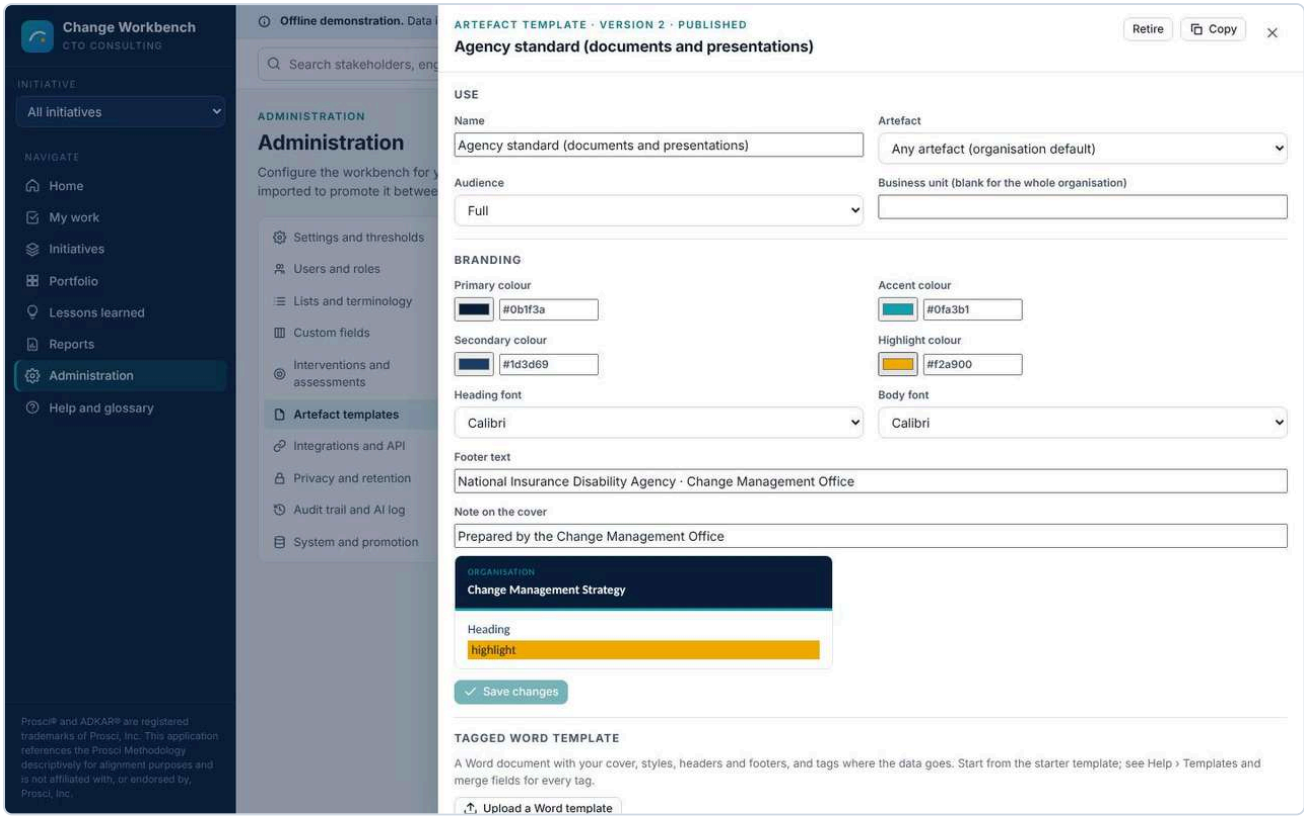

135 Artefact templates

Artefact templates: branded templates for documents and presentations, with their versions and states.

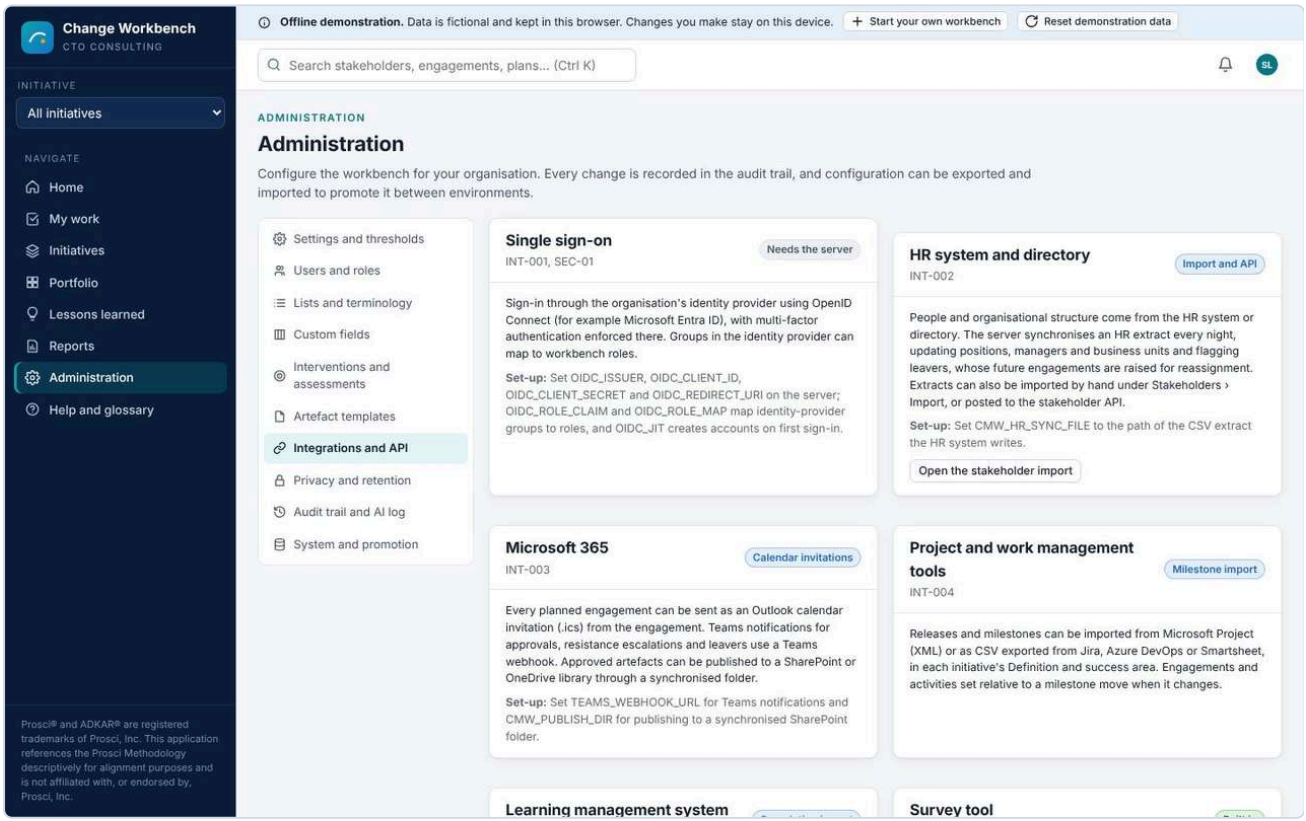

136 Artefact templates · A template

A template's branding: colours, fonts, footer and cover note, and an optional tagged Word template.

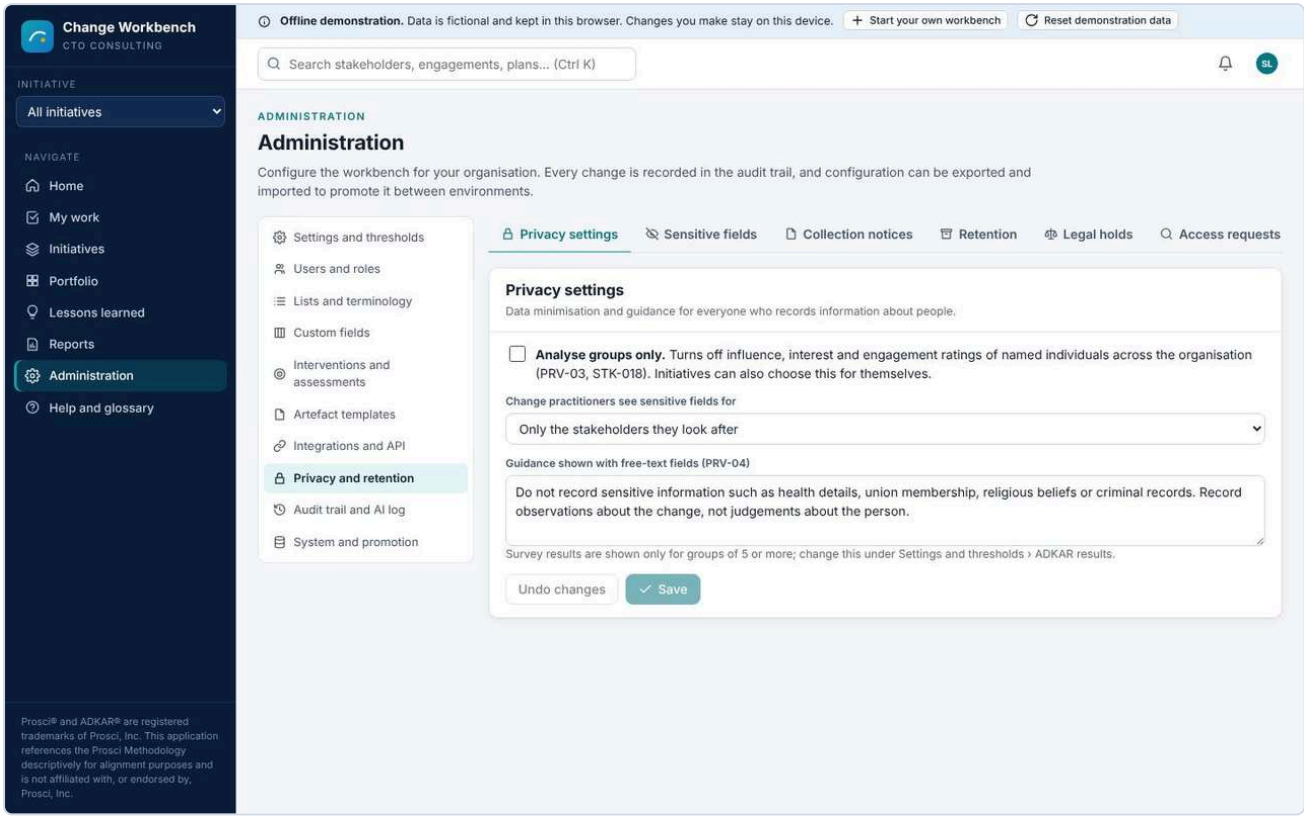

137 Integrations and API

Integrations: single sign-on, HR and directory, Microsoft 365, project tools, learning systems and survey tools. The API and webhooks run on the server.

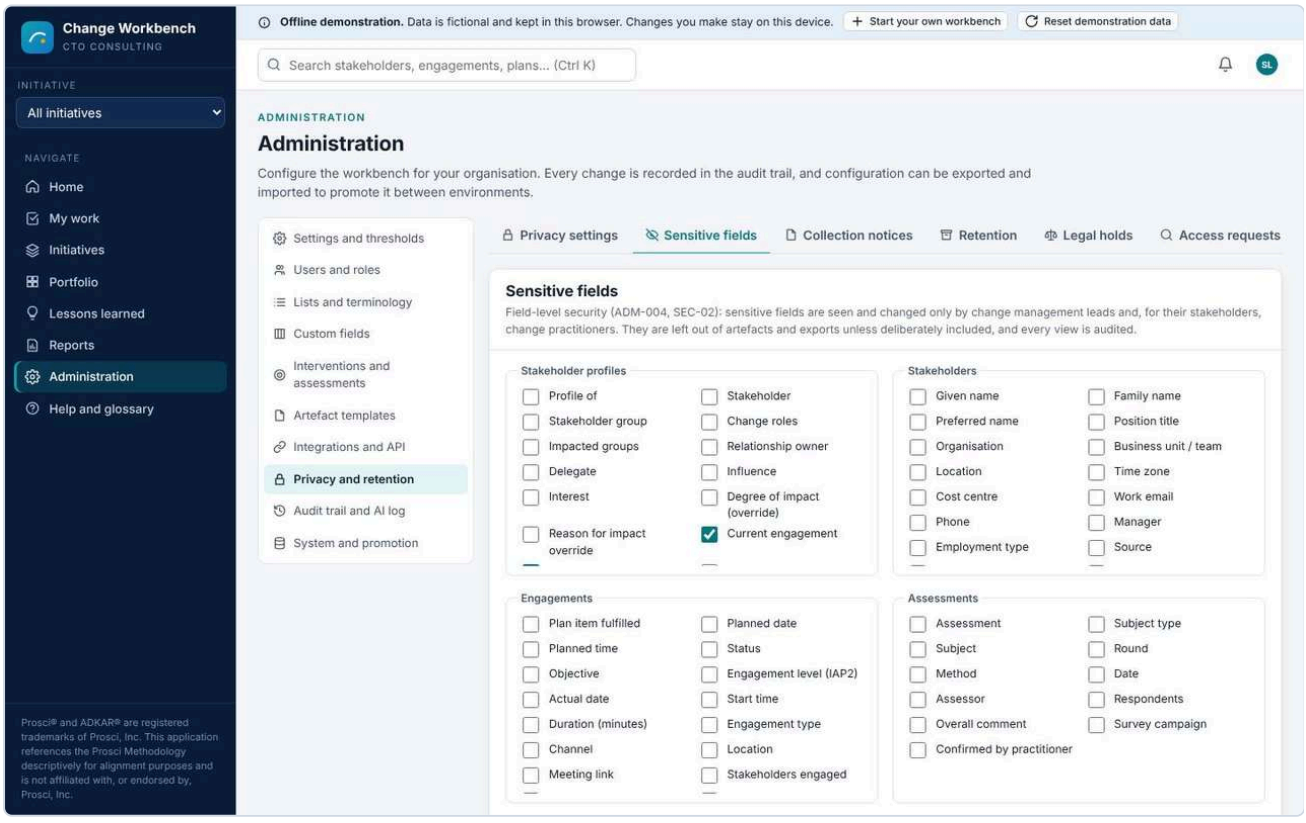

138 Privacy and retention · Privacy settings

Privacy settings, such as how stakeholder analysis may be shared.

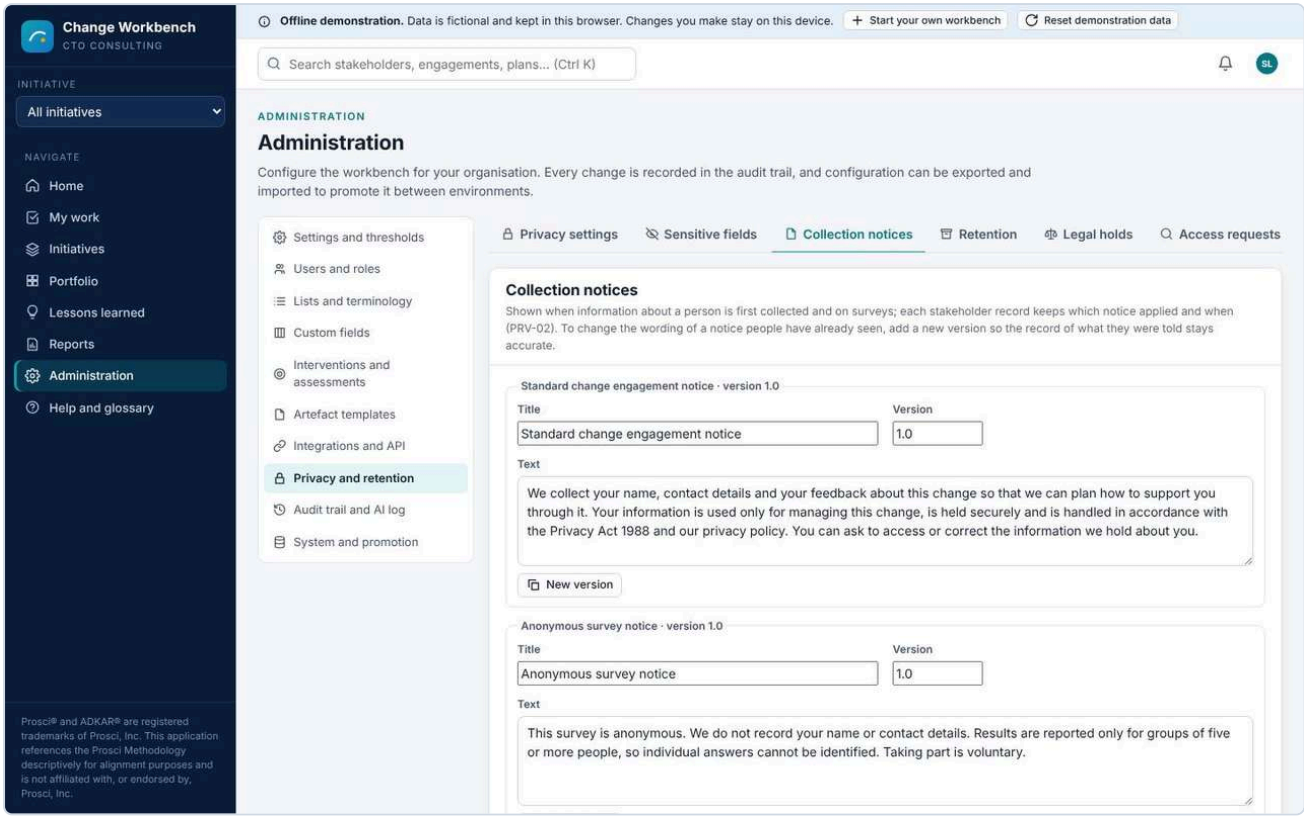

139 Privacy and retention · Sensitive fields

Sensitive fields, visible only to authorised roles.

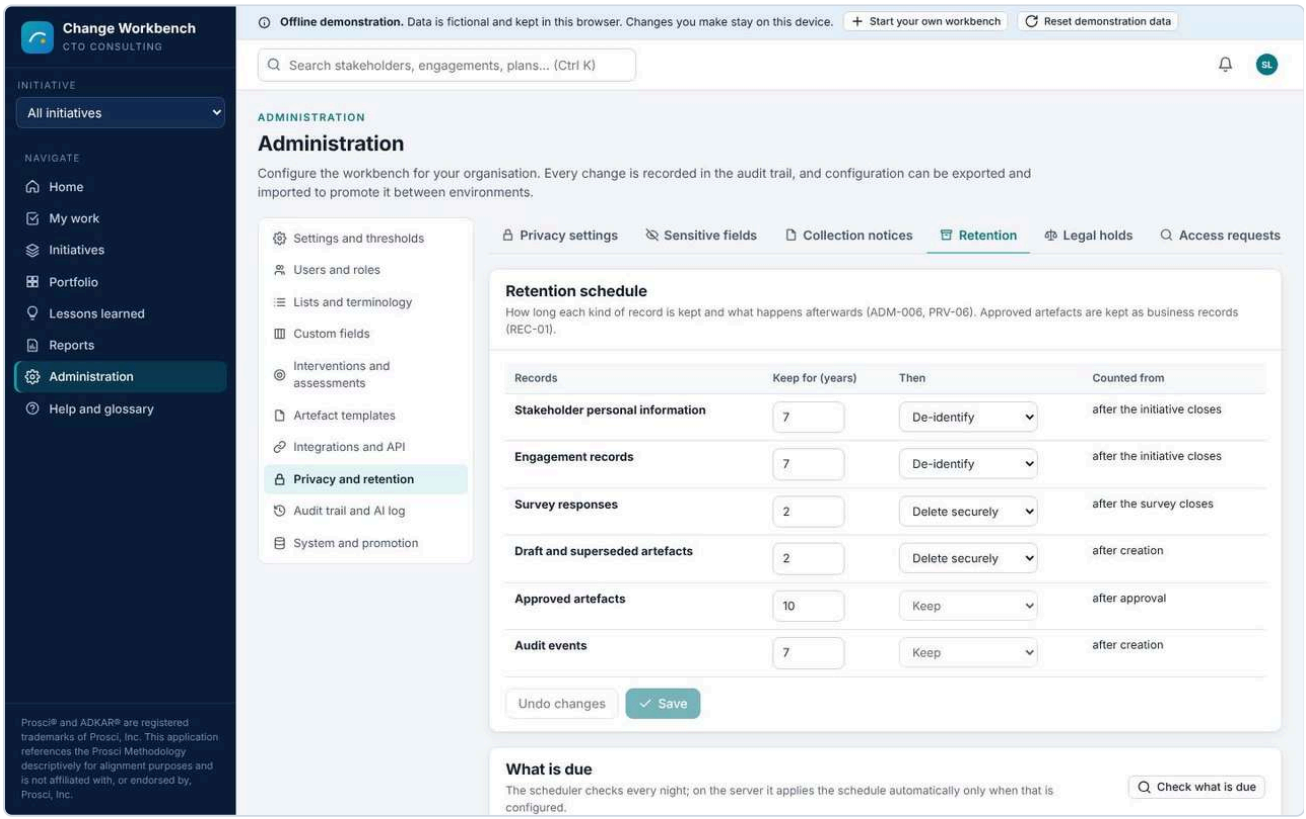

140 Privacy and retention · Collection notices

Collection notices shown when information is collected, with versions.

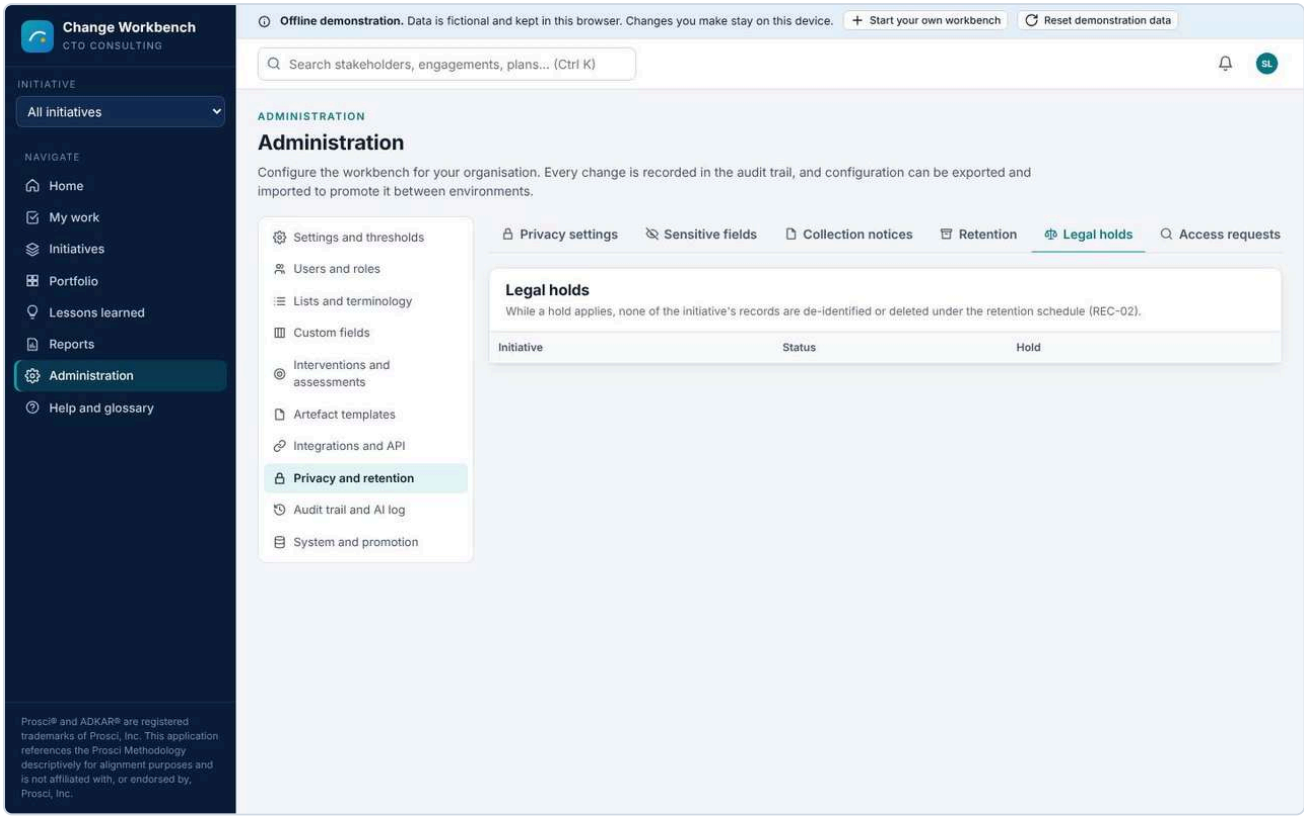

141 Privacy and retention · Retention

The retention schedule for each kind of record.

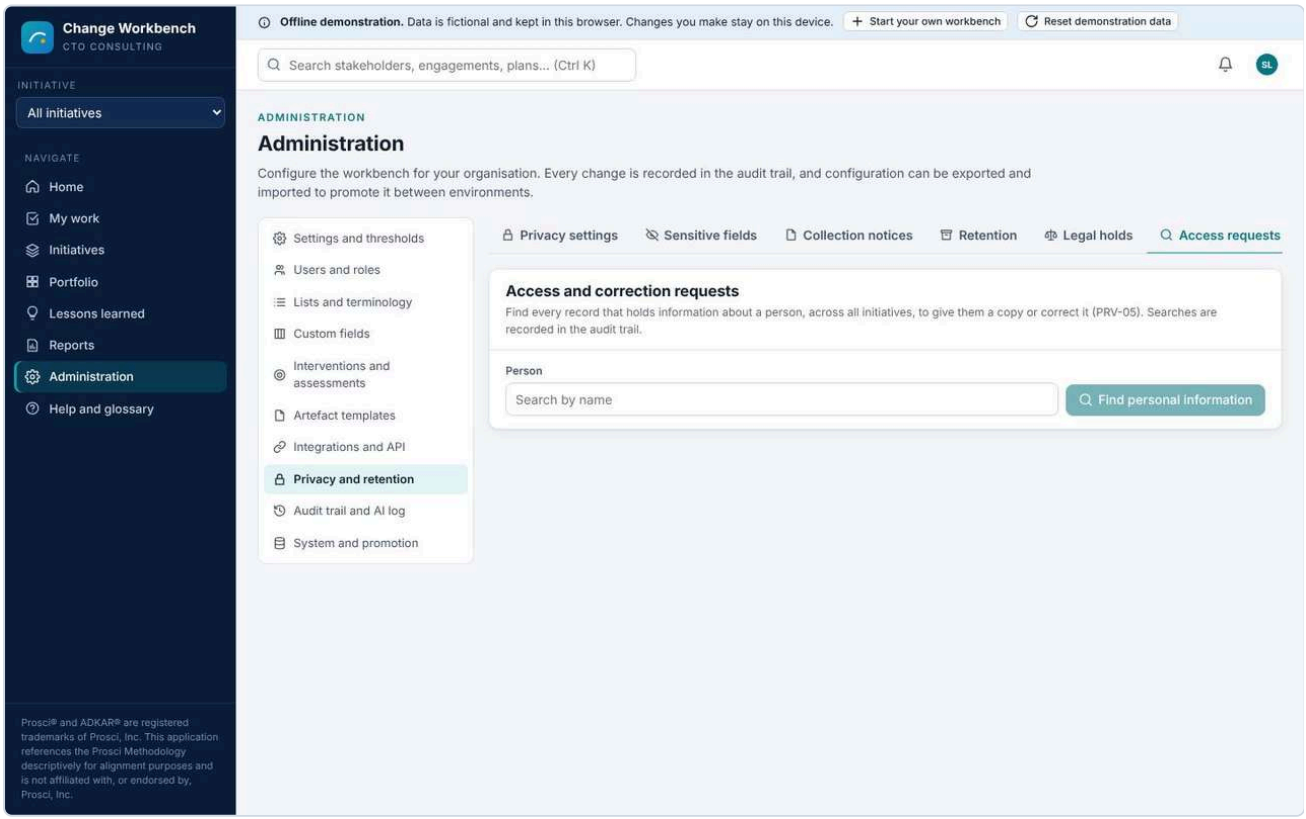

142 Privacy and retention · Legal holds

Legal holds, which suspend retention for an initiative.

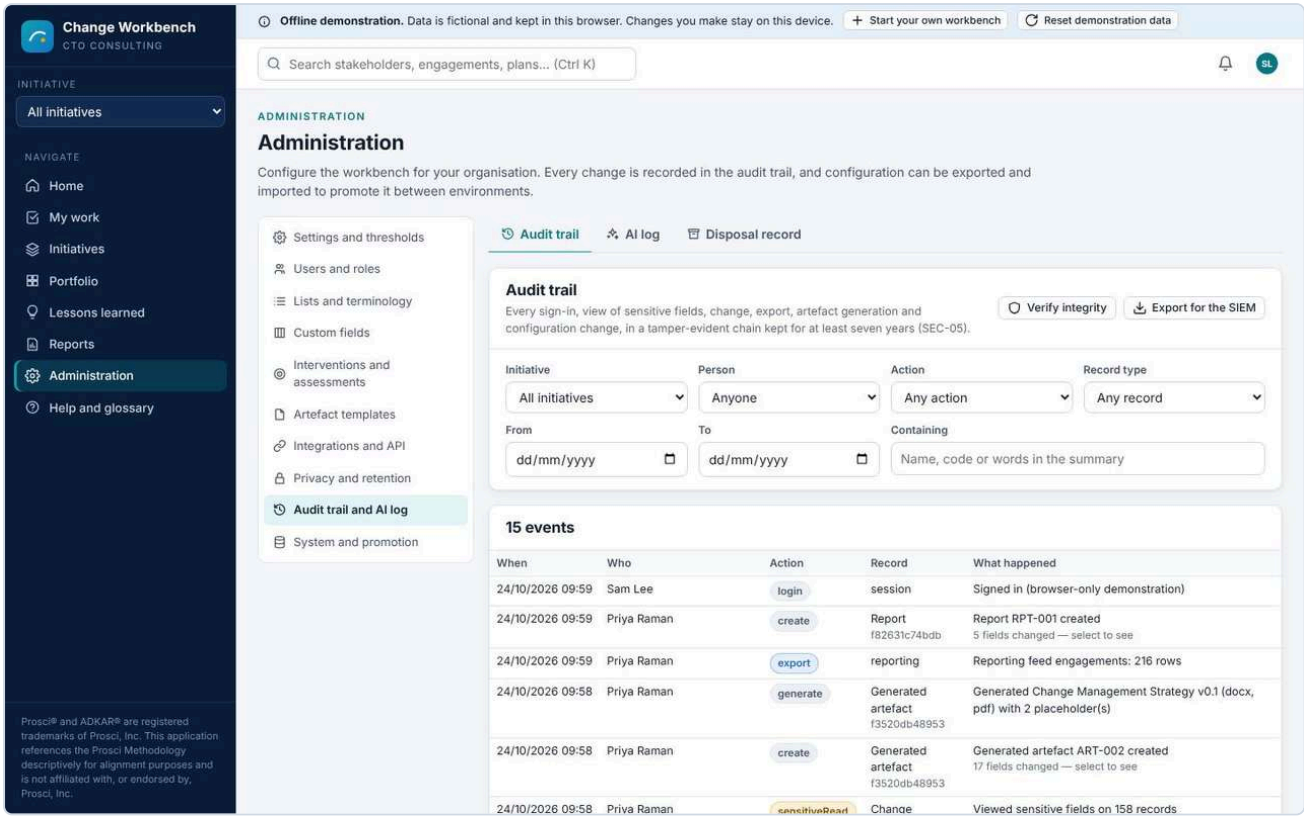

143 Privacy and retention · Access requests

Access and correction requests: find everything held about a person.

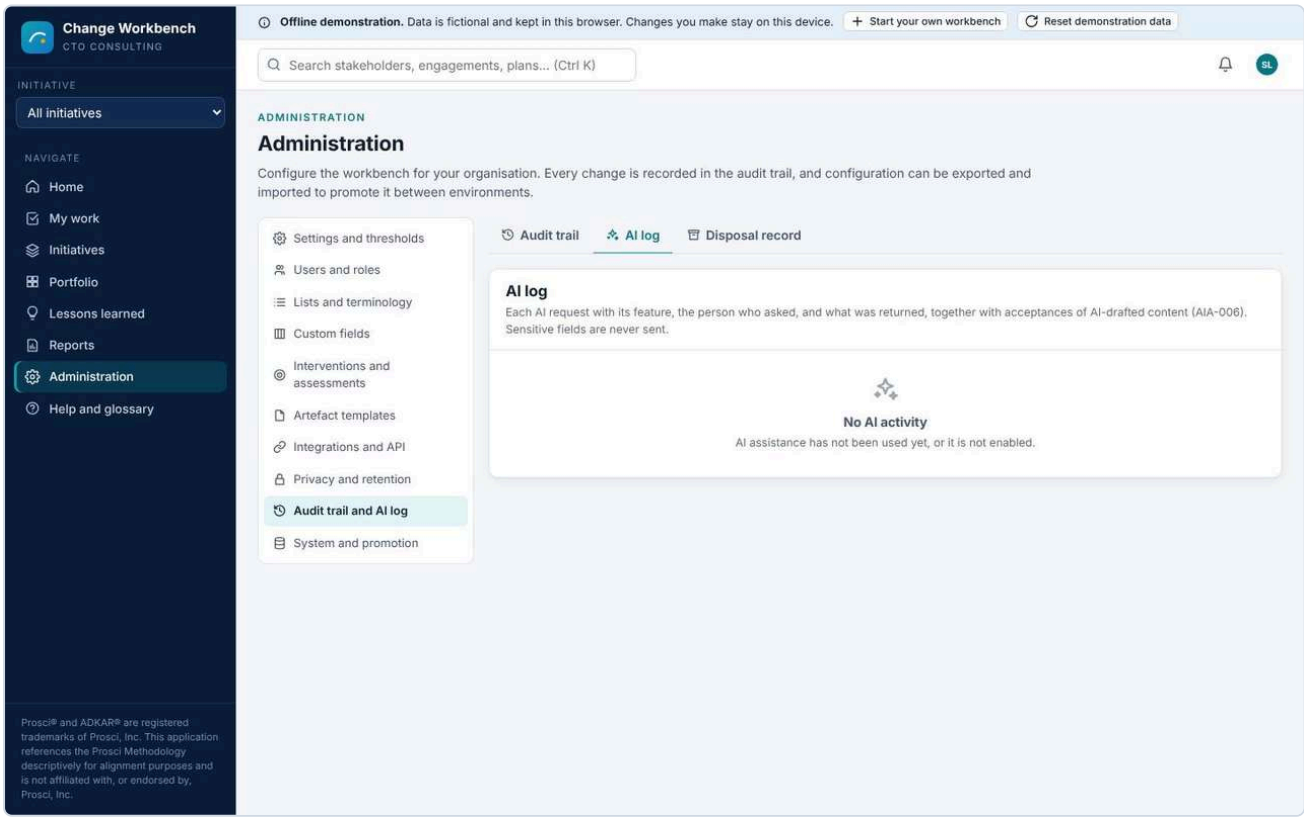

144 Audit trail

The audit trail: sign-ins, views of sensitive fields, changes, exports and approvals, in a tamper-evident chain.

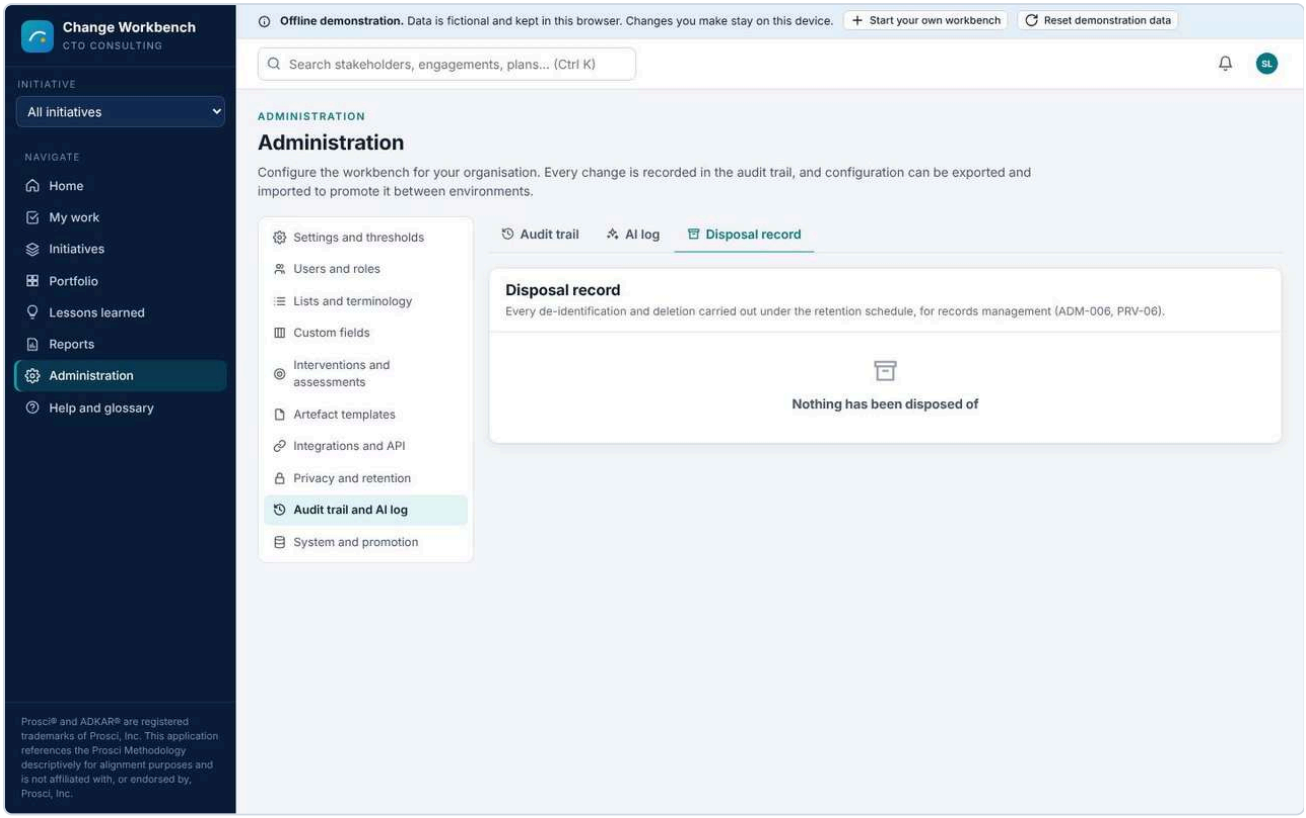

145 Audit trail · AI log

The log of AI prompts and outputs. AI assistance needs the server, so offline the log is empty.

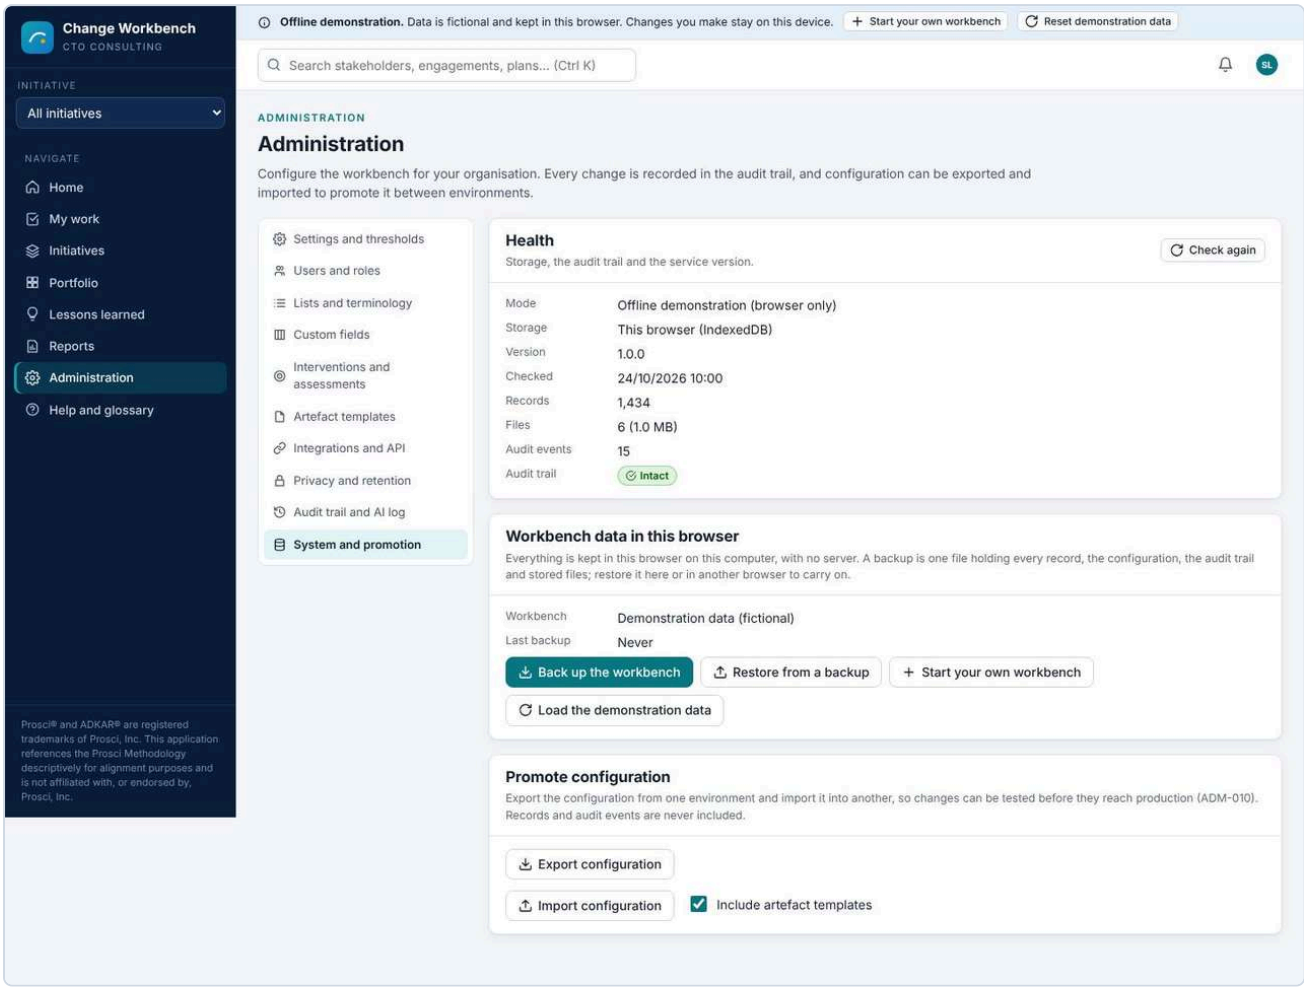

146 Audit trail · Disposal record

The record of what the retention schedule has de-identified or deleted.

147 System and promotion

System: health and the audit trail check, the workbench data in this browser with backup and restore, and configuration promotion.

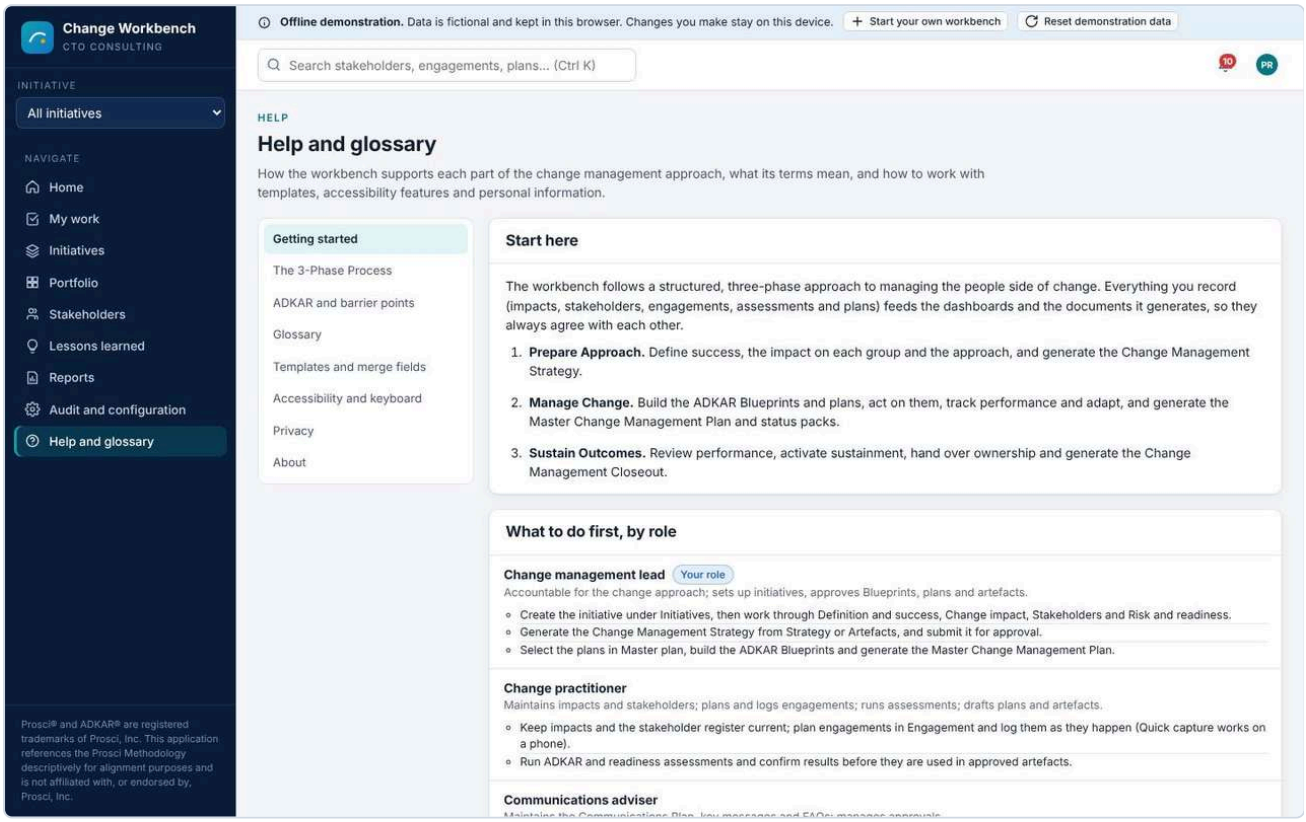

PART 12 OF 14

Help and glossary

Guidance is built in: the process, the ADKAR Model, templates and merge fields, accessibility, privacy and a glossary.

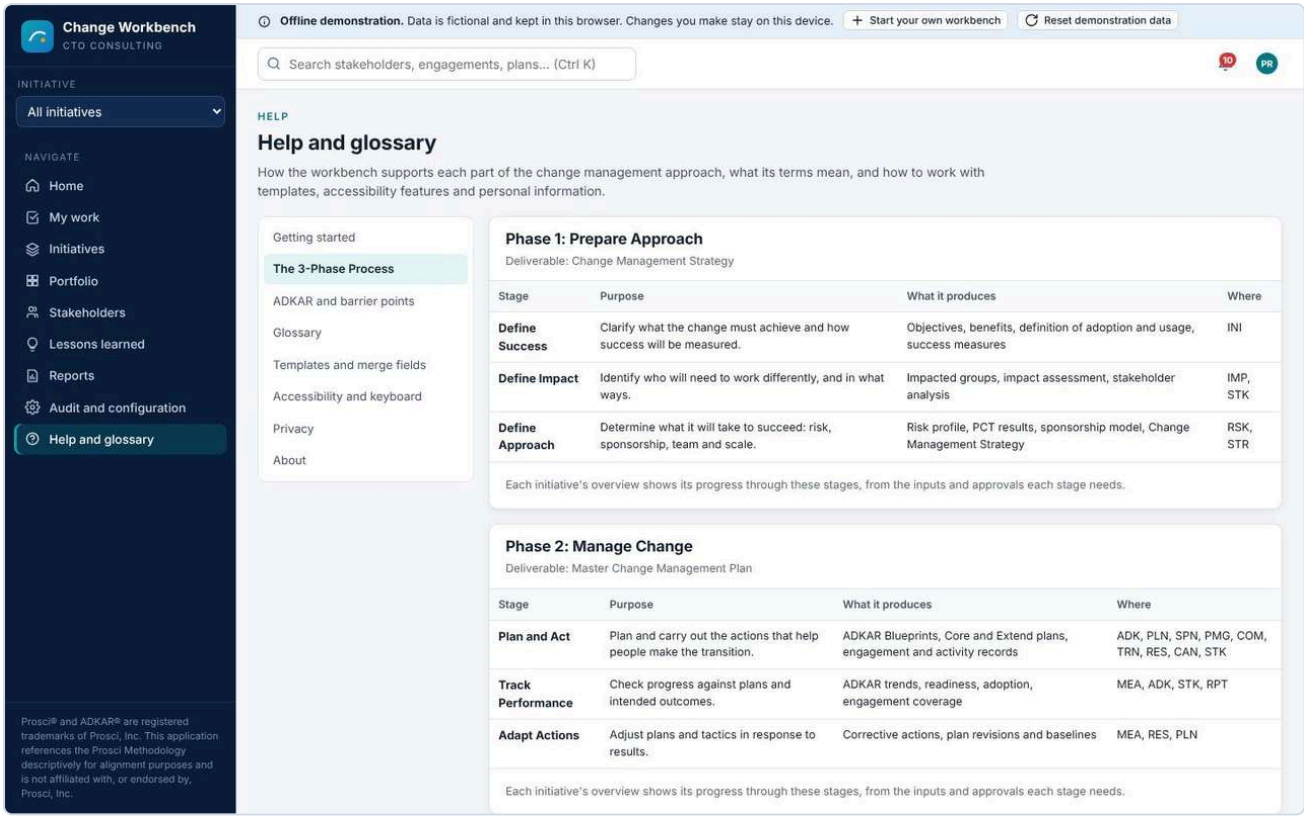

148 Help · Getting started

Getting started: the three phases, and what to do first in each role.

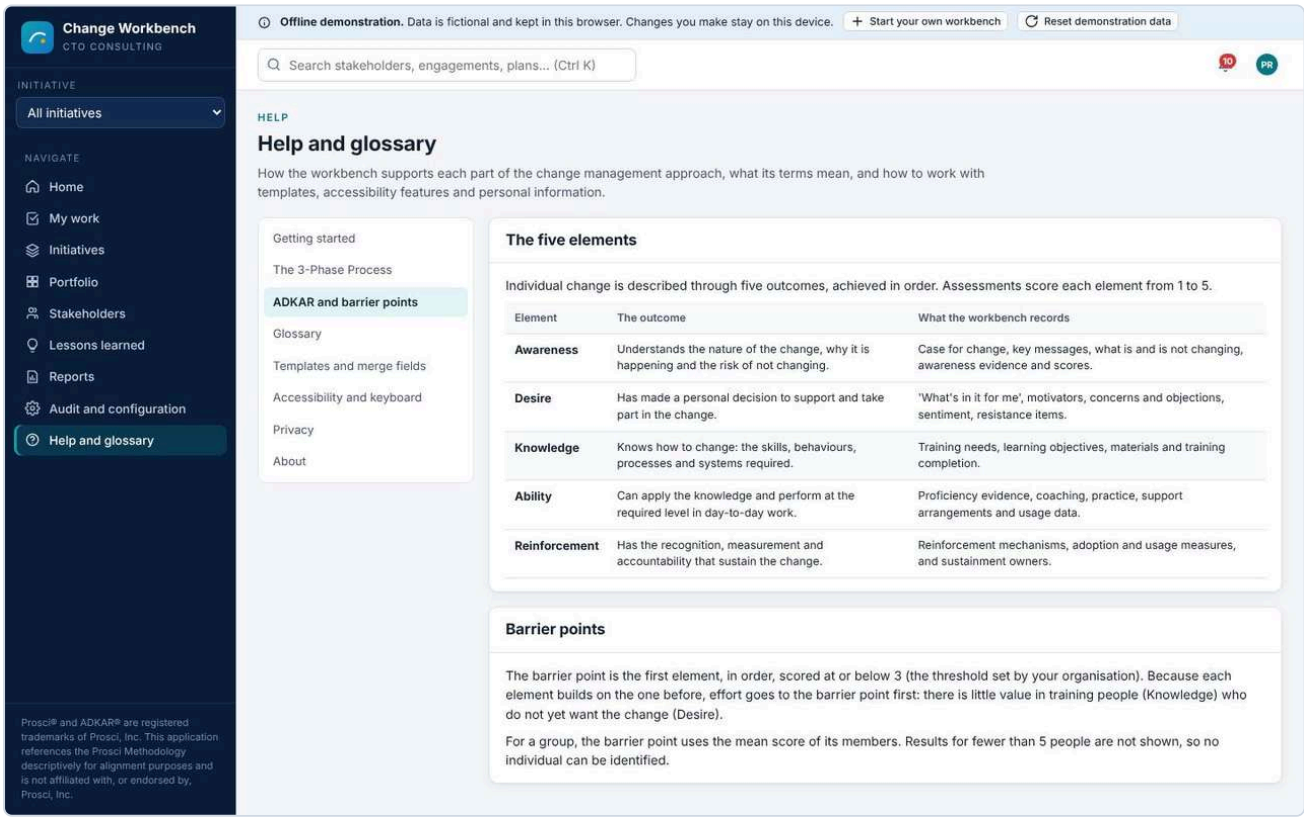

149 Help · The 3-Phase Process

The 3-Phase Process: each phase's stages, what they produce and where they are in the workbench.

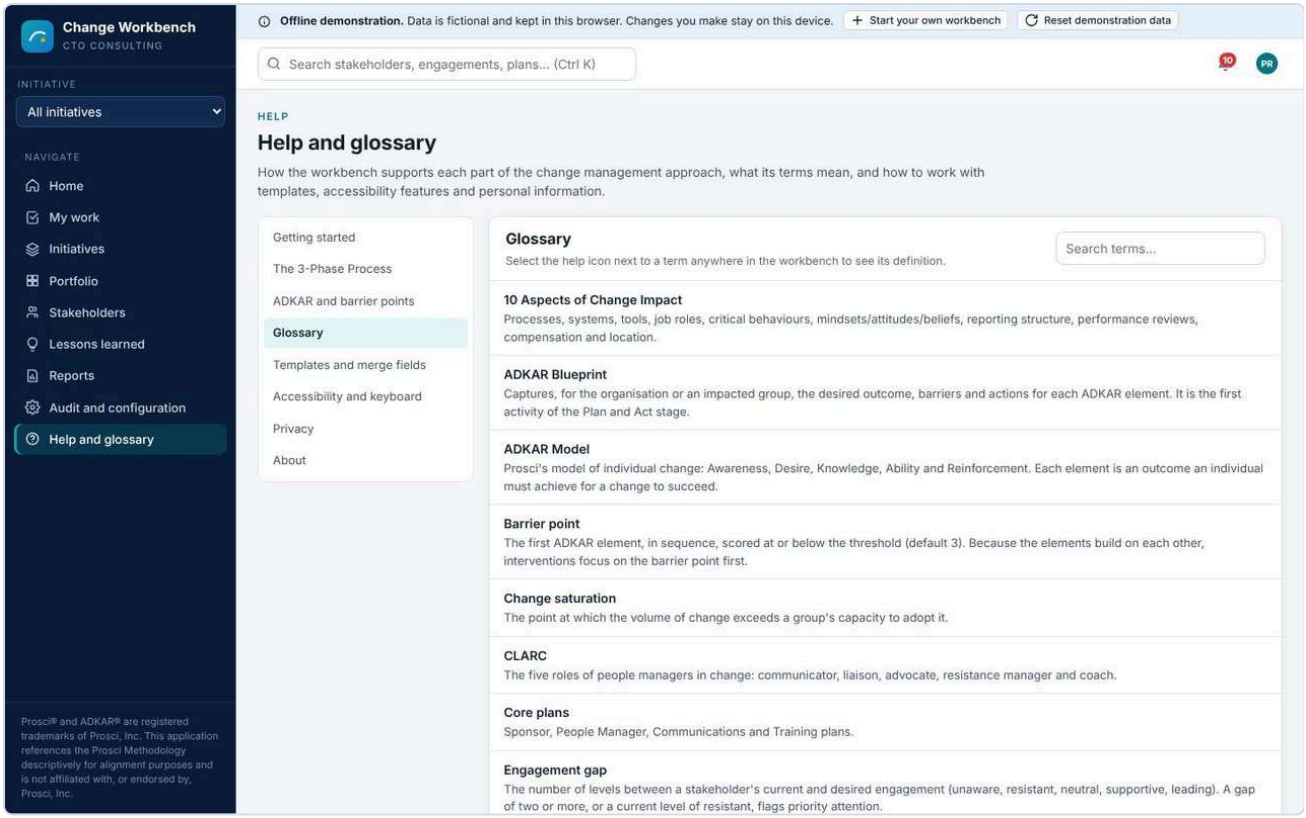

150 Help · ADKAR and barrier points

The five ADKAR elements, and how barrier points are found.

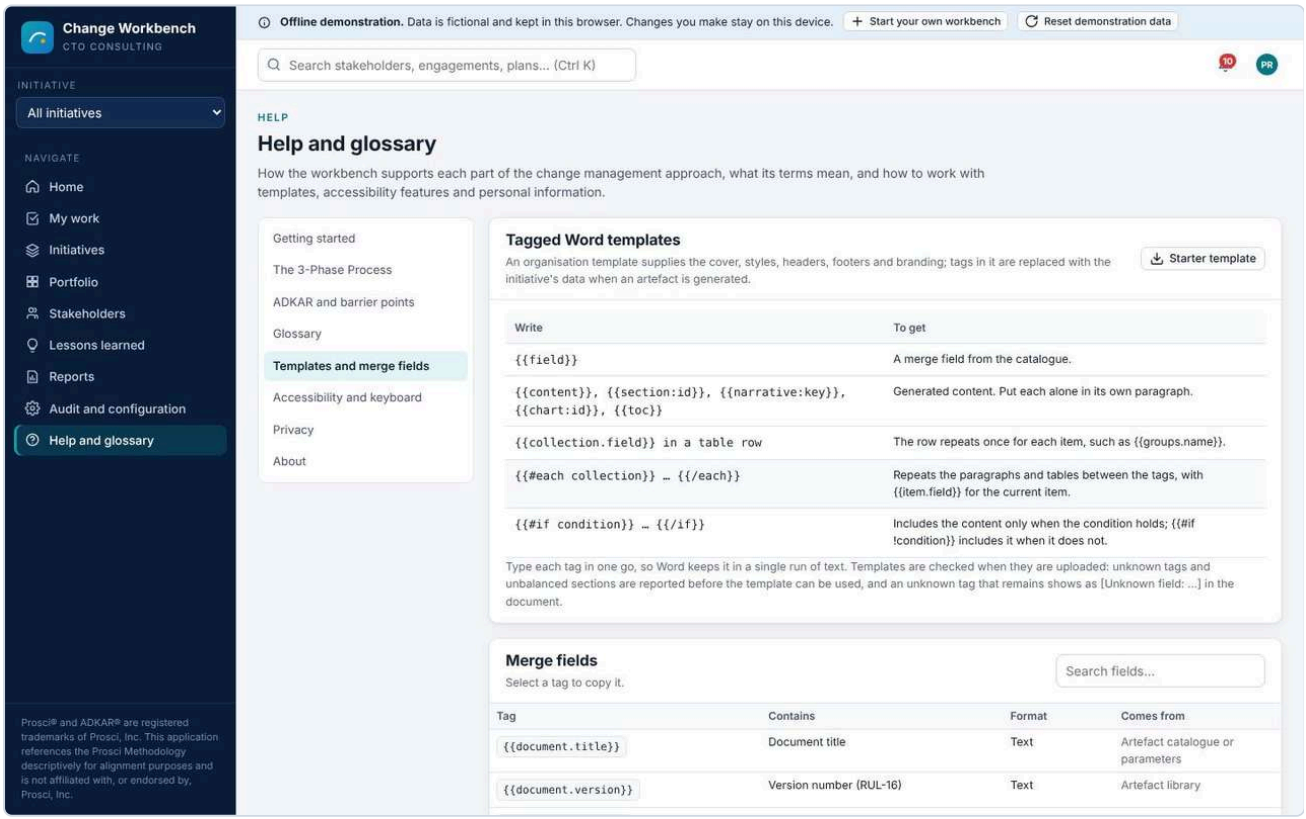

151 Help · Glossary

A searchable glossary of change management terms, also reached from the help icons on screens.

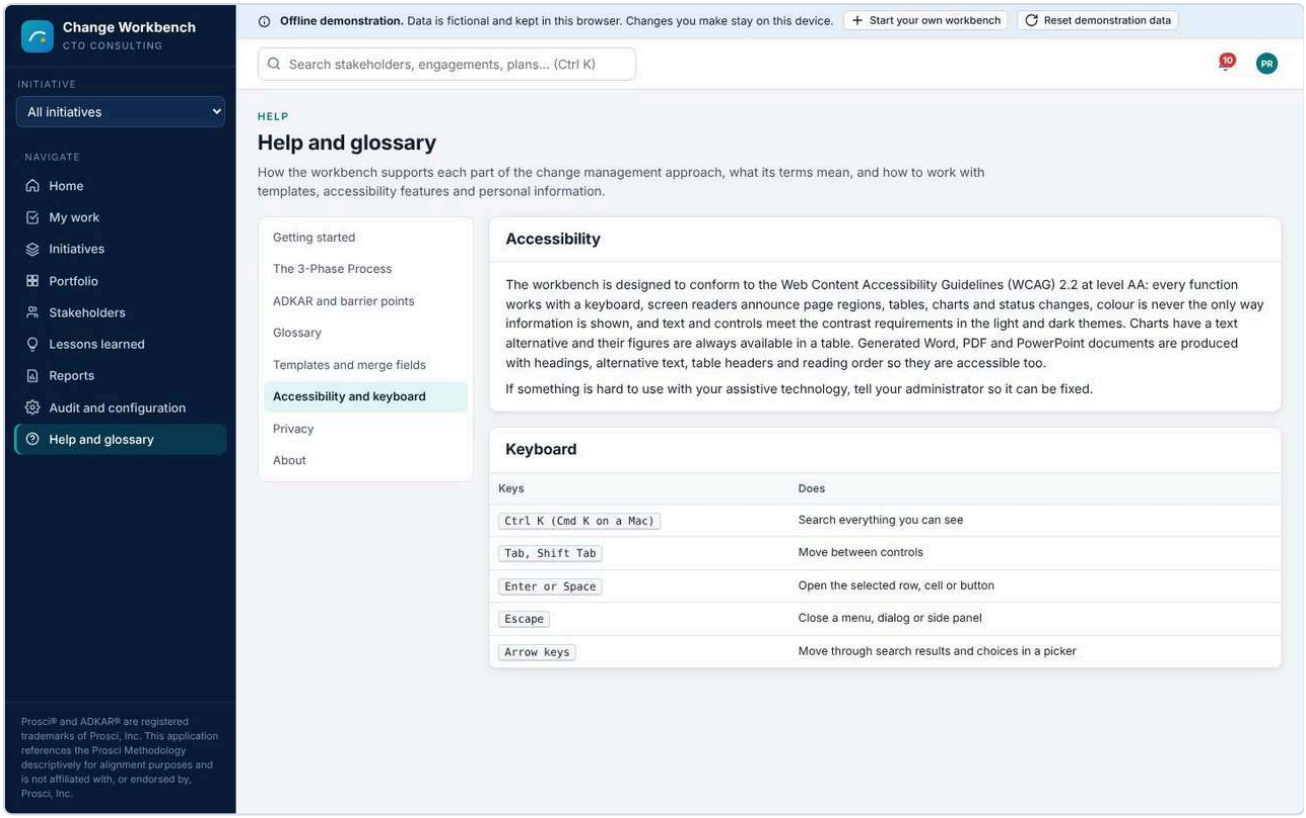

152 Help · Templates and merge fields

Tagged Word templates and the catalogue of merge fields.

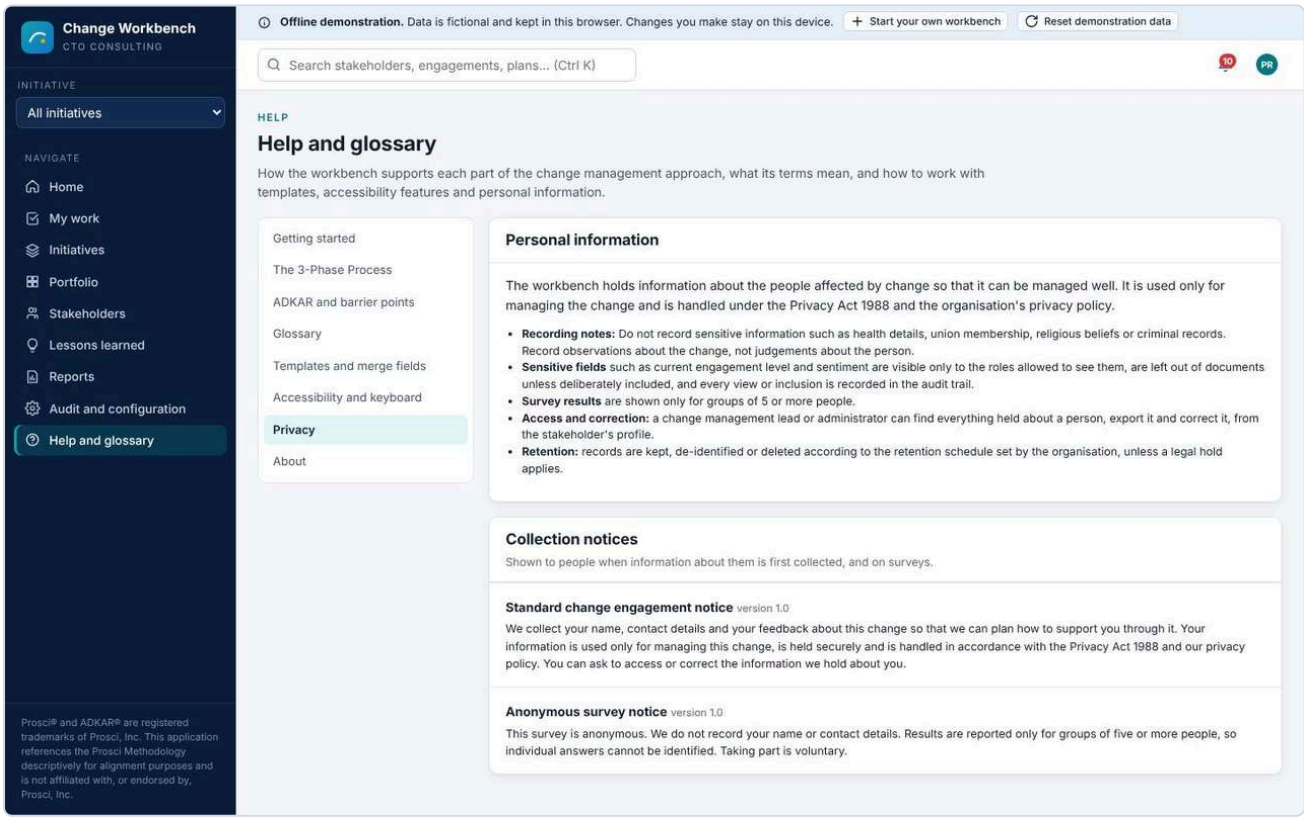

153 Help · Accessibility and keyboard

Accessibility, and the keyboard shortcuts.

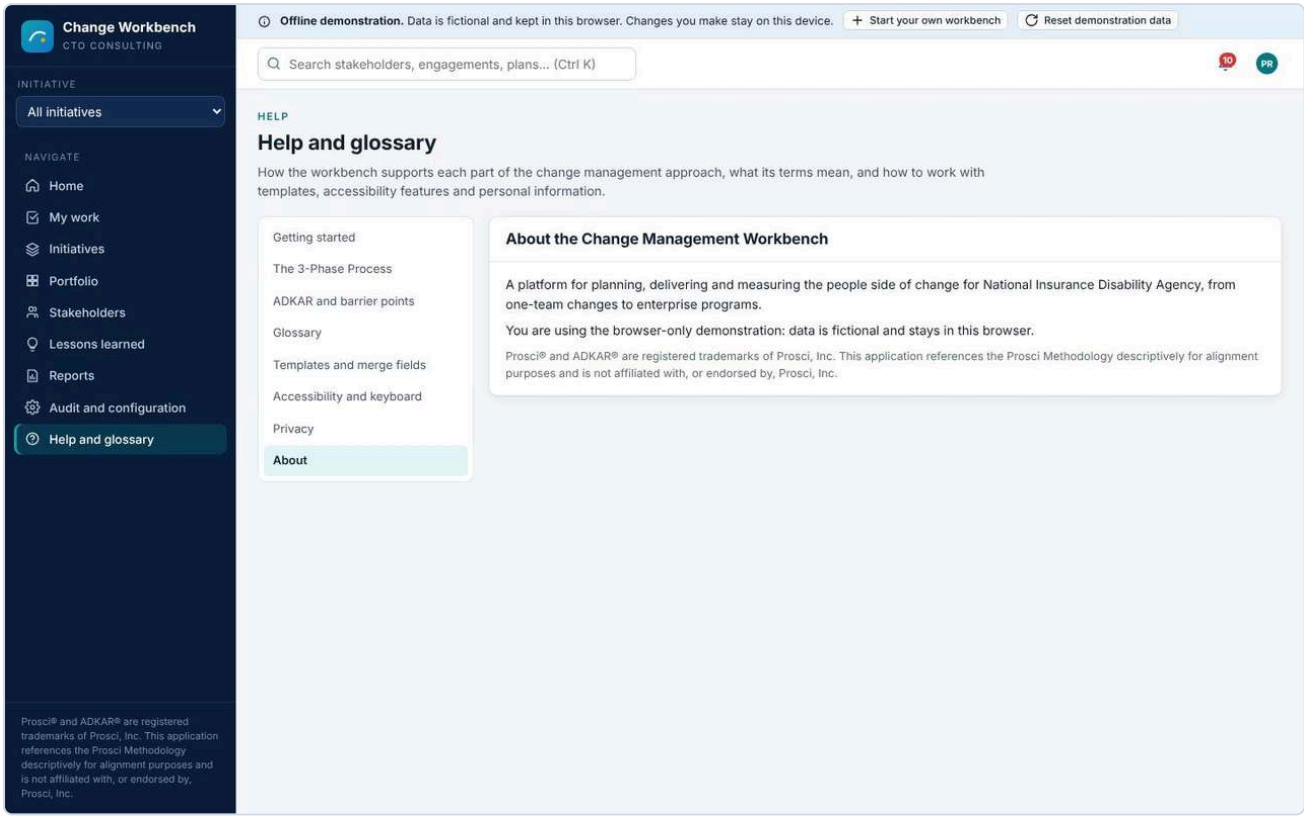

154 Help · Privacy

How personal information is handled, and the collection notices.

155 Help · About

About the workbench.

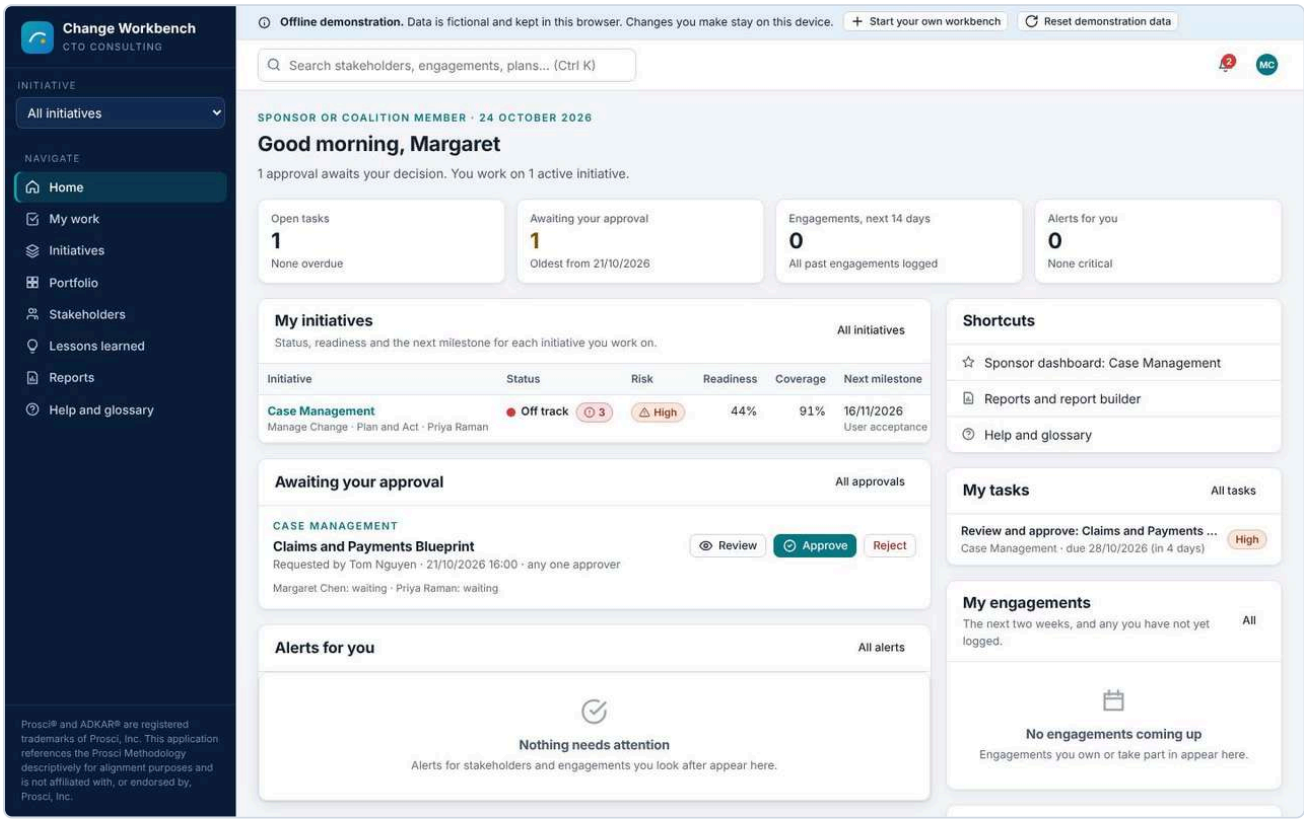

PART 13 OF 14

Roles, phones and dark mode

The same workbench as other roles see it, on a phone and in dark mode.

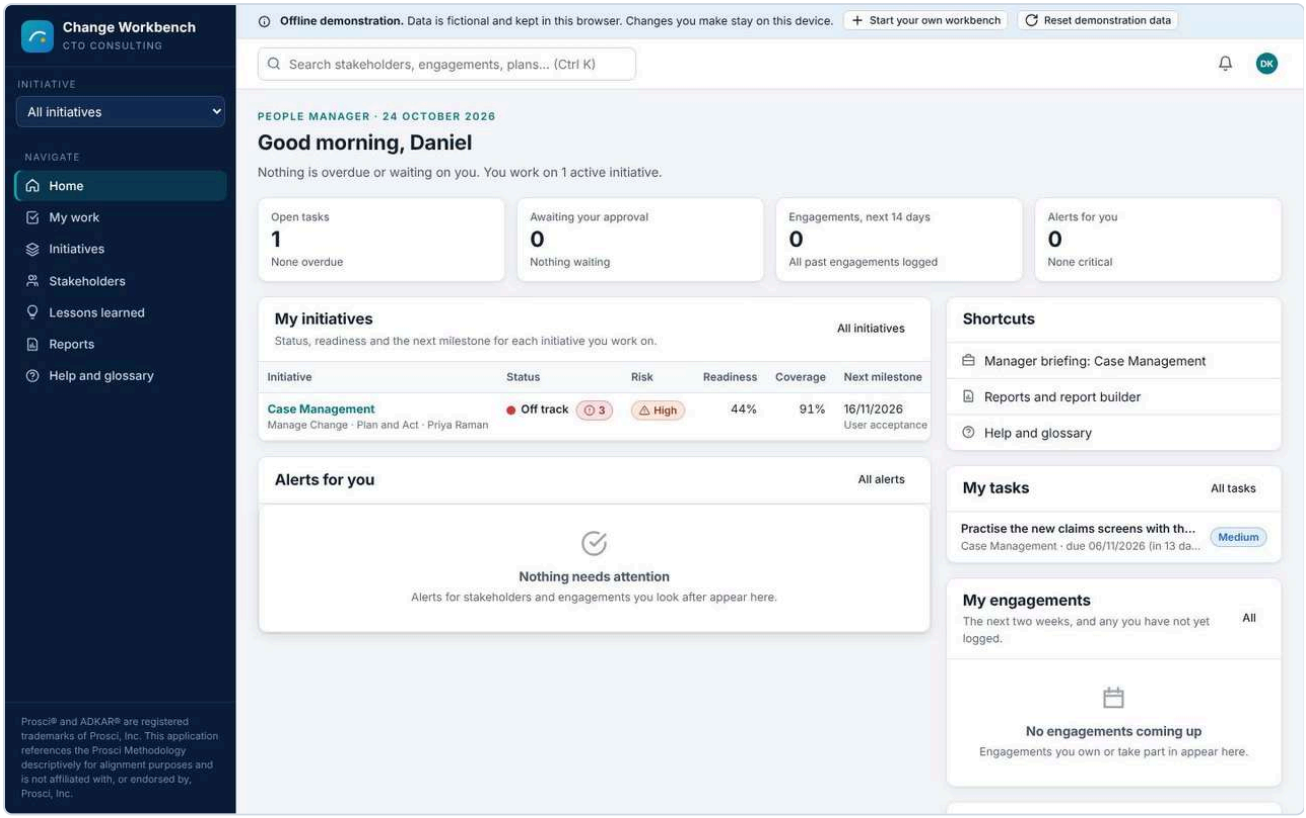

156 Home for the primary sponsor

Home for the primary sponsor: what is awaiting their approval, their initiative and the sponsor dashboard.

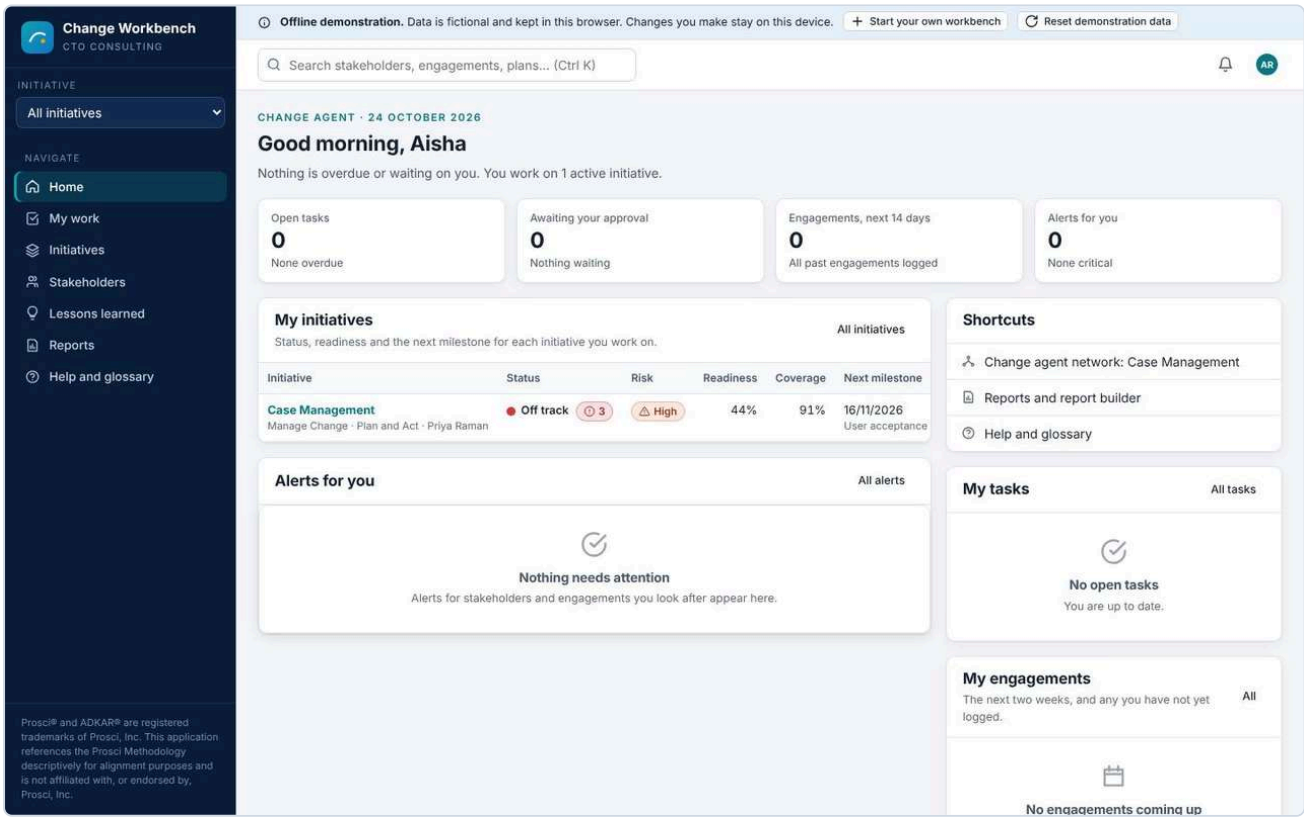

157 Home for a people manager

Home for a people manager: their initiative, their tasks and their team's engagements.

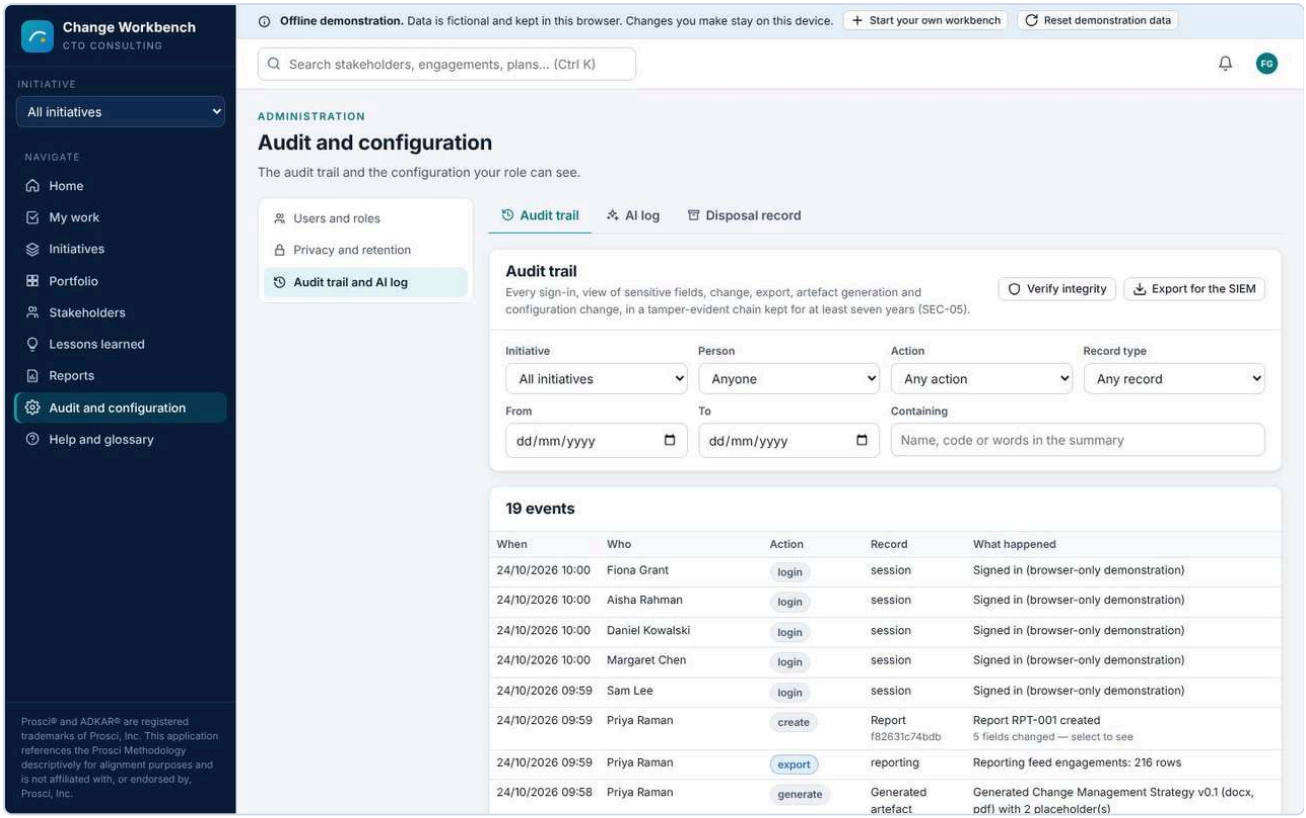

158 Home for a change agent

Home for a change agent: their initiative, the change agent network and their engagements.

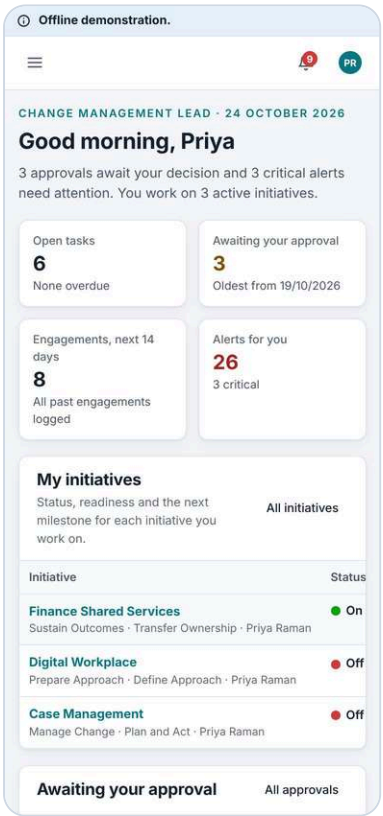

159 The auditor’s read-only view

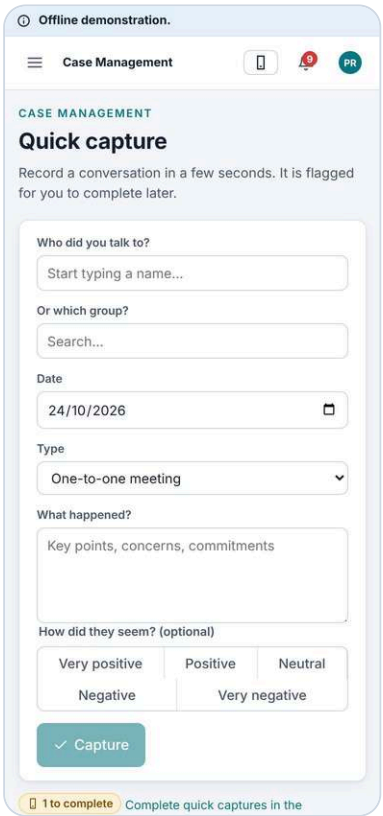

The auditor’s read-only view of the audit trail, users and privacy.

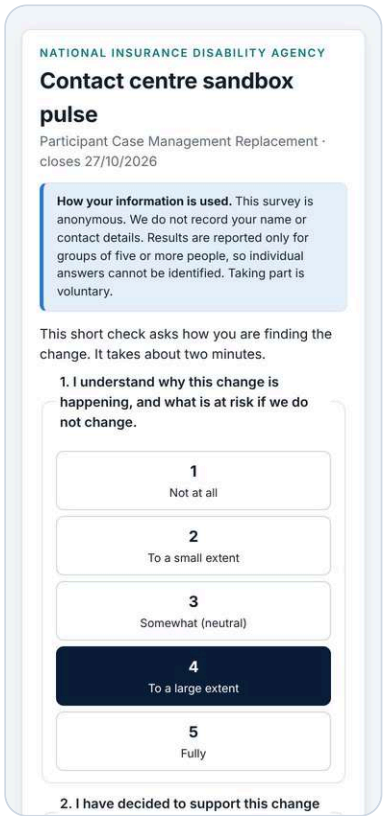

160 On a phone: home, quick capture and a survey

On a phone: the home page, quick capture of an engagement in a few taps, and a survey.

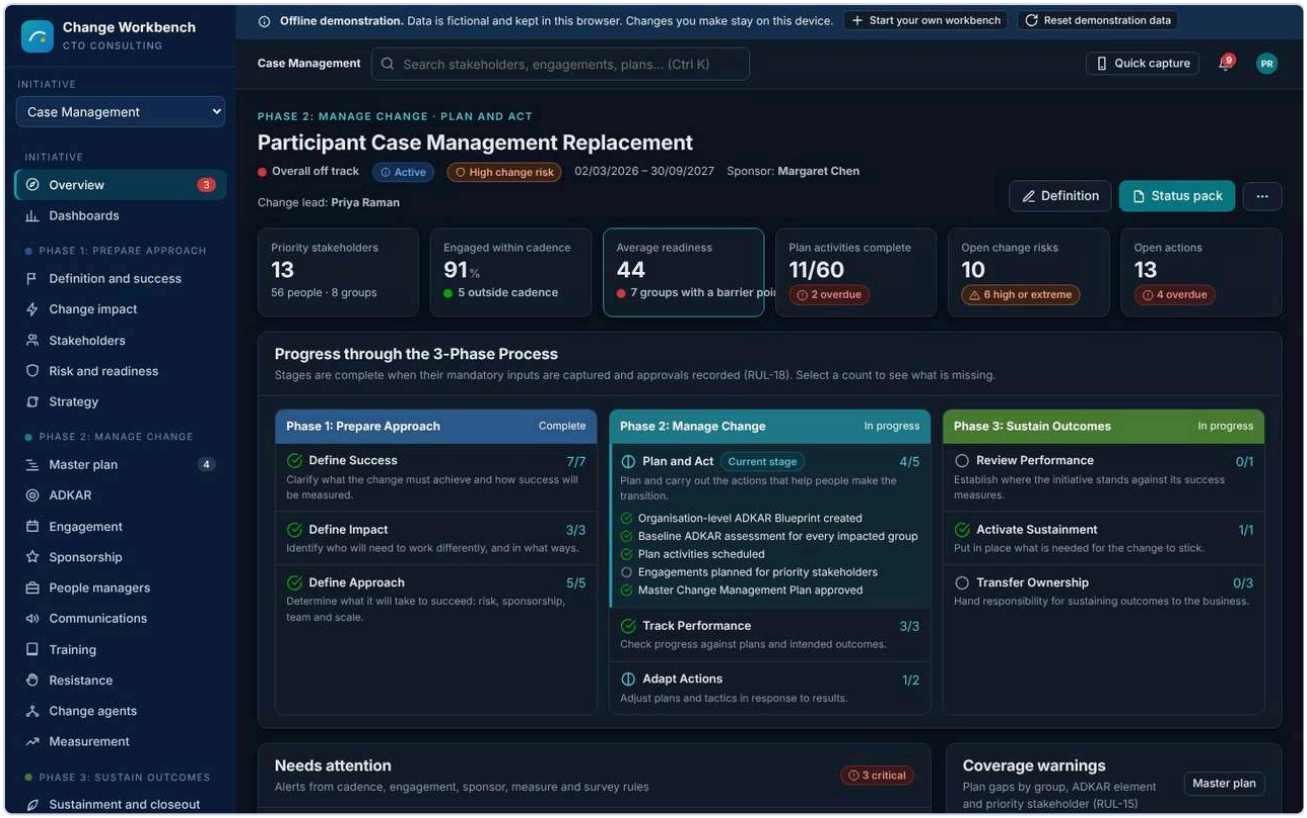

161 Dark mode

Dark mode, which follows the device setting or is chosen in the account menu.

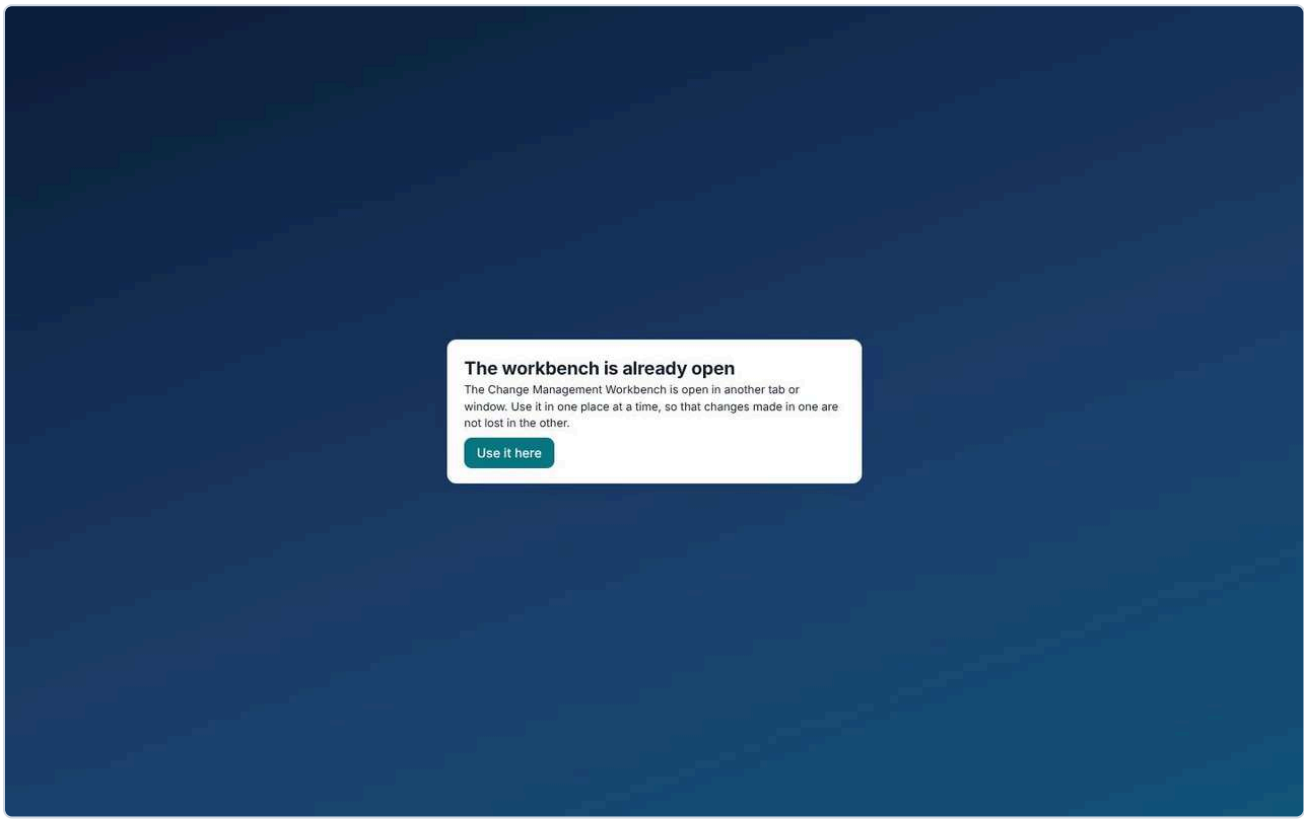

PART 14 OF 14

Offline safeguards

Two protections for data kept in a browser: the workbench works in one tab at a time, and it says so plainly when a browser will not keep the data.

162 Opened in a second tab

The file opened in a second tab. The workbench works in one tab at a time so that changes are never lost between them; Use it here takes it over.

163 A browser that will not keep the data

A browser that will not keep data for a file opened from disk: the workbench runs in memory, says so, and asks you to back up before closing.
