# Proposal Platform

Screen tour — every part of the application

CTO Consulting · [www.ctoconsulting.com.au](http://www.ctoconsulting.com.au)

Implements the Proposal Authoring Platform — Functional & Technical Specification  
v0.1

51 screens across intake, authoring, review, approval, production, submission, the  
content library, insight and administration

Captured 30 September 2026

All clients, people, bids and documents shown are fictitious demonstration data.

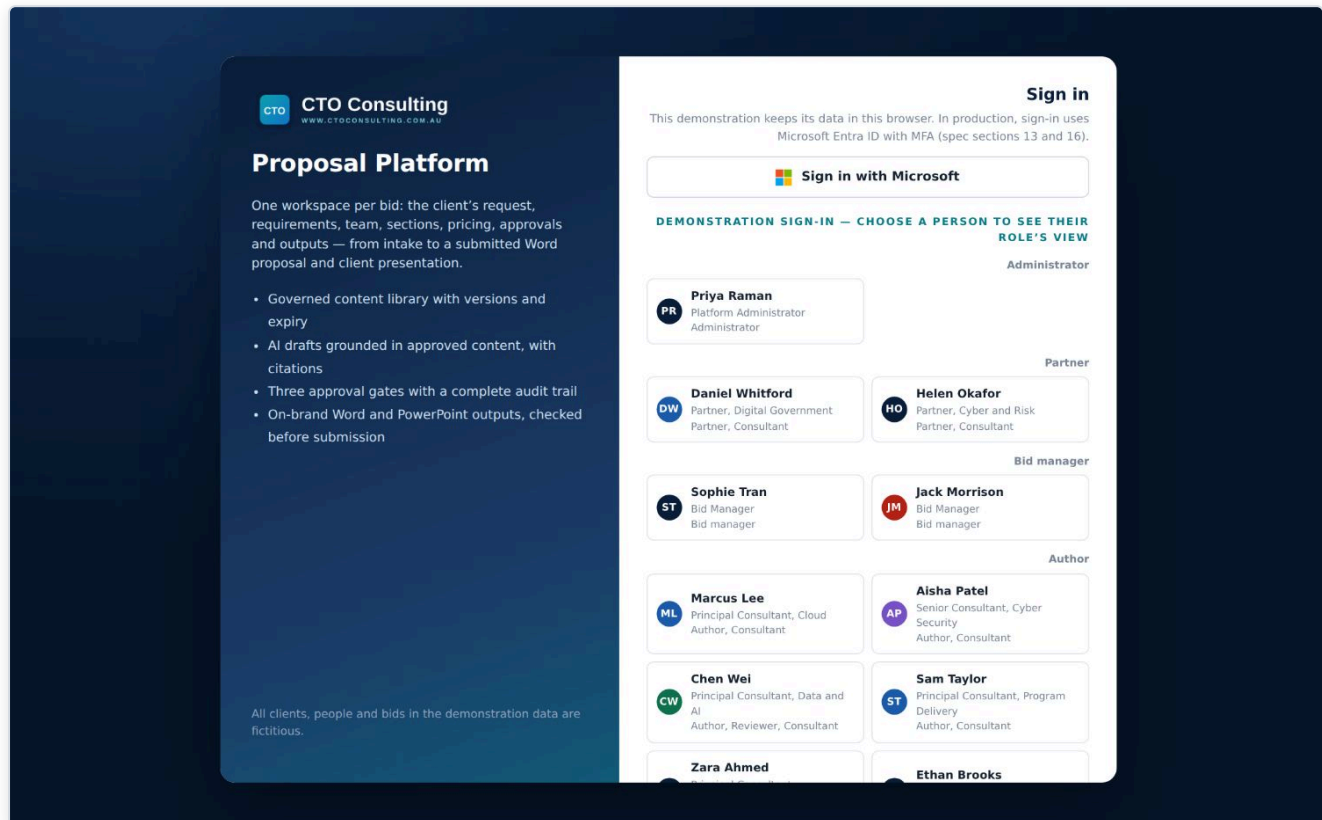

# Contents

Screens captured from the running application in browser mode, signed in as the person whose role each screen illustrates (bid manager, author, commercial approver, partner, content librarian or administrator). Requirement IDs in the captions refer to the specification.

Digital Records Modernisation Partner

Office of the Digital Registrar 12 Nov 2026, 12:00 pm AEDT \$850,000 estimated AusTender

1 Intake 2 Qualify 3 Plan 4 Author 5 Review 6 Approve 7 Produce 8 Submit 9 Outcome

Overview Request 7 Compliance matrix 5 Qualify Plan Sections Reviews Team and pricing Approvals 1 Produce Present

Opportunity brief

One page: client, need, scope, timing, risks and suggested win themes (CR-06) [Regenerate](#)

Client

Office of the Digital Registrar

Need

The Office holds 60 million records across three legacy registry systems, the oldest of which was implemented in 2004. The Office intends to consolidate these registers onto a modern records platform and to retire paper-based processes for 1.2 million annual

Timing

- Closes 2026-11-12 12:00 (Australia/Sydney)
- Clarification deadline: 2026-10-29 12:00

Requirements

5 mandatory and 2 desirable requirements; 4 weighted evaluation criteria.

Risks

- NV1 clearances required: limits the available team.
- Page limit: 20 pages.

Win themes

A proven, low-risk migration method with a rehearsed rollback for every wave

Evidence-based cyber uplift that an auditor will accept

Capability left behind: the client's team runs what we build

Measurable benefits tracked from day one

Add a win theme

Save brief and win themes

Bid/no-bid scorecard

Pre-filled with evidence for the partner to decide (CR-07). Scores 1 (poor) to 5 (strong). [Save scores](#)

Strategic fit

Alignment with our offerings, sectors and growth plan

5

Matches our offerings: Digital strategy, Data and

Relationship

Existing relationship, access to the buyer, past work

2

No previous work with Office of the Digital

Capability match

Library evidence: case studies, methods, people

5

7 of 7 requirements have strong library evidence.

Competitive position

Incumbent, likely competitors, differentiation

3

No incumbent is referred to. Limited to panel

Capacity to deliver

Availability of the proposed team and bid team

2

2 available consultants with matching skills and

Risk (higher is lower risk)

Commercial terms, delivery, reputational risk

4

NV1 clearances required: limits the available team.

Value

Contract value, margin potential, follow-on work

3

Estimated value \$850k against a median bid

Average 3.4 / 5 · total 24 of 35 [Recommendation: Bid](#)

Gate 1: bid/no-bid decision

The accountable partner decides. A no-bid archives the bid with its reason. [Awaiting decision](#)

☒ Bid ☐ Bid with conditions ☐ No-bid

Comment (optional)

Record decision

10. Plan

Response outline from the client’s structure, with owners, reviewers, due dates, word limits and linked requirements (WF-01, WF-02); back-scheduled milestones (WF-13).

## 13. Section editor — AI drafting

Grounded AI drafting: every sentence cites a library item or request clause; AI text stays highlighted until a person accepts or edits it (WD-01...WD-03).

The screenshot displays the CTO Consulting Proposal Platform interface. On the left is a dark sidebar with navigation options: 'New bid', 'My work', 'Pipeline', 'All bids', 'Search', 'Content library', 'Consultants', 'Rate cards', 'Templates', 'Win/loss analytics', 'Content insight', 'AI usage', and footer information. The main workspace is divided into three sections. The top section contains a search bar and a toolbar with options like 'List', 'Table', 'Accept AI', and 'Clear flag'. The middle section is the text editor, showing a draft with multiple paragraphs. Each paragraph is highlighted in light blue and includes a source citation in green text (e.g., 'M6 MT-002', 'MT-002', 'CS-002', 'SA-003 EV-004 M4', 'M4 M6', 'MT-002', 'SA-003', 'EV-004', 'EV-005'). The bottom section shows a status bar indicating 'Proposed approach and metho...' and 'Delivery plan and timeline →'. On the right side, there is a panel for 'AI assist' with a 'Draft more and append' button and four checkboxes: 'Shorten to 800 words', 'Strengthen against the evaluation criteria', 'Check against 2 linked requirements', and 'Tailor a case study to this client'. Below these is a note about AI text highlighting and source citation.

Comment Suggest 323 / 800 words

We will take the Authority from Maturity Level 1 to Maturity Level 2 across all eight mitigation strategies, with evidence that the Authority's auditors will accept. **M6 MT-002**

We start with an assessment against the ASD Essential Eight Maturity Model, using technical testing rather than interviews alone. We then prioritise mitigation strategies by risk reduction and business impact, and implement changes in controlled pilots before rolling them out. **MT-002**

For every mitigation strategy we produce an evidence pack that maps each maturity requirement to configuration, test results and screenshots. A sustainment model with monthly compliance reporting keeps the Authority at Maturity Level 2 after we leave. **MT-002**

We have delivered this outcome before: for a New South Wales Government department we achieved Maturity Level 2 across all eight mitigation strategies in nine months and enforced application control on 4,800 endpoints. **CS-002**

CTO Consulting holds ISO/IEC 27001:2022 certification for its information security management system, covering all offices and consulting services. **SA-003 EV-004 M4**

This section responds to SRWA's requirements M4 and M6. **M4 M6**

Our Essential Eight uplift method takes organisations to a target maturity level with evidence an auditor will accept. **MT-002** We assess ourselves annually against the Essential Eight and currently operate at Maturity Level 2 across all eight strategies. **SA-003**

**ISO/IEC 27001 certification (M4).** We will hold current ISO/IEC 27001 certification for its information security management system. **M4** Certification of CTO Consulting's information security management system to ISO/IEC 27001:2022, covering all offices and consulting services, valid to 31 March 2027. **EV-004** Certification of CTO Consulting's quality management system to ISO 9001:2015, valid to 31 October 2026. **EV-005**

**Requirement M6.** We will uplift the Authority to Essential Eight Maturity Level 2 across all eight mitigation strategies and provide evidence of the maturity achieved. **M6 Maturity Level 2**

We will take the Authority from Maturity Level 1 to Maturity Level 2 across all eight mitigation strategies, with evidence that the Authority's auditors will accept. **M6** **MT-002**

We start with an assessment against the ASD Essential Eight Maturity Model, using technical testing rather than interviews alone. We then prioritise mitigation strategies by risk reduction and business impact, and implement changes in controlled pilots before rolling them out. **MT-002**

For every mitigation strategy we produce an evidence pack that maps each maturity requirement to configuration, test results and screenshots. A sustainment model with monthly compliance reporting keeps the Authority at Maturity Level 2 after we leave. **MT-002**

We have delivered this outcome before: for a New South Wales Government department we achieved Maturity Level 2 across all eight mitigation strategies in nine months and enforced application control on 4,800 endpoints. **CS-002**

CTO Consulting holds ISO/IEC 27001:2022 certification for its information security management system, covering all offices and consulting services. **SA-003** **EV-004** **M4**

Comment Suggest 167 / 600 words

Southern Rivers Water Authority provides drinking water and wastewater services to 420,000 customers and runs 180 business applications from two ageing data centres. M1 The lease for the primary data centre expires in June 2027, which sets a hard deadline for the migration program.

A 2026 internal audit found the Authority at Essential Eight Maturity Level 1 for most mitigation strategies and recommended uplift to Maturity Level 2 by June 2028. M6 The Authority also wants its internal ICT team to operate the new environment with confidence once the program ends. M8

What success looks like

- Every workload migrated or retired before the data centre lease ends, with no unplanned outage to customer billing or water operations.

"with confidence once the program ends"

Can we quantify this? The criteria reward measurable outcomes. @Marcus

Marcus Lee: Good point — I will add the certification numbers from Murray Basin. 24 hours ago

Panel or contract rates override standard rates (PR-04)

Kestrel Superannuation master servic

Discount (%)

0

Expenses (ex GST)

No expenses.

Price

AUD. GST is shown separately (PR-04).

|                   |           |
|-------------------|-----------|
| Labour (110 days) | \$143,500 |
| Professional fees | \$143,500 |
| Total ex GST      | \$143,500 |
| GST (10%)         | \$14,350  |
| Total inc GST     | \$157,850 |

Estimated value at intake: \$640,000 (\$496,500 below).

Margin (internal only)

Visible to partners, commercial approvers and administrators (PR-08). Never included in client outputs.

|             |           |
|-------------|-----------|
| Labour cost | \$108,750 |
| Margin      | 24.2%     |

Threshold 25%. Below threshold: gate 2 needs an additional commercial approval.

Pricing schedule

Excel, in CTO Consulting's format or the client's own (PR-07)

Download pricing schedule (.xlsx)

Internal workbook with cost and margin

To fill the client's own pricing schedule, add their Excel file to the bid's documents on the Request tab.

Assumptions

Carried into the proposal's commercial section (PR-06)

Add assumption

ASSUMPTION

Framework design covers member services and investment operations only.

X

Commercial risks

Add risk

Approvals 1

Produce

Presentatic

Gate 1 (bid/no-bid) is decided on the Qualify tab: Passed. Requesting gate 2 or 3 takes a named snapshot and locks the covered sections. An edit after approval voids the approval and notifies the approvers (WF-08).

Gate 2: Commercial approval

Awaiting decision

REQUIRED APPROVALS

1 / 2 Commercial approver

Workflow template: Margin below 25% needs a second commercial approval AS

Eligible on this bid: Rebecca Stone, James Wu

Margin 24.2% is below the 25% threshold, so an additional commercial approval is required (PR-05).

Covers 1 section marked commercial, plus the team and price.

## 23. Approval decision

Approve, approve with conditions or reject, recorded with the approver, time, comment and snapshot (WF-07).

The screenshot displays the CTO Consulting Proposal Platform interface. A modal titled "Gate 2: Commercial approval" is open, allowing a user to approve a snapshot. The modal contains the following elements:

- Title:** Gate 2: Commercial approval
- Message:** You are approving snapshot **rel\_g2**: 1 section at their locked versions, the team and the price. Your decision is recorded with the exact version approved (WF-07).
- Options:** Three radio buttons for "Approve", "Approve with conditions" (selected), and "Reject".
- Conditions (required):** A text input field with the placeholder "For example: confirm the travel budget with the client before submission."
- Comment (optional):** A text input field.
- Buttons:** "Cancel" and "Record decision".

The background interface shows a sidebar with navigation options like "New bid", "My work", "Pipeline", "All bids", "Search", "Content library", "Consultants", "Rate cards", "Templates", "Win/loss analytics", "Content insight", and "AI usage". The main content area displays a proposal titled "Data and AI Governance Framework" with a status of "Awaiting decision". A "DECISIONS" section at the bottom shows a record by Rebecca Stone, Commercial approver, who approved with conditions 21 hours ago.

## 24. Produce — outputs and checks

Word proposal generated from the approved snapshot into the CTO Consulting template; pre-final checks linked to the sections to fix, and provenance of template, content and AI model (WD-06, WD-07, WD-11).

- We will assess the Commission against the Essential Eight Maturity Model and report current maturity for each mitiga...
- Maturity Level 2 achieved across all eight mitigation strategies in nine months
- The department was assessed at Essential Eight Maturity Level 1 and had nine months to reach Maturity Level 2 before an...

**2 reasons to choose CTO Consulting**

- Evidence-based cyber uplift that an auditor will accept
- A cleared, available team ready to start on day one

**Agenda**

- Our understanding of your needs
- Our approach
- Timeline
- Your team
- Relevant case studies
- Why CTO Consulting
- Next steps

**What ASAC needs, and why it matters now**

- The supplier must assess the Commission against the Essential Eight Maturity Model and report current maturity for each...
- The supplier must implement application control and restrict administrative privileges to reach Maturity Level 2
- The supplier must provide an evidence pack suitable for review by the Commission's internal auditor

**7 phases, each with a clear exit point**

Final drafts complete

All sections ready for review

Final team review complete

Goal 2 communication approval

Goal 3 external sign off

Final outputs produced and checked

**A New South Wales Government department: Maturity Level 2 achieved across all...**

Outcomes

- Maturity Level 2 achieved across all eight mitigation strategies in nine months
- Privileged accounts reduced by 50%
- Application control enforced on 4,000 endpoints
- Patch compliance for critical vulnerabilities within 48 hours improved from 30% to 90%

**Northbridge Health Service: All 12 AI pilots assessed and risk-rated within f...**

Outcomes

- All 12 AI pilots assessed and risk rated within four months
- Data classification applied to 90% of critical data assets
- 60 data custodians trained and accredited

**Kestrel Superannuation: Landing zone approved by the fund's risk committee at...**

Outcomes

- Landing zone approved by the fund's risk committee at the time
- 100% of controls mapped to CPS 234 control objectives
- Environment provisioning time reduced from three weeks to two hours

**Next steps**

- Answer any questions from the panel
- Confirm the contract start date
- Mobilise the named team within two weeks of award
- Hold a kick-off workshop with ASAC's leadership team

**Questions**

Essential Eight uplift to Maturity Level 2 for a state government department

Approved Owner 

NK

 Nina Kowalski · v1 approved

Start a new version Retire

Content · v1

Approved by Nina Kowalski 400 days ago

Named Anonymised

State government · Cyber security, Governance and assurance · \$1,350,000 · 2024-2024 · Referee: Chief Information Security Officer

The department was assessed at Essential Eight Maturity Level 1 and had nine months to reach Maturity Level 2 before an audit committee deadline. CTO Consulting led the uplift program across 4,800 endpoints and 310 servers.

Application control, patching and privileged access were assessed at Maturity Level 0 or 1, and prior uplift attempts had stalled on business resistance.

We prioritised mitigation strategies by risk reduction per dollar, piloted application control with volunteer business units, automated patch compliance reporting, and embedded a security champion in each division.

Outcomes for Department of Regional Transport:

- Maturity Level 2 achieved across all eight mitigation strategies in nine months
- Privileged accounts reduced by 64%
- Application control enforced on 4,800 endpoints
- Patch compliance for critical vulnerabilities within 48 hours improved from 38% to 96%

### Integrations

Mode: browser storage (demonstration). Secrets are set as server environment variables and never stored in the browser.

| INTEGRATION                  | PURPOSE                                                                                              | STATUS                                                        | CONFIGURATION                                                                                                                                                 |
|------------------------------|------------------------------------------------------------------------------------------------------|---------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Microsoft Entra ID           | Single sign-on with MFA; roles can be mapped from Entra groups.                                      | Not connected                                                 | Register an app in Entra ID and set ENTRA_TENANT_ID, ENTRA_CLIENT_ID and ENTRA_CLIENT_SECRET on the server. Until then the server uses demonstration sign-in. |
| Anthropic Claude API         | Drafting, extraction, storyboards and other AI actions, grounded in approved content with citations. | Not connected<br>Offline engines in use                       | Set ANTHROPIC_API_KEY on the server. Use an in-country endpoint or zero-retention terms where clients require it.                                             |
| Semantic search (embeddings) | Library retrieval for drafting and search.                                                           | Connected<br>Built-in lexical search with synonym expansion   | An embeddings provider can be configured on the server; the built-in index works without one.                                                                 |
| PDF and PDF/A rendering      | Renders outputs with LibreOffice and counts pages on the rendered PDF (WD-08).                       | Not connected                                                 | Install LibreOffice on the server host (soffice on the PATH).                                                                                                 |
| OCR for scanned requests     | Reads scanned PDFs during intake.                                                                    | Not connected                                                 | Install Tesseract on the server host.                                                                                                                         |
| Microsoft Graph email        | Notification emails and the daily digest (WF-11).                                                    | Not connected<br>15 messages in the outbox                    | Grant Mail.Send to the Entra app and set GRAPH_SENDER. Messages queue in the outbox until then.                                                               |
| Microsoft Teams              | Approval cards and mentions; approve from the card (WF-12).                                          | Not connected<br>Cards are generated and queued in the outbox | Configure an incoming webhook or bot for the Teams channel and set TEAMS_WEBHOOK_URL.                                                                         |
| SharePoint                   | Import existing library folders (CL-01).                                                             | Not connected<br>ZIP export import available now              | Grant Sites.Read.All to the Entra app. Meanwhile, export a folder as ZIP and use Library → Bulk import.                                                       |
| CRM                          | Create bids from CRM opportunities and write back outcomes.                                          | Not connected                                                 | Configure the CRM connector (for example Dynamics 365 or Salesforce) on the server.                                                                           |
| Calendars (.ics)             | Back-scheduled milestones and key dates export to Outlook or Google Calendar (WF-13).                | Connected<br>Available on every bid's overview                | —                                                                                                                                                             |
